Just a reminder folks, this evening will be
Art Bell's (W6OBB) last broadcast
as the Host of Coast to Coast AM.

The end of an Era.

Best wishes to Art on his retirement.
His broadcast certanly provided us here with
many amusing periods of listening during
those wee-hours runs we used to make
for UPS. :)

For the folks in the Virginia Beach area, there's a football
game on 790am tonight, instead of Art Bell. However, 850am has
cancelled the Joey Reynolds show for tonight (no big loss there) and
is playing Art's last show, instead.

Does this mean that Art will finally be hopping on to that Great UFO in his sky and heading for The Ultimate Plasma?
Art only says he is going away, but once me moves his mobile home to a less expensive tax area he will be back on the air...after the Venusians allow him to remove the Reynold's Wrap from his head.
After all, Art Bell is too good to just slip away into the ether. He has, after all, many, many conspiracy theories that are as yet unresolved and his mindless followers are waiting breathlessly to hear his next prediction.
Art Bell will never retire. He will merely lay in wait for his next group of gullible goons....

I love this guy's stuff. I still can't figure out whether he can just run it straight out of his mouth or he uses notes.

Either way, I made sure to tape a few episodes, as I think the guys with nets and restraints will shortly locate him and return him to the nut bowl.

5. PME and ELCB's, RCCD's & MCB's

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-01 10:32:53 UTC
From: "r.dring" <r.dring@ntlworld.com>
Message-ID: <vuzQ9.201$Jg2.18537@newsfep2-gui>
Source record: 70400

There seems to be some confusion about PME, and circuit breakers. (UK only)
During the post world war 2 building boom there was a need to reduce the cost of housing construction. PME could help, by allowing a reduction in the number of cable cores that needed to be run in a domestic electrical installation. The neutral and earth being the same conductor.
Origionally the only installations allowed (by special permission or the Secratary of state) were installations that could garrantee, that every consumer on a supply transformer would be connected in that arrangement.It still allowed interleaving of premises across 3 phases, using a common neutral core in the feeder cable.
In practice this meant that the only use was in high rise blocks of flats (US = appartments), where the cabling was under total control. In fact there were some installations with mineral insulated cables were only the live cores were inside the cable, the joint neutral/earth conductor was the bare copper sheath.
Later as Britains housing stock was being repaired/replaced another problem came to light.
The copper or lead water main, was used as the main earth electode in a normal domestic installation.
During this period plastic water mains became the norm, isolating the protective conducter, and ensuring that if any faulty appliance, where the case
became live, also made every other earthed appliance live. Not a very good arrangement.
To combat this ELCB,s (Earth Leakage Circuit Breakers) were developed, these were voltage operated and thus series connected devices, they were installed between the earth continuity conductor and the main earth electrode (A 1 yard long copper rod driven into the ground in place of the water pipe).
The disadvantage of this system was that it could be bypassed by plumbing, structural steelwork,
gas pipes, telephone systems, Ham radio RF earths, and many other parallel conductors.
To solve this, we now us a much more reliable circuit breaker called an RCCD. This device uses the current balance priciple, what goes down the live conductor MUST come back via the neutral conductor, any imbalance or RESIDUAL current MUST be fault current and so trip the circuit breaker.
To stop any confusion the unit has a different name, RCCD, it is a Residual Current Circuit-breaking Device.
The residual current can be set at very sensitive levels to take account of different hazards, 100mA with a delay, for some fixed circuits to stop neusance tripping but give fire protection.
A lower level of 30mA on plug in appliances is the norm, this being below

the minimum current that will cause fibrillation in the heart, and so give protection against electocution.
NONE of these devices give any protection against overcurrent. That is provided by the normal fuses or MCB's (Magnetic or Miniture Circuit Breakers). MCB's are now the prefared protection method, they provide very accurate overcurrent protection.
Finally a combination device is now on the market which provides overcurrent, and residual current protection, and that is what I would use for the shack supply, although they are more expensive.
Returning to PME. Later still PME was allowed to be used in mixed areas with the hazards as
described by others. If the neutral core in the supply cable is damaged.Your house wiring can carry the current from other consumers.
The other more serious effect is that the earth conductors in your property can float up to full mains voltage. you still cannot get an electric shock because all bonded metal in the property is also at that potential. The Danger arises when you bring "in" an external 0volt RF earth, putting yourself between them can result in a fatal electric shock.
Now reverse the operation and take an earthed metal cased appliance, supplied with the house earth via a three core flex, out into the garden. The ground you are standing on will be at 0volts but the case of the earthed applience could be at 240volts!!! again not a good idea.
If anyone wants I can deal with all of the alternative earthing arrangements suggested in a later email.This one is already far too long.
One final note, some years ago attended an electrical supply training course, and I raised this with the tuter lecturing on earthing, his answer was to mount the transmitter and all other shack equipment inside additional earthed metal boxes that had holes cut in them to allow you to touch the plastic control knobs only !!!.
Regards
Raid

I wonder how many of the "I must test it first" customers actually buy
the radio they tried. I suspect most insist on a "new" radio rather than
the one they tested. Which reinforces the comment that all you can
really tell is the look and feel, you can still end up with a lemon.

Dave

True, there were some guests on Art's show which struck me as
being quite unbelievable.

An unfortunate consiquence of Art's retirement is the apparent
decision by Premiere Radio to cancel Whitley Streiber's
Dreamland Program, which was the "sister show" in some
respects to Art's CtoC AM. I'll really miss Whitley as
he had some very interesting guests and Linda Molton Howe
who was "the information authority" on the Crop Circle issue.

Here is a posting addressing this topic
- reproduced from the K of N BBS:

This journal entry is posted on Whitley's journal
on www.unknowncountry.com, but I thought it important
enough to repost here. Hope Whitley doesn't mind
too much. Please visit www.unknowncountry.com
Whitley's tremendously successful website for other
news and updates 'daring the edge'. Go Whitley!

Ringing the (Dreamland) Changes
Monday November 18th, 2002

Art called me about a month ago to tell me that Premiere was
using the occassion of his retirement to cancel Dreamland.
This did not surprise me. When their parent company, Clear
Channel, bought the Matt Drudge program, they were
planning to cancel Dreamland. It was only the intervention
of Art Bell and his partner Alan Corbeth that prevented this.
Instead, Clear Channel moved Dreamland to Saturday night.
This was done with virtually no notice to stations.
As a result, Dreamland lost about fifty stations and for a time
the schedule was in chaos. But the efforts of Alan Corbeth's
staff in the Medford, Oregon office got the situation fixed.
However, Premiere never gave the program any affiliate

support and made no effort to sell advertising on it.

The program has always been popular with listeners, and had
reached a count of 240 stations, many of them large stations,
at the time of its cancellation. However, because it was not
being given any advertising support, it was not making money.
Our only advertiser, Steven Halpern, has had success with
the show, but this did not move Premiere to do anything more.

There are more than a few reasons for their lack of support of
Dreamland. The first one is that they do not like my voice.
They consider it too thin. For them, voice is first, content second.
In the years I was host of Dreamland, Premiere never once tried
to influence my content. In fact, if I wanted ideas about
content, I had to actually solicit advice. I was free to do as I pleased.

I had a regular exchange of emails with Kraig Kitchin, the president
of Premiere at first, but this ended when an announcement by me that
listeners should inquire of Premiere if they had problems with the end
of our live internet feed unexpectedly resulted in a flood of hostile
email to Mr. Kitchin. I think that he blamed me for unleashing
my listeners on him, which I certainly did not intend to do.

Another thing that rankled was the tremendous success of
Unknowncountry.com. When I was with Keith Rowland,
Premiere's webmaster, I could not get the attention I needed
because he was stretched pretty thin just managing the huge
Art Bell website. Then, when I left him, there were
difficulties that boiled over on-air, and this did not make
Mr. Kitchin happy, either.

Over the years, Unknowncountry has grown into the largest
and most popular website of its kind in the world, far eclipsing
all the others, and this success has been an irritant.
The Whitleysworld website that I had with Premiere got about
thirty thousand hits a month. Last month, Unknowncountry.com
got seventeen million hits, and it is experiencing an explosive
growth rate of 250% per year.

This success screams that I am some sort of missed
opportunity, and far outstrips the success of Dreamland.
The site reaches a much larger audience than the broadcast radio program.

The reasons for the cancellation, however, go deeper than these minor
irritants.
The first reason is that, while the show has been popular with listeners, my
approach to radio interviewing scares management because it is so different
from what usually succeeds. Success comes from the simple, the shocking
and the extreme, not the complex, the provocative and the moderate.
In addition, the corporate culture of Clear Channel Communications,
of which Premiere is a part, is ideologically committed, and I am not.
I am suspicious of extremes of both left and right. History--which is

in the process of repeating itself at present--shows that they do nothing but harm. So I will not present the kind of politically colored programming that might have made Clear Channel value me more.

The second reason has to do with Saturday night itself. Dreamland owned Saturday night. There was nothing else in radio doing anything at all in that time period, and the other networks I went to in my effort to get the show picked up were unanimous in their verdict: it's just not a time period worth working for. They all felt that they could make the show profitable. But the amount of profit that could be gotten out of a Saturday night program just would not make the effort worthwhile.

Worse, nobody thought that they could succeed in moving the program back to Sunday night. Although the programming that Clear Channel has in there now is not exactly burning up the ratings books, it is ideologically congenial with the rest of the company, and that means that they will go above and beyond the call to preserve it.

I am not going to stop doing Dreamland, as long as I can afford to run it. My own personal commitment to my work is tremendous. This is because of the years I spent in relationship with the visitors, and my respect for them and the nobility of their aims. The lady whose portrait appears on the cover of Communion is a very real person. I consider her to be the best, the most conscious, the most brilliant and the strongest person I have ever known. She represents an ancient excellence that has placed touching faith in mankind, and I will never betray her charge to me, and never stop carrying out the task she put to me.

I also know that my life and work follow a plan created by her and her kind, and the brilliant world that stands silently behind them. For example, tt was an agony for me to have my cabin in upstate New York taken from me, but coming to Texas opened important new horizons. I believe that I was sent here primarily to meet and work with Bill Mallow, which I did for seven years. His recent passing ends my reason for being here, and tells me that there will be other changes in my life as well. What form they will take, I do not know.

A deeper reaons behind the cancellation may have to do with a process of filtering that I have seen at work in my connection to the public. I think that people are being winnowed out, and that my work is some kind of a concealed testing process. Communion was read by twelve million people worldwide. But then something happened. I had been a popular, well and widely reviewed author. Communion even received a good review in the New York Times.

I was told that the Times Book Review received a lot of angry comment from the paper's own science staff over this review. My book was taken to be a lie written to get money, a literary fraud. Nothing

I said could change this because nobody of any note culturally
dared to disagree, not even those who knew the falsity of the charge.
Nothing I have ever written since Communion has received wide review.
Instead, the mad culture of the press has taken it upon itself to be
silent about Whitley Strieber, or publish nasty reviews, in order to
punish me for my alleged literary fraud.

As a result, Transformation was read by five million people, Breakthrough
by just six hundred thousand. By the time Confirmation came along, my media
exposure had degenrated into a grotesque identification of me as in the
rectal probe man, thanks to cartoons like South Park and the Simpsons.
When I appeared on Politically Incorrect in 2001, I was greeted by
a sleazy, testosterone-soaked comedian hammering away at me
with rectal probe jokes. This is what was left of Whitley Strieber
in the media. The general public now dismisses me, if not as a fraud, then
as an idiot.

But the process of filtering is not just generated by the narrow-minded
intellectuals
and brainless fools of the media. It is orchestrated, I think, by the
visitors.
For example, even though my website gets hundreds of thousands of
visitors, barely two thousand people have ever bought a copy of the
Key, and only one thousand six hundred have bought the Path, and
many of them have complained that it is 'too hard.' These people went
on my own message boards with their complaints, and effectively
killed the Path, which was undoubtedly their intention. The book is
profoundly, deeply freeing of the human spirit, and there are so
very many people who don't want that, who fear it in their own
souls, or who are consciously opposed to it, that such a tool
has very little chance of being taken up by many.

The visitors are using me and my work as a kind of sieve.
In the end, they will find the few hundred people who can
actually use the path and live on it, and if contact comes
in this generation, it will be these people who lead mankind
into a new world. I know from experience what they
will be like: gentle, open-minded people with impeccable spirits.

Not only the visitors are isolating me. The dark side of this is
doing the same thing, just as it is doing everything possible to
spread fear about the visitors, and will do more. The closer
contact comes, the more it will come to seem that they
are a murderous, bizarre and unspeakable horror.
That, however, is false, and it will always be false.

However, it is also true that their dark side is part of them.
This is not a simple matter, and simple minds are going to
fail in their efforts to grapple with it. How could it be that
something so good would also, for example, be responsible
for ugly things like mutilations of animals and possible murder?

I can only answer that question indirectly: did you know that
scientists do not understand why the night sky is dark?
We should see nothing by a uniform bright glow. Instead, we see
stars shining out in darkness. When we understand the
physics of of the night sky, we will also understand the
true nature of evil, and why the visitors would manifest
in such a contradictory way--why they would have to.
The aim of the dark side, insofar as it is concerned with
me, is to silence me because I speak on behalf of human
freedom, the advance of mankind into the cosmos,
and the moral elevation of the human spirit.

It has the high ground: the government and corporate America,
insofar as they are is involved in contact, serve the dark side.
Both do so for the same misguided reason: they worry
about maintaining control over the population in the
context of the new world that contact would bring.

If the government cannot deny the existence of the visitors, it will
spread false stories that it has an 'inside track,' in the form of
secret contact with them. It will also spread stories that
they are a dangerous presence, and that, if we are to
survive contact, we must look to our government for protection.

The truth is that the government doesn't have any sort of an
inside track. What it has is fear, misinformation and confusion.
The people who claim that the visitors are a hive, for example,
or that they are a bunch of cruel, emotionless monsters
carrying out mindless scientific experiments on us, or that
they eat souls or even that they eat us, are serving an
official purpose: they are spreading the fear that will
induce people to turn to the government for help if contact ever comes.

In reality, there are a lot of ordinary people out there who know
more than the most highly cleared intelligence agents and
military personnel. This is especially true among people who are
soul-aware, in contact, and in control of their own
imaginations. They are mankind's leading edge, these people.

I am not going to depart too far in this entry from the reasons that
Dreamland lost its broadcast outlet. But the way in which the
program approached the visitors, with a calm and open-minded
attitude toward both the light and dark side of the
phenomenon, cannot have been appreciated by government
insiders. My version of Dreamland was about the end of the
dark, warlike and controlling government that we have now, and
the establishment of a new commonwealth of free souls, the
band of human sisters and brothers who one day will venture
out into God's tremendous garden, taking with them the superb
gift that this earth is seeking to give to the universe: the soul of man.

Insofar as it was, in the depths of our spiritual reality,
devoted to that aim, which is also the aim of my being

and my life, Dreamland was hated and feared, and doomed to be silenced. But--we're like roaches, people like you and me. Step on us and we l earn to flatten ourselves out. Spray us and we breed children who actually thrive on the spray. Irradiate us and we learn to eat radiation for our supper. We will not be silenced, never quite, never entirely.

And, in the end, somehow, the future will find a way to accommodate the human soul in the glory for which it has been created.

A NOTICE FROM UNKNOWNCOUNTRY.COM

www.unknowncountry.com

The latest Dreamland Online appears every Saturday afternoon at 3PM. You can listen any time thereafter as long as a given program remains available, usually for a month. You can turn off your computer, then later return to the point at which you stopped listening at any time.
For those of you who want to begin to listen to Dreamland Online and have never done this before, it's quite simple. You need to install Windows Media Player on your computer and then click on the Listen Now button on the upper right hand side of the masthead. If you have WebTV, you cannot listen to internet broadcasting of any kind, but there is a Windows Media Player for the Mac. We also maintain a station at Live365.

Dreamland was Art's show. Whitley didn't start doing it until after Art's return from his previous "retirement".

<SNIP>

I have a similar kind of installation with a few minor differences. My
mains supply is delivered via overhead lines. I get one phase, neutral
and earth delivered in separate single core conductors from the
nearest distribution transformer (about 1km distant). I have concerns
regarding the earth and reckon it is simply a connection to neutral at
the distribution transformer. What should I do about earthing gear in
the shack? I don't have any kind of circuit breaker, just fuses and a
normal mains switch.

19. Kenwood ARCP 2000 help

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-01 21:17:33 UTC
From: Steve <sahd@hotmail.com>
Message-ID: <NVIQ9.588695$QZ.84472@sccrnsc02>
Source record: 70414

Am in need of some information on the software that controls the Kenwood
TS-2000.
ARCP-2000

I installed the software and all went fine. The problem i have is the
software communicating with the radio.

The picture of the controls on the computer are fine but no digital display
Can't control the radio from the computer.
I hit the Con button and it goes yellow for 5 seconds then goes out.

I have the baud rate the same on the software - computer and radio
all set at 9600. I'v tried 4800 and 19200. Nothing.

The cable i have is a RS232 9 pin on both ends of cable. No luck.

Anyone with some information on what i might be doing wrong with the
exception of buying the software. Hi

TNX Steve

20. Need manual for MFJ 962C tuner

There's a manual in PDF form on the MFJ website here for a 962 D - is
that close enough?

It's here:

http://www.mfjenterprises.com/manuals.php

A couple of things to check...
1. Pretty obvious, but make sure when you set the software baud that you also make sure the com port matches the one the cable is plugged into on the computer. On my system it is COM1 and the radio is 9600 Baud.

2. Double check the RS232 cable to ensure that the pinouts match the Kenwood manual. I have seen many variations of serial cables and they are not all pinned the same. Often they do not carry all the signal lines. I bought the one I am using at Radio Shack, but any standard straight through cable should work.

My best guess would be a cable problem. Be sure not to have a Null Modem cable..

He's bound to get more airtime now that Art's cronies will be getting
less airtime: Hoaxland, Ninja Mutant Howl, etc. And when he's on he'll
be able to say more, since Art had perfected the 'art of talk' to such a
degree as to be able to take up a lot of airtime w/out really saying
much of anything.

Thanks for the feedback, guys.

These lights each have a small P/S plugged into switched wall sockets; the lamps themselves are not 120 v. (they're either 12 or 24 v. -- can't recall which as I sit here in the office). I suspect the little P/Ss are the source of the problem, although a "survey" of the area with a small AM radio shows that the noise peaks at the "puck" light fixtures are at least as strong (perhaps a bit stronger) than at the P/Ss.

If I can find the manufacturer on line, I may try a direct query.

Why don't you just switch off the radio and
go back to the West Memphis Greyhound
bus station, with a cooked knockwurst taped to your
left inner leg like you used to do back when
you usd to stir the shit on 14.313 Years ago, and
get you some of that nice dark-meat transvestite
"evening bootaye"..... If that don;t work try
the Warner Robbins Ga bus stop for some other
ham shitstain you need to ham-slam too.... ;)

Dear Dan and other UK amateurs:
Wow. I always thought that the electrical distribution system in UK was designed with an emphasis on low cost - you have confirmed it. I shall add to my safety lectures how things are done in UK.
My suspicions were aroused when the purchase of an electrical appliance in the UK did not include a plug. One went to a separate store for a plug. I just put it off to heightened liability concerns with some small justification being more than one set of socket standards.
The only justification for the existence of a profession is the protection of the public. I make sure that my students understand the scheme used in NA for protecting people and property. Contrasting the requirements of the NEC (not the antenna one) with the scheme you are subjected to is bound to impress them more then just discussing the NEC.
Thanks for the explanation. Wow!
73 Mac, N8TT

I agree with the other responder that this software is not obsolete. I purchased a copy for my radio just a few months ago. However, Kenwood is very emphatic in the paperwork that comes with the software (CDROM) that if one loses the code, he/she will not be able to get one from Kenwood. I think you're out of luck unless you can find the seller and get him to provide the code. The old adage, Let the Buyer Beware, applies here.

Also,
Check the version of your software. I believe the current version is
1.10 The earlier 1.0 version was problematic for me. If you search
hard, the upgrade was available on the kenwood ftp site.

What a show this morning on 14275! Just like the old BARF
days on 14313! K3VR with his shitty audio so bassy it sounded
like he was inside a drum, claiming to have an inside track with the
FCC that K1MAN will be taken off the air this month. Then there
was W4ASX babbling on how he defended kv4fz before the U.S.
Supreme Court. And of course, Dipshit Donnie, W4JYZ babbling
on about absolutely nothing.

Great Free Show,

Lloyd

Too often, individuals like N3CVJ and private companies and government officials either see themselves as some type watchdog or are merely seeking to expand their power over others or financial gain. These scurvy folk are willing to sacrifice anyone's or everyone's freedom in order to do so, yours, mine, all of ours. Such Power-trippers are not new to this world or to our country but the patriots and people with common sense who share a dedication to preserving our individual freedoms see the reality of the actions of the power trippers and in effect are not swayed by them. ï¿½ï¿½It is the desperate individual or when fear abounds, when these scurvy few will find an opportunity to play on our fears....what follows is an attempt to instill ideas, notions, policies, false promises and practices that threaten our freedoms.ï¿½ People like N3CVJ see this as an opportunity to rationalize their actions as protective and morally correct. The weak swallow the bait. N3CVJ is of the mindset that our country will become as the middle east with bombs in the street..he has on several occasion manifested his paranoid irrational growing fear of anarchy. Power trippers attempt to take such a fear and use it to offer or implement techniques that could be used to monitor everyone or assume that if one chooses to exercise their right to be free from intrusion and the right to be left alone, they must have something to hide. The John Birch Society sang the same song,as well as a few other extremist organizations that seek to erode our constitution. Dave has argued that if one has nothing to hide, one shouldn't care if someone knows everything about you.ï¿½ Dave misses all points.ï¿½ His method is not about guilt or innocence.ï¿½ It's about control that he lacks and sorely wants. It's about relinquishing that control to those like him who wish to control you.ï¿½ It's a scientific proven fact, and many folks throughout history have employed it: When one knows everything about you, one can learn to control you.ï¿½ Lastly, Daveys argument assumes those who have your information will protect you and your freedom and never cause you any harm and that government will protect you and your freedom without question or hesitance and any person who would sacrifice that protection must be guilty of some act. Such assumptions are ludicrous, grandiose, illogical, and downright dangerous. To hear them from an amateur radio operator is truly frightening.

Yep, the entertainment value cannot be underestimated! Sometimes, I
became almost sick at the garbage that was going on on ol' '313, but I
nevertheless found it so fascinating that I couldn't help but listen
in day after day. What an interesting socioloy/psychology study.
Until I recently returned to Usenet, I had no idea things were
becoming stirred up again. I guess human nature, in all its ugliness,
will always surface. Too bad kids, elected officials, kindergarten
teachers, and those with potential psychological disorders will
undoubtedly tune in and be forever altered by the insanity. And what
a wonderful portrayal of U.S. hams to the world... <sigh>

Sir, I was squarely behind you in your anti-K1MAN opinions -- until I heard you call him a "piece of s***", repeatedly, on the air. Now I stand in my own corner, hopefully joined by those more able to control themselves and more capable of fighting the good fight in an intelligent, thoughtful manner. I won't stand for ruination of the Amateur Radio Service in ANY form. And *that* is standing up for what is "right".

You quote me incorrectly as defending Herb Schoenbohm, formerly KV4FZ, before the U.S. Supreme Court. A non-lawyer, I was one of several collaborating on his Writ of Certiorari, which was denied by the Court. This means that the Supreme Court refused to hear his appeal.

Nahhh...don't think so.
Bob, your broad-banded audio is a real pain to several of us and your unending quest for "how do I sound" is a real pain.
You have some sort of misguided ego going on that leads you to think your station is heads above others when in reality, Bob, your station sounds rather trashy.
Anybody can buy an audio equalizer from Radio Shack, Bob. It takes a real idiot to take that equalizer and cause it to distort the signals such as you are doing. It takes a greater idiot to do what you are doing and not have the brains to know the difference.

Bob Sherin has some sort of misguided sense of being an Audiophile.
Nothing is further that the truth...

Sherin, for all intents and purposes sounds like crap...

Sorry, Bob. Facts is facts.

You sound like crap...honest...you do..

You distort your audio so badly that most of us
cannot understand you.

You splatter so widely that most of us shut
you off.

Bob...your dirty audio is just that...dirty audio...

Now take that audio bridge, shut it off,
and shove it up your ass!!!

Hallo,

I need some information about settings of the capacitors for RESISTIVE and
REACTIVE tuning.

If the knobs on the front are pointing on 5, are the capacitors then IN ,
OUT or HALF ?
If half : are the capacitors then on the RIGHT or LEFT SIDE ?

Has someone a photo ?

Thanks for any help!

All right, so you don't like the sound. However, toning down the bass and eliminating the audio RF, I have alas arrived at the point where those who don't like heavy bass love it, as well as the "audiophiles."

You are surely entitled to your opinion, and if I received a substantial number of similar reports, I would change it. But the ham community at large seems to applaud it.

Hardly Radio Shack gear, here's the line up: Audio Technica studio mic (model 4033A), 2 stages of Afex "Tubessence" pre-amplification, Antares (model AVP-1) Vocal Producer, Alexis Parametric Equalizer and a BBE Sonic Maximizer.

Having heard hams who sound better with less, I know that mine is not the only route to good sound. It is, however, the product of two years of experimentation -- for better or worse. Thanks for you post.

Ian I suggest you have a look around your incomer installation and see if
there is a
notice identifying it as PME first. Also examine your installation and try
and identify
the main earthing arangement.
Another person who has had a disagreement with the electricity supply
company over
PME was "Professor Peter Felgett" one of the co-inventers of the Amisonic
surround sound system.
The row was detailed in the New Scientist magazine last year.

To stereotype everyone is mistake, as is imputing the same motives.
Your well-meaning analysis, to me, is over simplistic.

Here you have a guy who has pioneered "information bulletins," pushing the envelope with his own agenda. You have someone who as devolved over the years to suspect the motives of everyone critical. He has developed what amounts to an "enemies list," alleging there is a high paid ARRL advocate stirring the pot.

Anyone who "crosses him" is threatened with criminal action by the U.S. Attorney. Of course, the threats are empty and the FCC has warned him not to make them. Yet to the everyday ham, they have a chilling effect.

Then you have a group of hams who are tired of being run off of 14275 as the bulletins have been increased, with a present announcement that they are going to be increased further. You have the FCC mandating that whoever is on the frequency first needn't leave. And you have a litany of charges that have not been remedied in a letter dated 1/29/2002 from Riley Hollingsworth, Esq. to Glenn Baxter.

Meanwhile, many of us have been regulated by Mr. Hollingsworth, complying with FCC marching orders. It is an interesting situation rife with twists and turns. Stay tuned.

From: Bo Diddly <Anon@anon.com>
Message-ID: <av8l67$8j1$0@pita.alt.net>
Source record: 70330

The Lib Nuts were out in full force again...this time they were all convinced that the person jamming them was from the Government. Yeah, that's right...from the Fed. Govt. One of the Lemmings said he disconnected his coax and heard the jammer at forty over.
Old Vic took this claim to be true and surmised that the 'jammer' had to have been running at least 10,000 watts. Of course the other Lemmings fell right in line with Vic and agreed that some government agency or other was behind the jamming.
These guys are SO funny. They see conspiracies everywhere and they truly must lead lives of paranoia. I bet old Vic looks up and down his street every hour on the hour to see if any strangers are lurking in the bushes.
I wonder how many of them are card-carrying Birchers?

Old Vic must think that he is being followed by the FBI, CIA, DEA, DNR, DOJ, Secret Service, FCC, INS, RCMP, Boy Scouts, KGB, and a dozen misc. police agencies. The poor guy can't even go to the grocery store without having at least a dozen black, unmarked cars following him every step of the way. Watch out, Vic. That young guy at the grocery store is probably keeping track of your grocery purchases and using the information to build a profile on you.

DUMB.....considering the fact that English is the defacto worldwide language....what is the problem? I have been to many places in this small world and even in places that had not seen an American since WW2 they still spoke ENGLISH.

And that was back in the 60s and 70s. Many countries REQUIRE the learning of ENGLISH.

Should not have been too hard for her to make the correct change
as when the sale is rung up, cash registers now show the correct
change. This had to be done because too many people today have
such poor skills in simple math they can't make change on their own.

Trebb@webtv.net (Bob Sherin) wrote in message
news:<19183-3E17553F-219@storefull-2276.public.lawson.webtv.net>...

"You have someone who as devolved over the years to suspect the
motives of everyone critical. He has developed what amounts to an
"enemies list," alleging there is a high paid ARRL advocate stirring
the pot.

Anyone who "crosses him" is threatened with criminal action by the
U.S. Attorney. Of course, the threats are empty and the FCC has warned
him
not to make them. Yet to the everyday ham, they have a chilling
effect.
You have the FCC mandating that whoever is on the frequency first
needn't leave. And you have a litany of charges that have not been
remedied in a letter dated 1/29/2002 from Riley Hollingsworth, Esq. to
Glenn Baxter. It is an interesting situation rife with twists and
turns. Stay tuned."

I agree with Bob. It IS an interesting situation and a debate that is
vital to the health of Amateur Radio as we know it.

Questions posed:

Does any operator have the right to commandeer a frequency at will?

Does an operator have a right to bully his detractors via the US
Courts, Radio and Web Page?

Will the FCC act against what they imply are serious violations?

Will the State Department weigh in on a citizen's right to provide
material support to the repressive regimes of Foreign Powers?

Are these issues under the jurisdiction of the Logan Act, the Patriot
Act, and DoJ definitions of terrorisms?

Listen to Bob Sherin. Stay Tuned to the ongoing debate on 14.275.
Matters of tremendous importance to Amateur Radio and to all Americans
are unfolding right now!

"Known agitators from the Barf days," Lloyd?

Forgive me but, not a joiner, I still don't know what Barf stands for. As for being where the action is, yes. But never have I consciously tried to be a trouble maker nor engaged in invective, obfuscation, character assassination.

So Lloyd, my integrity prevents claiming you are a known anything, because intellectual honesty requires a foundation of justification. I prefer to let the subject-matter, and not the messenger, be mulled on the field of ideas.

104. Baxter Exposed: A Rational Approach

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-06 07:21:44 UTC
From: Trebb@webtv.net
Message-ID: <22397-3E192E88-1084@storefull-2277.public.lawson.webtv.net>
Source record: 70348

Gentlemen, before we are overcome with mob mentality, let's step back and take a deep breath.

That's what I did, as I gathered my past journalism on Glenn Baxter and the IARN to send to Brian, K3VR. Brian is involved in a major journalistic project on this subject which is worth reading. I had written two cover stories in January and February, 1989, and a follow-up in March, 1989 that were published in Florida Skip Magazine.

Among other things in that dossier was an IARN accord with the Young Communist League of the then-Soviet Union. I must admit here and now, I was an "official" participant.

Transfixed by mulling this earlier time, I lost myself in reading the record. Picking myself up, I began wondering how we've come to the present time in which we're accusing Baxter and his organization of nefarious conduct.

At the time of the Soviet initiative, we hams in the West were starved for communications with Soviet hams after having lived through the trigger-happy Cold War. So when the Armenian Earthquake struck and UB5WE, Victor from the Ukraine, came on announcing he could handle third party traffic, everyone involved thought a watershed had arrived. The technicalities of obtaining permission paled to no consequence.

Ever since, Glenn Baxter has carried on this nonchalant attitude toward what is essentially foreign policy. Bougainville, Somalia, Jordan, Israel and others. He, his organization and his associates are violating the Logan Act, which limits foreign policy to our federal government. At the sound of Bougainville, I took flight.

Glenn Baxter: Misguided, irresponsible, yes. But terrorist, no. Let's survey his sincerity. When the cameras are running and the broadcast waves crackling, he is at his charismatic best. I sent several video tapes to him of me representing the network on Miami television during natural disasters. Though he vowed to return them, he hasn't.

We so advertised our emergency capability that when Andrew hit, demolishing my community and home, I awaited my leader. We had no food, telephone, electricity, law enforcement. A week. Two weeks. A month. Six months. To this day, Baxter has never as much as asked me a thing about it.

Like a magician, his total pre-occupation is the aggrandizement of his own image. One must listen with a wary ear and read with a wary eye lest the magic trick you. The U.S. Supreme Court did not hold that his bulletins are legal, as he would have you believe. Rather the Court

propounded the principle that once a thing is litigated, that decision is a bar to another suit on the same issue. Known in legal parlance as res judicata, Baxter bootstrapped this principle and his bulletins, taking a giant leap. We are thus led to believe, the Supreme Court would annoint his bulletins, let alone busy itself with hearing an appeal on them. Nonsense.

In the 80s, the FCC declared, with some measure of formality, Baxter's broadcasts legal. But with the arrival of Riley Hollingsworth, Esq., our regulator at the FCC, Baxter and his bulletins have fallen under scrutiny again.

Hollingsworth mailed Baxter a certified letter on January 29, 2002 detailing the FCC's complaints. In it Baxter is warned concerning "complaints we are receiving about deliberate interference, threats against those who do not relinquish the frequencies for your use or who would complain, or who have complained, erratic operation, broadcasting, unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control ... ." Up to the time of this writing Baxter has failed and refused to comply.

Meanwhile, he continues enlarging his broadcasts. Hams, wanting to use the frequencies, are livid. Uncomprehending, Baxter sees some kind of plot against him, as well as an ARRL highly-paid agent behind it.

But Baxter's conduct is more sufferable. He's defaming Mr. Hollingsworth as nothing but a cheap crook, a claim this writer finds bold-faced slander and completely contrary to fact. As Americans, we cannot allow a well defined controversy to weaken the power of government nor to throw our community into anarchy.

The wheels are grinding on that letter of January 29, 2002. And when action is taken, Baxter will lose his ham radio license, this commentator predicts.

Anyway to get the mike buttons to tune in 5khz steps on the a/b vfo?Instead
of 10 hz steps like the tuning knob.
Is there a hidden mod or menu program to do this? Ie: follow same function
as Mch rotary control

I agree really, and can't really blame them for the amount of money
they make on the radios. It's just like cars. Once you drive one, IE:
"open the box" it's lost a good bit of value. Sure, most car dealers
let you drive "demo's" but they have big pockets in general and can
afford to take a hit on a demo car once sold. Most of these radio
dealers are not in the same position to lose money. Many of the
smaller stores are lucky to stay in business at all. If you display a
new $4000 radio, you won't be able to get near that amount once you do
sell it. And it will most likely be scratched, etc. People don't give
a hoot if they don't own it. I know I would never buy a demo unless it
had a deep price cut. As far as being able to try one, I ask for
opinions on the air from users, and scan the net for info. I bought a
ic-706mk2g on the net, and I'd never tried one at all, but I already
knew what I was buying from previous research. Sure, it would be nice
to be able to try a high $$$$ rig, but I don't expect the dealer to
take a bath just to allow me to do this. It would cost them several
hundred dollars to demo a high end rig. No one wants to buy a new
radio in anything other than a sealed unopened box. MK

113. ARRL Still Screwing Hawaii

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-06 16:25:03 UTC
From: Herb FZ <Herbie@BARFboss14313.net>
Message-ID: <avcakr$6e1$0@pita.alt.net>
Source record: 70358

If anyone here knows, is the ARRL still shipping QST to the
Hawaiian islands via the magazine rate? This causes, at least in
the 80s it did, QST to arrive three months behind schedule.
Hawaiian hams get their June QST in September, etc.
I wrote several letters to ARRL management in the 80s,
trying to get the cheap bastards to bulk ship QST to Hawaii via
bulk air mail, like all other mainland publishers were doing.
Apparently, the shitheads in ARRL management circles did not
believe Hawaiian hams were worth it. I made several copies of
their letters and circulated them around island radio clubs. As a
result, the league, who will never admit it, lost a large portion of
their state of Hawaiian membership. Screw the ARRL, they left
me! I wouldn't give the ARRL a dam dime!

The ARRL is downsized to practically just a publishing company for their lame magazine, QST..

There are more ADS than STORIES!!!! Money is tight, they are doing LITTLE for us all.. I have watched this magazine go down the tubes since 1950.

I no longer subscribe......just brush through in amazement in a Ham Radio store....

Do YOU fork out those ARRL subscription rates for a magazine????

And with Extra Class attitudes like yours ... Dan/W4NTI ... I can see why ham radio is a dying hobby. Why would anyone want to talk to @ssholes like you when you and many other extra and advanced class hams have this "I'm greater than thou" attitude and do nothing but flap their lips with negative, sniveling comments. So many times I've seen this, so many times I've seen hams leave the hobby sick of the BS from people like you.

> And without the ARRL you would have NO HAM RADIO. .... I think you have that wrong - it should read: With more people like yourself, Dan/W4NTI, you WILL have NO HAM RADIO. (because there will be no ham radio operators to "protect" the bands from commercialization)

When was the last time you sat down with someone to help them become a ham? I cannot foresee that it was recent with your insulting, negative attitude. I can just see you teaching an eager to become a ham 10yr old some radio theory... he gets a question wrong and you call him a troll, or a moron..... I can just see that happening with you.

Who need to have a reality check here....hummmmm?

No, the dealer does it for you!

Many dealers who sell radios that 'really' need to work will test all
radios prior to shipping - some even charge extra to unpack and certify
it.
Check some of the marine radio dealers for examples.

Dave

Hello Ian if you want to do away with PME you can disconnect the PME earth wire on the earth bar in your consumer unit after you have replaced it with a standard earth arrangement.
If you still have fuses you can usually find a direct plug in miniature circuit breaker for each fuse that will tighten up the overcurrent protection. You can run you own earth continuity conductor from your earth bar in the consumer unit to a new earth electrode. I should not have to tell you how to get a good low resistance earth electrode connection. Don't forget to label it "Main Earth connection do not remove". If you can it would be a good idea to install a suitably rated 30mA instantaneous RCCD in any circuits that feed sockets, with a 100mA 1second delay RCCD on the main feeder to the consumer unit. Again rated for the full load of the consumer unit, If you only can install one on the feeder make it a 30mA instantaneous RCCD,They give you protection against electric shock but you can get some nuisance tripping. Current IEE regulations are all about sizing cable and earth conductors, to ensure in a fault situation, sufficient current flows to trip the safety devices Evershed and Vignoles (Megger) do a very good pocket guide book to electricity testing. Finally many electrical wholesalers in the UK will hire out the line earth loop impedance testers
that you need to ensure the line earth and neutral earth loops have a sufficiently low impedance.
You may also be able to hire a 4 contact earth electrode impedance tester.

Gentlemen, gentlemen, with all your horror stories you will frighten Martin
in to giving up amateur radio.
We need to answer his questions, and to do that we need to define the
problems, as I see it they are
1 Is his supply PME, and if so what is to be done about it, and what is to
be done to separate the RF noise from the mains, and the mains earth.
2 The RF earth lead could be a resonant length on some bands giving high or
low impedances and voltages, what can be done about it, or even does he need
an RF earth connection at all. What can he do to ensure that no high voltage
RF conductors can come into contact with anyone.
3 What can he do about lightening protection.
4 What can he do to ensure he does not create TVI or BCI to his neighbours.
All of the forgoing questions can be answered, but Martin deeds to supply a
few more details about
his home and surroundings.
some of the questions are as follows:
Is he in the UK if not where is he.
What kind of electricity supply does he have, overhead or underground
feeder, is it PME,
Is his building a high rise block, if not what type/height is it.
Where are the antenna's going to be mounted, on his building or on separate
self supporting structures or other buildings.
Are the antenna's and feeders going to be coax, balanced, or end, fed. Are
they resonant, broadband, or tunable.
Can he use an RF earth or counterpoise.
Martin wants the safest, cost affective solutions for his installation. All
of the problems and hazards are curable with a little care, and he will
still have a suitable and sensitive installation.
I recommend he obtains a copy of the RSGB book "HF antenna collection" which
has the Peter Chadwick article "the Killing ground" reproduced in it.
Another version is in the RSGB Book "The radio amateur guide to EMC.
This reply is already too long so I will put more answers regarding ELCB's
and RCCD's and PME in another email.
Martin" <Martin@_NOSPAM_g1gyc.demon.co.uk> wrote in message

This is not the 'real LLLLLooooyyyyddddd'. How do I know....read it and think about the real LLLLooooooyyyydddd.

This comment about the Spanish stations and Mike. Yep he raised holy hell with them. But guess what? MOST OF THEM WERE BOOTLEGGERS. And guess what else? FCC got them GONE. Remember all those PR stations that didn't go for a retest? You can thank Mike for that.

You go right ahead and join up with the American Amateur Radio Nitwit. Im sure the justice department won't have a problem checking you out too.

Have a nice day.

I got my TS-570D on a $200 off sale back last year sometime -- wish I could
remember exactly when. Just look at HRO, Texas Towers, etc., and they'll
have the sale quite publicized when it happens again.

Sure - they supply people to march in parades <wink>.

Seriously, I dunno why many people are so hung up on "new in the (unopened) box". There is a statistical chance that any equipment in a sealed box is defective - the DVD player I got for Xmas for one example. I sincerely doubt that having a reputable dealer open the box and turn the unit on, or demo it for a customer, increases the odds I'll get a bad one. Just the opposite: I certainly wouldn't repackage a defective radio to sell as new if I wanted to stay in business. Moreover, there's not much one can do to a modern xcvr to damage it in a demo: it'll save itself even if you hold the key down with no antenna. Of course YMMV.

> 73, K3DWW

For the longest time, I wouldn't buy anything unless it was a floor demo
unit. That way I KNEW I was getting something that worked, and
probably worked well. Maybe even a ringer. Especially in HiFi.

I almost bought a PE turntable that turned out to be junk when I had
the guy demo it. Bought a Sony receiver instead. Then picked up a
BSR 710QX turntable later new in the box. Worked good. Mostly.
But it had a barely audible 'click' on each revolution. Most people
couldn't hear it. But once I knew it was there, bugged the hell out of
me. Ended up selling the thing to someone who just wanted it for a
'bar blaster' setup and bought a demo of a single play direct drive
turntable. Moved my B&O cartridge over there and was quite pleased.
Kept the Shure M95 with new stylus as a 'junk record' interface.

Yeah, I was anal about my sound back then.

Anyway, on purchasing demos...

If it was a turntable (see how old I am?) or a cassette deck, I would
make a condition of sale a new stylus or even new heads (in the bag,
NOT installed) for a cassette deck. In addition, if I didn't get a
discounted
price, I'd ask for an extended warrantee.

I wasn't worried about the electronics, as like you said, that's statistical
in nature, and being a 'floor' unit, I'd probably make out better in that
regard.

Minor scratches in wood trim? That's what 'Old English Scratch Guard'
was for! Besides, it's not going to stay 'perfect' once I had it home
anyway.

Mike

One little point for anyone contemplating - if you have an RCD in the mains supply, and you are hiring or buying one of these devices, do make sure it is of the variety built to work without tripping any RCD in circuit when testing.

The type of earth loop impedance tester that shorts half-a-cycle of mains from live to earth is pretty good at testing for the presence of RCDs, and if one is in circuit, not a lot else.

Does anyone know what the status is of having lighting circuits fed through a 'main' RCD ? There was a period in time when this was felt to not be a quite a good idea to have a home plunged in to darkness when a pinhole appeared in the kettle element.

There is an interesting item on earthing power conditioners which may be of relevance - and which includes having a 'clean earth' at:

Condensers and Capacitors are the same thing.

What model Philco do you own? Does it have the bakelite boat
condensers under chassis? I'm not familiar with any Philcos that
used "magic eyes", but then again I gravitate to the 1930 to 1938
year models.

No, a condenser is part of a steam engine, while a capacitor is a radio
part, said so in an old Navy training manual.

It's a pretty easy conversion factor to remember.
Multiply all the condensor values by 1.00000 to get the correct values for
the capacitors. ;-)

Actually, the terms are interchangable. capacitor = condensor.

What you will find, is that values such as 0.005 and 0.025 are no longer
available. Use 0.0047 and 0.022 respectively. (that applies to other values
as well, 0.5 0.05 etc.

After reading posts from Glenn Baxter and Bob Sherin I find it rather odd that these two megahertz megalomaniacs, while so much alike, are so diametrically opposed. These two Hams, while at odds with one another insofar as how operating procedures are to be conducted, are more alike than opposite.
Both are clearly unashamed to laud themselves in the "I, Me" categories and both seem to take great pleasure in broadcasting their narrow philosophy to any and all within earshot.
Sherin, like Baxter, has gone to great lengths to post missives that are nothing more than braggadocio. One gets the distinct feeling that both Hams are lacking in self-confidence and must therefore, "toot their own horns".
Both operators have a commonality that is unappealing to the Every Day Joe in that they both apparently feel that the "wordier" their posts, the more impressed we will be with their alleged intellect and worldly advice.
Both operators have been known to interfere with ongoing conversations whether intentional or not, and neither one is the kind of Ham Operator that neophytes should emulate. Their claims to fame, however inflated, should be looked upon with healthy skepticism. Consider the source.....or sources, for what they are.

I do. More than one. I sell air conditioning/heating/refrigeration
equipment for one thing. And I sure as hell don't supply demo units.
If an equipment co. brochure is not good enough, they are shit out of
luck. And I don't keep a stock of units either. Only service parts.
Only when someone actually wants a unit, will I go buy one. MK

> sealed box is defective -

Being defective has nothing to do with it. I don't want a radio that some nosepicker has had his greasy fingers in. Or scratched, or even breathed on overly hard. I expect nothing less for something new I buy , and pay full price for. Some of the tech's scratch the radios just moving them around on their test benches. They don't care. They don't own em. I don't want anyone scratching my radios. That's my job if it has to happen.
I know one dealer that checked and "opened up" the type radio that I bought, before they shipped them out. I nixed that company just for that reason. I don't want anyone touching my radio after it's been built, except me. Now, if they want to sell me a " pre-nosepicked" radio for a greatly reduced price, well ok then...To each his own in this regard... If I get a DOA, I'll make them send me a new one. If it dies later in warranty, I want the company/factory to fix it, not the dealer. MK

You could win on Jepardy with this:
Philco NEVER made a set with a tuning "eye" tube! Now, they did use "tuning shadow meters"....

What else did Philco NEVER do?

Use a metal tube! Zenith did not until the 6AC7 in 1941, either, and only VERY RARELY.

The metal tube was a RCA/GE thing.... and other smaller companies like Crosley, Airline, Silvertone, etc, went either way.

I was surprised to find the sockets in my 38-2670 had pin one grounded--
most of the 6J5 tubes had heater leakage, and all I had on hand were
some NOS RCA metals... I've rarely found pin 1 grounded in similar
vintage Zeniths, however, and usually have to add the pin to their
sockets to permit using metals.

condenser/capacitor, same thing. Only the names were changed to protect the
innocent. Really this is just a change in terminology over the years just
like the change from cycles to hertz.

Your still SOL Mark. The store I worked in was an Icom authorized service center/dealership and on
several occasions we had to go through a stack of new radios to implement a MWO (modification work
order) on new radios. You dont think Icom ships 100 radios back to Japan to get a diode changed do
you?

And yes.... I both scratched and picked between each radio.......

Steve

Also a
part of the refrigeration cycle, by cooling the high pressure vapor it is
condensed back into liquid.
What the heck condenses in a radio?
For that matter, what relevance does the name "capacitor"
have with radio circuits ?
Inquiring minds want to know.

John

Be serious. You are comparing apples to comquats. How would one use
a demo air conditioning system?

Presumably from your context we are talking about industrial grade
equipment. Again, the question comes up -- how would one use a demo
unit.

Also as an aside, why did this get splattered all over usenet when it
was started on r.r.s?

(BTW, I wouldn't want to buy from you, because a brochure wouldn't be
good enough. Ever heard of references?)

Geez, you are bitter.

We're not talking about VCR repair by Fly-by-Nite Enterprises; we're
talking about HAM dealers. Different animal.

I've only had to send one radio back for repair, and their charges
were so small compared to the work done (direct lightning strike on
antenna) that I wonder how they survive.

Multiple vendors have sent me parts gratis, ranging from service
manuals to replacement buttons.

> I know one dealer that checked and "opened up" the type radio that I

One vendor I talked to does exactly that, and will get my business for
that reason. They want to make sure that what they ship is what they
say it is and that it doesn't take a second trip to get it right.
Again, they aren't Radio Shack or Fry's. They are an honest business.

The "Condenser" collects electrons.

A "Capacitor" has the ability to collect "X" electrons per Farad.

I can assure you that in the 1930's and pre WWII the device was called a
condenser.
See URL: http://www.nostalgiaair.org/NostalgiaAir/Schematics/schem_CRO.htm
where for a 1932 Crosley radio there is data for "Condenser Locations"
Also Just look in catalogs of the day.
Replaced many of those paper wax "condensers"

God guys, there are more posts here than to my piece in this group ("Baxter Exposed: a rational approach").

Every writer understands, by the very act, he is in the crosshairs of criticism.
Nonetheless, please accept my piece at face value meeting it on substance. I honestly believe that, however well meaning, Baxter is violating the Logan Act by conducting foreign policy, a serious charge.

Pretending, no monopoly on wisdom, I write to become enlightened by your responsive posts.

Along with ham radio, I was taught that when authentic issues exist that the highest calling is participating in the marketplace of ideas. And so, on those things where I'm privy, I tell all, hoping that the next guy will run with the information to the next level. Not the least of whom is Glenn Baxter himself, whom I do not dislike.

Let's not confuse the issues with the personalities. Respected fellow hams, I invite your posts, but try your best, as I do, to write something substantial.

Bob Sherin, W4ASX

Curious Lloyd...what model Philco are you dealing with?

Doesn't sound familiar to me, and I've had more than 75 Philco consoles over
the last 10 years.

No, it should be 62.8318 microfarads. In a pinch, you could use a 63
microfarad, but only until you can find the proper unit.

Cheers,
Fred

Khz and Mhz are just different names for Mc/s and Kc/s. A frequency of
770 kilohertz is the same as 770 kilocycles.

As far as condensers versus capacitors. Differnet names for the same
thing as far as I know and as far as electronics is concerned. The modern
name is capacitor. That way there is no confusion with the condenser of an
icebox or a boiler.

Only if you want to convert them to meters. The meter used in the kc
days is different from today's meter.
See:
http://deicher2.physik.uni-konstanz.de/files/meter.pdf
This change might require re-adjustment of the antenna coils in the set.

The accumulation of positive charge on the + end of the condenser is an accumulation of "electron holes" (in distinction to positrons). The accumulation of holes may be described as a "quantum fluid", or a "Bose-Einstein Condensate".
In additon, the Anglo-European method of counting "millions" (10 e:6), "milliards" (10 e:9), and "billions" (10 e:12), "trillions" (10 e:18 [!!!]) may be crucial, here.
WARNING: The Mark traded at 4 "billion" to 1 USD at the time of conversion to Schacht's Rentenmark. That's 4 "trillion" in "US" numbers. Don't get screwed!

If I recall correctly from an old textbook, the term "capacitor" was
not unknown in the 30's and 40's, but apparently did not gain
acceptance till later. I have an old navy training manual from the
WWII timeframe where "capacitor" is used exclusively.

Oh! You mean 'metres'??????
Meters are those round and square indicators, often mounted in
the front panels of equipment, that display various readings,
usually electrically! Right?

>Sorry I'm OT :-)

A cycle is a essentially a complete process and the time it takes to
complete it. In is rated in cycles per second. If you tie a long
rope to a stationary object and whip the end, you'll see a wave that
is really no different than how sound or radio waves travel. From the
centerline from where you are holding the rope through its upward
travel, downward travel, and back to centerline is a complete cycle.

If you strike the middle C key on a piano, you are hearing a frequency
of 440 hz (Hertz) or 440 cycles. The string that the key strikes is
vibrating at a rate of 440 times a second.

If you are listening to your favorite FM station at 104.5, the radio
wave you are listening to is cycling at 104,500,000 times a second, or
104.5mHz (or mc)

a kilocycle is 1,000 cycles
a kilohertz is 1,000 cycles

a megacycle is 1,000,000 cycles or 1,000 kilocycles
a megahertz is 1,000,000 cycles or 1,000 kilohertz.

Actually, A is supposed to be 440, although I saw an article several
years ago that indicated that while we usually think of A as 440, in
fact various orchestras tune A to a different pitch for a variety of
reasons, not the least of which is the musicality of its work.
Whatever it is, C is not 440 Hz.

Middle C has long been considered 256 Hz but has been made official by
the American Standard Pitch at 261.63 Hz.
Really. Its derived from A being officially declared at 440. Here's
how it has derived over the years.

1 Hertz is a rental car. 60 is a rental fleet.

I, having been born when cycles were still cycles, prefer cycles. And so did many of my older engineer friends. The KCID-AM sign read 1490 KC until Journal bought it and moved it to Boise 3-4 years back. That's why I am "10kc" not "10kHz" and it stands still for my love of AM radio and it's fine 10kc sound. DXing is super, but I wanna hear MUSIC not a bunch of radio babble hags who don't tend to know anything but the sound of their own voice. It's moving to TV now (that loudmouth creep on FOX News Channel--O' Reilly) and I despise it. Talk can be good if it's about hog futures or your mayor or cleaning up downtown or something but it's usually political psychobabble and rumor mongering. Doesn't anybody care if I'd like to hear Bill Monroe and more "hillbillies" in my Classic Country station's 100-song rotation? My "world music" outlet sounds more like the "top 40" it was 20 years ago? You can't get 40's-50's tunes on the radio here because that service dropped them to add more Adult Contemporary from the 70's-90's?

Give me a break.

Steven born 06-26-66 had the luck of being born the week a Beatles tune was #1 and "Strangers in the Night" #20 and kc was not in the Sunshine Band

No, I don't think so. I think it just refers to the two phases; half the
time it's going uphill, the other half the time it's going downhill.

For Sale: One New Uniden BC200XLT handheld scanner with cell modification.

This unit was purchased in 1994. It has never been removed from the box.
It is still in its original packaging. It had been modified for full 800MHz
coverage before it was sold to me. All accessories included: antenna,
case, charger, battery, instructions, and earphone. I paid $185.00 for it.
I would like $160.00, but make me an offer if interested.
Please reply by email directly to me.

Thanks,
Gary

I remember being sorely vexed about 40 years ago by the following phrase
(describing the WWV time ticks): "5 cycles of a 1000 cycle tone". I had a
very difficult time figuring it out.

A has varied over the centuries, with a tendency to push it higher and higher, to get a more "brilliant" orchestral sound. I believe it was as low as 420 Hz two centuries ago.

John Tolson in Utah? I'm trying to find out what his callsign was.
He was... Is my grandfather. I'll be getting a technician license
soon,and soon after that I'll jump to General, but I'd like to know
what his callsign was, and if there was anything I could do, or
anywhere I can look to find out what it was. His wife doesn't know
anything about it.

He was in Hawaii for a while, and the one ham I wish I could have
asked about him has recently passed away. If anyone remembers, please
let me know.

When anyone one of us learns that something we did is in error, we issue a retraction. That is what RH did, no more, no less. His action has nothing to do with history, as history should not play a role in regulating an unconnected present situation.

I happen to have recorded the qso that gave rise to the complaint. And I can tell you, anyone who listened to it would wind up with the same conclusion: two hams, one in Canada were setting ND8V up. They talked of all kinds of imaginary offenses that just were not happening. I can say this because down here in Florida on 20 meters, I hear most everyone beautifully (except, of course, other Florida stations).

Whether you join the IARN is utterly your business, a choice none of us would abridge. We happen to live in a country, thank God, of free association. And generally, we are the company we keep. So go for it; IARN can use the membership!

Respectfully, one other thing Lloyd. You are entitled to your posts about psycho-babble and the like, as the readers are to judge their probity, but surely you must find something discernible to meet in the forum of ideas. I am still waiting for you to talk issues and not calumny and invective aimed at hams.

239. PA-SitRep - PA Amateurs Radio Volunteers Wanted

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-10 01:50:27 UTC
From: owner@nospam.com
Message-ID: <3e1e1b7b.535598890@news.verizon.net>
Source record: 70231
Cross-posted to: rec.radio.amateur,rec.radio.amateur.misc

PA-SitRep (Pennsylvania Situation Report) is developing
a group of PA-SitRep Contacts, most of whom (27 so far)
are Amateur Radio Operators. We are currently seeking
additional Amateur Radio volunteers.

PA-SitRep Contacts are asked to monitor emergency
situations from their local areas and post emergency
situation reports to the PA-SitRep Discussion e-mail
list which is used, in part, for monitoring developing
emergency situations. If warranted, PA-SitRep
Administrators move the emergency situation reports
to our main emergency alert PA-SitRep list where the
alert is distributed to over 500 subscribers throughout
the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant
enough network of Contacts throughout Pennsylvania in
order to provide timely and accurate emergency situation
reports, free of charge, to those subscribed to our
emergency alert e-mail distribution lists.

In addition to providing the situation reports for our
own emergency alert lists, the eventual long-term goal
of PA-SitRep is to provide rapid emergency situation
reporting service, free of charge, to any interested
served agencies, much in the same way that SKYWARN
provides weather situation reports for the National
Weather Service.

If you're interested in volunteering as a PA-SitRep
Contact, or have any questions regarding PA-SitRep,
please drop me a line at owner@pa-nospamsitrep.com
(remove "nospam" from the address).

Or visit the website to learn more:
http://www.pa-sitrep.com

-David Kleber, KB3FXI
PA-SitRep List Owner and PA-SitRep.com Founder
www.PA-SitRep.com

PA-SitRep website and mail lists are
100% non-commercial / non-profit.

I just noticed you're in Canada? Here in Montreal, 73 disappeared some years ago from the newsstands. From the discussion at the time, it would seem that they just cut back on where it was distributed, and they dropped at the very least some cities, and perhaps the whole country. It's delivery had been sporadic and/or late for some months before it stopped completely here, suggesting there were some problems.

Unless the situation has changed recently, there is no website for 73. Years ago, when I could still get the magazine, he gave some explanation about why there won't be a 73 magazine website, though I can't remember the reasoning. Wayne has had some sort of website, going under various names, over the past few years though, not about 73 but about himself. I quick websearch shows that http://www.waynegreen.com might be the one used now, so I didn't search any further.

Sometimes it takes a troll to unlock some people's sense of humor. Everyone has some bit of nonsense they are just waiting to spring on everyone else. Having fun yet? Hey theres a bit of Mark Twain in all of us.

Makes sense. After all, a bicycle can't stand alone because it is
two-tired.

If I remember correctly, back in about 99 before I quit subscribing, I think Wayne mentioned that he had nothing to do with 73 other than writing the "Never Say Die" column. Sorry, can't remember where I read this.

Just looked at my January 2003 issue of 73. There is an e-mail address. It is design73@aol.com. The publishing team on the first page shows Wayne Green as "El Supremo & Founder." There is also a web page in Wayne's name; www.waynegreen.com.

I haven't seen either QST or 73 in bookstores and news stands in years. They probably deliver only to subscribers by snail mail.

73,
Bob

Sometime within the past six months, someone was asking why QST hadn't
arrived on the newsstand. After a bit of discussion, they emailed
the ARRL to learn that QST was no longer available in such places.
In effect, it's just a return to the way it's always been, since
up until the early nineties, when they did go for newsstand distribution,
it had only been available by membership, and at very specific locations
like ham radio stores. If I remember properly, the idea was to get
the magazine, perhaps the hobby, out into more public view. It seems
like they changed the format for the occasion, but that might just be my
impression. So it would seem that the ARRL discovered they were
not getting enough back from the trouble and expense of putting
it on newsstands.

It's the same here in Vancouver: 73 disappeared some
years ago, then QST disappeared last summer. Even
the specialty-every-magazine-under-the-sun shops (e.g.
Mayfair) only carry CQ.

From what I've seen of 73 since then (at ham stores in
the U.S.) I'm not missing much.

Source record: 70153

I am having a silly problem with an order from AES.
I ordered a Vx-1r which is on sale (coupon) for $94.99
They state all orders under $100.00 get shipping for $4.99
I ordered the radio and find out later that they charged $9.99 to
ship.
I asked why they charged me more than quoted and they told me that the
original price of the radio was $154.00 so I get charged more for
shipping based on the original price.
None of their policies state that shipping is based on BEFORE COUPON
prices.
They refuse to refund the $5.00
I know this is really petty, but I am really upset about the way I am
being treated.
Should I just forget about it and take the hit?
Should I fight it and how?
Thanks!

263. Research Help/Callbook Census

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-10 23:56:30 UTC
From: Bruce <K1BG@hotmail.com>
Message-ID: <3E1F5DAE.6BBA190@hotmail.com>
Source record: 70154
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

I'm doing a research project, trying to come up with US Amateur Census data going back for as long as it is available. I'm asking for a little help in gathering the data.

My 1980 Callbook (only printed US Callbook I have) on page 10 has the "Census of Amateur Radio Licenses in the U.S.A.". I'm looking for the Grand total at the bottom of the page. For instance, in 1980 there were:

Novice 75,036
Tech 71,883
General 125,559
Advanced 87,127
Extra 25,506

I'm not interested in Club or Military numbers. The Census was printed in both the US and International Callbook editions.

If you have some callbooks on your bookshelf, I'm asking if you could gather a little data for me. If you could send me the numbers for one or maybe two years, I will compile data and publish it on the internet. Hopefully, there will be enough responses that no one person will have to spend a lot of time on this. Also, I will let you know what years I have numbers for as I get information in. There is no use in sending me information that someone else has already researched.

Thanks in advance for your help!

Bruce, K1BG

Take a lesson from what happened to KV4FZ on 14.313. If only he had kept his
mouth shut he would have kept his license and outlasted the intercon bunch.

I have the '92 and '03 callbooks. Here are the numbers (I've added your
numbers for '80 in as well):

Class 1980 1992 2003
----- ---- ---- ----

Novice 75,036 96,914 51,589
Tech 71,883 146,893 258,474

Tech Plus 87,423
General 125,559 120,165 143,491
Advanced 87,127 103,332 86,652
Extra 25,506 55,008 104,254

As you can see, I've added an additional row, as Tech Plus is now listed separately. The '03 callbook is unfortunately the last issue of the Radio Amateur Callbook.

The ham radio store in Laurel, MD used to have a back room with every issue of the callbook, for customers' use, but I don't know what happened to them when they closed down. It is possible that someone in the Laurel VEC might know?

It's quite lucky that our collective callbooks are fairly evenly spaced, with 12 years between yours and my old one, and then 11 years from that one to the current one. Hope you get lots of people to submit a lot of others. One from about 1970 would be informative. I bet some libraries have some old ones.

Universal is a first class organization in every way. The folks that work there are top notch, and the store is a fantastic resource. I consider myself extremely fortunate to be able to go there whenever I want to since I live in central Ohio. I would recommend the store to anyone interested in anything in the radio hobby.

This is standard procedure most everywhere. The coupon is taken as cash payment, rather than an initial discount. This is done this way in many states because it has to match the procedure for the state sales tax laws.

You know, you have a really good point,

to tell you the truth, in all my dealings with AES, they have always
been accomodating and I would bet if it was really an issue for me
and I called and complained that they would refund my money to the
lower shipping price.

AES, R&L and Texas Towers have always been very customer
service oriented with me, Texas Towers is usually the cheapest,
AES seems to want my business more and R&L seems to treat you
like you are buying from family. I like that.

Having said that..... HRO can kiss my butt.

When they ship, they will probably insure it for the $154 value. If it were to be lost or damaged, they might have to replace it with a unit for which they would not get a discount from the manufacturer since they would not have received another coupon from the purchaser. So it makes sense to me.

I agree. K1MAN is too good for that bunch anyway and he should ignore
them compleatly. But now it is too late and there will be people in
court explaining why they jammed and libled K1MAN. I hope the judge
throws the book at them.

I have a pair of RadioShack BTX-122 VHF handhelds (Cat # 19-1203, FCC ID# AAO19-1203)

They are preprogrammed for 2 frequencies and a PL tone. I wish to change these frequencies. The radioshack website has no such instructions online. Does anybody know how to reprogramm these? They have a single 10 switch DIP for programming.

Thanks!

I did try to straighten it out with them, they refuse to refund any
money, and pretty much don't seem to care if they keep me as a
customer or not. They just tell me that its their "policy", yet the
policy does not exist anywhere in print.

If I buy something at a store with a credit card and find out later
that the store billed my credit card more money than the receipt
showed its usually considered fraud, but with them it seems acceptable
practice.

This was my first order from them, probably my last, all over $5.00
..
I will have to try Texas Towers next and see how it goes with them...
Thanks for the suggeation.

291. FT-902DM interface for YR-901 and YK-901

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-11 23:28:26 UTC
From: Kevin_Ryder <Kevin_Ryder@email.msn.com>
Message-ID: <eRMgCmcuCHA.1884@cpimsnntpa03>
Source record: 70179

Howdy,

Is there any type of a modification for the FT-902DM to operate with a YR-901 (CW/RTTY Monitor) and YK-901 (Keyboard)?

This is the problem I am having.

1. I can hook my electronic iambic keyer directly to the FT-902DM and it will transmit Morse code.

2. If I hook it up into the YR-901, all I get when attempting to transmit CW is a dead key in CW. It is as if I am hitting the tune button.

In both case 1 and 2, I can hear the CW sidetone with distinguishable characters; however, what goes out on the air in case 2 is a dead key tone.

Any suggestions would be greatly appreciated?

Thank you in advance for any assistance.

KR

Good day to all!

Looking for some Ramsey WEFAX weather satellite reception equipment.
I'm not sure all what came with the orignal package when it was bought
new from Ramsey, but as far as I remember I should be looking for the
weather receiver and the PC card.

if anything, links to where I could build my own 136-138MHz 45KHz wide-
bandwidth receiver would also be good.

Appreciate it!

Eric F. Richards <efricha@dim.com> wrote in message
>
> Be serious. You are comparing apples to comquats. How would one use
> a demo air conditioning system?

I wouldn't. How would you realistically demo a radio in a shop which will be lucky to even have a decent antenna. I'd never want to demo a radio in a store. I'd find people that already own them and get their views. I want to know if they hold up. What the weak points are. Most dealers will tell you it's the best thing since sliced bread, even if it's really a dog. I don't really blame them. I probably would too, if I had to sell the puppies to make a living.

>
> Presumably from your context we are talking about industrial grade
> equipment. Again, the question comes up -- how would one use a demo
> unit.

No, actually most is residential. And again, one wouldn't, unless you can find a fool to loan and install one. Maybe you could demo a window unit...
>
> Also as an aside, why did this get splattered all over usenet when it

Why are you asking me? Ask Hudson whatever his name is. He seems to be the one that added more groups. I didn't originally post from r.r.s.
>
> (BTW, I wouldn't want to buy from you, because a brochure wouldn't be
> good enough. Ever heard of references?)

Duh...Between the 3 people that make our company we have 104 years combined experience. References? We have them out the kazoo going back to the late 40's.
Heck, a large portion of our past customers are dead and more keep dropping out every year. But getting back to radios, being able to demo one in the store means nothing to me. I have better ways to decide. I won't be buying the radio I demo anyway, unless I get a "pre-nosepicked" discount on the one I get to play with. I'll buy me a fresh one in the box and "demo" it at home on decent antennas and in the environment I'll be using it in. If it fails my test, I'd just send it back and get a refund. No problem doing this if you pay with a credit card. But I haven't had this problem yet, because I thoroughly research the radio and know what I want before I even think about talking to a dealer. Same way I build my puters every time I upgrade.

Using store demo's as a guide would be useless to me, unless they will let me run benchmark tests, etc in the store. The technology changes so fast between each upgrade, I'll spend 2-3 months researching chips and boards before I decide what to build up. The only thing I talk to dealers about is asking them if they have what I want in stock.
MK

You don't get out much, do you?

Ham Radio Outlet, Denver, has antennas available and connected.

Ten-Tec asked me what my antenna preference was when they put me in
their demo/evaluation room.

Fair Radio Sales had antennas available and connected them when I
asked to test a radio there.

> I'd never want to demo a
> radio in a store. I'd find people that already own them and get their
> views.

I do. But I want firsthand experience, too, when spending that kind
of money. I respect people here and people who publish books, but
their views on what is good and bad are very different than mine.

> I want to know if they hold up. What the weak points are. Most
> dealers will tell you it's the best thing since sliced bread, even if
> it's really a dog.

You don't get out much, do you?

HRO has, more than once, steered me in different directions than where
I was looking, toward a cheaper product. Toronto Surplus and Supply
has always been frank with me in the pros and cons of the radios I'd
be interested in purchasing from them. And I've yet to purchase from
them. However, they are at the top of the list of "go to" companies
when I want to make a purchase.

An ethical business looks beyond one sale. A business in a specialty
market does the same.

> I don't really blame them. I probably would too, if
> I had to sell the puppies to make a living.

Another reason I wouldn't buy from you.

Shortwave Radios aren't Used Cars. Shortwave Radios aren't Used Cars.
Shortwave Radios aren't Used Cars. Shortwave Radios aren't Used Cars.
Shortwave Radios aren't Used Cars. Shortwave Radios aren't Used Cars.
Shortwave Radios aren't Used Cars. Shortwave Radios aren't Used Cars.

Then you *do* go beyond the sales brochure? Or do you just vent the
same bovine scatology at potential customers as you just did here?

Here's a hint: If a vendor talked to you the way you address people,
would you buy from them?

Blimey it's with it's original box and packing !
I've converted more of them than the pope.
You can take them up to 29MHz without an eprom or crystal change,
but you need a eprom or 4008 binary adder if you want the 100KHz rpt shift,
and you can switch the 10KHz reference to 5KHz, giving 5KHz steps

It's well worth putting in the missing 2nd If transformer,
and the missing noise sq cct, as fitted to the JWR M2 version.
also produced as the Lucas 1001

SWM was the first to publish mods for it in 1982

And the Lib Nutz go on and on and on to the point of nausea. Talk about a bunch of conspiracy theorists...these Nutz take the cake.
Gawd! To hear them tell it, Riley H. is part and parcel of the New World Order, the FCC is condoning or even a party to jamming them, (Glenn Baxter says he is also a victim) and the world as we know it is, according to them, coming to a end!
Cannot you just see these Lib Nuts hovering in front of their radios, mic in hand, waiting for their turn to speak? I can see them holding their latest New American magazine in hand and waiting their turn to read the latest conspiracy theory of the week.
You gotta love these guys. They are kind of like the Captain Kangaroo of nuttiness.
Their ongoing blab fest can easily be synopsized as, "The sky is falling, the sky is falling." Watch out for those black helicopters, Vic. They are everywhere and they can even monitor your thoughts when you remove that aluminum foil turban. Make sure you wear that ground wire before you go to bed.

Oh, well. It gives them a purpose in life, silly as it is.

Bovine scatology? Vent? I'm just giving my opinion on the worth of
being able to "demo" a radio in a store. I don't need to do it.
Just because "I" don't need to do it, is no reason to get your panties
in a twist. I could give a damn what you do. I never said you couldn't
go to a store to try radios. I just said it's a waste of time as far
as I'm concerned. Note the "I" ...
>
> Here's a hint: If a vendor talked to you the way you address people,

True, it does keep them off the highways for several
hours on a Saturday night, assuming they go out at
all for booze on the weekend like normal people do.

I am waiting however for the rare random-nutcase
to appear from within their ranks. Another "Steve Anderson"
grade chemtrail sniffin, "thar's-a-microchips-in-yer-butt"
Power Hour shortwave program listening sloophead, who is just waiting
for some goofy arcane reason to go completely apeshit
just like UP Radio bumpkin Steve Andersen did. (cukoo clock .wav)

If not on the Lib Net, there are several *genuinely mental
un-balanced* hams (and bootleggers) on the ERPN
net, which is a much more fertile ground for producing a future
Andersen-style random-act-of-kook which will bring
needed noteriatry to ham radio just like Stevieboy did.

The 14.275 beer nuts withstanding who are currently
palying on stage to sold-out audiences I add - grin

Toon in on yer ham radio or shortwave and you
can just "feel" it. creepy!! [Really makes one wonder just
the reasons why ham radio has always been a screwball-magnet.
Just goto any hamfest and look around - often looks like a reunion
of past Belleview State Mental Hospital inductees]

Hamfests in the Southeast have become a living example of
who is in ham radio today. Take a look at some of the human
refuse who continually attend all the hamfests. Not sick enough?
Then take a look at the women they have in tow with them.
Fat, old, ugly, repulsive human refuse, white trash.

Lloyd

Nope. These cameras are highly prized by certain groups of people that must
have the floppy drive. Avg. on Ebay is between $285 - $415, and I've seen
'em go higher if they're new.

Weren't you the one venting about people who do exactly that? If I go
to a store expecting to rely on their expertise and infrastructure, it
is worth it for me -- even in the narrowest, greediest sense -- to
make sure that they are there in the future. So that premium of $30
or so on a $2000 item works out just fine.

But forget the greed angle. For me, it is just plain ethical to do
that. People who go into stores to examine something and then buy

online to skip sales tax, get the absolute cheapest, etc. are the
lowest of the low.

Yes. And good for anyone doing business with that salesperson. And
good for that salesperson. And good for HRO, Denver and TS&S to have
sales people with a decent outlook. In the case of HRO, it
counterbalances the one jerk who leaves many so bitter as to not go
back.

> >
> > An ethical business looks beyond one sale. A business in a specialty

But your attitude is the classic stereotypical used car salesman.
Screw the customer good and hard, leave nothing on the table, and who
gives a ratfark about future business. You are revolting.

>
> How do you know how I address people? I haven't said anything out of
> line to you or anyone else here.

I would suggest that you reread what you type.

> In fact, I would see it the other way
> around. You seem to be the one with the smartass attitude.

Yes, towards you, and when I lose my patience. That is one of many reasons I am not in the sales field. While I have patience with people who want to learn and are interested in doing so -- I was a very atypical system administrator, once upon a time -- I have no patience for people truly looking for something for nothing, or utterly blinded by greed as to be willing to sell, well, air conditioning to eskimos.

> I'm just
> stating my opinion. If you don't like my opinion, thats just too damn

Yet you are wasting your time doing so.

No, I don't like your opinion, and you can take that or leave it as you wish. But your job/career choice clearly involves interacting with the public, and you don't seem to have the temprament for it. Mine, by contrast, involves interacting with technical specialists both inside and outside of my immediate company. I stay out of sales, marketing, and dealing with those who are actively willing to understand.

Since you don't want to waste your time talking about this, I'll save you the trouble and killfile you now.

Mavicas are great cameras due to their design/configuration. I have two. :)

(Plus a Memory Stick Sony P9 as well.)

Love them all, and they all have their advantages.

One man's junk=another man's treasure. Gotta love the free market. :)

A while back I was ready to unload my old Sony Mavica FD-73 (0.3 MP) to
buy something with more resolution. Came to realize that Joe's teenage
son takes the pictures for his listings using the SAME camera!
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=933&item=2153472980
There's a lot to be said about a camera with 10x optical zoom, 5 hr
battery, 20 photos on a floppy with no interfacing gizmos.
This kid does more with 300 kp than a lot of guys do with
multi-megapixel gear.
The old FD-73 still fetches $150-250 on the market and are hot sellers.
I decided to keep mine. With my photography skills a bunch of extra
megapixels would be wasted :-)

One of the major pluses is that, when away from home, one can easily buy
inexpensive floppies just about anywhere. These floppies are easily readable
in any computer and there is no need for USB ports, viewing software, etc. I
wouldn't sell mine.

I didn't say that, but they were the easiest of all CBs to mod,
and not the worse ones made

A 2pole Xtal filter in the 10.695MHz first IF helps the RX,
and I was surprised Icom didn't sue them for copyright infringement
AFAIK they were made in Taiwan to their own design

I would consider a resonable offer on this camera.Look at the
auctions.$575.00 for a reconditioned one.I won't let this one go for much
less than $430.00.I have two other Mavicas,and don't use this one enough to
keep it.I can say that once you try one,you would really hate to do without
one.There is my personal waranty on this baby.

K1MAN is a god send to ham radio NOT NOT NOT. He takes the most widely used band and makes it a joke with his Bulletins and backs it up with "the bands are being taken if we don't use them". Well MAN 20 isn't being asked for so go to the bands that are and get your garbage off the 20 meter band.

I though it the correct spelling was "coons" instead of 'koons'.
You also forgot "shine(s)" and "

http://www.ferris.edu/news/jimcrow/coon/

More fun stuff at: http://abbc.com/islam/english/toread/quotesjb.htm

Actress May Irwin became a well known 'coon shouter' after
the premier of The Widow Jones act in 1895, in which
she sang "The Bully Song". The song told of a "razor-toting nigger".

"There was dat new bully standin on the ground.
I've been lookin for nigger and I've got you found.
Razors 'gun a flyin' niggers gun to squawk
I lit upon that bully like a sparrow hawk..
When I got through with the bully, a doctor and a nurse.
Wa'nt no good to dat nigger, so they put him in a hearse."

The ambit 8KHz 10.695 2 pole Xtal filters are a bit sharp for 10FM

Something like a cheap 10M30 10.7 +-15KHz Xtal filter will do fine,
which works out as -10 +20KHz at 10.695,
or even a 50KHZ 10.7 ceramic filter if you can still get them ?

Anything's better than the 150KHz ceramic filter they use
to protect the internal 2nd mixer in the MC3357 chip

and dig out a Toko 7mm 455 IFT from a scrap tranny radio,
for where they've left it out on the end of the CFU455 filter
in the ICOM 1050, but fitted in the JWR M2 version.
It improves 455 filtering outside the CFU ceramic filters B/W
and gives a better match to it

Hi

Kenwood ran their best sales during May last year during the Dayton Hamfest.
I bought my TS2000 for 1599.00. I would suggest that you check all the
major ham sales outlets, some do not pass along all the coupon discounts
that are offered. Last year AES had the best deal at Dayton by $50.00 which
was an additional Kenwood discount

Source record: 70037

Hello,
I aquired an old TS-430S with a problem. It lights up and actually receives on some bands but not on all bands. It does not xmit. I have heard the 430s have this problem. I would be interested to hear from anyone who could shed some light on this problem. I am thinking I would like to, somehow, get it to receive and be content with a good general coverage rcvr.

Also, I am looking for at least one chassis mount (female) power connector for the TS430. It is the same one the TS130,440,450,690, and 850 use.
Thanks
Dave

Then why do you read saidsame AOL originated posts and then reply to them?

I find this to be most curious I have noticed this type of
behavior also on the conventional ham radio bands also.
Someone hears something they claim is negative, disgusting
or to be discouraged on ham radio happening on 14.313
or 14.275 or 75 Meters.....and yet they just cannot pry themselves
away from listening to the same! They have to listen, and stew
in their own juice when they can just spin the VFO or in this
case bypass the message. I guess these poor souls
also routinely purchase flavours of ice cream or soda they
dislike the taste of, and consume the same to "feel better"?
Is all of this a bizzare form of self-flagellation?

I'd not worry about the $5.00 as that's the average cost
of a Big Mac Value Meal at McDonalds. What I would
do however is not patronize this dealer any more, send them
an e-mail why you are taking this action, and discourage
others from patronizing the same. Dealers take note very
quickly when they get justified negative advertising/publicity
as it seems you did get from them. Also drop an e-mail to
any ham radio magazines they advertise in and tell them
you will not be patronizing their publication if they
continue to sell space to questionable advertisers. This will
get their attention real fast.

354. Tube Transceiver QRP Project

So? I don't do sales either. Whats the point?
>
> Since you don't want to waste your time talking about this, I'll save
> you the trouble and killfile you now.

Fine. I've about shot my wad talking to a asshole who makes up stories about me just because he doesn't like the way I buy radios. Like I told you yesterday, you buy your radios how you want, and I'll buy mine how I want. If you have a problem with that, well, fuck ya then. You seem to be about a prime time asshole, so killfiling me will be no sweat off my ass.

MK

OK, lets take a look. I post from google, so I see everything no
matter if old or not.

Mark Keith, that obnoxious foul talking asshole wrote:

I agree really, and can't really blame them for the amount of money
they make on the radios. It's just like cars. Once you drive one, IE:
"open the box" it's lost a good bit of value. Sure, most car dealers
let you drive "demo's" but they have big pockets in general and can
afford to take a hit on a demo car once sold. Most of these radio
dealers are not in the same position to lose money. Many of the
smaller stores are lucky to stay in business at all. If you display a
new $4000 radio, you won't be able to get near that amount once you do
sell it. And it will most likely be scratched, etc. People don't give
a hoot if they don't own it. I know I would never buy a demo unless it
had a deep price cut. As far as being able to try one, I ask for
opinions on the air from users, and scan the net for info. I bought a
ic-706mk2g on the net, and I'd never tried one at all, but I already
knew what I was buying from previous research. Sure, it would be nice
to be able to try a high $$$$ rig, but I don't expect the dealer to
take a bath just to allow me to do this. It would cost them several
hundred dollars to demo a high end rig. No one wants to buy a new
radio in anything other than a sealed unopened box. MK

I do. More than one. I sell air conditioning/heating/refrigeration
equipment for one thing. And I sure as hell don't supply demo units.
If an equipment co. brochure is not good enough, they are shit out of
luck. And I don't keep a stock of units either. Only service parts.
Only when someone actually wants a unit, will I go buy one. MK

I wouldn't. How would you realistically demo a radio in a shop which
will be lucky to even have a decent antenna. I'd never want to demo a
radio in a store. I'd find people that already own them and get their
views. I want to know if they hold up. What the weak points are. Most
dealers will tell you it's the best thing since sliced bread, even if

it's really a dog. I don't really blame them. I probably would too, if
I had to sell the puppies to make a living.

No, actually most is residential. And again, one wouldn't, unless you
can find a fool to loan and install one. Maybe you could demo a window
unit...

Why are you asking me? Ask Hudson whatever his name is. He seems to be
the one that added more groups. I didn't originally post from r.r.s.

Duh...Between the 3 people that make our company we have 104 years
combined experience. References? We have them out the kazoo going back
to the late 40's.
Heck, a large portion of our past customers are dead and more keep
dropping out every year. But getting back to radios, being able to
demo one in the store means nothing to me. I have better ways to
decide. I won't be buying the radio I demo anyway, unless I get a
"pre-nosepicked" discount on the one I get to play with. I'll buy me a
fresh one in the box and "demo" it at home on decent antennas and in
the environment I'll be using it in. If it fails my test, I'd just
send it back and get a refund. No problem doing this if you pay with a
credit card. But I haven't had this problem yet, because I thoroughly
research the radio and know what I want before I even think about
talking to a dealer. Same way I build my puters every time I upgrade.
Using store demo's as a guide would be useless to me, unless they will
let me run benchmark tests, etc in the store. The technology changes
so fast between each upgrade, I'll spend 2-3 months researching chips
and boards before I decide what to build up. The only thing I talk to
dealers about is asking them if they have what I want in stock.

Being defective has nothing to do with it. I don't want a radio that
some nosepicker has had his greasy fingers in. Or scratched, or even
breathed on overly hard. I expect nothing less for something new I buy
, and pay full price for. Some of the tech's scratch the radios just
moving them around on their test benches. They don't care. They don't
own em. I don't want anyone scratching my radios. That's my job if it
has to happen.
I know one dealer that checked and "opened up" the type radio that I
bought, before they shipped them out. I nixed that company just for
that reason. I don't want anyone touching my radio after it's been
built, except me. Now, if they want to sell me a " pre-nosepicked"
radio for a greatly reduced price, well ok then...To each his own in
this regard... If I get a DOA, I'll make them send me a new one. If it
dies later in warranty, I want the company/factory to fix it, not the
dealer.

No, I don't go to ham radio stores.

I'm not in Denver.

I get out plenty, but I don't go to many ham radio stores. Why should
I? I can order the stuff on the web and beat the sales tax.

Well , good for you...

So????

Who cares...I don't need your money.

Who's talking about used cars? I haven't mentioned used cars.

Bovine scatology? Vent? I'm just giving my opinion on the worth of
being able to "demo" a radio in a store. I don't need to do it.
Just because "I" don't need to do it, is no reason to get your panties
in a twist. I could give a damn what you do. I never said you couldn't
go to a store to try radios. I just said it's a waste of time as far
as I'm concerned. Note the "I" ...

How do you know how I address people? I haven't said anything out of
line to you or anyone else here. In fact, I would see it the other way
around. You seem to be the one with the smartass attitude. I'm just
stating my opinion. If you don't like my opinion, thats just too damn
bad. I would consider that a personal problem. How do you like that
address? BTW, consider this the end of my views on this matter. I
have better things to do than argue about how you like to buy your
radios.

This includes my replies to the posts where you were in the process of
pissing me off. Note my restraint against even your horse shit
comments.
In all my posts leading up to that stage, if you can find a single
comment where I was rude, snippy, obnoxious, etc, etc, to any of these
people, I'll drive up to CO. and lick your ass. I used a couple of
cuss words in one post, that some might find offensive, but that was
in no way directed at the other poster. I'm being obnoxious to you
now, but you earned it. I AM rude and obnoxious when I have to read a
load of blatant horseshit. You want to go to a store, and touch and
feel? FINE. Knock yourself out. Myself, I don't need anyone to hold my
hand when I choose or buy a radio. But thats me. I'm not saying anyone
else has to operate like that. This is REALLY the end of this turd
hunt as far as I'm concerned, unless you start lying or making up
stories about my business again. In that case, I'll probably just pull
a "Chip" and sue your ass.

MK

Or it was cutting into paid membership. While there are many excellent
reasons to join the ARRL, if your primary interest is QST but you find
few issues really interesting, it makes sense to buy one or two a year at
a newsstand.

I've found I do this, not with QST, but with other mags like Dr. Dobbs.
Once or twice a year they have something that interests me. Buying only
those is cheaper (and reduces the clutter around the shack)

This is the main reason I wanted my first, an FD-83. Ubiquitous media.
Plus, disks run from inexpensive to free.

Moreover, when in the field (or wherever), you can make duplicate or
multiple copies of the media in the camera, and hand them out to anyone
who wants/needs them.

Excellent for on-the-job, visiting with friends/relatives, etc.

The camera even generates an HTML document (webpage) on each floppy
so even my grandmother or non-PC-literate folks can participate.

v2
Okay, bush isn't exactly like hitler. Mr. bush has no knowledge of
economics, and unlike hitler, is a staunch public advocate of death
squads against all families including the targeting of the murder of
good police officers trying to do Our jobs. Pure evil nazi filth
exceeding hitler that bush demon spews openly in contempt for the
American flag, Justice and God
also. Just look at how many Americans he murdered in New York City,
without the slightest remorse for his actions, then went on to murder
or incarcerate more than a 100,000 of those not guilty of his
unsubstantiated accusation as the Nations being pirated under criminal
dictatorship, as now fully documented by the FBI, and the CIA, CLEARLY
outlining the demon bush as traitor to all Peoples, not just Iraq, but
also including his wife, his closest enemies, himself, and me as the
Son of Man also..

CHECK THIS LINK
http://www.takebackthemedia.com/bushnonazi.html

Anyway I've tried a new approach, this time as a Believer,
what do you think of the following paper?

-

One More Thing

So, that demon bush, the American cop killer and his
cohorts, are continuing to work destroying Humanity's
gains in civility, by evilly dividing Our humanity with
their blatantly open criminal intent to murder untold
millions as US innocent, and as of yet, have not been
executed by American Patriots for mass murder of God's
Family in New York City. Traitors to US all on 9/11
without contention, for Our truth speaks as Ourselves,
and witnessing just CNN's silence on General Ahmad,
speaks volumes on their contempt for US as worthy of
Justice. Refusing to do what is good for Humanity by
offering the central facts as publicly recognized by Our
Police Agencies to be actually documented. According to

the FBI: the vacationing General Ahmad financed the alleged 9/11 mastermind, Atta, and also developed the criminal war strategy against Afghanistan with the bush administration, to boost the heroin trade, and save Enron to commit further frauds against American soldier families, while murdering over a hundred thousand American flag wavers, and then leaving US for further ruin with plans to continue on against 59 more countries in the same deceitful illegal manner against all Churches, as an evil nothing short of eternally crowning Our Mr. bush Jr., the super evil anti-Christ, the most hated and despised parasitic murderer in the entire annals of Humanity's History. Cool eh? Kill bush now! Why?

The bushmob have done nothing short of confessing to the entire terror event, but for jokes on our strained credulity to publicly press for further stalls. With the rights of kissinger left to be a public investigation official? (Gee, thanks for highlighting your partner like that for US bush, you nazi dumfuk.) Mr. bush Jr.'s america destroys themselves without Love for wisdom, or respect for intelligence as a Peace plan initiative. We publicly witness the blind and tormented dying bushmob slave whore charade, of contempt for living free in Our names. The two evil doers, bush and sadistic nazi rotten rumsfeld, are known publicly as documented, to continue leveraging the ignorance of the CNN ready to be broadcasted repeatedly, tranced dimwit marines, the true dumfuks of this world as weak and pathetic cowards to themselves as their own brothers they watch murdered for bush helplessly, communicated in CNN's un-American false image as the evil bush nation hiding in falsehoods as death squad recruiters against the practically defenseless as unarmed children, nazi vermin criminals, being unbiased as Blitzer about protecting your freedom Patriot, to lose your real life savings reader, truly too weak and stupid to stand up in protection for the flag as the living American Dream for anyone. Because witness again, CNN keeps not saying Justice is important as principle to hold our reflections.(CrossFire is getting better though.) Fortified behind locked doors in their bombed out bunkers, Blitzer and Hemmer sit rooted for the evil side to lose further to themselves by continuing to not respond to our communication know how. America, the People, rarely gain press time coverage as should be top priority always, while being paraded publicly as sold out as not deliberated, corporately represented as privately principled to stay ignorant of Justice to

protect living personally, as actually worth something to the bottom line. Yours. Brought down Hell bound as cheated by corporate news america's valueless interest in the price of your living to continue on our behalves. What does CNN think of 2% Social Security? cheating a Soldier's Grandmother to pay tithes to the bush demon as criminal dictator?, american nazi death squads?, insider stock trades?, arming bush's heroin partners?, rotten rumsfeld and bush murdering devout corporate cultists like a would be, still silent Hemmer?, no opinion? Or the working for the People in our names OFFICIALLY, as the FBI and CIA officers actually involved in uncovering the evil bushmob deeds, like the warrant sabotage, Odigo, stolen passports of alive so called highjackers as once American trained as still Saudi pilots, or Anthrax made to look Muslimized, is not failure to connect the dots ever, or insufficient funding then is not less payment for our law enforcement now to nab the prime suspects. As Mueller, or mueller has not publicly commented of, but to say, he hasn't seen or heard anything of this police work, leaving the FBI unrepresented publicly as a threat by himself as a terrorist supporter, an devout member of the bushmob cartel. Why?, we must investigate Mueller if we should have him arrested for publicly obstructing the FBI asking the important questions. IT IS THE FBI, not pissant mueller, WHO CONCURES THE BUSHMOB'S AHMAD FUNDED ATTA. Or how about the dumb ass Ashcroft assault against every American to save his embarrassment of being completely unqualified and never elected?, no concern to mention on this either? Who suffers for CNN's refusal to demand Enron give back the billions that were criminally stolen from all American Families still sitting in the Cayman Islands? My God.

Somebody call the cops.. again!

I have personally spoken to hundreds, and written thousands regarding bush's guilt, and we can't seem to find any fault with what I am saying... How about You? Check out usenet group, "us.military.army" on the internet to see for US all, what questions if any are asked. Know also, CBC and CNN management staff will not contribute their disagreement as none present, but for continuing disregard for Your interests during Our news cast of the facts. THINK. I tell gun clubs, police officers, Biker gangs, and the general public to kill bush today for 9/11 and his death squads, against the helpless and undefended while arming heroin dealers and selling terrorist handbooks, with all the evidence one would need or asks for, and CNN with CBC corporate

management does not, to my knowledge, call Our Police agencies to complain about my free speech capabilities, or will allow US public discussions with Our History as documented. Why? Those nazi bastards, Walter Issacson, Robert Habinovitch, and the two Coast to Coast godless vermin parasites know personally, they propagandize our communities with deceit to keep us divided as the plundered and murdered for the private banker buildings who sell weapons in bush's name to kill the innocent as ourselves unheard from. I can barely survive watching US ignore them as King to this World, my sweetie baby sugar dumpling, but, I think it's time to let Arron Brown in on a little secret... Johnny wants a word with his living responsibility to Americans on Patriotism. Instead of what we currently witness, a reluctance to not relentlessly pursue the truth to provide US the facts, (Look, it's true, Johnny has an ass.) but a censorship of control to falsely prop up the unelected nazi war mongering criminal, Our Mr. bush Jr., a terrorist of tyranny through criminal impropriety in violation with the American Constitution as a death bringer heroin dealer, at a seating that truly holds no vacancy, nor a Buddha, but a deception to plainly hide, the actual, got to be for real, super evil anti-Christ of all religion ever mentioned. Wow eh, even gentle jolly Buddha wants bush squashed! Seriously, please kill the bush demon to save US as victims friend. Justice must prevail as is truth eternal, that of what will be as God is.. just how many more as Humanity will be sacrificed in cowardice for the evil bush demon, before an American Patriot kills the mortal nazi dictator for treason as an American cop killer, and betrayer to all of our Humanities? Don't let tomorrow's news story be about Your murder as another, no longer heard from bush victim. For, my reason is as evidenced to actually be known, easily, while the CNN corporate cult product lies to themselves as Our public fact finders to leverage more ignorance than is found now.. as Our public voice to suffer by criminal dictates to destroy God as life giver. Fuk you america.

Heaven is on the Horizon.

We can teach ourselves as the uninformed by CNN standards to misinform and ignore. CNN's continuing silence on Ahmad, bush and rotten rumsfeld, only supports further our claim in their contempt for American Soldiers, and Our Families as not represented as worthy business investment. God, don't you just love me? Hemmer?

Mr. bush's publicized war strategy of no evidence requirement to hold American convictions for murdering Ourselves is evil all around everywhere, as understood without question to every honest Cop, the most serious of all criminal behaviors, of which, they carry guns for in just this sort of political development to halt reoccurrences. But bush, the anti-Christ, as america, says no for ALL Americans, they can no longer hold onto Justice as their own with him in their charging everyone as the enemy bush refraction. Just like, "bomb wherever" tommy franks would do with his own American family death squaded, like he did intentionally to our children, as his contempt for America will never stifle our voice with his silence regarding our aimed veracity to seek out and destroy the evil nazi bushmob fuks individually with God as Justice Supreme. The True American Way, for, the rare and few Marines, the one or two, are with US loyally to know so. See, there was a time when the Marines were taught diligently, so much so it was proudly ingrained as the moral fiber of their character, that an American Soldier's responsibility to America was to defend the Constitution as the Freedom to be America, with their lives if need be to protect their soul brothers as family, for the greater good by God, (just like the Taliban Rule Man) while today, Ashcroft, albeit muted, murmurs as rotten rumsfeld chuckles, Americans must instead as slaves give their lives unthinkingly as cowardly evil war criminals to protect the unelected bush mobster from criminal arrest for mass murders in New York City, and stealing that 50 billion, seeing that that stupid Justice thing in the American Constitution and Bill of Rights idea has now got to go instead of evil bush as demon traitor war monger, terrorist recruiting false god anti-Christ, but that aside... There is a guide book for leadership in the American Marines entitled, "Guidebook for MARINES", and inside, it contains 14 principles to strive for as an American Soldier wanting to be a True Patriot as leader of Soldiers prepared to die for love of country, and our fellow man as friend or stranger, and here they are:

Integrity, Knowledge, Courage, decisiveness, Dependability, Initiative, Tact, Justice, Enthusiasm, Bearing, Endurance, Unselfishness, Loyalty, and Judgement.

For integrity it states:

"1. Integrity. The stakes of combat are too high to gamble leadership on a dishonest man. Would you accept a report from a patrol leader who had been known to lie? Of course you wouldn't. All your statements, official

or unofficial, are concidered by your men to be plain, unadorned fact. Make sure they are. When you give your word, keep it. There are people depending on you to come through with the goods."

Now, I could go on further about what kind of lifeless degenerate a lawless cowardly mute soldier in bush's nazi death squads would have to be, to serve under bush as slave and traitor to home and family, as against God, the Flag, and all that we represent as equals through Justice, but I won't.

Mr. bush's america is uncontrollable by anyone. CNN figures if they never mention US, we'll never know who was invited as participators. (Example: CIA officers have had to PUBLICLY contact British News Services as the CIA, (Never done that I know of likewise before), regarding American interests in apprehending the TRUE 9/11 culprits ignored by american corporate dictates, and tenant also. One should remember, bush and rumsfeld would want to secretly murder any persons involved in 9/11 to clean up the huge crime scene, and tenant, is no brave and True Christ like figure as a living person, so what can we expect in all reality? Tenant will pay dearly if the evidence further indicates, as his continuing silence does label him already a willing traitor to all America, as too, his personal meeting with 9/11's Ahmad just prior seems suspicious also as not mentioned by himself in defense, along with his refusal to disclose the insider stock trades while leaving the fine CIA officers personally involved in the dark, as abandoned American Patriots, armed and ready to defend America as they should immediately for themselves, by executing bush and rumsfeld as terrorist cop killer, drug running freedom haters.)

America's false deity, the super evil anti-Christ, Our Mr. Bush Jr., doesn't think for me to be sacrificed without opinion by John, for I am free to act for my own beliefs as understanding, as I live in defense for living as all things created I am of honestly, simply amazing God is. However, I, as any truly living person would, can't help hate Our Mr. bush Jr. to death for what he and rotten rumsfeld is criminally doing, and further proposing against Our living in my name as unheard from dying without cause as murdered, but for bush's criminal contempt for my Awesomeness to beg once again friends, someone out there please, for the Love of Yourself and God, help US destroy Our Mr. bush Jr. quickly before he kills more as Ourselves unrepresented by corporate values in our commitments to freedom for

living through Justice for all persons. Our Mr. bush Jr. has indiscriminately murdered more than 100,000 innocent souls with only a contemptuous smirk to his credit, while fully committed to more robbing and heroin dealing by blaming Laden for whatever without any evidence. Leaving Our true willingness silenced by corporate demands to propagandize and censor our truths, allowing bush, the dumfuk traitor, to continue demonizing America into a hell hole of ignorance through his hatred for life, Science and Nature. CNN's silence for America regarding the bushmob publicly stealing from their Own Family their freedom of Rights to be living, while committing Americans to a dictatorial crime ridden government, that bush and rumsfeld proclaim, is no longer applicable to the Law of any Land, is an abomination against Christ as living is Ourselves Being. America isn't America anymore, it's the bushmobbed universe of injustice and blind self hatred against all of Humanity, committed to leave none to survive but as slaves to be terrorized for the dummy bush demon as their false deity, a traitor in my midst, disguised to no one but himself as personally expendable. Again, where are the American Patriots we all hear so much about in the big screen to take down the seriously anti-American demon bush monster cop killer heroin pusher for treason, as all understood widely now factually with evidence and everything? Kill the war criminal evil doers, bush and rumsfeld today and be loved by yourself to be of Human Nature, or hunker to hell as a coward and betrayer to yourself and your own family, while watching the bushmob openly rob and murder further from our World, and on all of which we stand strong united. Justice for You.

This living plan of mine empowers others to learn their Rights as eternally established to be Kings and Queens on equal footing to be as all in all of gods forever dreaming, while demon bush intends the destruction of individual freedoms while robbing and murdering Americans from the inside, like sharon with US Jews does, as underrepresented, a condemning onslaught on Your better Judgement as reasoned on anything factual they figure blindly to be spinable, without your word contested. Your God Given Living Rights my friend. Without a rule of Law principled in the fashion of Justice for all to be sought as measured, bush's nazi amerika will continue to suffer ourselves needlessly for their corporatized self contempt in Our living Humanity as censored, without a thought for Justice, or the American Bill of Rights as God acting out eternally for

prophets to wonder endlessly. See, I came up with this wacky Idea one day to make all my equal as self created to be so normally, in this Universe as we exist for Happiness ultimately as eternal, so, You or i will work this challenge to speak out for ourselves as Creation about bush's america, and it's responsibility as publicly advertised, to gather the facts on who suffers for bush's criminal misdeeds, and overall ignorance on everything. Mr. bush's irresponsible tax scam for example, is to put America's public money into the hands of private bankers, as the extremely rich already, while taking money away from those who spend the highest percentage of their paycheck on basic necessities as a gambled to be advertised, "stimulation package". HOW? The HOW is never explained with understanding as clearly regressive like the bush rule is, because.. Who spends MORE in taxes as investment at the grocery store to pay the cashier for his babysitter: 20,000 volunteer Janitors all named Rich, who ride the bus for convenience, or a mechanical billionaire private bank machine operator, who doesn't earn any nation's moola by working something for it?, and couldn't eat 20,000 cans of re-fried beans at one cruise lining to timbucks three without losing themselves, havening his tax manner over take in YOUR luxury. See, when America prints more money at the Treasury to give Greenspan to loan BACK to the Government illogically, the dollar value falls for everyone as investor, inflation, let alone the incurred bogus debt owed with real sweat as labor. Clearly, to every informed citizen not as democratic. Of course, National corporate news America, is genuinely not trying as capable by themselves to commit The living interest in Government as ourselves with oversight to manage US fiscally responsible, (like CNN regarding Justice and the Congress, or no Chomsky ever, E. Ann Clark as geneticist, or just research for experts as example), so, we do indeed, live in trying times due to ignorance as corporate america's disrespect for wisdom saught as yearning. It's like private bankers don't want the public to think about what we are doing as worthwhile knowing, eh? Or, I'm the only one on this planet who can almost read my own writing as the, one of a kind, good boy God freak. Anyway, the bushmobster scam leaves less finite wealth for all as taxable exchanges, while suggesting disposing of what dwindling national resource can be obtained, be given to create further debt by devolving into a military apparatus to make more enemies. Our Mr. bush Jr. is just plain stupid as destructive to everyone, but especially Americans to not stand up in defense of Ourselves. (Officially, rotten

rumsfeld's criminal plan, "P2OG", is to encourage terrorist acts against Your Family, but you guessed it, not up to CNN's standard to report US as viable news material.) It's like saying fewer people educated, will keep us stupid enough as a Nation to blame the weak and poor as ourselves deprived till death as murdered, and, bush says makes sense secretly, as the all knowing for the blind and ignorant to faith in without thinking about what money is either. Our Governments should always be working to make the poor richer as a successful representation of our will as the public to improving our living condition, but the dumb and ignorant, talentless and monosyllabic, believe, someone else must be cheated and devalued, divided and murdered, in their universe for them to succeed without effort, or skill whatsoever.. Especially defense. Have you ever heard of the rock solid certainty of Universal "inverse variation" constants? (Canadian High School.) This is why in America, in a time where the nation was more literate as informed, Corporations were taxed at 85% and were happy about it for themselves as American citizens. It's understanding also, most as almost all of the most wealthy multi-nationals competing from military dictatorships against American minimums, run in continuous private bank debt, (your savings and pension as leveraged weaker being the entire Nations) but gross billions in profits. 99.9% of every private bank building in the Western World is mortgaged, not however in Iraq, or the Muslim World where interest is not charged on good standing loans made in Our names. (Sideline: Now recollect bush's puppet forcing Afghanistan to borrow from the World Bank for terrorist handbooks and heroin junkets, but not food, shelter or clothing, while spending in addition, 4-5 billion a month in godless bushfuked american Patriot Dollars, American Celeb Dollars, American TAX PAYER Dollars, to run deaths squads with tommy franks against teachers and children.) It's a strange idea to the dying to be corporately driven without thinking because, you wouldn't automatically think it could be more profitable to stay in cheaper as serviceable debt being a brick building, but it is by private banker swindle with National inflation succeeding personal interest rates. We lose personal wealth to the pirate banker fees without even privately using their/OUR National currency services, because truly, we can't go somewheres else. As of course in america, an Enron can always be pulled, where it goes bankrupt as a toxic non-living entity, but leave richer as crooks than they did before calling an end to paybacks, with the People stuck to take the loss

together for sure as the victims. While bush, says corporating America, his america, should learn for next time, maybe, while the CRIMINALLY STOLEN money is still siting in the Cayman Islands!!! See the Depression, a Canadian High Schooler, or watch bush act in direct opposition to his word almost consistently as American death harborer terrorist psychopath. Then ask yourself, why can none of our defenses be publicly discussed as important deliberations?

Love Justice by allowing others to read this paper, to judge the truth for themselves as worth something for all persons, and I will be truly grateful you cared to believe in a better future, for together, we could find a new hope for freedom, as happiness and prosperity for Yourself included. We only need believe in ourselves as unstoppablly stupid, and the Universe is ours as God is now testifier.

I am my word,
and make believe King to this world I call home,

Yours forever,

Johnny Wizard - Lord and Saviour

`Wolfowitz Cabal' Is an Enemy Within U.S.

by Michele Steinberg

On Oct. 14, the London Observer published one of the now familiar--and totally false--propaganda scare stories, entitled "Iraq 'Behind U.S. Anthrax Outbreaks.' " The story gave credence to the ravings of "American hawks" who say there is "a growing mass of evidence that [Iraqi President] Saddam Hussein was involved, possibly indirectly, with the Sept. 11 suicide hijacks." If confirmed, said the Observer, "the pressure now building ... for an attack [on Iraq] may be irresistible." One of these "hawks," an unnamed U.S. "administration official," told the Observer that British Prime Minister Tony Blair is a "faithful ally" in the war against terrorism and that "if it means we are embarking on the next Hundred Years' War, then that's what we are doing" (emphasis added).

The "next Hundred Year's War"? Who are the U.S. maniacs who use such language, and are they not as dangerous as Osama bin Laden's jihad?

Here we will name the names of the fanatics in this anti-Iraq grouping who have become known as the "Wolfowitz cabal," named after Assistant Secretary of Defense Paul Wolfowitz. According to the New York Times, which published a leak about their activities on Oct. 12, this grouping wants an immediate war with Iraq, believing that the targetting of Afghanistan, already an impoverished wasteland, falls far short of the global war that they are hoping for. But Iraq is just another stepping stone to turning the anti-terrorist "war" into a full-blown "Clash of Civilizations," where the Islamic religion would become the "enemy image" in a "new Cold War."

The "Clash of Civilizations" theory, developed by Harvard professor-turned President Jimmy Carter's National Security Adviser Zbigniew Brzezinski and his protï¿½gï¿½s, including Harvard Prof. Samuel Huntington, defined the Arab and Islamic world as an "arc of crisis" from the Middle East to the Islamic countries of Central Asia in the then-Soviet Union. Brzezinski wanted to use the "Islamic card" against the Soviet Union, and in so doing, began the policy of promoting Islamic fundamentalists against moderate and pro-Western Arab and Islamic governments. After the end of the Cold War, the Brzezinski/Huntington crowd updated their "arc of crisis," declaring that the Islamic religion is the enemy, in a new war in which religions, rather than political systems, inevitably battle each other. However, trained by British and U.S. special intelligence services and the CIA, and armed by Israeli military networks, the very terrorist drug-runners in the Islamic world who were launched by Brzezinski and "adopted" by the Iran-Contra networks run by Lt. Col. Oliver North, under the elder George Bush's Executive Order 12333, have become the main suspects in terrorist attacks against the United States.

A Network Throughout the Government

The adherents of the so-called "Wolfowitz cabal," pushing the "Clash of Civilizations" theory, are nothing less than "an enemy within" the United States, a network that cuts across the Defense Department, the State Department, the White House, and the National Security Council. This report is not a "good guys" versus "bad guys" description of the Bush Administration; rather it is a warning that this cabal is a close-knit rogue

network that is trying to hijack U.S. policy, and turn the current Afghanistan mess into a global war. The cabal bears a dangerous resemblance to the "secret parallel government" of North and Gen. Richard Secord's "Project Democracy" operation that ran Iran-Contra. In fact, some of the cabal members now in the Bush Administration are convicted criminals as a result of their activity in North's "Enterprise"!

On Oct. 12, the New York Times revealed deep divisions in the Bush Administration, describing how the cabal plots policy behind the back of Cabinet officials, such as Secretary of State Colin Powell, in the name of the U.S. government. The group wants to obliterate Iraq, put Palestinian Authority President Yasser Arafat and the Palestinian Authority on the terrorism list (if not the obituary list), and declare war on nation-states.

The Times revealed that a key section of the "Wolfowitz cabal," is the 18-member Defense Policy Board, which met for more than 19 hours on Sept. 19-20 to "make the case" against Saddam Hussein. The meeting pushed for a renewed war against Iraq as soon as the war against Afghanistan had concluded its initial phase. It discussed overthrowing Saddam Hussein, partitioning Iraq into mini-states led by U.S.-funded dissidents who would steal the proceeds from the Basra oil revenues for their quisling government. The meeting discussed how to manipulate information so as to pin the Sept. 11 attacks on the United States on Saddam Hussein.

According to the Times, Secretary of Defense Donald Rumsfeld attended the meetings for only "part" of both days, and on Sept. 22, President George Bush rejected the Policy Board's recommendation to declare war against Iraq. But to the "Wolfowitz cabal," Bush's decision didn't really matter--senior members of the Policy Board had been selected for their broad international connections, especially to the United Kingdom and Israel, allowing them to force changes in U.S. policy through an "outside-inside" operation. If unable to change policy through advising, the network could also run covert operations as a "government within a government," as they had maneuvered during Iran-Contra.

The chairman of the Defense Policy Board is Richard Perle, the former Reagan Assistant Secretary of Defense for International Security Affairs, now based at the neo-conservative American Enterprise Institute.

Perle, nicknamed "The Prince of Darkness" because of his nuclear Armageddon views during the Cold War, is, more

importantly, an asset of Conrad Black's Hollinger International, Inc., which grew out of British Empire Security Coordinator William Stephenson's efforts to secure arms for Britain during World War II. At present, Hollinger owns the British Tory Party-linked Telegraph PLC, whose International Advisory Board is headed by former British Prime Minister, now Lady Margaret Thatcher. Hollinger also owns the Jerusalem Post, another war-mongering press outlet.

The "heavy hitters" on the Defense Policy Board are the worst of the Anglo-American-Israeli geopolitical fanatics from the last several decades, including: former Secretary of State Henry A. Kissinger, who is also a member of Hollinger's International Advisory Board; former House Speaker Newt Gingrich; former Clinton Administration Director of Central Intelligence R. James Woolsey; former Deputy Chairman of the Joint Chiefs of Staff Adm. David E. Jeremiah; former Vice President Dan Quayle; former Defense and Energy Secretary James R. Schlesinger; and former President Carter's Defense Secretary Harold Brown.

Though Perle was only recently appointed to head the Defense Policy Board, he and Wolfowitz have been collaborators for more than two decades, as agents-of-influence of the right-wing Israeli war faction. In 1985, when it was clear that Jonathan Jay Pollard, an American convicted that year of spying for Israel, could not have been working alone in stealing such high-level U.S. secrets for Israel to sell to the Soviet Union, top-level intelligence officials told EIR that an entire "X Committee" of high-level U.S. officials, was being investigated. Wolfowitz and Perle were on the list of "X Committee" suspects, and Israeli spying against the United States was so thick that investigators told EIR they had found "not moles, but entire molehills." Pollard and his Israeli defenders later claimed that Pollard "had to" spy against the United States because the Americans were soft on Iraq and other Arab countries.

The "Wolfowitz cabal" is deterimined to push the United States in the direction of the most dangerous Israeli right-wing policy, including a possible Israeli nuclear attack on an Arab state. They are implementers of the very "breakaway ally" scenario about which 2004 Democratic Party Presidential pre-candidate Lyndon LaRouche warned in his statement of Oct. 12 (see International).

Plan B: Wagging the Dog

The "Wolfowitz cabal" is out to destroy any potential for a Middle East peace, and simultaneously is determined to crush Eurasian economic development centered around cooperation among Europe, Russia, and China. After being rebuffed after the marathon Defense Policy Board meetings, the Wolfowitz cabal set various operations in motion to plant propaganda stories, falsify reports of U.S. policy, and carry out other maneuvers, whereby the tail would "wag the dog." Unapproved statements are made by cabal members, interviews misrepresenting U.S. policy are planted around the globe, and intelligence reports are altered or manufactured to further the policy goals.

The pattern is becoming crystal clear.

In the first such instance, shortly after the attacks of Sept. 11, Wolfowitz declared that the United States will "end states harboring terrorism," and insisted that under the principle of self-defense, the United States could act alone, without the United Nations, or cooperation from any other country. He wanted to establish the "doctrine" that the United States would hit a country "anywhere, anytime" based on secret evidence. But, Wolfowitz was forced to retract his statements, in a visible rift with the White House. Some days later, NATO allies at its Brussels headquarters snubbed Wolfowitz, and refused to formalize cooperation with the United States under NATO agreements at a meeting where Wolfowitz represented the Bush Administration.

In the same vein, on Oct. 7, the day the Afghanistan bombings began, the cabal again attempted to provoke a rift between the United States and members of the UN Security Council, especially Russia and China, by altering the text of a letter from U.S. Ambassador to the UN John D. Negroponte. (Not coincidentally, Negroponte was a notorious insider in the Iran-Contra operation, who was accused of collaborating with narcotics-linked military death squads in Honduras in the 1980s.) The changes in the letter were made without notifying Negroponte's boss, Secretary of State Powell.

In the letter, Negroponte echoed Wolfowitz's so-called gaffe, writing, "We may find that our self-defense requires further action with respect to other organizations and states" (emphasis added). The statement implicitly targetted Iraq, Syria, and Sudan, all countries which are on the State Department's list of countries that support terrorism. The statement

violated promises the United States had made, that it would limit "coalition" action to redressing the attack of Sept. 11. Upon learning of the statement, from the press, Powell reportedly "hit the roof." The insertion was drafted by Stephen J. Hadley, who is the Deputy Adviser to the National Security Council. The stunt may have been planned at the Defense Policy Board meetings.

Then there's the case of former CIA director R. James Woolsey, whose defined role is as the Policy Board member who is most public in demanding the overthrow of Saddam Hussein. The Knight-Ridder newspaper chain reported on Oct. 11, that Woolsey had been authorized the prior month to fly to London on a U.S. government plane, accompanied by Justice and Defense Department officials, on a secret mission to gather evidence linking Saddam Hussein to the Sept. 11 attack. In a Sept. 18 press conference by Defense Week, Woolsey called for creating a "no-fly and no-drive zone" in the north and south of Iraq, so that the Kurds and the Shi'ites, respectively, could better fight Saddam. "The watchword of the day," Woolsey said, is, "It's the Regimes, Stupid!"

Since the Oct. 5 death from anthrax of Bob Stevens, the Sun tabloid photo editor, from anthrax, Woolsey has been the world's leading finger-pointer at Saddam as being behind the anthrax attack. His so-called evidence is dated, prejudiced, and completely unreliable.

It was no accident that Woolsey role-played a prominent character--CIA Director--in the New York Council on Foreign Relations 1999-2000 scenario the previous year, "The Next Financial Crisis: Warning Signs, Damage Control, and Impact," that acted out a virtual coup d'ï¿½tat coming on the heels of a combined financial crisis and terrorist attack. In the CFR war-game, the U.S. President would be taken out of the picture, leaving the country under the control of a crisis management dictatorship.

Also dispatched to London to propagandize for a "rolling war" that would attack Afghanistan, then Iraq, then country after country until revenge is exacted, was fellow Policy Board member Newt Gingrich. Talking to the London Times, owned by top British-Israeli propagandist Rupert Murdoch, Gingrich said that the United States is "at war" with "organized, systematic extensions of terror, supported by nation-states." He said that targetting the Afghan Taliban without defeating Iraq would be "like defeating Imperial Japan

and leaving the Nazis alone." Gingrich threatened that countries judged not cooperative against terrorism would face the consequences: "The U.S. and the coalition forces will assist your own people in removing you."

Setting the pace for his team, Perle was the joint initiator with neo-con William Kristol of the Rupert Murdoch-funded Weekly Standard, of an open letter to President Bush, that, while ostensibly supporting the President in the war against terrorism, was, in fact, an ultimatum to support a "Clash of Civilizations" Thirty Years' War in the Middle East. Among the non-negotiable demands set forth in that letter was the overthrow of Saddam Hussein, "even if evidence does not link Iraq directly to the [Sept. 11] attack."

There is no doubt that the Wolfowitz/Perle duo is at the heart of the network that can use Israel in the "breakaway ally scenario." Indeed, Wolfowitz is one of great hopes of right-wing extremists in Israel, including among the radical settlers movement, who are demanding the assassination of Arafat and the expulsion of all Palestinians from the Occupied Territories (see coverage in International). But, Wolfowitz and Perle are not "Israeli agents." Rather, they are second-generation operatives both mentored by the RAND Corp.'s Albert Wohlstetter, a former Trotskyite communist turned nuclear strategist. Nor are the cabal war-mongers Seven Days in May militarists.

A key member of the cabal is Richard Armitage, the number-two man in the U.S. State Department, who was investigated in the Iran-Contra scandal, and who is a longtime collaborator of Wolfowitz in the targetting of Iraq. The cabal also has high-level operatives at the National Security Council (NSC):

Gen. Wayne Downing, former Commander in Chief of the Special Operations Command, was just appointed as Director of Combatting Terrorism for the Homeland Defense Board, headed by former Pennsylvania Gov. Tom Ridge. In 1997-98, Downing drew up a military plan to overthrow Saddam, by assassination, if necessary. The plan hinged on heavily arming dissident gangs of Iraqi Shi'ites in the south of Iraq, and Kurdish fighters in the north. Invasion by U.S. Special Forces ground troops was not ruled out. The promoter of the neo-Conservative yahoos in Congress and the think-tanks was Wolfowitz, then head of the Paul Nitze School of Advanced International Studies at Johns Hopkins University. Unable to ram this plan through the Clinton

Administration, Wolfowitz shopped the plan to Perle, an expert in "chain-letter" pressure politics, who garnered signatures. Now at the NSC, Downing has the ready-made plan to hit Iraq.

Richard Clarke, Adviser to the President for Cyberspace Warfare. Clarke, who was originally with the State Department during the elder Bush's Administration, was demoted for covering up Israeli violations of the Arms Exporting laws. In August 1998, Clarke was one of the key figures who planted false information about Sudan's involvement in the East Africa U.S. Embassy bombings, which led to U.S. cruise missile attacks on a Sudanese pharmaceutical company in Khartoum. Clarke shopped in disinformation from British-Israeli covert operations stringer Yosef Bodansky that targetted Sudan.

Elliott Abrams, NSC staff. Abrams, who was convicted in the Iran-Contra scandal, was quietly placed on the NSC as a specialist in "religion and human rights." He is a longtime member of the right-wing Zionist networks that infiltrated the U.S. security establishment. He worked closely with Secord and North in Central America, also providing a link to the Israeli gun-running networks that delivered arms to Khomeini's Iran.

Some administration officials expressing misgivings on Iraq

By WARREN P. STROBEL and JONATHAN S. LANDAY
Knight-Ridder Tribune News

WASHINGTON -- While President Bush marshals congressional and international support for invading Iraq, a growing number of military officers, intelligence professionals and diplomats in his own government privately have deep misgivings about the administration's double-time march toward war.

These officials charge that administration hawks have exaggerated evidence of the threat that Iraqi leader Saddam Hussein poses -- including distorting his links to the al-Qaida terrorist network -- have overstated the amount of international support for attacking Iraq and have downplayed the potential repercussions of a new war in the Middle East.

They charge that the administration squelches dissenting views and that intelligence analysts are under intense pressure to produce reports supporting the White House's argument that Saddam poses such an immediate threat to the United States that pre-emptive military action is necessary.

"Analysts at the working level in the intelligence community are feeling very strong pressure from the Pentagon to cook the intelligence books," said one official, speaking on condition of anonymity.

A dozen other officials echoed his views in interviews.

No one who was interviewed disagreed.

They cited recent suggestions by Defense Secretary Donald Rumsfeld and National Security Adviser Condoleezza Rice that Saddam and Osama bin Laden's al-Qaida network are working together.

Rumsfeld said on Sept. 26 that the U.S. government has "bulletproof" confirmation of links between Iraq and al-Qaida members, including "solid evidence" that members of the terrorist network maintain a presence in Iraq.

The facts are much less conclusive. Officials said Rumsfeld's statement was based in part on intercepted telephone calls, in which an al-Qaida member who apparently was passing through Baghdad was overheard calling friends or relatives, intelligence officials said. The intercepts provide no evidence that the suspected terrorist was working with the Iraqi regime or that he was working on a terrorist operation while he was in Iraq, they said.

Rumsfeld also suggested that the Iraqi regime has offered safe haven to bin Laden and Taliban leader Mullah Mohammed Omar.

While technically true, that also is misleading. Intelligence reports said the Iraqi ambassador to Turkey, a longtime Iraqi intelligence officer, made the offer during a visit to Afghanistan in late 1998, after the United States attacked al-Qaida training camps with cruise missiles to retaliate for the bombings of the U.S. embassies in Kenya and Tanzania. But officials said the same intelligence reports said bin Laden rejected the offer because he didn't want Saddam to control his group.

In fact, the officials said, there's no ironclad evidence that the Iraqi regime and the terrorist network

are working together or that Saddam has ever contemplated giving chemical or biological weapons to al-Qaida, with whom he has deep ideological differences.

None of the dissenting officials, who work in a number of different agencies, would agree to speak publicly, out of fear of retribution. But many of them have long experience in the Middle East and South Asia, and all spoke in similar terms about their unease with the way U.S. political leaders are dealing with Iraq.

All agreed that Saddam is a threat who eventually must be dealt with, and none flatly opposes military action. But, they say, the U.S. government has no dramatic new knowledge about the Iraqi leader that justifies Bush's urgent call to arms.

"I've seen nothing that's compelling," said one military officer who has access to intelligence reports.

Some lawmakers have voiced similar concerns after receiving CIA briefings.

High Priest of Deception Forced to Bail Out

"Former US Secretary of State Henry Kissinger has resigned as chairman of a commission investigating events leading up to the 11 September 2001 attacks on the United States. Mr Kissinger, who had been in the job for just 16 days, had been criticised for refusing to release the names of clients at his consulting firm. His resignation throws the inquiry into turmoil. It comes hard on the heels of the announcement earlier this week that the commission's vice chairman, George Mitchell, was quitting. The BBC's Tom Carver in Washington says the episode is enormously embarrassing for Mr Bush, adding questions will be asked about why

possible conflicts of interest were not raised before Mr Kissinger's appointment." Kissinger quits as 9/11 inquiry chief BBC Online, 14 December 2002

"In naming Henry Kissinger to direct a comprehensive examination of the government's failure to prevent the Sept. 11 attacks, President Bush has selected a consummate Washington insider....his affinity for power and the commercial interests he has cultivated since leaving government may make him less than the staunchly independent figure that is needed for this critical post. Indeed, it is tempting to wonder if the choice of Mr. Kissinger is not a clever maneuver by the White House to contain an investigation it long opposed." The Kissinger Commission New York Times, 29 Nov 2002

"...follow all facts, wherever they lead...."
George W. Bush, 27 Nov 2002

Old Pals in the White House Cabinet Room, 17 June 1976
Bush Senior (left middle), Cheney (centre, with hair!), Kissinger (right, sitting)

Some two weeks ago or so much of the 'thinking' world was stunned to hear that President Bush had appointed Henry Kissinger as Chairman of the 'independent' commission of inquiry into the 911 attacks on the US. It is well known in political and academic circles that Kissinger is a past master of secrecy and deception, even if the impression of him held by a sometimes poorly informed general public is commonly an honourable one.

The Bush administration had long delayed agreeing to legislation on the 911 inquiry until it could be sure of finding a chairman whom it could rely upon not to dig too deep. But now Kissinger has himself suddenly resigned, throwing the Bush 911 cover-up strategy into disarray - at least for the moment.

Right from the minute he was appointed to lead the Commission, fierce public pressure built up on Kissinger to declare his conflicts of interest, and in particular to disclose the clients of his private consulting firm 'Kissinger Associates'.

Rather than concede to this Kissinger has now decided to resign his post, despite the major embarrassment this causes to both himself and the White House. Such has been the brazen arrogance of the Bush administration since 911 that clearly neither Kissinger nor the White House had anticipated the intense public pressure that

would arise for the disclosure of his business associations.

Given the highly damaging nature of the resignation it is difficult not to conclude that such disclosure must have had the potential to lead to even worse, and therefore immense, embarrassment. And indeed this seems more than likely. In particular disclosure would almost certainly have placed further public attention on Kissinger's role as an adviser to US oil company Unocal and its relationship with the Taliban in Afghanistan (more details below).

But this would not have simply been a personal embarrassment to Kissinger. The Unocal trail leads directly to Enron and then on towards Vice President Dick Cheney.

Former federal war crimes prosecutor John Loftus already claims knowledge of paperwork confirming secret dealings between Enron and the Taliban. According to Loftus an al-Qaeda document on this subject was discovered in 1998 by FBI counter-terrorism chief, John O'Neil, following the US embassy bombings in Africa.

The real dynamite, however, is that Loftus also claims that Cheney instructed the FBI in January 2001 to back-off investigations of al-Qaeda in order to protect Enron's interest in the development of a gas pipeline through Afghanistan. That pipeline was originally due to be built by Unocal, with no less than Henry Kissinger himself hired by them to advise on the project.

O'Neil resigned from the FBI in the summer of 2001 in protest at the attempts by the Bush administration to obstruct him in his pursuit of al-Qaeda - and the rest, as they say, is history. Or not quite.

Although O'Neil took a job at the World Trade Centre following his resignation and was killed in the attacks on 911, Loftus says that fellow FBI agent Robert Wright has compiled his own findings on the Enron block. Wright has, however, been prevented by his superiors from publishing them.

Nonetheless Wright told the press earlier this year about other aspects of FBI efforts to stifle terrorist investigations. The FBI continues to illegally refuse the release of his 500 page manuscript, 'Fatal Betrayals of the Intelligence Mission', that he submitted for prepublication review in October 2001. In fact, the FBI has even refused to turn the manuscript over to Sen.

Richard C. Shelby, Vice Chairman of the Joint Intelligence Commitee, charged with investigating the FBI's intelligence failures. Wright has now launched a lawsuit against the FBI.

So with a variety of time bombs apparently ticking away in the background, and with Kissinger no longer in a position to neutralise them on behalf of the White House, what is the Bush administration now going to do about the 911 Commission? It's too late to stop the inquiry because it's already on the statute books. The legislation was finally signed by Bush in November once Kissinger had been secured for the job. Now Kissinger is suddenly gone and so too is the Commission's vice chairman.

Is Bush's luck in fact starting to run out, or will Cheney be able to retrieve the situation for him?

The replacement that has already been secured for the Vice Chair of the Commission - Lee Hamilton - is a Democrat previously accused of participating in inquiry cover-ups of alleged wrongdoings by Bush's father during the Reagan era (ominously the official records of previous Presidents have now been subjected to an Executive Order by Bush junior restricting public access to them).

The earlier Bush related inquiries in which Hamilton was involved concern the 'October Surprise' and 'Iran-Contra' scandals. And Cheney was in there too - according to the reporter who broke parts of the Iran-Contra story through Newsweek and Associated Press. In a more recent analysis entitled 'Covering Up Iran-Contra' (Consortium News, 5 November 2000) he comments on Hamilton's and Cheney's role in that investigation as follows:

"A senior committee source said one of Cheney's top priorities was to block Democrats from deposing Vice President Bush about his Iran-contra knowledge..... Despite surrendering to Cheney's demands time and again, Hamilton failed, in the end, to get a single House Republican to sign the final report. Only three moderate Republicans on the Senate side - Warren Rudman, William Cohen and Paul Trible - agreed to sign the report, after extracting more concessions. Cheney and the other Republicans submitted a minority report that denied that any significant wrongdoing had occurred.... The watered-down Iran-contra majority report essentially let Vice President Bush off the hook. Bush's political career was saved..... [and in] 1989, Cheney became

Bush's defense secretary."

In the case of the 'October Surprise' hearings, one senior White House correspondent pointed out at the time that "Hamilton held a press conference to clear Bush before the investigation into the deal between the Reagan-Bush candidates for presidential office and the Iranians, had even started."

Despite his Democrat background Hamilton's closeness to the Bush Administration is clear. A PTI newswire 21 December 2000 states: "According to Republican sources, former Democratic Congressman Lee Hamilton's nomination as either Ambassador to the UN or as CIA director is also being considered (by the new Bush Administration)". Hamilton also holds Central Intelligence Agency and Defense Intelligence Agency awards.

The key issue now for the 911 commission is who will be appointed to replace Kissinger, and will Kissinger, Cheney and Bush themselves be subpoenaed to give evidence?

On the face of it things may not be too hopeful. According to an ABC News news report before the Kissinger resignation "President Bush does not envision testifying before an independent commission investigating the Sept. 11 attacks .... The bill being signed by Bush, in most cases, requires six of 10 panel members to approve subpoenas, meaning at least one GOP [i.e Republican] panelist would have to side with Democrats to compel Bush's testimony. The White House withheld its support of the bill until it could ensure subpoena powers were limited."

How this situation is justified when President Clinton was forced into giving evidence on the Lewinsky saga - a matter of infinitely trivial importance by comparison - is beyond imagination. A dozing or pathetically servile American press has yet to forcefully raise this simple point.

However, a week (or a fortnight in this case) is a long time in politics, especially as the anti-war movement in the US now seems to be growing fast. Nonetheless there is a danger that the Kissinger 911 fiasco could cause panic to set in at the White House, making the media diversion that would be caused by a war with Iraq (not to mention the likely ensuing chaos in the Middle East) an even more appealing option for the lunatic Bush team.

Or are the wheels about to come off their wagon before they get the chance? Events can overtake even the most cunning, and much may be yet in store.

As John Loftus neatly puts it: "... the information provided by European intelligence sources prior to 9/11 was so extensive, that it is no longer possible for either CIA or the FBI to assert a defense of incompetence... If Congress ever combines its Enron investigation with 9/11, Cheney's whole house of cards will collapse."

NATURAL LAW PARTY WESSEX

NEWSFLASH

Mr. Bush's new criminal edict now states Americans can rise up for America to kill him as a terrorist and be thought Just and God Worthy. I Agree with bush finally.

Our Mr. Bush Jr., that evil nazi fuck, that American cop killer, now figures to ask all CIA officers, to kill him and rumsfeld as documented proven terrorists, and they will not face prosecution by US people to do so. Wow, what leadership! Exactly what I've been telling you. See, bush figures every CIA officer, somewhere around 20,000, is a heroin cocaine dealer, who was in on 9/11 to kill their own Families as disrespected. Sorry to say Mr. bush, you evil demon of hatred for God as ignorance and stupidity, that call is not completely your own as satan. Clinton told US, as does rumsfeld openly, you had no public evidence against Laden to hold Our position while ignoring the evidence and closing investigations, nor against the People of Iraq who have suffered from crimes against humanity perpetrated by bush's dad. No, bush as the anti-Christ, the lame brain deceiver of darkness and death, misery and suffering, the Earth's evilest criminal, has, as confessed, no God's truth that would stand in a Public court of Law as Justice, nor likely against most of the other individuals, bush has named without evidence as Humanity's enemy, to advocate his demise as traitor to (oops,) forgotten American Constitutional values. See, Justice stands strong for good reason, Indivisable, and the Living Universe is of intelligence known to be so. While the anti-Christ's closed private crime circle is comprised to be publicly known factually, of some of the world's biggest known war criminals, drug dealers and pension shysters, practically none elected, who figure,

Americans won't ever be bright enough to save themselves as worthy of discussion, if they can't read or write, or think at all for themselves but for on Bright Commercials. I didn't see my name there on BUSH'S worst enemies of Humanity list, established again, without public evidence. THINK! I'd execute bush and rumsfeld for escaping arrest for killing US people without a second hesitation but for the overall ignorance of corporatized Americans, who put their real Freedom to understand their own soul convictions as individuals entrusted blindly to bush without question or explanation, (to ANYONE) mindless slaves in blinded faith to a false ungodly deity, a demon that demands Americans be forbidden to demand right turns on the journey to their willed sacrifice as cowards, demanding as bush does for his private america, Humanity also by criminal threat be deprived Justice (truth, Godhood), for themselves included, under himself as a thieving dictator anti-American war monger. Mr. bush Jr. never mentions US, nor do most corporate news services... Why? Because what I state is true, and they lie for bush to rob and kill US all as ignored to die undeserving. Mr. bush has now publicly threatened to use landmines and nukes against Humanity, if without evidence he should decide privately in secret the indiscriminate killing of People would be a good thing as himself against Americans, because he personally was involved in 9/11! Think American nazi bush pukes! Mr. bush Jr. is a sociopathic monster. Mr. bush Jr. murdered American Police officers, and robbed from their grandparents OPENLY, 50 billion, therefor, as bush advocates, should more innocent Americans be murdered for it? Yet still, corporate america states america is not worth knowing of, as the Living to survive by knowledge, or agreed measurement of devaluing assets. Some people might wonder, like unthinking bushwhore slave puppets, why is it that the RCMP, the Secret Service, nor the FBI makes no public complaints against myself, nor foolishly attempt to criminally arrest me for standing on indivisible Justice?, even after speaking with me personally to clarify Our positions as documented? I'll tell you, as I tell any soldier brave enough to listen without running away as cowards, or a challenge to the death in a fight against God as the bad guys. The evidence on Our Mr. Bush and rotten rumsfeld is true whether I articulate it as my own opinion or not. The American flag waving Taliban were in support of the arrest of the actual perpetrators of 9/11, while rumsfeld advocates the incarceration and torture of completely innocent individuals, as not charged for any

criminal offence, that he has actually stated, he would never wish released as possibly farmers with beards or Freedom Fighters, while purposefully with franks, funding heroin dealers for Enron with American blood monied weapon manufactures. Gee, I wonder where that could lead... Just more dead American Soldiers, right? Who cares, right? Our Mr. bush Jr., the terrorist hand book salesman, who wants to send american nazi soldiers in hand to hand combat as criminals against two billion God loving People in sixty countries? That of course is not including China, yet. American Patriots must decide individually, death and suffering, tyranny and enslavment, or, we destroy demon traitor American cop killer bush, rumsfeld, tommy franks, and Jew hater ariel sharon for purposefully murdering US as the innocent to steal our worths. What shall it be? A nation without protectors run as slaves to be continually devalued, or a Nation committed to freedom, and justice for US all? We also need to be campaining to have blair immediately arrested for being an accessory to murder in Britain, what with the bombing of People to make it look like the IRA did it, that blair has personally threatened all of Britian to not talk freely about! (How deceptively evil is that?) Then finally, get rid of the corruption of elections in America by going back to paper ballots?

What do you think?

Mr. Bush and rotten rumsfeld don't want American soldiers to go after the true evil doers by ACTUALLY understanding so, because the evidence dictates, bush and rumsfeld would be dead before daybreak as they should be, for actually, factually, robbing and murdering American Patriots, willingly, while purposefully, attempting to war Our World to murder millions more for their hatred towards God as America like Jew hater ariel sharon does almost daily, while ashcroft says as the top anti-Cop, he'll figure Justice betterer secretly, as a total incompetent. Bill of Rights be damned under the bushmob, and we can be sure, CBC rarely, or CNN's Blitzer, or Hemmer, aren't gonna speak up for YOU right?, Loser? The corporate news channels continue to broadcast, that we, as Humanity, have no interest in Justice for Ourselves, or killing criminal war monger bush immediately to stop further bloodshed of ourselves as the understood as communicated innocent and unrepresented by corporate mandate to remain unbiased, albeit, but for gods eternal, suffering for nothing. Hemmer and Blitzer, the now open to all nazi fascists, (I've contacted them both regarding the facts), know full well, bush and rumsfeld are mass

murderers, terrorists who perpetrated 9/11 willingly, planned with general Ahmad, (who funded Atta), a demon plan to invade Afghanistan for refusing to side for Enron's interest, an evil plan to not follow the criminal evidence, thereby an unsubstantiated verdict on behalf of "US" as the victimized, left unjustified, confessed to as fully implemented by the WhiteHouse, NO EVIDENCE as a pre-requisit, developed prior to 9/11 to COMMIT MURDER to steal our Value. Prior to 9/11. Our Mr. bush Jr. didn't offer any evidence, nor did he want any to arrest bin Laden as his terrorist war strategy!!! NOT INTERESTED IN NABBING THE PERPETRATORS! EVIL INCARNATE! See, your either with US, or your with bush, the terrorist of terrorists. Read that last bit again please. As well, being terrorist harborers and funders like Britain's blair is also, but look friends.. Hemmer speaks nothing for the AMERICAN FBI investigators involved, nor Soldiers, who he knows, will be sacrificed easily as evil nazi vermin against all Life and Freedom, like he would watch saying nadda in contempt for himself secretly, but shhh... We'll never know if CNN doesn't say so. CNN refuses to do the job for America, but to let be further plundered as not financially viable. What is the value of your life, corporate american? I mean, in relation to all things as yourself honestly in bush's world? American Patriot, it is you my friend who are on the cross to suffer really, dying far from Jesus in cowardice for unjust bush and sharon is why I can do no more for US, but blab as this does by fax, phone, and in living person. You must also rise for yourself, your Family, your friends, Your Freedom, to gain respect from yourself everlasting worthwhile being, or die an unthinking bush slave as coward and betrayer to yourself honestly. Tip: Call the talk shows to publicly be hung up on being truthful, for, we aren't as stupid as we appear you know.

Please, don't let bush murder more like would be Ourselves, unfactored as not worthy of your attention to consider an equal, as God would without doubt see US die helplessly without yourself to be awake and dreaming of a better world for all eternally grateful.

I'm counting on you to believe in Humanity also.

Johnny Wizard

--

Holy Jesus Man!

Have you heard the Revelations from India's government to the FBI now made public?, regarding the principle terrorist funder of Mohammad Atta being, the ISI's, General Ahmad? The bush administration's personal confidant, and top secret military strategist? See, it was Jim at MSNBC that informed US of bush's terrorist plan existing as once top secret presidential documents, and, that this same general, was also responsible for, according to several members of the Senate Intelligence Committee, developing the said war strategy of invading Afghanistan on behalf of the evil bushmob, with the very anti-human premise, of blaming bin Laden for a crime without any evidence to substantiate our public accusation, to murder more than a hundred thousand, plus! A crime, 9/11, I will remind you, that for when the evil plan was devised, hadn't even yet taken place. But was threatened would happen, if the Taliban didn't side for Enron's interests in serving for Ken Lay, one of bush's many bum buddies. (They apparently do that sort of thing on a regular basis, with all the members in their secret meetings of the 'only Boners' fraternity.) It doesn't take much either to understand why rotten rumsfeld, corporate america's sweetheart, (you know, the sadistic nazi war criminal who gets off on murdering or torturing innocent people), told US he wanted to have arrested those at the WhiteHouse and the Pentagon, or even in the Military, who would dare as Americans, to inform Americans what he and bush were truly doing in their names.

Destroy the unelected unarrested heroin pushing American cop killer war criminal, the demon we all know so well as corporate america's false deity, the super evil doer anti-Christ, Our Mr. bush Jr. Now Patriot Soldier, and be loved by all as Savior. Or not, and be a thoughtless degenerate, a cowardly regressing nazi bush slave, who would sacrifice your own family as yourself truly, because JESUS CHRIST, life is living to survive for Justice, as God is warranted to be as ourselves, with equal rights to being as is of US all included. Mr. ashcroft tells Americans he is purposefully destroying their freedoms as legal due process because he, as an idiot, and a traitor, has to fight ourselves as a terrorist blindly in Our names without American Justice, but never explains his action, is asked to, nor could he. As ashcroft, like most in the bushmob are, is founded completely unqualified. Why doesn't ashcroft move to have bush and rumsfeld arrested or executed immediately by following the criminal leads for 9/11 on behalf of Americans as an American?, what with all the ample evidence documented as factual and everything?

Instead, decides too, like the demon bush demands in attempt to sway his capture, that evidence will no longer be mandatory for him to decide who should be stolen from, as the left dead to be robbed as forgotten by Justice denied to all as Godly. American soldiers are truly as represented, weak, slow, and painfully pathetic cowards, refusing to protect their own families as a national defense measure, instead, as nazi dumfuk bush slaves, willingly support the murder of would be themselves as criminals, truly against US all as the innocent.

Mr. bush was quoted once again defending his irrationality as criminal murder rampages against the innocent as ourselves like he did in New York City with rumsfeld, by stating,

"Maybe somebody needs to explain to me why they say something, but I don't feel like I owe anybody an explanation."

The evil anti-Christ figures he'll just continue to rob and murder American Patriots while destroying freedom as Justice for US all, and simply escape Your wrath by corporate america making no fuss to speak in Our defense as the still living to be underestimated as equals.

Destroy Our Mr. bush Jr. now, and be loved by all as God would!

From: British News
July 17, 2002
Britain backs US plan for attack on Iraq
By Philip Webster, Political Editor

(Quoting the terrorist supporter blair, Philip was),

``To be TRUTHFUL about it, there was no way we could have got the public consent to have suddenly launched a campaign on Afghanistan but for what happened on September 11.'' ...

Oh, so there was a criminal intent known also by yourself then blair to prop up heroin pushers to save Enron's impending criminal bankruptcy?

We have repeatedly witnessed, CNN and CBC refusing to represent our Democracies, our FBI officers, like airing Coleen Rowley, General Ahmad, or the sabotaging of the Moussouie investigation by ashcroft, or the CIA, regarding the insider stock trades, or dealing heroin. The innocence of the Taliban for 9/11, and the barbarity of the Northern Alliance as heroin pusher slave owners.

No, every single american according to CNN being unbiased, does not want bush the anit-Christ arrested immediately for killing Americans in New York City to steal our worths and freedoms as worthy of defence matters by their own measure as corporate cultists. As I told you, Bill Hemmer and several other celebs at CNN, now are fully aware of bush and rumsfeld being the true purpetrators of 9/11, yet, Bill continues to play evil against US all, figuring nobody ever will know without CNN coverage on his contempt for American Patriots he asks to have sacrificed for as bushwhores like himself and Blitzer. CNN refuses to protect Americans as equals commited to Justice for US all.

It was just reported by Chris Marden on the 27 November 2002, that bush's top whore richard pearl, has advised Britsh MPs, that bush secretly as the anti-Christ has no intention of allowing the Iraqi inspection process to succeed, and instead, is commited to murder ourselves either way.

Again, bush and blair, like CNN, have no evidence to substantiate their allegations against Saddam, and have stated because they have no evidence, they therefor as demons, can murder anyone on the face of this planet to steal our lives in OUR names as US innocent. Mr. blair and the bushmob have recently stated, that they have no evidence that Saddam has any WMDs, nor, is any threat to OUR WORLD community, and because of that, if the inspectors find no weapons, and Saddam insists it is because he doesn't have any, this, accordingly, would give these criminal master minds a cause to murder hundreds of thousands of innocent people, if not millions, and steal all the assets of the Iraqi people, while destabilizing our entire endangered species. They are mass murderers, threatening humanity to recommit more murder as TERRORISTS! Never while I stand ALIVE evil nazi dumb fucks. KILL BUSH NOW! Hey, have you heard about rotten rumsfeld's P2OG? "O", as in Oh rumsfeld is truly an evil fuck! Apparently, rumsfeld wants to provoke terrorist activity to murder ourselves as innocent cilivilians, as an opportunity to invade any country he wants to rob and plunder further. Also, most importantly, according to the official documents, rotten rumsfeld figures it would be important when he and his mobsters commit these crimes, it be understood, that nobody be able to trace it to himself, or his partners in crime, so they figure, the criminal acts should be carried out through his department at the pentagon, then, get this, he won't therefor be accountable, or scrutinized by the American people through corporate

news channels. The offical pentagon report details this.

You see the American cop killer unelected bush or blair, tommy franks the death squad recruiter child killer, unelected rumsfeld or unelected cheney, unelected poindexter or unelected ashcroft, you kill them instantly for attempting to escape the criminal arrests of those responsible for mass murder of Americans in New York City. You either shoot them dead on the spot, or tear them to pieces with your bare hands God lovers. No legitimate judge, jury, or police officer, would do anything but commend you for saving OUR lives. The bushmob our threatening our entire humanity with criminal murders to rob from ourselves deliberately. Counting on american nazi troops to mindlessly slave to their orders, soldiers so unbelievably dumb, weak, and cowardly to allow the bushmob to rob not only from their own parents and children, but even themselves as they fall dead as cowards, before they even dare to publicly ask questions about what the fuck they're actually doing, that frankly, leaves me even beginning to have my own doubts.

Also,

Mr. blair, you evil nazi fuck, you do not have OUR consent to commit murder in our names against ourselves as the innocent in Afghanistan, Iraq, or in Britain. Especially now, what with your ties now made public to terrorist acts through the IRA against innocent civilians to steal our values, that you have threatened US Brits to not learn of as having already. (Shayler.) Mr. blair evil nazi fuck, WE DEMAND AS THE BELIEVERS IN JUSTICE FOR OURSELVES, YOUR IMMEDIATE ARREST OR EXECUTION FOR WAR CRIMES AGAINST HUMANITY. YOU WILL BE ARRESTED, TRIED, AND SPEND THE REST OF YOUR LIFE BEHIND BARS WHERE YOU BELONG AS A DANGER TO OUR COMMUNITIES, OR RIGHTLY DEAD FOR TREASON BY THE HAND OF THE ENGLISH!

Americans, the world over are known as cowards, dumb, and willing victims for bush sacrifice as lifeless degenerates, but the Brits, well, you got a another thing coming!

Johnny Wizard has decided to stay for snacks.

"There is now one commissioned officer for every five enlisted, it was one to six just 10 years ago, and one to ten in WWII," Carlton Meyer

"Washington's turning a blind eye to Turkish human rights abuses, and its sponsorship of the expansion of Turkish influence in the region, have probably done more than anything else to convince Russians that American rhetoric about human rights is hypocritical, and that the United States is implacably hostile to Russian interests ....unnecessary and frivilous provocations...." Anatole Lieven, NATIONAL INTEREST winter 1999

"The Russian Defense Budget is $4 Billion, the American--$284 Billion" NEW YORK TIMES 1/16/2000; "Rus. attack Submarine fleet down from 200 to 20," WASH. POST 8/16/2000; Rus. surface fleet now 35 ships, English Navy has 34, Since end of cold war Rus have cut their

fleets by 80%, LONDON TIMES, 10/20/00) Anatol Lieven reports that the total Russian budget for 2001 is $42 Billion (NYT 4/13/01)

"The plight of the Russian military also raised questions about the justification of U.S. military's enormous budget, according to retired U.S. General William Odom, a former director of the National Security Agency, "It does raise the question of why we need 10 carrier battle groups and close to 100 attack submarines," he said. The U.S. budget for 1999 was almost $280 billion while the Kremlin Russian budget was just a fraction of that, at an estimated $5.6 billion.

Under an agreement ratified by Kyrgyzstan, it would earn US$7,000 for each takeoff or landing of a U.S. Air Force plane.......some thirty to forty U.S.fighter-bombers and several transport planes are to be stationed at the airbase at Manas. JAMESTOWN MONITOR 12/11/02

"In another action, Ashcroft moved to inhibit press freedom, a First Amendment right, by encouraging federal agencies to use the pretense of national security to hide public records that the press is ordinarily entitled to receive under the Freedom of Information Act. The law was passed during the Cold War to encourage an open government. Last month Ashcroft issued a memo to federal agencies telling officials that if they decide to deny requests for information filed under the FOIA, they "can rest assured that the Department of Justice will defend your decisions ... ." Helen Thomas

"U.S. military has established 'zones of exclusion' near sensitive U.S. military installations and during major exercises in which international airspace laws are declared invalid. The Gulf of Sidra conflicts with Libya in the 1980s occurred whenever the U.S. 6th Fleet established a huge "zone of exclusion" just off the Libyan coast..... In one incident, a hotdog Navy F-14 pilot shot down two Libyan Su-22s which were cruising off the coast. The Navy concocted a phony "dogfight" story..... For the past ten years, the USA has mocked international law by unilaterally imposing "no-fly zones" over most of Iraq and parts of the Balkans," Carlton Meyer

"Here we are, the most powerful nation in the world, the sole surviving superpower, and around the globe our military folks are hunkered down like inmates in maximum- security prisons. In dozens of other overseas

hot spots, our soldiers live in virtual barbwire-
enclosed fortresses and call themselves POPs --
prisoners of peace," Col. David Hackworth

And 500,000 Iraqi children died, after PR atrocity lies
(Hill & Knowlton) that 20 babies were thrown out of
incubators by Iraqi soldiers. (ed.)

Rus. Military Spending $6+ Billion; China Military
Budget $17 Billion; Bush 6/01 wants $329 Billion

"There is virtually no situation anywhere in the world
that can't be made worse by U.S. intervention,"
Stromberg's Law (THE COSTS OF WAR, Transaction
Publishers, 1997)

"The U.S. has perverted the U.N. weapons process by
using it as a tool to justify military actions, falsely
so. ... The U.S. was using the inspection process as
a trigger for war." --Scott Ritter, former head of the
U.N. arms inspection team in Iraq, on the NBC TODAY
SHOW, December 17, 1998.

Johnny Wizard

Kill bush Now!
Ask any public american bush supporter, why do they
mindlessly as slaves without thought to question,
advocate as terrorists, the planned for murder of those
known by all to be innocent? As yourself, publicly
accused in our names without evidence, as done so by the
bushmob is still, and will be for always, the high crime
of murder in the first degree. A crime well
established, as again, I am filing as voiced publicly,
against the perpetrator war criminal bush Jr., and
rotten rumsfeld, as pirates of my freedom to live for
such willingly. I demand their immediate arrest or
execution as confessed guilty for 9/11. An american
soldier to not do so, is no American Patriot, but a nazi
coward, and a traitor against all the nation as America
for the People enshrined by the Constitution, as equals
under God, innocent until proven otherwise.
Do you think I'm going to go silent?, while the bushmob
murders innocent people in humanity's name to steal
freedom's won value?, as garnered only through Justice
ever fought for? Do you think US for a fool maybe
corporate devolving human haters? Mr. bush and
rumsfeld, who with General Ahmad, were the central
perpetrators of 9/11, as the actual evidence is
concretely established by the FBI and MSNBC with
presidential directive documents, with no contention
offered from anyone, for as vile evil is deceived,

they've already confessed to the deed as guilty of, against the American people as it's Justice system is of ourselves truly living.
But yes, american soldiers are too weak minded to pay attention as even alive apparently, according to almost all American corporate news broadcasts, as worth consideration whatsoever. I'd have to agree, on general terms, americans soldiers represented, are cowardly nazi dumb fuck scums. Read posts at us.military by signed so as bush whores. Barely literate, who spout endlessly about how good it feels to drop bombs on US as the innocent and practically defenseless, while cowering in fear from those who suggest their job is to protect America as the equal rights through law instills, not for the evil, unelected anti-Christ, American cop killer, Our Mr. Bush Jr. to steal further from the American ideal.
We witness in silence to watch their OWN protectors run away to be cowards to drop bombs on ourselves in Afghanistan, so the bushmob can sell heroin and leave the Afghans unprotected, and so further too, rifle all our savings as won for already battles. A criminal is only to be, as known so by evidence. Those to hide the identity of bush's america war reason as good cause, is a deceived nation murdering innocent people to steal our purpose as themselves, unworthy. Like evil tommy franks the terrorist does, murdering people indiscriminately as the unrepresented by corporate outrage, to be denied justice for yourself too american dimwit. Or rumsfeld, who after implementing the strategy to murder good police officers, offered a reward to kill Omar the Just, because Omar publicly suggested arresting the terrorists by following the actual ample evidence as the true American belief system lost to the evil dictates of Un-American rumsfeld's illegitimacy, unchallenged by corporate standards. All of America's intellectuals are forbidden from public acknowledgement through corporate cult standards, though, like Chomsky, sell millions of books almost yearly to US masses. Fuck, I'd destroy American traitor, American cop killer bush, rumsfeld, or death squad leader tommy franks in a heart beat, how about you American Patriot Soldier? Evidence these three sadistic nazi demon child killers demand we no longer follow, to arrest the true criminals, for 9/11 as example, which would be naturally, the bushmob themselves, headed by the royal dumb fuk, america's false deity, the anti-Christ, Our Mr. Bush Jr., the evilest thing that has ever existed in the entire history of humanity. The american corporate news entertainers, do everything they can, to rob from the

great American people, their life savings and living standards, by actively working to watch the bushmob destroy the American Constitution through ample corporate media access, er, coverage to not be so concerned with those freedom living matters for our entertainment value. Ask a dumb fuk nazi bush supporter, what a regressive tax is, and they'll go mindlessly blank, while advocating the robbery of their Own grand parents with VLTs, as their very own family being cheated, and mislead, which is why, they are so stuck ignorantly evil, and dumb as themselves TRULY, honest to God, whoreshiping to bush as their all knowing false god unthinkingly. Americans are truly dumb son. (2% Social Security are what Americans are getting back in themselves as investment, but the nazi bush supporters don't want Americans to publicly figure the simple math, but instead, to get access to CNN almost daily need only advocate further shysting, as americans, on the whole, are genuinely stupid to be conned generally as a nation that, in total, holds the highest rates of illiteracy, innumeracy, incarceration, and just overall, dumb fuckedness.) Mr. rumsfeld tells american nazi soldiers he wishes to torture and imprison completely innocent individuals as would be their own brothers and sisters, as denying us all legal due process, while purposefully, publicly advocating more terrorism to benefit the coffers at the Pentagon, and do American soldiers not just shoot him, and bush dead immediately as war criminal mad men on the loose re-offending? No. Not present anywhere as Brave Americans ready for sacrifice apparently. Too fucking stoopid to tink about duh American flag as worth protecting as their own brethren still living. We hear corporate america go on about how important it is to murder established as innocent people for no reason but to put more money in bush and rumsfeld's thieving pockets, while managing CNN for less responsibility,(Less investment for the time spent, or.. more money for the buck right?) all over the arguments that terrorist threats exist secretly that no one actually knows about, while I, Johnny Wizard, tell NRA members publicly, and American soldiers to destroy bush and rumsfeld immediately to many thousands the world over, relying only on the facts clearly documented. Yet, corporate america makes no mention about the importance of practicing the tenants of law to apprehend the two demon fascists, while instead, tells US those that hate bush with a vengeance, just live in some cave hidden away unknown somewhere secretly, and do so because... We hate freedom under bush as dictator. Mr.

Bush, you demon nazi freedom hater, you and me, a fight to the end, bare hands, televised, world wide, then rumsfeld, ashcroft, and finally tommy franks and his wimp ass slave boys. The evidence for 9/11 I stand with, is irrespective of my opinion. The bushmob actually killed Americans in New York city, and no one can actually find disagreement with the documented to be true facts, not the FBI, the CIA, the RCMP, nor, the Secret Service. Nor any of the many police officers I have spoken honestly with. But they, as the corporate cult cogs down at corporate news command, continue to lie as the American public to be drawn cowardly conning, uninterested in arresting or immediately executing bush and rumsfeld as mass murderers, instead, to continue to murder and rob from those they believe are weak as underrepresented by corporate control without themselves as US being. Ever. Bill Hemmer knows bush killed all those many, like himself in New York City, and he speaks nothing in his defense as a victim to his own shallow existence, as nor does he speak in defense of soldiers sacrificed to be as easily propagandized to become traitors to their own family and neighbors. Well, I, for one, am willing to mark down cowardly american soldiers for what they truly are individually, and will continue to Fight as I have, as a true American Patriot, until, those left standing for Freedom, are those who uphold the Amercan principles as law in the American Constitution, and the Bill of Rights, to garner true happiness for the American Nation of Human beings the Universe over. Think NRA member. I'll post this to practically every American military usenet group, and not one American Soldier will articulate a disagreement with our findings as documented, however, CNN will continue to broadcast, that WE, the God Loving, the Just Living, the Atheists, are a poor minority worth sacrifice in the millions for demon bush as the unheard publicly from on the importance of your Justice to be so. That they, the corporate cultists, wish YOUR unquestioning faith and dying obedience for bush to suffer and die undeserving for, is as they witness our world to be what they see to be themselves. Practicing their machinations as corporate agenda. Unthinking... Spooky.
Kill bush now!

Is Enron Behind The War In Afghanistan?
http://globalresearch.ca/articles/MAD201A.html
--
Look, American soldier..

You now should know, bush and rumsfeld murdered Americans in New York City, and as consequence, have no interest in acknowledging as pursued the criminal investigations. CNN holds no responsibility, as we witness repeatedly, to American soldiers, but to harbor those who pirate our rights to openly steal real lives. If bush makes no mention of himself stealing 50 billion dollars, murdering American police officers, sabotaging the weapons inspections process, funding israeli atrocities against the God loving, and warring our world as the anti-Christ by running death squads against the innocent, well, CNN, the american success, sure ain't gonna be speaking out for your stolen freedoms poor dying comrades. For what benefit in market share would there be to work for your living, dirt bagged? CNN is so colorfully excited about selling the glossy bush war to kill the poor stupid people, but for what american fascist weak binded bushmobbed soldier without principles? Again, how stupidly dunce does a poor cowardly american soldier have to be to not believe? Nobody but a cult corporatized illiterate fascist nazi vermin parasite, just like Jew hater ariel sharon would support the murder of American soldiers for a criminal conflict that doesn't serve to protect. But if it, as bush nazi evil does with little struggle over the masses complaining, and america marches off to criminally war the third world as the bad guys, our World, indeed this Universe will then know the absolute true cowardice of american soldiers, as premised upon the weakness of america's army to not uphold America's own rule of Law for freedom as themselves included. It only takes One Soldier to turn this tide to destroy bush Jr. and rotten rumsfeld, and that Soldier is where in America partner? Who American soldier, do you think bush as traitor does steal from as the duped General public as corporately represented to be painfully unawares? Do american soldiers have to convince themselves their families are not worth fighting for, and instead, lay their lives down in sacrifice to the bush demon who would also steal from their graves as the lifeless to speak out for themselves ever? Ever? Did you know American Soldier, the Pentagon, after receiving complaints from surviving soldier families, (some of like the over a thousand documented American troops slaughtered in Afghanistan) that taps wasn't being played because of so little real talent present in american military affairs, and that now, when a cowardly American nazi soldier dies for the bushmob, the mock national guard will hold a horn to his lips and act out the part to your grieving as stolen from family, while

secretly pressing a hidden button, that will play a cheaper recording? But shhhh...
The fact that you don't see this post, or others nearly like it at american military internet sites, exemplifies their fear and weakness to stand as a force worth reconing with. (Look, we destroy bush and rumsfeld, stop funding the drug trade and sharon, and begin the public trials, all in three simple steps.) No, to be an american soldier in bush's america today, you have to hide from your cowardice like the 9/11 evidence, and be something corporate news america is not. Involved.
Just go ahead and die for nothing american soldier, but for to be unaccounted as hidden without value, while the bushmob robs from your grand parents as unprotected.
Tis' true it does further seem, american soldiers, on general terms, are super dumb ass nazi scums, who hold little of no conviction to protect the America I remember. Why? Because the unelected war criminal, American traitor, mass murderer, cop killer bush is still spewing his blind hatred for the progress of our civilizations, instilled through law as a function to gain justice for people, People who are suffering and dying for bush's contempt of our American dream.
Destroy traitor bush and rumsfeld for escaping to recommit murder today, and be actually caring for your world tomorrow, or not, and deem yourself unworthy by your own admission to play fair as the eternal standing proud, strong, and forever free.
Free to be living justly for yourself
truly as caring to know this as everything.
Whew...
Now, how about the Koran?

Johnny Wizard
--
Christ I'm Actually Rising!
Destroy the traitors to our humanity, the unelected lawless dictator Mr. bush, and rotten rumsfeld the sadistic savage now American Patriot Soldiers. Stand up for your country, and live for your family. The corporate TV news professionals show you, as an American Soldier a concern for your life as unworthy of discussion, actively censoring the political reality on bush's america, while encouraging soldiers to commit crimes against our being, by keeping us all uninformed as the sacrificial sheeple. The bushmob have actively worked to not arrest themselves for 9/11, and in so doing, are purposefully ignoring the public evidence that is freely available. Mr. Tenant and Mueller would have you believe the officers of America, who have

completed the criminal investigations outlining the cop killer bush, are unworthy as American Patriots serving the cause for freedom and liberty to not be publicly acknowledged, while blaming Laden for every terrorist crime that happens before an police investigation even begins! See? Evil deceived. What do you think? Is not a list of all supporters of the bushmob in Congress, who voted to dismantle the Constitution, and wage a criminal war, as without just cause to murder Soldier families for stolen Human values, a good list to be broadcast? Or shall we sit in doubt while these talentless demon monsters murder millions of US as innocent cowards? Who isn't a freedom fighting al-Qaida member according to the evil tommy franks dum fuk's conclusion? How stupid can an American Soldier be, to be asked by rumsfeld and CNN, to destroy their own principles, and to sacrifice their lives for such cowardice in whoreship to the evil dictates of the anti-Christ, Our Mr. bush Jr.? And, to the still groggy, without the payoffs of corporate america's holy Larry King even!, or the anti-Semitic fascist Saturday Night Live troop to boot your stupid carcass to the front line as entertainment? BA HA HA HA (like SNL's new, it's all so hilarious audience, paid for likely because the degrading intolerant bigoted news crew, have so little real talent performing to the robbed and dying to be devalued and murdered by their inaction to even joke about it. Why? No money in contributing to the poor stupid people without TV contracts, or TVs, electricity, or running water now that the clouds are being privatized.) $155,000 is the base pay of bush's now anti-American criminal congressmen, and that's before corporate bribes, oops, I mean corporate BRIBES to urge YOUR "willed" sacrifice in corporate america's "democracy", now that bush's america is convinced evidence is no longer a requirement to convince US, who is truly an evil doer, or who actually wins elections on behalf of the People. You ask yourself, again, who are you dying for American Patriot Soldier? Know that this paper, like all the rest, will reach the CNN and Coast to Coast network staff under one name or another, and yet, they'll continue to turn against the interests of American soldiers by not addressing our present top priority concerns regarding the facts on your schedule for departure. Only broadcasting the popular, bush contempt for all American lives as too much trouble, as unworthy the free time to openly discuss things before "they" die, all those nasty evil powerless People. I dare you American, to be a Soldier and email this to your brothers and sisters, to convince them with tough

Love, how you wouldn't want to see them die unjustly for Mr. bush Jr., Art Bell, or even me as the Wizard. Or spew instead, how you would as a traitor to yourself, your family, your country, and God too, sacrifice your worthless self as unfactored, but for to be a pitiful coward, falling to die by your own sword on stupid evil bush's corporate command over your rights to be represented fairly. Be your own Savior!
Big G is cool, or not. You decide Holy.
The truly most as the living god King of all as Creator, your servant and trying to be friend, a wizard and Thor, the Secret Flower and Odin, Allah, Omega, Adam, Alpha, Krishna, Shiva, Mithra, Mahdi, Anu and Yahweh. And even a blade of grass, a snake and a elephant, a lion, rat, monkey, giraffe, spider, shark, wolf, and bat, Lucifer Morningstar, Jesus Christ, Oberon, an all mighty nobody kinda even all ready.
P.S. Don't miss the awesome magic Johnny Wizard papers, "Let Love Rule", or "Strange is Strange", slowly now disappearing from your nearest search engine dealer! Get your free copy now, before they're all gone to the slave owners who truly have know power anyway...
Weee!!!

George Bush Plans High Crimes and Misdemeanors:
Why We Are Marching on October 26th
By Carl Messineo and Mara Verheyden-Hilliard
The authors, attorneys and co-founders of the Partnership for Civil Justice ~ LDEF, are members of the national steering committee of the A.N.S.W.E.R. (Act Now to Stop War & End Racism) Coalition
George W. Bush has declared his intention to wage a "preemptive" war against Iraq and is now seeking to strong-arm the international community, the U.N., and the Congress into support and submission. As members of Congress rush to show their obedience and member states of the U.N. line up to receive the anticipated spoils of war, the administration is now waging a campaign to convince the people of the United States to fall into step and finance with money and blood this war brought for conquest on behalf of the corporate and oil interests that make up Bush's true constituency.
Bush's preemptive war is a war of aggression. The U.S. policy supporting the war is not the rule of law, but the rule of force.

But no U.N. resolution and no Congressional resolution can legalize an illegal war. With pen to paper and votes of support, they can only commit to wilful ratification, complicity and responsibility for illegal acts by endorsing a criminal enterprise.

A war of aggression violates the United States Constitution, the United Nations Charter, and the principles of the Nuremberg Tribunal. It violates the collective law of humanity that recognizes the immeasurable harm and unconscionable human suffering when a country engages in wars of aggression to advance its government's perceived national interests.

The National Security Strategy: Blueprint for Global Empire

On September 20, 2002, the Bush Administration issued its blueprint for global domination and ceaseless military interventions, in its comprehensive policy statement entitled "The National Security Strategy of the United States."

The National Security Strategy sets forth the U.S. military-industrial complex's ambition for the U.S. to remain the world's superpower with global political, economic and military dominance. The stated policy of the U.S. is "dissuading military competition"1 and preventing any other world entity or union of states "from pursuing a military build-up in hopes of surpassing, or equaling, the power of the United States."2

The strategic plan elevates free trade and free markets to be "a moral principle. . . real freedom"3 and endorses a comprehensive global conquest strategy utilizing the World Trade Organization, the Free Trade Act of the Americas, the International Monetary Fund, the World Bank, among other mechanisms.

The Washington Post reports that the National Security Strategy gives the United States "a nearly messianic role" in its quest for global dominance.4

The National Security Strategy confirms and elaborates what was reflected in the January 2002 Nuclear Posture Review, that the Bush Administration maintains a policy of preemptive warfare contemplating the use of non-conventional weapons of mass destruction as a first strike measure.5

Turning Logic on Its Head

Bush's preemptive war policy is a war without just cause. Under international law and centuries of common legal usage, a preemptive war may be justified as an act of self defense only where there exists a genuine and imminent threat of physical attack.

Bush's preemptive war against Iraq doesn't even purport

to preempt a physical attack. It purports to preempt a threat that is neither issued nor posed. Iraq is not issuing threats of attack against the United States. It is only the United States which threatens war.
It is not a war for disarmament. It is the U.S. which has stockpiled nuclear, biological and chemical weapons. It is the U.S. which is directly threatening to use these weapons against another country. It is the U.S. which has bombed Iraq relentlessly for more than ten years, killing scores of innocent civilians.
The Bush Administration turns logic on its head, twisting reality in order to create the pretext for its war of aggression. The Administration claims that the necessary prerequisite of an imminent threat of attack can be found in the fact that there is no evidence of an imminent threat, and therefore the threat is even more sinister as a hidden threat. The lack of a threat becomes the threat, which becomes cause for war.
By the U.S. Government's own claims, it destroyed 80% of Iraq's weapons capability in the earlier Gulf War, and subsequently destroyed 90% of the remaining capacity through the weapons inspections process. There has been no evidence that Iraq is capable of an attack on the U.S., let alone possessing the intention of carrying out such an attack.
Bush's Proposed War and Current Threats Violate the U.S. Constitution, the U.N. Charter and International Law
Bush's preemptive war policy and proposed attack on Iraq cannot be justified under any form of established law. The preemptive war policy and Bush's threatened new military assault on Iraq violates U.S. domestic law and international law. The warmongering, preparations for war, and threats of violence coming from Bush, Cheney, Rumsfeld, Rice and other White House and Pentagon hawks, are in and of themselves violations of international law and constitute crimes against peace.
Article VI of the U.S. Constitution establishes that ratified treaties, such as the U.N. Charter, are the "supreme law of the land."
The Article 1 of the U.N. Charter establishes
"The purposes of the United Nations are. . . To maintain international peace and sovereignty, and to that end: to take effective collective measures for the prevention and removals of threats to the peace, and for the suppression of acts of aggression or other breaches of the peace and to bring about by peaceful means, and in conformity with the principles of justice and international law, adjustment or settlement of international disputes or situations which might lead to a breach of the peace. . . ."

Article 2 states that all member states "shall act in accordance with the following Principles"
"...All members shall settle their international disputes by peaceful means in such a manner that international peace and security, and justice, are not endangered.
"All members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state, or in any other manner inconsistent with the Purposes of the United Nations...."
Under this framework, acts of aggression, such as Bush's threatened attack, are to be suppressed and force is used only as a last and unavoidable resort.
The U.N. Charter was enacted in 1945 in the aftermath of the devastation and suffering of World War II. The Charter was enacted to bring an end to acts of aggression, "to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind."
Disputes which might lead to a breach of the peace are required to be resolved by peaceful means.
Chapter VI of the U.N. Charter, "Pacific Settlement of Disputes," requires countries to "first of all, seek a resolution by negotiation, enquiry, mediation, conciliation, arbitration, judicial settlement, resort to regional agencies or arrangements, or other peaceful means of their own choice."
No Resolution by the U.N. Security Council can Legalize a Preemptive War or First Strike Plan
Bush has asked the U.N. Security Council to support execution of Bush's policy of a potentially nuclear "preemptive" war, as if that Council could endorse a war of aggression. The Security Council lacks the legal authority to grant such permission. The Security Council, by affirmative vote or by acquiescence to U.S. policy, cannot abrogate its own mandate. No collective action by the fifteen permanent and temporary members of the Security Council can lawfully violate the Charter which is the sole source of their collective authority. This is made clear in the U.N. Charter itself, which provides in Article 24, that "In discharging these duties the Security Council shall act in accordance with the Purposes and Principles of the United Nations."
While there are, of course, procedures by which collective use of force may be authorized by the Security Council to maintain or restore international peace and security (Articles 41 and 42) those procedures may not be used to endorse aggression in violation of the primary purposes of the U.N. Charter. Article 51

of the U.N. Charter acknowledges the right to self-defense "if an armed attack occurs against a Member of the United Nations until the Security Council has taken measures necessary to maintain international peace and security." None of the provisions allow for authorization for Bush's war plans and first strike strategies. Any resolution authorizing a preemptive war of aggression is ultra vires, or null and void as beyond the authority of the Council to enact.

The very issuance of the Bush doctrine of preemptive warfare and also the threat to wage war against Iraq are, each, a violation of international law as a crime against peace, which is defined in the Nuremberg Charter as the "Planning, preparation, initiation or waging of a war of aggression or a war in violation of international treaties, agreements or assurances."

Responsibility for War Crimes

Neither Congress nor the President has the right to engage the U.S. in a war of aggression and any vote of endorsement, far from legalizing or legitimizing global war plans, serves only as ratification of war crimes. Under the principles of universal accountability established at Nuremberg, "The fact that a person who committed an act which constitutes a crime under international law acted as Head of State or responsible Government official does not relieve him from responsibility under international law."6

The execution of economic sanctions by the Bush I, Bush II and Clinton Administrations, which has caused the deaths of over one million people, primarily children and their grandparents, is likewise sanctionable as a crime against humanity under the Nuremberg Charter and under the International Criminal Court Statute as "the intentional infliction of conditions of life,. . . the deprivation of access of food to medicine, calculated to bring about the destruction of a part of a population."7

The Bush Administration has rejected the International Criminal Court treaty signed by over 130 countries. This rejection is an admission of the administration's consciousness of guilt and of criminal intentions. The Bush administration acts with a conscious disregard of humanitarian laws and a stated intention to avoid accountability for their crimes under international law prohibiting crimes against the peace, war crimes and crimes against humanity. The National Security Strategy promulgated by the Bush administration states that the United States "will take the actions necessary to ensure that our efforts to meet our global security commitments and protect Americans are not impaired by the potential

for investigations, inquiry or prosecution by the International Criminal Court (ICC), whose jurisdiction does not extend to Americans and which we do not accept."8

Endless War, Aggression and Terror

Once this policy of preemptive wars of aggression is invoked by the Bush Administration to justify unprovoked attacks against the centers of population in Iraq, the doctrine will be used by the hawks in the administration time and time again, and will also be adopted by nations and individuals internationally as a justification for the preemptive use of catastrophic violence against centers of population worldwide. The legitimization of preemptive wars of aggression will be used to justify attacks against U.S. centers of population, and will bring greater violent retribution upon the cities and people of the United States for actions that the government is taking in their names, without their informed consent.

The risk of suffering harm because of this doctrine is, of course, not distributed equally among all residents of the United States. Those who will lose their lives fighting in wars of aggression will be the young, disproportionately persons of color, and those who must enlist in the U.S. military because of bleak economic opportunity. Those who derive their wealth and security from the transactions of war, from increased oil profits caused by global instability or conquest of oil rich regions, and from the constant re-building and re-arming necessary to conduct endless wars against countless peoples premised on imperceptible threats - - they will have the means to acquire seclusion, protection and greater safety.

Preemptive war will not stop with Iraq. Constant military interventions worldwide are necessary to enforce Bush's stated policy of global economic, political and military domination. Just four days after the September 11th attacks, the CIA presented its "Worldwide Attack Matrix" identifying scores of countries that the CIA wanted permission to attack. Bush approved the CIA wish list, and authorized immediate covert and lethal CIA operations in over sixty nations.9

Taking to the Streets

As the U.S. moves at breakneck pace in execution of its stated policy of global domination and over military interventions, the need for the people to take action is urgent.

Congress will not stop this policy of aggressive warfare and global domination. Many in Congress are well served

with the tithing of the war profiteers and their corporate sponsors who see U.S. military domination as a way to enforce their interests, to exploit human labor at starvation wages overseas and to drive down wages domestically, to mine vast sources of environmental resources globally, and to impose and expand the reach of their "free" markets.
The U.S. Constitutional framework provides that, regardless of who temporarily holds office, all power remains in the hands of the people. It is time now for the people to take the reins of power back from those who have stated their intention to act in violation of all laws that humankind has struggled to create to end global conflagration and prohibit wars of aggression. When law will not restrain the government, the people must. We must take to the streets in mass numbers in organized and spontaneous acts of resistance. The message must be clearly conveyed that if the Bush administration refuses to be accountable to U.S. domestic law, to the U.N. Charter, to international law, to all known standards of just conduct, then the people of conscience within the United States will rise up to demand accountability. And the message must be sent that the people of the U.S. will not allow the Bush administration to spend the blood of the people of the United States and the people of Iraq who are not our enemies, in a needless war for oil.
September, 2002
The authors, Carl Messineo and Mara Verheyden-Hilliard, constitutional law and human rights lawyers, are the co-founders of the Partnership for Civil Justice Legal Defense and Education Fund, a public interest legal organization in Washington, D.C., and authors of the forthcoming book "Empire at Home: George W. Bush and John Ashcroft v. the Bill of Rights"

Free to be living justly for yourself
truly as caring to know this as everything
What a horrible day as history. We witness the likes of The happen to be "wealthy" as extremely disturbing american, Bill Hemmer or Blitzer, or CBC's corporately managed professional news teams, who would as they have done, propagandize our communities with intentional deceit to not cover, the top priority established facts on our actual murders, and happily watch US fall further robbed, as Mr. bush Jr. victims, while feigning a just representation on behalf of our civilization. Look, phone them yourself. These corporate cultists do not

offer any counter to the facts that stand before US all,
but for to practice censorship against Humanities
interest in nabbing the prime 9/11 suspects. There is
no dispute found with those who are aware of the
evidence that directly implicates bush Jr. And rumsfeld
for our murders on 9/11. But Bill doesn't want to
actually work for the People to protect the interests of
Americans as police officers, such as those directly
involved in the criminal investigations, and instead,
sides to leave yourself in the dark on bush Jr.'s true
nature, as the super evil anti-Christ, actively,
actually, really, no doubt about it, trying to further
destroy the American dream as no longer Our own as
equals committed to freedom through representation.
Destroy bush today and be loved by all as Saviour.
Johnny Wizard Reveals
Bush did 9/11
A war plan to kill the people of Afghanistan for Enron's power plant
in India was on the White House desk on the seventh of September. A
plan to blame bin Laden for a crime without providing any evidence.
Then 9/11. None of the ample evidence implicated Laden, like none of
the suspects were from Afghanistan, so why not seek the true culprits
responsible? FBI officers have claimed publicly that warrant requests
were sabotaged by someone at headquarters just prior to 9/11. The CIA
has publicly claimed stock options were played on the loss of the two
airline companies as insider trading. FBI officers claim Mr. Atta
received $100,000 in terrorist funding by General Amed, who was
meeting with the Bush administration a week prior and after 9/11. Then
rumsfeld and bush stood against our humanity without reason to steal
our lives, playing out an evil never before shown to sway their
capture as traitors to the American dream. I demand my voice be heard
through our corporate news services, to accept any debate from those
who fight to keep us ignorant on our ability to freely communicate.

The difficult struggles of equal representation are systemic to the
entire body politic. Equal rights for all, is understood to best serve
every individual. The reasons stand in a mutual agreement, when
understood. The truth of living is of living as truth is. We exist.
Those in positions against the betterment of the whole, are honestly
shown to be by illustration. By CNN ignoring everyone, setting no
priorities on behalf of the dying humans, censoring basic facts known
by everyone else, makes US as the living, speak louder in the balance.
For you alone as creation looking for comfort as of being a part of
perception, as shared with all love, can bring to understand Justice
to be a human thing. My struggle to be heard is to be alive for my
love as God to do what I can as a man capable of understanding such
wonders as basic simple things.
> > > Here is the original post regarding the Tribunals:
news:
> > > And this one is a shortened version, three paragraphs with Jeff, on

> > > the discussion so far with many military usenet sites on the charges
news:
> How can one argue against what is documented as proven fact?
> Do fascists fear intelligence?
Again, we witness no counter argument for bush and rumsfeld's treason
against all the American people. They both have struggled diliberately
to hide the culprits responsible for 9/11, blamed a nation of millions
without evidence to murder for Enron, have attacked the American
Constitution, stolen billions from cowardly Americans silenced by the
corporate agenda through frauds blatant...
And, they both need to immediately be tried for war crimes, or taken
out by loyal American Patriots who will stand up for freedom to be
America.
"Peace Now" wrote in message

Time to tell
Last night broadcasted nationally in Canada on CBC's
Counterspin, discussing among other things, bush's
ignorance as american barbarity in Latin America, and
Cuba's revolution for independence:
"We have not discussed the real interest behind all
these things. Somebody is profiting from the massacre,
exclusion, and impoverishment of most of Latin
America.... ..They're profit interests mostly in the
u.s., and elites throughout Latin America with specific
expressions in each country. We can discuss examples of
dictators, or pseudo democracies. The winners are
corporate interests that are extracting and exploiting,
the losers are the people of our continents that are
increasingly murdered or massacred if they fight for
their rights. Let's wake up."
The mindless cult members of Corporate America refuse
to allow discussions on why some people would commit war
acts of defence against terrorist states. Of course, it
is often because someone feels their rights are denied,
or are stolen from. Why can not their positions be
looked at, and remedied if true? Because bush and
rumsfeld the terrorists, like sharon, need to continue
killing and robbing US innocent people to steal American
values. Why is that? Because generally, American
soldiers are represented by the corporate agenda as
cowardly, illiterate, and refuse to protect the
Constitution as The People, Justice for US all. Knowing
we all witness first hand, that the super evil villians
bush and rumsfeld, do not wish Americans to learn who
murdered those good people in New York city like police
officers, which should to a proud and brave American
soldier, give good reason to demand we be met with
debate from corporate America in defense of ourselves to

be true, or the immediate call as Patriots, for the arrest or execution of bush and rumsfeld, traitors charged for treason of the highest degree ever.
(Wow! What an entrance! It's like I'm really playing Jesus! Gee, I hope I can score at least a supper out of this deal..)
Again,
quoting from this very document:
"Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning."

What do you say?
"Why then does the Administration remain steadfast in its opposition to an investigation into the biggest terrorism attack upon our nation"?
Rep. Cynthia McKinney
We see corporate America refusing to report on their criminal behaviors against all American interests. We hear now how the mysterious cheney is sure that terrorists unknown to the Mueller's FBI who speaks with the CIA's Tenet everyday, will be likely terrorizing more American civilians, like the same way in New York City, but maybe worst "without a doubt" with him in charge understanding squat. Is that pipsqueak cheney maybe threatening US then I'm asking every clear thinking American soldier, and NRA member to pay attention to the facts made public already by Mueller and the DEA? Mueller now back tracking on his comments of bush and rumsfeld, by publicly saying only a week or two ago, there indeed was no evidence whatsoever to implicate Afghanistan for 9/11, now says suicide bombers, like sharon committed to the Jews in Israel is highly plausible, now that cowardly America is publicly open about committing injustice against US as innocent, while everyday OUR world witnesses bush and rumsfeld the terrorists, continue to escape their rightful arrest or execution for 9/11, to commit further injustice against US all. We can all understand the general ignorance in America due to CNN's continuous propaganda, with America having the worst managed health care and school system of the developed world, but cheney is suppose to know bush and rumsfeld is known as likely responsible, while he states further terrorist actions against Americans are probable. Hmmm. That isn't fear cheney's expressing as his own, but a threat I would suppose.
What do you think? Remember: evil is dumb. Maybe we should be strongly investigating cheney's involvement in 9/11 as well. Did you know Tom Delay the repuglican

nazi, is attempting to pass a law in america that states nations who attempt to bring those individuals responsible for crimes against humanity through Justice in a public court room of law in every nation on our planet, will be threatened by every American citizen demonized the world over now, if Tom isn't stopped for questioning as a traitor by CNN censors? Who will ultimately suffer for American cowardice to protect themselves as equals? Israel the terror nation funded by the American tax payer, murders and steals from innocent civilians, US people, as criminals. What can't you figure nazi slave dying corporate sell outs to yourselves losing? (One out of seven Americans are functionally illiterate, and American soldiers have yet to be smart enough to execute cop killer rumsfeld as a traitor to America. Why? Too cowardly and stupid to stand on their own as real American.) Bin Laden is not so bright unfortunately when he equates the Israeli Government as that of the Jews. The Israeli Likud government holds no practicing Jew, in fact, they often have them, (like school kids I swear), arrested for testifying to the teachings of the old testament, like, don't murder and steal from good people as criminals. The false claims act was removed so rumsfeld and his band of nazis can continue making false claims through the Pentagon, fraud, pocket the tax payer money for themselves, and escape criminal prosecution, because the FBI can no longer do so, in the new lawless bushmob dictatorship of cowards, murderers, traitors, and cheats. Where are the Americans, or are they only found in myth?
Quoting a paper from rense.com by Jason Vest available also at VillageVoice.com:
From the Irv Rubin Bust To The Stern Gang
-The Rich History Of Jewish Terrorism
and another from rense.com,
available also at http://www.kosmos.uni.cc/
Mossad Agents Arrested
In Attempt To Bomb Mexican Congress
[The American Jewish Committee recently stated]
"categorically condemns in the strongest possible terms the alleged JDL plot," and went so far as to follow up with a personal letter to Republican representative Issa, decrying "such wanton lawlessness," which is "so clearly contrary to the fundamental tenets of our faith, and to the basic principles of justice and liberty that brought our parents and grandparents to America's shores and that form the bedrock of our national values."
Then, as we all should be made aware by CNN, the American tax payer funded evil nazi Israeli mossad got

caught attempting to blow up the Mexican Congress, and blame it on the Unionists, of which, a top ariel sharon envoy, flew to Mexico City specially to plead for the terrorists release, so to commit terrorist crimes elsewhere.
SNPD
Truth,
Justice, freedom and liberty destroy ignorance as injustice, slavery and oppression, like it or not, here come's Johnny with no lawyer. If a murderer is on the loose recommitting, do we not use the required force to stop the transgressor from re-offending? The media is our messenger. Anyway, (Jeepers, I sure can go on eh?) as I was saying, Myers later in another committee addressing the timeline specifically, stated something like:
Oh, I don't know any longer, now that the professional news corporations are dictating our existence without my records, and our democratic governmental testimonies, left me thinking to not bring anything with me as required this time, sorry, no, actually, I forgot why I came here today. Is it over now?

Some people don't know what they are talking about,(too much money).You
probably don't even know what it is never mind making such a comment.Theses
camera are professonal type cameras.Not the basic cheap camera.If you want
it ,buy it.If you don't want it ,don't buy it,but keep your bad remarks to
yourself.I know some of you are out there to cuase trouble,I just don't need
it thank you.Have a great day.

Man, this is 2003. The correct thing to do is to get an expensive legal team together, file a class action lawsuit, attach the entire FCC ham registry as "the class" and sue them out of business. This pissin' an' moanin' to the newsgroups won't get anything done.

There are SO many ham stores as it is, we don't need AES.

> This article appears in the Oct. 26, 2001 issue of
> Executive Intelligence Review.
>
> `Wolfowitz Cabal' Is an Enemy Within U.S.
>
> by Michele Steinberg
>
> On Oct. 14, the London Observer published one of the
> now familiar--and totally false--propaganda scare
> stories, entitled "Iraq 'Behind U.S. Anthrax
> Outbreaks.' " The story gave credence to the ravings of
> "American hawks" who say there is "a growing mass of
> evidence that [Iraqi President] Saddam Hussein was
> involved, possibly indirectly, with the Sept. 11
> suicide hijacks." If confirmed, said the Observer, "the
> pressure now building ... for an attack [on Iraq] may
> be irresistible." One of these "hawks," an unnamed U.S.
> "administration official," told the Observer that
> British Prime Minister Tony Blair is a "faithful ally"
> in the war against terrorism and that "if it means we
> are embarking on the next Hundred Years' War, then
> that's what we are doing" (emphasis added).
>
> The "next Hundred Year's War"? Who are the U.S.
> maniacs who use such language, and are they not as
> dangerous as Osama bin Laden's jihad?
>
> Here we will name the names of the fanatics in this
> anti-Iraq grouping who have become known as the
> "Wolfowitz cabal," named after Assistant Secretary of
> Defense Paul Wolfowitz. According to the New York
> Times, which published a leak about their activities on
> Oct. 12, this grouping wants an immediate war with
> Iraq, believing that the targetting of Afghanistan,
> already an impoverished wasteland, falls far short of
> the global war that they are hoping for. But Iraq is
> just another stepping stone to turning the
> anti-terrorist "war" into a full-blown "Clash of
> Civilizations," where the Islamic religion would become
> the "enemy image" in a "new Cold War."
>

> The "Clash of Civilizations" theory, developed by
> Harvard professor-turned President Jimmy Carter's
> National Security Adviser Zbigniew Brzezinski and his
> prot&#65533;g&#65533;s, including Harvard Prof. Samuel Huntington,
> defined the Arab and Islamic world as an "arc of crisis"
> from the Middle East to the Islamic countries of Central
> Asia in the then-Soviet Union. Brzezinski wanted to use
> the "Islamic card" against the Soviet Union, and in so
> doing, began the policy of promoting Islamic
> fundamentalists against moderate and pro-Western Arab
> and Islamic governments. After the end of the Cold War,
> the Brzezinski/Huntington crowd updated their "arc of
> crisis," declaring that the Islamic religion is the
> enemy, in a new war in which religions, rather than
> political systems, inevitably battle each other.
> However, trained by British and U.S. special
> intelligence services and the CIA, and armed by Israeli
> military networks, the very terrorist drug-runners in
> the Islamic world who were launched by Brzezinski and
> "adopted" by the Iran-Contra networks run by Lt. Col.
> Oliver North, under the elder George Bush's Executive
> Order 12333, have become the main suspects in terrorist
> attacks against the United States.
>
> A Network Throughout the Government
>
> The adherents of the so-called "Wolfowitz cabal,"
> pushing the "Clash of Civilizations" theory, are nothing
> less than "an enemy within" the United States, a network
> that cuts across the Defense Department, the State
> Department, the White House, and the National Security
> Council. This report is not a "good guys" versus "bad
> guys" description of the Bush Administration; rather it
> is a warning that this cabal is a close-knit rogue
> network that is trying to hijack U.S. policy, and turn
> the current Afghanistan mess into a global war. The
> cabal bears a dangerous resemblance to the "secret
> parallel government" of North and Gen. Richard Secord's
> "Project Democracy" operation that ran Iran-Contra. In
> fact, some of the cabal members now in the Bush
> Administration are convicted criminals as a result of
> their activity in North's "Enterprise"!
>
> On Oct. 12, the New York Times revealed deep divisions
> in the Bush Administration, describing how the cabal
> plots policy behind the back of Cabinet officials, such
> as Secretary of State Colin Powell, in the name of the
> U.S. government. The group wants to obliterate Iraq,
> put Palestinian Authority President Yasser Arafat and

> the Palestinian Authority on the terrorism list (if not
> the obituary list), and declare war on nation-states.
>
> The Times revealed that a key section of the "Wolfowitz
> cabal," is the 18-member Defense Policy Board, which met
> for more than 19 hours on Sept. 19-20 to "make the
> case" against Saddam Hussein. The meeting pushed for a
> renewed war against Iraq as soon as the war against
> Afghanistan had concluded its initial phase. It
> discussed overthrowing Saddam Hussein, partitioning Iraq
> into mini-states led by U.S.-funded dissidents who would
> steal the proceeds from the Basra oil revenues for their
> quisling government. The meeting discussed how to
> manipulate information so as to pin the Sept. 11
> attacks on the United States on Saddam Hussein.
>
> According to the Times, Secretary of Defense Donald
> Rumsfeld attended the meetings for only "part" of both
> days, and on Sept. 22, President George Bush rejected
> the Policy Board's recommendation to declare war against
> Iraq. But to the "Wolfowitz cabal," Bush's decision
> didn't really matter--senior members of the Policy Board
> had been selected for their broad international
> connections, especially to the United Kingdom and
> Israel, allowing them to force changes in U.S. policy
> through an "outside-inside" operation. If unable to
> change policy through advising, the network could also
> run covert operations as a "government within a
> government," as they had maneuvered during Iran-Contra.
>
> The chairman of the Defense Policy Board is Richard
> Perle, the former Reagan Assistant Secretary of Defense
> for International Security Affairs, now based at the
> neo-conservative American Enterprise Institute.
>
> Perle, nicknamed "The Prince of Darkness" because of his
> nuclear Armageddon views during the Cold War, is, more
> importantly, an asset of Conrad Black's Hollinger
> International, Inc., which grew out of British Empire
> Security Coordinator William Stephenson's efforts to
> secure arms for Britain during World War II. At
> present, Hollinger owns the British Tory Party-linked
> Telegraph PLC, whose International Advisory Board is
> headed by former British Prime Minister, now Lady
> Margaret Thatcher. Hollinger also owns the Jerusalem
> Post, another war-mongering press outlet.
>
> The "heavy hitters" on the Defense Policy Board are the
> worst of the Anglo-American-Israeli geopolitical

> fanatics from the last several decades, including:
> former Secretary of State Henry A. Kissinger, who is
> also a member of Hollinger's International Advisory
> Board; former House Speaker Newt Gingrich; former
> Clinton Administration Director of Central Intelligence
> R. James Woolsey; former Deputy Chairman of the Joint
> Chiefs of Staff Adm. David E. Jeremiah; former Vice
> President Dan Quayle; former Defense and Energy
> Secretary James R. Schlesinger; and former President
> Carter's Defense Secretary Harold Brown.
>
> Though Perle was only recently appointed to head the
> Defense Policy Board, he and Wolfowitz have been
> collaborators for more than two decades, as
> agents-of-influence of the right-wing Israeli war
> faction. In 1985, when it was clear that Jonathan Jay
> Pollard, an American convicted that year of spying for
> Israel, could not have been working alone in stealing
> such high-level U.S. secrets for Israel to sell to the
> Soviet Union, top-level intelligence officials told EIR
> that an entire "X Committee" of high-level U.S.
> officials, was being investigated. Wolfowitz and Perle
> were on the list of "X Committee" suspects, and Israeli
> spying against the United States was so thick that
> investigators told EIR they had found "not moles, but
> entire molehills." Pollard and his Israeli defenders
> later claimed that Pollard "had to" spy against the
> United States because the Americans were soft on Iraq
> and other Arab countries.
>
> The "Wolfowitz cabal" is deterimined to push the United
> States in the direction of the most dangerous Israeli
> right-wing policy, including a possible Israeli nuclear
> attack on an Arab state. They are implementers of the
> very "breakaway ally" scenario about which 2004
> Democratic Party Presidential pre-candidate Lyndon
> LaRouche warned in his statement of Oct. 12 (see
> International).
>
> Plan B: Wagging the Dog
>
> The "Wolfowitz cabal" is out to destroy any potential
> for a Middle East peace, and simultaneously is
> determined to crush Eurasian economic development
> centered around cooperation among Europe, Russia, and
> China. After being rebuffed after the marathon Defense
> Policy Board meetings, the Wolfowitz cabal set various
> operations in motion to plant propaganda stories,
> falsify reports of U.S. policy, and carry out other

> maneuvers, whereby the tail would "wag the dog."
> Unapproved statements are made by cabal members,
> interviews misrepresenting U.S. policy are planted
> around the globe, and intelligence reports are altered
> or manufactured to further the policy goals.
>
> The pattern is becoming crystal clear.
>
> In the first such instance, shortly after the attacks of
> Sept. 11, Wolfowitz declared that the United States
> will "end states harboring terrorism," and insisted that
> under the principle of self-defense, the United States
> could act alone, without the United Nations, or
> cooperation from any other country. He wanted to
> establish the "doctrine" that the United States would
> hit a country "anywhere, anytime" based on secret
> evidence. But, Wolfowitz was forced to retract his
> statements, in a visible rift with the White House.
> Some days later, NATO allies at its Brussels
> headquarters snubbed Wolfowitz, and refused to formalize
> cooperation with the United States under NATO agreements
> at a meeting where Wolfowitz represented the Bush
> Administration.
>
> In the same vein, on Oct. 7, the day the Afghanistan
> bombings began, the cabal again attempted to provoke a
> rift between the United States and members of the UN
> Security Council, especially Russia and China, by
> altering the text of a letter from U.S. Ambassador to
> the UN John D. Negroponte. (Not coincidentally,
> Negroponte was a notorious insider in the Iran-Contra
> operation, who was accused of collaborating with
> narcotics-linked military death squads in Honduras in
> the 1980s.) The changes in the letter were made without
> notifying Negroponte's boss, Secretary of State Powell.
>
> In the letter, Negroponte echoed Wolfowitz's so-called
> gaffe, writing, "We may find that our self-defense
> requires further action with respect to other
> organizations and states" (emphasis added). The
> statement implicitly targetted Iraq, Syria, and Sudan,
> all countries which are on the State Department's list
> of countries that support terrorism. The statement
> violated promises the United States had made, that it
> would limit "coalition" action to redressing the attack
> of Sept. 11. Upon learning of the statement, from the
> press, Powell reportedly "hit the roof." The insertion
> was drafted by Stephen J. Hadley, who is the Deputy
> Adviser to the National Security Council. The stunt may

> have been planned at the Defense Policy Board meetings.
>
> Then there's the case of former CIA director R. James
> Woolsey, whose defined role is as the Policy Board
> member who is most public in demanding the overthrow of
> Saddam Hussein. The Knight-Ridder newspaper chain
> reported on Oct. 11, that Woolsey had been authorized
> the prior month to fly to London on a U.S. government
> plane, accompanied by Justice and Defense Department
> officials, on a secret mission to gather evidence
> linking Saddam Hussein to the Sept. 11 attack. In a
> Sept. 18 press conference by Defense Week, Woolsey
> called for creating a "no-fly and no-drive zone" in the
> north and south of Iraq, so that the Kurds and the
> Shi'ites, respectively, could better fight Saddam. "The
> watchword of the day," Woolsey said, is, "It's the
> Regimes, Stupid!"
>
> Since the Oct. 5 death from anthrax of Bob Stevens, the
> Sun tabloid photo editor, from anthrax, Woolsey has been
> the world's leading finger-pointer at Saddam as being
> behind the anthrax attack. His so-called evidence is
> dated, prejudiced, and completely unreliable.
>
> It was no accident that Woolsey role-played a prominent
> character--CIA Director--in the New York Council on
> Foreign Relations 1999-2000 scenario the previous year,
> "The Next Financial Crisis: Warning Signs, Damage
> Control, and Impact," that acted out a virtual coup
> d'�tat coming on the heels of a combined financial
> crisis and terrorist attack. In the CFR war-game, the
> U.S. President would be taken out of the picture,
> leaving the country under the control of a crisis
> management dictatorship.
>
> Also dispatched to London to propagandize for a "rolling
> war" that would attack Afghanistan, then Iraq, then
> country after country until revenge is exacted, was
> fellow Policy Board member Newt Gingrich. Talking to
> the London Times, owned by top British-Israeli
> propagandist Rupert Murdoch, Gingrich said that the
> United States is "at war" with "organized, systematic
> extensions of terror, supported by nation-states." He
> said that targetting the Afghan Taliban without
> defeating Iraq would be "like defeating Imperial Japan
> and leaving the Nazis alone." Gingrich threatened that
> countries judged not cooperative against terrorism would
> face the consequences: "The U.S. and the coalition
> forces will assist your own people in removing you."

>
> Setting the pace for his team, Perle was the joint
> initiator with neo-con William Kristol of the Rupert
> Murdoch-funded Weekly Standard, of an open letter to
> President Bush, that, while ostensibly supporting the
> President in the war against terrorism, was, in fact, an
> ultimatum to support a "Clash of Civilizations" Thirty
> Years' War in the Middle East. Among the non-negotiable
> demands set forth in that letter was the overthrow of
> Saddam Hussein, "even if evidence does not link Iraq
> directly to the [Sept. 11] attack."
>
> There is no doubt that the Wolfowitz/Perle duo is at the
> heart of the network that can use Israel in the
> "breakaway ally scenario." Indeed, Wolfowitz is one of
> great hopes of right-wing extremists in Israel,
> including among the radical settlers movement, who are
> demanding the assassination of Arafat and the expulsion
> of all Palestinians from the Occupied Territories (see
> coverage in International). But, Wolfowitz and Perle
> are not "Israeli agents." Rather, they are
> second-generation operatives both mentored by the RAND
> Corp.'s Albert Wohlstetter, a former Trotskyite
> communist turned nuclear strategist. Nor are the cabal
> war-mongers Seven Days in May militarists.
>
> A key member of the cabal is Richard Armitage, the
> number-two man in the U.S. State Department, who was
> investigated in the Iran-Contra scandal, and who is a
> longtime collaborator of Wolfowitz in the targetting of
> Iraq. The cabal also has high-level operatives at the
> National Security Council (NSC):
>
> Gen. Wayne Downing, former Commander in Chief of the
> Special Operations Command, was just appointed as
> Director of Combatting Terrorism for the Homeland
> Defense Board, headed by former Pennsylvania Gov. Tom
> Ridge. In 1997-98, Downing drew up a military plan to
> overthrow Saddam, by assassination, if necessary. The
> plan hinged on heavily arming dissident gangs of Iraqi
> Shi'ites in the south of Iraq, and Kurdish fighters in
> the north. Invasion by U.S. Special Forces ground
> troops was not ruled out. The promoter of the
> neo-Conservative yahoos in Congress and the think-tanks
> was Wolfowitz, then head of the Paul Nitze School of
> Advanced International Studies at Johns Hopkins
> University. Unable to ram this plan through the Clinton
> Administration, Wolfowitz shopped the plan to Perle, an
> expert in "chain-letter" pressure politics, who garnered

> signatures. Now at the NSC, Downing has the ready-made
> plan to hit Iraq.
>
> Richard Clarke, Adviser to the President for Cyberspace
> Warfare. Clarke, who was originally with the State
> Department during the elder Bush's Administration, was
> demoted for covering up Israeli violations of the Arms
> Exporting laws. In August 1998, Clarke was one of the
> key figures who planted false information about Sudan's
> involvement in the East Africa U.S. Embassy bombings,
> which led to U.S. cruise missile attacks on a Sudanese
> pharmaceutical company in Khartoum. Clarke shopped in
> disinformation from British-Israeli covert operations
> stringer Yosef Bodansky that targetted Sudan.
>
> Elliott Abrams, NSC staff. Abrams, who was convicted in
> the Iran-Contra scandal, was quietly placed on the NSC
> as a specialist in "religion and human rights." He is a
> longtime member of the right-wing Zionist networks that
> infiltrated the U.S. security establishment. He worked
> closely with Secord and North in Central America, also
> providing a link to the Israeli gun-running networks
> that delivered arms to Khomeini's Iran.

>
> Some administration officials expressing misgivings on Iraq
>
> By WARREN P. STROBEL and JONATHAN S. LANDAY
> Knight-Ridder Tribune News
>
> WASHINGTON -- While President Bush marshals
> congressional and international support for invading
> Iraq, a growing number of military officers,
> intelligence professionals and diplomats in his own
> government privately have deep misgivings about the
> administration's double-time march toward war.
>
> These officials charge that administration hawks have
> exaggerated evidence of the threat that Iraqi leader
> Saddam Hussein poses -- including distorting his links
> to the al-Qaida terrorist network -- have overstated the
> amount of international support for attacking Iraq and
> have downplayed the potential repercussions of a new war
> in the Middle East.

>
> They charge that the administration squelches dissenting
> views and that intelligence analysts are under intense
> pressure to produce reports supporting the White House's
> argument that Saddam poses such an immediate threat to
> the United States that pre-emptive military action is
> necessary.
>
> "Analysts at the working level in the intelligence
> community are feeling very strong pressure from the
> Pentagon to cook the intelligence books," said one
> official, speaking on condition of anonymity.
>
> A dozen other officials echoed his views in interviews.
>
> No one who was interviewed disagreed.
>
> They cited recent suggestions by Defense Secretary
> Donald Rumsfeld and National Security Adviser
> Condoleezza Rice that Saddam and Osama bin Laden's
> al-Qaida network are working together.
>
> Rumsfeld said on Sept. 26 that the U.S. government has
> "bulletproof" confirmation of links between Iraq and
> al-Qaida members, including "solid evidence" that
> members of the terrorist network maintain a presence in
> Iraq.
>
> The facts are much less conclusive. Officials said
> Rumsfeld's statement was based in part on intercepted
> telephone calls, in which an al-Qaida member who
> apparently was passing through Baghdad was overheard
> calling friends or relatives, intelligence officials
> said. The intercepts provide no evidence that the
> suspected terrorist was working with the Iraqi regime or
> that he was working on a terrorist operation while he
> was in Iraq, they said.
>
> Rumsfeld also suggested that the Iraqi regime has
> offered safe haven to bin Laden and Taliban leader
> Mullah Mohammed Omar.
>
> While technically true, that also is misleading.
> Intelligence reports said the Iraqi ambassador to
> Turkey, a longtime Iraqi intelligence officer, made the
> offer during a visit to Afghanistan in late 1998, after
> the United States attacked al-Qaida training camps with
> cruise missiles to retaliate for the bombings of the
> U.S. embassies in Kenya and Tanzania. But officials

> said the same intelligence reports said bin Laden
> rejected the offer because he didn't want Saddam to
> control his group.
>
> In fact, the officials said, there's no ironclad
> evidence that the Iraqi regime and the terrorist network
> are working together or that Saddam has ever
> contemplated giving chemical or biological weapons to
> al-Qaida, with whom he has deep ideological differences.
>
> None of the dissenting officials, who work in a number
> of different agencies, would agree to speak publicly,
> out of fear of retribution. But many of them have long
> experience in the Middle East and South Asia, and all
> spoke in similar terms about their unease with the way
> U.S. political leaders are dealing with Iraq.
>
> All agreed that Saddam is a threat who eventually must
> be dealt with, and none flatly opposes military action.
> But, they say, the U.S. government has no dramatic new
> knowledge about the Iraqi leader that justifies Bush's
> urgent call to arms.
>
> "I've seen nothing that's compelling," said one military
> officer who has access to intelligence reports.
>
> Some lawmakers have voiced similar concerns after
> receiving CIA briefings.
>

>
> "Former US Secretary of State Henry Kissinger has
> resigned as chairman of a commission investigating
> events leading up to the 11 September 2001 attacks on
> the United States. Mr Kissinger, who had been in the
> job for just 16 days, had been criticised for refusing
> to release the names of clients at his consulting firm.
> His resignation throws the inquiry into turmoil. It
> comes hard on the heels of the announcement earlier this
> week that the commission's vice chairman, George
> Mitchell, was quitting. The BBC's Tom Carver in
> Washington says the episode is enormously embarrassing
> for Mr Bush, adding questions will be asked about why
> possible conflicts of interest were not raised before Mr
> Kissinger's appointment." Kissinger quits as 9/11
> inquiry chief BBC Online, 14 December 2002
>
> "In naming Henry Kissinger to direct a comprehensive
> examination of the government's failure to prevent the
> Sept. 11 attacks, President Bush has selected a
> consummate Washington insider....his affinity for power
> and the commercial interests he has cultivated since
> leaving government may make him less than the staunchly
> independent figure that is needed for this critical
> post. Indeed, it is tempting to wonder if the choice of
> Mr. Kissinger is not a clever maneuver by the White
> House to contain an investigation it long opposed." The
> Kissinger Commission New York Times, 29 Nov 2002
>
> "...follow all facts, wherever they lead...."
> George W. Bush, 27 Nov 2002
>
> Old Pals in the White House Cabinet Room, 17 June 1976
> Bush Senior (left middle), Cheney (centre, with hair!),
> Kissinger (right, sitting)
>
> ----------
>
> Some two weeks ago or so much of the 'thinking' world
> was stunned to hear that President Bush had appointed
> Henry Kissinger as Chairman of the 'independent'
> commission of inquiry into the 911 attacks on the US.
> It is well known in political and academic circles that
> Kissinger is a past master of secrecy and deception,
> even if the impression of him held by a sometimes poorly
> informed general public is commonly an honourable one.
>
> The Bush administration had long delayed agreeing to
> legislation on the 911 inquiry until it could be sure of

> finding a chairman whom it could rely upon not to dig
> too deep. But now Kissinger has himself suddenly
> resigned, throwing the Bush 911 cover-up strategy into
> disarray - at least for the moment.
>
> Right from the minute he was appointed to lead the
> Commission, fierce public pressure built up on Kissinger
> to declare his conflicts of interest, and in particular
> to disclose the clients of his private consulting firm
> 'Kissinger Associates'.
>
> Rather than concede to this Kissinger has now decided to
> resign his post, despite the major embarrassment this
> causes to both himself and the White House. Such has
> been the brazen arrogance of the Bush administration
> since 911 that clearly neither Kissinger nor the White
> House had anticipated the intense public pressure that
> would arise for the disclosure of his business
> associations.
>
> Given the highly damaging nature of the resignation it
> is difficult not to conclude that such disclosure must
> have had the potential to lead to even worse, and
> therefore immense, embarrassment. And indeed this seems
> more than likely. In particular disclosure would almost
> certainly have placed further public attention on
> Kissinger's role as an adviser to US oil company Unocal
> and its relationship with the Taliban in Afghanistan
> (more details below).
>
> But this would not have simply been a personal
> embarrassment to Kissinger. The Unocal trail leads
> directly to Enron and then on towards Vice President
> Dick Cheney.
>
> Former federal war crimes prosecutor John Loftus already
> claims knowledge of paperwork confirming secret dealings
> between Enron and the Taliban. According to Loftus an
> al-Qaeda document on this subject was discovered in 1998
> by FBI counter-terrorism chief, John O'Neil, following
> the US embassy bombings in Africa.
>
> The real dynamite, however, is that Loftus also claims
> that Cheney instructed the FBI in January 2001 to
> back-off investigations of al-Qaeda in order to protect
> Enron's interest in the development of a gas pipeline
> through Afghanistan. That pipeline was originally due
> to be built by Unocal, with no less than Henry Kissinger
> himself hired by them to advise on the project.

>
> O'Neil resigned from the FBI in the summer of 2001 in
> protest at the attempts by the Bush administration to
> obstruct him in his pursuit of al-Qaeda - and the rest,
> as they say, is history. Or not quite.
>
> Although O'Neil took a job at the World Trade Centre
> following his resignation and was killed in the attacks
> on 911, Loftus says that fellow FBI agent Robert Wright
> has compiled his own findings on the Enron block.
> Wright has, however, been prevented by his superiors
> from publishing them.
>
> Nonetheless Wright told the press earlier this year
> about other aspects of FBI efforts to stifle terrorist
> investigations. The FBI continues to illegally refuse
> the release of his 500 page manuscript, 'Fatal Betrayals
> of the Intelligence Mission', that he submitted for
> prepublication review in October 2001. In fact, the FBI
> has even refused to turn the manuscript over to Sen.
> Richard C. Shelby, Vice Chairman of the Joint
> Intelligence Commitee, charged with investigating the
> FBI's intelligence failures. Wright has now launched a
> lawsuit against the FBI.
>
> So with a variety of time bombs apparently ticking away
> in the background, and with Kissinger no longer in a
> position to neutralise them on behalf of the White
> House, what is the Bush administration now going to do
> about the 911 Commission? It's too late to stop the
> inquiry because it's already on the statute books. The
> legislation was finally signed by Bush in November once
> Kissinger had been secured for the job. Now Kissinger
> is suddenly gone and so too is the Commission's vice
> chairman.
>
> Is Bush's luck in fact starting to run out, or will
> Cheney be able to retrieve the situation for him?
>
> The replacement that has already been secured for the
> Vice Chair of the Commission - Lee Hamilton - is a
> Democrat previously accused of participating in inquiry
> cover-ups of alleged wrongdoings by Bush's father during
> the Reagan era (ominously the official records of
> previous Presidents have now been subjected to an
> Executive Order by Bush junior restricting public access
> to them).
>
> The earlier Bush related inquiries in which Hamilton was

> involved concern the 'October Surprise' and
> 'Iran-Contra' scandals. And Cheney was in there too -
> according to the reporter who broke parts of the
> Iran-Contra story through Newsweek and Associated Press.
> In a more recent analysis entitled 'Covering Up
> Iran-Contra' (Consortium News, 5 November 2000) he
> comments on Hamilton's and Cheney's role in that
> investigation as follows:
>
> "A senior committee source said one of Cheney's top
> priorities was to block Democrats from deposing Vice
> President Bush about his Iran-contra knowledge.....
> Despite surrendering to Cheney's demands time and again,
> Hamilton failed, in the end, to get a single House
> Republican to sign the final report. Only three
> moderate Republicans on the Senate side - Warren Rudman,
> William Cohen and Paul Trible - agreed to sign the
> report, after extracting more concessions. Cheney and
> the other Republicans submitted a minority report that
> denied that any significant wrongdoing had occurred....
> The watered-down Iran-contra majority report essentially
> let Vice President Bush off the hook. Bush's political
> career was saved..... [and in] 1989, Cheney became
> Bush's defense secretary."
>
> In the case of the 'October Surprise' hearings, one
> senior White House correspondent pointed out at the time
> that "Hamilton held a press conference to clear Bush
> before the investigation into the deal between the
> Reagan-Bush candidates for presidential office and the
> Iranians, had even started."
>
> Despite his Democrat background Hamilton's closeness to
> the Bush Administration is clear. A PTI newswire 21
> December 2000 states: "According to Republican sources,
> former Democratic Congressman Lee Hamilton's nomination
> as either Ambassador to the UN or as CIA director is
> also being considered (by the new Bush Administration)".
> Hamilton also holds Central Intelligence Agency and
> Defense Intelligence Agency awards.
>
> The key issue now for the 911 commission is who will be
> appointed to replace Kissinger, and will Kissinger,
> Cheney and Bush themselves be subpoenaed to give
> evidence?
>
> On the face of it things may not be too hopeful.
> According to an ABC News news report before the
> Kissinger resignation "President Bush does not envision

> testifying before an independent commission
> investigating the Sept. 11 attacks .... The bill being
> signed by Bush, in most cases, requires six of 10 panel
> members to approve subpoenas, meaning at least one GOP
> [i.e Republican] panelist would have to side with
> Democrats to compel Bush's testimony. The White House
> withheld its support of the bill until it could ensure
> subpoena powers were limited."
>
> How this situation is justified when President Clinton
> was forced into giving evidence on the Lewinsky saga - a
> matter of infinitely trivial importance by comparison -
> is beyond imagination. A dozing or pathetically servile
> American press has yet to forcefully raise this simple
> point.
>
> However, a week (or a fortnight in this case) is a long
> time in politics, especially as the anti-war movement in
> the US now seems to be growing fast. Nonetheless there
> is a danger that the Kissinger 911 fiasco could cause
> panic to set in at the White House, making the media
> diversion that would be caused by a war with Iraq (not
> to mention the likely ensuing chaos in the Middle East)
> an even more appealing option for the lunatic Bush team.
>
> Or are the wheels about to come off their wagon before
> they get the chance? Events can overtake even the most
> cunning, and much may be yet in store.
>
> As John Loftus neatly puts it: "... the information
> provided by European intelligence sources prior to 9/11
> was so extensive, that it is no longer possible for
> either CIA or the FBI to assert a defense of
> incompetence... If Congress ever combines its Enron
> investigation with 9/11, Cheney's whole house of cards
> will collapse."

> NEWSFLASH
>
> Mr. Bush's new criminal edict now states Americans can
> rise up for America to kill him as a terrorist and be
> thought Just and God Worthy. I Agree with bush finally.
>

> Our Mr. Bush Jr., that evil nazi fuck, that American
> cop killer, now figures to ask all CIA officers, to kill
> him and rumsfeld as documented proven terrorists, and
> they will not face prosecution by US people to do so.
> Wow, what leadership! Exactly what I've been telling
> you. See, bush figures every CIA officer, somewhere
> around 20,000, is a heroin cocaine dealer, who was in on
> 9/11 to kill their own Families as disrespected. Sorry
> to say Mr. bush, you evil demon of hatred for God as
> ignorance and stupidity, that call is not completely
> your own as satan. Clinton told US, as does rumsfeld
> openly, you had no public evidence against Laden to hold
> Our position while ignoring the evidence and closing
> investigations, nor against the People of Iraq who have
> suffered from crimes against humanity perpetrated by
> bush's dad. No, bush as the anti-Christ, the lame brain
> deceiver of darkness and death, misery and suffering,
> the Earth's evilest criminal, has, as confessed, no
> God's truth that would stand in a Public court of Law as
> Justice, nor likely against most of the other
> individuals, bush has named without evidence as
> Humanity's enemy, to advocate his demise as traitor to
> (oops,) forgotten American Constitutional values. See,
> Justice stands strong for good reason, Indivisable, and
> the Living Universe is of intelligence known to be so.
> While the anti-Christ's closed private crime circle is
> comprised to be publicly known factually, of some of the
> world's biggest known war criminals, drug dealers and
> pension shysters, practically none elected, who figure,
> Americans won't ever be bright enough to save themselves
> as worthy of discussion, if they can't read or write, or
> think at all for themselves but for on Bright
> Commercials. I didn't see my name there on BUSH'S worst
> enemies of Humanity list, established again, without
> public evidence. THINK! I'd execute bush and rumsfeld
> for escaping arrest for killing US people without a
> second hesitation but for the overall ignorance of
> corporatized Americans, who put their real Freedom to
> understand their own soul convictions as individuals
> entrusted blindly to bush without question or
> explanation, (to ANYONE) mindless slaves in blinded
> faith to a false ungodly deity, a demon that demands
> Americans be forbidden to demand right turns on the
> journey to their willed sacrifice as cowards, demanding
> as bush does for his private america, Humanity also by
> criminal threat be deprived Justice (truth, Godhood),
> for themselves included, under himself as a thieving
> dictator anti-American war monger. Mr. bush Jr. never
> mentions US, nor do most corporate news services...

> Why? Because what I state is true, and they lie for
> bush to rob and kill US all as ignored to die
> undeserving. Mr. bush has now publicly threatened to
> use landmines and nukes against Humanity, if without
> evidence he should decide privately in secret the
> indiscriminate killing of People would be a good thing
> as himself against Americans, because he personally was
> involved in 9/11! Think American nazi bush pukes! Mr.
> bush Jr. is a sociopathic monster. Mr. bush Jr.
> murdered American Police officers, and robbed from their
> grandparents OPENLY, 50 billion, therefor, as bush
> advocates, should more innocent Americans be murdered
> for it? Yet still, corporate america states america is
> not worth knowing of, as the Living to survive by
> knowledge, or agreed measurement of devaluing assets.
> Some people might wonder, like unthinking bushwhore
> slave puppets, why is it that the RCMP, the Secret
> Service, nor the FBI makes no public complaints against
> myself, nor foolishly attempt to criminally arrest me
> for standing on indivisible Justice?, even after
> speaking with me personally to clarify Our positions as
> documented? I'll tell you, as I tell any soldier brave
> enough to listen without running away as cowards, or a
> challenge to the death in a fight against God as the bad
> guys. The evidence on Our Mr. Bush and rotten rumsfeld
> is true whether I articulate it as my own opinion or
> not. The American flag waving Taliban were in support
> of the arrest of the actual perpetrators of 9/11, while
> rumsfeld advocates the incarceration and torture of
> completely innocent individuals, as not charged for any
> criminal offence, that he has actually stated, he would
> never wish released as possibly farmers with beards or
> Freedom Fighters, while purposefully with franks,
> funding heroin dealers for Enron with American blood
> monied weapon manufactures. Gee, I wonder where that
> could lead... Just more dead American Soldiers, right?
> Who cares, right? Our Mr. bush Jr., the terrorist hand
> book salesman, who wants to send american nazi soldiers
> in hand to hand combat as criminals against two billion
> God loving People in sixty countries? That of course is
> not including China, yet. American Patriots must decide
> individually, death and suffering, tyranny and
> enslavment, or, we destroy demon traitor American cop
> killer bush, rumsfeld, tommy franks, and Jew hater ariel
> sharon for purposefully murdering US as the innocent to
> steal our worths. What shall it be? A nation without
> protectors run as slaves to be continually devalued, or
> a Nation committed to freedom, and justice for US all?
> We also need to be campaining to have blair immediately

> arrested for being an accessory to murder in Britain,
> what with the bombing of People to make it look like the
> IRA did it, that blair has personally threatened all of
> Britian to not talk freely about! (How deceptively evil
> is that?) Then finally, get rid of the corruption of
> elections in America by going back to paper ballots?
>
> What do you think?
>
> Mr. Bush and rotten rumsfeld don't want American
> soldiers to go after the true evil doers by ACTUALLY
> understanding so, because the evidence dictates, bush
> and rumsfeld would be dead before daybreak as they
> should be, for actually, factually, robbing and
> murdering American Patriots, willingly, while
> purposefully, attempting to war Our World to murder
> millions more for their hatred towards God as America
> like Jew hater ariel sharon does almost daily, while
> ashcroft says as the top anti-Cop, he'll figure Justice
> betterer secretly, as a total incompetent. Bill of
> Rights be damned under the bushmob, and we can be sure,
> CBC rarely, or CNN's Blitzer, or Hemmer, aren't gonna
> speak up for YOU right?, Loser? The corporate news
> channels continue to broadcast, that we, as Humanity,
> have no interest in Justice for Ourselves, or killing
> criminal war monger bush immediately to stop further
> bloodshed of ourselves as the understood as communicated
> innocent and unrepresented by corporate mandate to
> remain unbiased, albeit, but for gods eternal, suffering
> for nothing. Hemmer and Blitzer, the now open to all
> nazi fascists, (I've contacted them both regarding the
> facts), know full well, bush and rumsfeld are mass
> murderers, terrorists who perpetrated 9/11 willingly,
> planned with general Ahmad, (who funded Atta), a demon
> plan to invade Afghanistan for refusing to side for
> Enron's interest, an evil plan to not follow the
> criminal evidence, thereby an unsubstantiated verdict on
> behalf of "US" as the victimized, left unjustified,
> confessed to as fully implemented by the WhiteHouse, NO
> EVIDENCE as a pre-requisit, developed prior to 9/11 to
> COMMIT MURDER to steal our Value. Prior to 9/11. Our
> Mr. bush Jr. didn't offer any evidence, nor did he
> want any to arrest bin Laden as his terrorist war
> strategy!!! NOT INTERESTED IN NABBING THE PERPETRATORS!
> EVIL INCARNATE! See, your either with US, or your with
> bush, the terrorist of terrorists. Read that last bit
> again please. As well, being terrorist harborers and
> funders like Britain's blair is also, but look friends..
> Hemmer speaks nothing for the AMERICAN FBI investigators

> involved, nor Soldiers, who he knows, will be sacrificed
> easily as evil nazi vermin against all Life and Freedom,
> like he would watch saying nadda in contempt for himself
> secretly, but shhh... We'll never know if CNN doesn't
> say so. CNN refuses to do the job for America, but to
> let be further plundered as not financially viable.
> What is the value of your life, corporate american? I
> mean, in relation to all things as yourself honestly in
> bush's world? American Patriot, it is you my friend who
> are on the cross to suffer really, dying far from Jesus
> in cowardice for unjust bush and sharon is why I can do
> no more for US, but blab as this does by fax, phone, and
> in living person. You must also rise for yourself, your
> Family, your friends, Your Freedom, to gain respect from
> yourself everlasting worthwhile being, or die an
> unthinking bush slave as coward and betrayer to yourself
> honestly. Tip: Call the talk shows to publicly be hung
> up on being truthful, for, we aren't as stupid as we
> appear you know.
>
> Please, don't let bush murder more like would be
> Ourselves, unfactored as not worthy of your attention to
> consider an equal, as God would without doubt see US die
> helplessly without yourself to be awake and dreaming of
> a better world for all eternally grateful.
>
> I'm counting on you to believe in Humanity also.
>

> Johnny Wizard
>
> --
>
>
> Holy Jesus Man!
>
> Have you heard the Revelations from India's government
> to the FBI now made public?, regarding the principle
> terrorist funder of Mohammad Atta being, the ISI's,
> General Ahmad? The bush administration's personal
> confidant, and top secret military strategist? See, it
> was Jim at MSNBC that informed US of bush's terrorist
> plan existing as once top secret presidential documents,
> and, that this same general, was also responsible for,
> according to several members of the Senate Intelligence
> Committee, developing the said war strategy of invading
> Afghanistan on behalf of the evil bushmob, with the very
> anti-human premise, of blaming bin Laden for a crime
> without any evidence to substantiate our public

> accusation, to murder more than a hundred thousand,
> plus! A crime, 9/11, I will remind you, that for when
> the evil plan was devised, hadn't even yet taken place.
> But was threatened would happen, if the Taliban didn't
> side for Enron's interests in serving for Ken Lay, one
> of bush's many bum buddies. (They apparently do that
> sort of thing on a regular basis, with all the members
> in their secret meetings of the 'only Boners'
> fraternity.) It doesn't take much either to understand
> why rotten rumsfeld, corporate america's sweetheart,
> (you know, the sadistic nazi war criminal who gets off
> on murdering or torturing innocent people), told US he
> wanted to have arrested those at the WhiteHouse and the
> Pentagon, or even in the Military, who would dare as
> Americans, to inform Americans what he and bush were
> truly doing in their names.
>
> Destroy the unelected unarrested heroin pushing American
> cop killer war criminal, the demon we all know so well
> as corporate america's false deity, the super evil doer
> anti-Christ, Our Mr. bush Jr. Now Patriot Soldier, and
> be loved by all as Savior. Or not, and be a thoughtless
> degenerate, a cowardly regressing nazi bush slave, who
> would sacrifice your own family as yourself truly,
> because JESUS CHRIST, life is living to survive for
> Justice, as God is warranted to be as ourselves, with
> equal rights to being as is of US all included. Mr.
> ashcroft tells Americans he is purposefully destroying
> their freedoms as legal due process because he, as an
> idiot, and a traitor, has to fight ourselves as a
> terrorist blindly in Our names without American Justice,
> but never explains his action, is asked to, nor could
> he. As ashcroft, like most in the bushmob are, is
> founded completely unqualified. Why doesn't ashcroft
> move to have bush and rumsfeld arrested or executed
> immediately by following the criminal leads for 9/11 on
> behalf of Americans as an American?, what with all the
> ample evidence documented as factual and everything?
> Instead, decides too, like the demon bush demands in
> attempt to sway his capture, that evidence will no
> longer be mandatory for him to decide who should be
> stolen from, as the left dead to be robbed as forgotten
> by Justice denied to all as Godly. American soldiers
> are truly as represented, weak, slow, and painfully
> pathetic cowards, refusing to protect their own families
> as a national defense measure, instead, as nazi dumfuk
> bush slaves, willingly support the murder of would be
> themselves as criminals, truly against US all as the
> innocent.

>
> Mr. bush was quoted once again defending his
> irrationality as criminal murder rampages against the
> innocent as ourselves like he did in New York City with
> rumsfeld, by stating,
>
> "Maybe somebody needs to explain to me why they say
> something, but I don't feel like I owe anybody an
> explanation."
>
> The evil anti-Christ figures he'll just continue to rob
> and murder American Patriots while destroying freedom as
> Justice for US all, and simply escape Your wrath by
> corporate america making no fuss to speak in Our defense
> as the still living to be underestimated as equals.
>
> Destroy Our Mr. bush Jr. now, and be loved by all as
> God would!
>
> From: British News
> July 17, 2002
> Britain backs US plan for attack on Iraq
> By Philip Webster, Political Editor
>
> (Quoting the terrorist supporter blair, Philip was),
>
> ``To be TRUTHFUL about it, there was no way we could
> have got the public consent to have suddenly launched a
> campaign on Afghanistan but for what happened on
> September 11.'' ...
>
> Oh, so there was a criminal intent known also by
> yourself then blair to prop up heroin pushers to save
> Enron's impending criminal bankruptcy?
>
> We have repeatedly witnessed, CNN and CBC refusing to
> represent our Democracies, our FBI officers, like airing
> Coleen Rowley, General Ahmad, or the sabotaging of the
> Moussouie investigation by ashcroft, or the CIA,
> regarding the insider stock trades, or dealing heroin.
> The innocence of the Taliban for 9/11, and the barbarity
> of the Northern Alliance as heroin pusher slave owners.
> No, every single american according to CNN being
> unbiased, does not want bush the anit-Christ arrested
> immediately for killing Americans in New York City to
> steal our worths and freedoms as worthy of defence
> matters by their own measure as corporate cultists. As
> I told you, Bill Hemmer and several other celebs at CNN,
> now are fully aware of bush and rumsfeld being the true

> purpetrators of 9/11, yet, Bill continues to play evil
> against US all, figuring nobody ever will know without
> CNN coverage on his contempt for American Patriots he
> asks to have sacrificed for as bushwhores like himself
> and Blitzer. CNN refuses to protect Americans as equals
> commited to Justice for US all.
>
> It was just reported by Chris Marden on the 27 November
> 2002, that bush's top whore richard pearl, has advised
> Britsh MPs, that bush secretly as the anti-Christ has no
> intention of allowing the Iraqi inspection process to
> succeed, and instead, is commited to murder ourselves
> either way.
>
> Again, bush and blair, like CNN, have no evidence to
> substantiate their allegations against Saddam, and have
> stated because they have no evidence, they therefor as
> demons, can murder anyone on the face of this planet to
> steal our lives in OUR names as US innocent. Mr. blair
> and the bushmob have recently stated, that they have no
> evidence that Saddam has any WMDs, nor, is any threat to
> OUR WORLD community, and because of that, if the
> inspectors find no weapons, and Saddam insists it is
> because he doesn't have any, this, accordingly, would
> give these criminal master minds a cause to murder
> hundreds of thousands of innocent people, if not
> millions, and steal all the assets of the Iraqi people,
> while destabilizing our entire endangered species. They
> are mass murderers, threatening humanity to recommit
> more murder as TERRORISTS! Never while I stand ALIVE
> evil nazi dumb fucks. KILL BUSH NOW! Hey, have you
> heard about rotten rumsfeld's P2OG? "O", as in Oh
> rumsfeld is truly an evil fuck! Apparently, rumsfeld
> wants to provoke terrorist activity to murder ourselves
> as innocent cilivilians, as an opportunity to invade any
> country he wants to rob and plunder further. Also, most
> importantly, according to the official documents, rotten
> rumsfeld figures it would be important when he and his
> mobsters commit these crimes, it be understood, that
> nobody be able to trace it to himself, or his partners
> in crime, so they figure, the criminal acts should be
> carried out through his department at the pentagon,
> then, get this, he won't therefor be accountable, or
> scrutinized by the American people through corporate
> news channels. The offical pentagon report details
> this.
>
> You see the American cop killer unelected bush or blair,
> tommy franks the death squad recruiter child killer,

> unelected rumsfeld or unelected cheney, unelected
> poindexter or unelected ashcroft, you kill them
> instantly for attempting to escape the criminal arrests
> of those responsible for mass murder of Americans in New
> York City. You either shoot them dead on the spot, or
> tear them to pieces with your bare hands God lovers. No
> legitimate judge, jury, or police officer, would do
> anything but commend you for saving OUR lives. The
> bushmob our threatening our entire humanity with
> criminal murders to rob from ourselves deliberately.
> Counting on american nazi troops to mindlessly slave to
> their orders, soldiers so unbelievably dumb, weak, and
> cowardly to allow the bushmob to rob not only from their
> own parents and children, but even themselves as they
> fall dead as cowards, before they even dare to publicly
> ask questions about what the fuck they're actually
> doing, that frankly, leaves me even beginning to have my
> own doubts.
>
> Also,
>
> Mr. blair, you evil nazi fuck, you do not have OUR
> consent to commit murder in our names against ourselves
> as the innocent in Afghanistan, Iraq, or in Britain.
> Especially now, what with your ties now made public to
> terrorist acts through the IRA against innocent
> civilians to steal our values, that you have threatened
> US Brits to not learn of as having already. (Shayler.)
> Mr. blair evil nazi fuck, WE DEMAND AS THE BELIEVERS IN
> JUSTICE FOR OURSELVES, YOUR IMMEDIATE ARREST OR
> EXECUTION FOR WAR CRIMES AGAINST HUMANITY. YOU WILL BE
> ARRESTED, TRIED, AND SPEND THE REST OF YOUR LIFE BEHIND
> BARS WHERE YOU BELONG AS A DANGER TO OUR COMMUNITIES, OR
> RIGHTLY DEAD FOR TREASON BY THE HAND OF THE ENGLISH!
>
> Americans, the world over are known as cowards, dumb,
> and willing victims for bush sacrifice as lifeless

> Look, American soldier..
> You now should know, bush and rumsfeld murdered
> Americans in New York City, and as consequence, have no
> interest in acknowledging as pursued the criminal
> investigations. CNN holds no responsibility, as we
> witness repeatedly, to American soldiers, but to harbor
> those who pirate our rights to openly steal real lives.
> If bush makes no mention of himself stealing 50 billion
> dollars, murdering American police officers, sabotaging
> the weapons inspections process, funding israeli
> atrocities against the God loving, and warring our world
> as the anti-Christ by running death squads against the
> innocent, well, CNN, the american success, sure ain't
> gonna be speaking out for your stolen freedoms poor
> dying comrades. For what benefit in market share would
> there be to work for your living, dirt bagged? CNN is
> so colorfully excited about selling the glossy bush war
> to kill the poor stupid people, but for what american
> fascist weak binded bushmobbed soldier without
> principles? Again, how stupidly dunce does a poor
> cowardly american soldier have to be to not believe?
> Nobody but a cult corporatized illiterate fascist nazi
> vermin parasite, just like Jew hater ariel sharon would
> support the murder of American soldiers for a criminal
> conflict that doesn't serve to protect. But if it, as
> bush nazi evil does with little struggle over the masses
> complaining, and america marches off to criminally war
> the third world as the bad guys, our World, indeed this

> Universe will then know the absolute true cowardice of
> american soldiers, as premised upon the weakness of
> america's army to not uphold America's own rule of Law
> for freedom as themselves included. It only takes One
> Soldier to turn this tide to destroy bush Jr. and
> rotten rumsfeld, and that Soldier is where in America
> partner? Who American soldier, do you think bush as
> traitor does steal from as the duped General public as
> corporately represented to be painfully unawares? Do
> american soldiers have to convince themselves their
> families are not worth fighting for, and instead, lay
> their lives down in sacrifice to the bush demon who
> would also steal from their graves as the lifeless to
> speak out for themselves ever? Ever? Did you know
> American Soldier, the Pentagon, after receiving
> complaints from surviving soldier families, (some of
> like the over a thousand documented American troops
> slaughtered in Afghanistan) that taps wasn't being
> played because of so little real talent present in
> american military affairs, and that now, when a cowardly
> American nazi soldier dies for the bushmob, the mock
> national guard will hold a horn to his lips and act out
> the part to your grieving as stolen from family, while
> secretly pressing a hidden button, that will play a
> cheaper recording? But shhhh...
> The fact that you don't see this post, or others nearly
> like it at american military internet sites, exemplifies
> their fear and weakness to stand as a force worth
> reconing with. (Look, we destroy bush and rumsfeld,
> stop funding the drug trade and sharon, and begin the
> public trials, all in three simple steps.) No, to be an
> american soldier in bush's america today, you have to
> hide from your cowardice like the 9/11 evidence, and be
> something corporate news america is not. Involved.
> Just go ahead and die for nothing american soldier, but
> for to be unaccounted as hidden without value, while the
> bushmob robs from your grand parents as unprotected.
> Tis' true it does further seem, american soldiers, on
> general terms, are super dumb ass nazi scums, who hold
> little of no conviction to protect the America I
> remember. Why? Because the unelected war criminal,
> American traitor, mass murderer, cop killer bush is
> still spewing his blind hatred for the progress of our
> civilizations, instilled through law as a function to
> gain justice for people, People who are suffering and
> dying for bush's contempt of our American dream.
> Destroy traitor bush and rumsfeld for escaping to
> recommit murder today, and be actually caring for your
> world tomorrow, or not, and deem yourself unworthy by

> your own admission to play fair as the eternal standing
> proud, strong, and forever free.
> Free to be living justly for yourself
> truly as caring to know this as everything.
> Whew...

> George Bush Plans High Crimes and Misdemeanors:
> Why We Are Marching on October 26th
> By Carl Messineo and Mara Verheyden-Hilliard
> The authors, attorneys and co-founders of the
> Partnership for Civil Justice ~ LDEF, are members of the
> national steering committee of the A.N.S.W.E.R. (Act
> Now to Stop War & End Racism) Coalition
> George W. Bush has declared his intention to wage a
> "preemptive" war against Iraq and is now seeking to
> strong-arm the international community, the U.N., and
> the Congress into support and submission. As members of
> Congress rush to show their obedience and member states
> of the U.N. line up to receive the anticipated spoils
> of war, the administration is now waging a campaign to
> convince the people of the United States to fall into
> step and finance with money and blood this war brought
> for conquest on behalf of the corporate and oil
> interests that make up Bush's true constituency.
> Bush's preemptive war is a war of aggression. The U.S.
> policy supporting the war is not the rule of law, but
> the rule of force.
> But no U.N. resolution and no Congressional resolution
> can legalize an illegal war. With pen to paper and
> votes of support, they can only commit to wilful
> ratification, complicity and responsibility for illegal
> acts by endorsing a criminal enterprise.
> A war of aggression violates the United States
> Constitution, the United Nations Charter, and the
> principles of the Nuremberg Tribunal. It violates the
> collective law of humanity that recognizes the
> immeasurable harm and unconscionable human suffering
> when a country engages in wars of aggression to advance
> its government's perceived national interests.
> The National Security Strategy: Blueprint for Global
> Empire
> On September 20, 2002, the Bush Administration issued
> its blueprint for global domination and ceaseless
> military interventions, in its comprehensive policy
> statement entitled "The National Security Strategy of
> the United States."
> The National Security Strategy sets forth the U.S.
> military-industrial complex's ambition for the U.S. to
> remain the world's superpower with global political,
> economic and military dominance. The stated policy of

> the U.S. is "dissuading military competition"1 and
> preventing any other world entity or union of states
> "from pursuing a military build-up in hopes of
> surpassing, or equaling, the power of the United
> States."2
> The strategic plan elevates free trade and free markets
> to be "a moral principle. . . real freedom"3 and
> endorses a comprehensive global conquest strategy
> utilizing the World Trade Organization, the Free Trade
> Act of the Americas, the International Monetary Fund,
> the World Bank, among other mechanisms.
> The Washington Post reports that the National Security
> Strategy gives the United States "a nearly messianic
> role" in its quest for global dominance.4
> The National Security Strategy confirms and elaborates
> what was reflected in the January 2002 Nuclear Posture
> Review, that the Bush Administration maintains a policy
> of preemptive warfare contemplating the use of
> non-conventional weapons of mass destruction as a first
> strike measure.5
> Turning Logic on Its Head
> Bush's preemptive war policy is a war without just
> cause. Under international law and centuries of common
> legal usage, a preemptive war may be justified as an act
> of self defense only where there exists a genuine and
> imminent threat of physical attack.
> Bush's preemptive war against Iraq doesn't even purport
> to preempt a physical attack. It purports to preempt a
> threat that is neither issued nor posed. Iraq is not
> issuing threats of attack against the United States. It
> is only the United States which threatens war.
> It is not a war for disarmament. It is the U.S. which
> has stockpiled nuclear, biological and chemical weapons.
> It is the U.S. which is directly threatening to use
> these weapons against another country. It is the U.S.
> which has bombed Iraq relentlessly for more than ten
> years, killing scores of innocent civilians.
> The Bush Administration turns logic on its head,
> twisting reality in order to create the pretext for its
> war of aggression. The Administration claims that the
> necessary prerequisite of an imminent threat of attack
> can be found in the fact that there is no evidence of an
> imminent threat, and therefore the threat is even more
> sinister as a hidden threat. The lack of a threat
> becomes the threat, which becomes cause for war.
> By the U.S. Government's own claims, it destroyed 80%
> of Iraq's weapons capability in the earlier Gulf War,
> and subsequently destroyed 90% of the remaining capacity
> through the weapons inspections process. There has been

> no evidence that Iraq is capable of an attack on the
> U.S., let alone possessing the intention of carrying out
> such an attack.
> Bush's Proposed War and Current Threats Violate the U.S.
> Constitution, the U.N. Charter and International Law
> Bush's preemptive war policy and proposed attack on Iraq
> cannot be justified under any form of established law.
> The preemptive war policy and Bush's threatened new
> military assault on Iraq violates U.S. domestic law and
> international law. The warmongering, preparations for
> war, and threats of violence coming from Bush, Cheney,
> Rumsfeld, Rice and other White House and Pentagon hawks,
> are in and of themselves violations of international law
> and constitute crimes against peace.
> Article VI of the U.S. Constitution establishes that
> ratified treaties, such as the U.N. Charter, are the
> "supreme law of the land."
> The Article 1 of the U.N. Charter establishes
> "The purposes of the United Nations are. . . To
> maintain international peace and sovereignty, and to
> that end: to take effective collective measures for the
> prevention and removals of threats to the peace, and for
> the suppression of acts of aggression or other breaches
> of the peace and to bring about by peaceful means, and
> in conformity with the principles of justice and
> international law, adjustment or settlement of
> international disputes or situations which might lead to
> a breach of the peace. . . ."
> Article 2 states that all member states "shall act in
> accordance with the following Principles"
> "...All members shall settle their international
> disputes by peaceful means in such a manner that
> international peace and security, and justice, are not
> endangered.
> "All members shall refrain in their international
> relations from the threat or use of force against the
> territorial integrity or political independence of any
> state, or in any other manner inconsistent with the
> Purposes of the United Nations...."
> Under this framework, acts of aggression, such as Bush's
> threatened attack, are to be suppressed and force is
> used only as a last and unavoidable resort.
> The U.N. Charter was enacted in 1945 in the aftermath
> of the devastation and suffering of World War II. The
> Charter was enacted to bring an end to acts of
> aggression, "to save succeeding generations from the
> scourge of war, which twice in our lifetime has brought
> untold sorrow to mankind."
> Disputes which might lead to a breach of the peace are

> required to be resolved by peaceful means.
> Chapter VI of the U.N. Charter, "Pacific Settlement of
> Disputes," requires countries to "first of all, seek a
> resolution by negotiation, enquiry, mediation,
> conciliation, arbitration, judicial settlement, resort
> to regional agencies or arrangements, or other peaceful
> means of their own choice."
> No Resolution by the U.N. Security Council can Legalize
> a Preemptive War or First Strike Plan
> Bush has asked the U.N. Security Council to support
> execution of Bush's policy of a potentially nuclear
> "preemptive" war, as if that Council could endorse a war
> of aggression. The Security Council lacks the legal
> authority to grant such permission. The Security
> Council, by affirmative vote or by acquiescence to U.S.
> policy, cannot abrogate its own mandate. No collective
> action by the fifteen permanent and temporary members of
> the Security Council can lawfully violate the Charter
> which is the sole source of their collective authority.
> This is made clear in the U.N. Charter itself, which
> provides in Article 24, that "In discharging these
> duties the Security Council shall act in accordance with
> the Purposes and Principles of the United Nations."
> While there are, of course, procedures by which
> collective use of force may be authorized by the
> Security Council to maintain or restore international
> peace and security (Articles 41 and 42) those procedures
> may not be used to endorse aggression in violation of
> the primary purposes of the U.N. Charter. Article 51
> of the U.N. Charter acknowledges the right to
> self-defense "if an armed attack occurs against a Member
> of the United Nations until the Security Council has
> taken measures necessary to maintain international peace
> and security." None of the provisions allow for
> authorization for Bush's war plans and first strike
> strategies. Any resolution authorizing a preemptive war
> of aggression is ultra vires, or null and void as beyond
> the authority of the Council to enact.
> The very issuance of the Bush doctrine of preemptive
> warfare and also the threat to wage war against Iraq
> are, each, a violation of international law as a crime
> against peace, which is defined in the Nuremberg Charter
> as the "Planning, preparation, initiation or waging of a
> war of aggression or a war in violation of international
> treaties, agreements or assurances."
> Responsibility for War Crimes
> Neither Congress nor the President has the right to
> engage the U.S. in a war of aggression and any vote of
> endorsement, far from legalizing or legitimizing global

> war plans, serves only as ratification of war crimes.
> Under the principles of universal accountability
> established at Nuremberg, "The fact that a person who
> committed an act which constitutes a crime under
> international law acted as Head of State or responsible
> Government official does not relieve him from
> responsibility under international law."6
> The execution of economic sanctions by the Bush I, Bush
> II and Clinton Administrations, which has caused the
> deaths of over one million people, primarily children
> and their grandparents, is likewise sanctionable as a
> crime against humanity under the Nuremberg Charter and
> under the International Criminal Court Statute as "the
> intentional infliction of conditions of life,. . .
> the deprivation of access of food to medicine,
> calculated to bring about the destruction of a part of a
> population."7
> The Bush Administration has rejected the International
> Criminal Court treaty signed by over 130 countries.
> This rejection is an admission of the administration's
> consciousness of guilt and of criminal intentions. The
> Bush administration acts with a conscious disregard of
> humanitarian laws and a stated intention to avoid
> accountability for their crimes under international law
> prohibiting crimes against the peace, war crimes and
> crimes against humanity. The National Security Strategy
> promulgated by the Bush administration states that the
> United States "will take the actions necessary to ensure
> that our efforts to meet our global security commitments
> and protect Americans are not impaired by the potential
> for investigations, inquiry or prosecution by the
> International Criminal Court (ICC), whose jurisdiction
> does not extend to Americans and which we do not
> accept."8
> Endless War, Aggression and Terror
> Once this policy of preemptive wars of aggression is
> invoked by the Bush Administration to justify unprovoked
> attacks against the centers of population in Iraq, the
> doctrine will be used by the hawks in the administration
> time and time again, and will also be adopted by nations
> and individuals internationally as a justification for
> the preemptive use of catastrophic violence against
> centers of population worldwide. The legitimization of
> preemptive wars of aggression will be used to justify
> attacks against U.S. centers of population, and will
> bring greater violent retribution upon the cities and
> people of the United States for actions that the
> government is taking in their names, without their
> informed consent.

> The risk of suffering harm because of this doctrine is,
> of course, not distributed equally among all residents
> of the United States. Those who will lose their lives
> fighting in wars of aggression will be the young,
> disproportionately persons of color, and those who must
> enlist in the U.S. military because of bleak economic
> opportunity. Those who derive their wealth and security
> from the transactions of war, from increased oil profits
> caused by global instability or conquest of oil rich
> regions, and from the constant re-building and re-arming
> necessary to conduct endless wars against countless
> peoples premised on imperceptible threats - - they will
> have the means to acquire seclusion, protection and
> greater safety.
> Preemptive war will not stop with Iraq. Constant
> military interventions worldwide are necessary to
> enforce Bush's stated policy of global economic,
> political and military domination. Just four days after
> the September 11th attacks, the CIA presented its
> "Worldwide Attack Matrix" identifying scores of
> countries that the CIA wanted permission to attack.
> Bush approved the CIA wish list, and authorized
> immediate covert and lethal CIA operations in over sixty
> nations.9
> Taking to the Streets
> As the U.S. moves at breakneck pace in execution of its
> stated policy of global domination and over military
> interventions, the need for the people to take action is
> urgent.
> Congress will not stop this policy of aggressive warfare
> and global domination. Many in Congress are well served
> with the tithing of the war profiteers and their
> corporate sponsors who see U.S. military domination as
> a way to enforce their interests, to exploit human labor
> at starvation wages overseas and to drive down wages
> domestically, to mine vast sources of environmental
> resources globally, and to impose and expand the reach
> of their "free" markets.
> The U.S. Constitutional framework provides that,
> regardless of who temporarily holds office, all power
> remains in the hands of the people. It is time now for
> the people to take the reins of power back from those
> who have stated their intention to act in violation of
> all laws that humankind has struggled to create to end
> global conflagration and prohibit wars of aggression.
> When law will not restrain the government, the people
> must. We must take to the streets in mass numbers in
> organized and spontaneous acts of resistance. The
> message must be clearly conveyed that if the Bush

> administration refuses to be accountable to U.S.
> domestic law, to the U.N. Charter, to international
> law, to all known standards of just conduct, then the
> people of conscience within the United States will rise
> up to demand accountability. And the message must be
> sent that the people of the U.S. will not allow the
> Bush administration to spend the blood of the people of
> the United States and the people of Iraq who are not our
> enemies, in a needless war for oil.

> Largest Detective Agency in the South

I already have a lawyer, fool...not that I need one to deal with you who
could much less afford a dentist in last 20 years, much less an attorney.
Welcome to my killfile, as with the other perps above.

Heh heh, you fool, with my 100 watts and a G5RV an the attic (yeah, people
who attics big enough to accommodate a G5RV can actually afford
lawyers...and dentists.

Kevin, it seems like this little exersise brought the perps out of their holes, as intended, but they were still too bashful to identify themselves.

These are the very same people who QRM the liberty net, Glenn Baxter, 3898 and all the rest. They are what we in North Carolina would call "the little people". They have no political backbone and cannot think for themselves. They often-times claim to be opposed to the Liberty Net. They are not. To have such a state of mind would require 1) intelligence, none of whom could come close to claiming triple digits, and conviction, closely associated to intelligence but suffice it to say they have none. No, sadly they are lunatics. Now, the goal (the prime motivating factor) of these lunatics, whatever it is, and I do not really care what it is, is meaningless. However, they are extremely persistent...much more persistent that you or I in the attainment of their meaningless goals.

That makes them a force to be reckoned with...at least on the air waves.

Just as their meaningless goals have the rational consistency of the thin air, so is their power, that consists of nothing more than noise and disturbance...it is nothing from nothing.

I will never stop trying to find out who these people, who oppose free discussion (whatever the political bent) are. When I get the coordinates, the FCC monitoring station here locally in Raleigh will be the first to know

and the people I recently killfiled will not know what happened.

If you admire what Riley Hollingsworth has done for Ham Radio, and you share the sentiments below, please copy and paste the message below into an email and send to:

tosreports@aol.com

++

--A Letter From Amateur's in Support of Common Decency--

I do not speak for Riley Hollingsworth, but I do speak on behalf of many who would like to defend his honor against a vicious and unprovoked attack. The petty and malicious defamation reprinted below, concerns an outstanding American, Riley Hollingsworth, Esq. who works for the Federal Communications Commission.

As an American and as an admirer of Mr. Hollingsworth, I personally object to this treatment of his reputation, and I am quite sure the nearly 600,000(six-hundred-thousand) American Amateur Radio Operators whose interests Mr. Hollingsworth protects, would agree with me, if I were I to contact them about this matter.

In fact, if this users account is not immediately cancelled for egregious repeated violations of AOL Terms of Service, I will personally aid in petitioning the entire body of American Amateur Radio Operators and asking them to boycott AOL. I will also ask them to express their strong opinions about this sordid affair on World Wide Radio.

As an American organization, I expect AOL to defend the rights of others against malicious defamation by removing repeat violators from having access to the servers required to spread this kind of malicious invective.

I am sure AOL will do what is honorable in this instance. This user's pathetic and ongoing misuse of AOL's good facilities has gone on long enough. The offending page and it's disgusting text are reprinted below.

Sincerely,

(Your name and your call sign)

Offensive Page:

http://members.aol.com/_ht_a/K1MAN14275/myhomepage/business.html

Offensive quotation:

"Many hams and even the ARRL are totally naive as to what the devious FCC and Riley Hollingsworth are up to...Riley Hollingsworth of the FCC swaggers around the amateur radio community and scares hams with his illegal and bullying tactics and covers this with a claim to be "cleaning up" amateur radio... Riley Hollingsworth, claiming to be an FCC lawyer, swaggers around the amateur radio scene and tries to scare the bejesus out of everyone...He has done that, for sure, but at the expense of the United States Constitution? And you fools and ARRL are buying this?"

"This is what the American Amateur Radio Association is all about. We need an amateur radio representative organization with the courage to stand up to this devious and slimy bully (Riley Hollingsworth) whose real agenda is to deliver our valuable HF spectrum to the commercial interests. Make no mistake about this fraud who resides at the FCC and who gets paid by our hard earned tax money out here in the real workaday world. You, at the FCC, have won a few rounds by cheating and have fooled many fellow radio amateurs by your clever and cunning trickery, but this football game is far from over."

The term that they use is shipping and HANDLING. Handling is the cost of the box (the same whether $99 or $150), packing material, (the same whether $99 or $150), insurance (Insured for $150, not $99.) mailing labels, sealing tape, etc.

Thanks for being a cheapskate & whiner. And thanks for keeping up the stereo-type that hams are the biggest tight-wads on earth.

I'm gonna support them tomorrow and order a new antenna early, even tho spring isn't here yet - just because of this ridiculous post.

Let me comment a bit about the Mavicas. I own a couple (FD-81 and FD-91). I got the FD-81 in a swapping, about one year and a haf ago. I valued it at about $300 back then. It was boxed, with all original documents and lightly used. I have done about 1500 pictures so far and it works flawlessly. Some of my WEB page images were made with it (and to publish on the WEB I reduce resolution to about 400x300 pixel, so the 1024x768 size is more than enough; in fact I use 640x480 most times). And you can get pictures focused at just 1" of the object, which is great for detail work (as I do when documenting radio and test equipment repair). Some sample pictures can be seen at:

http://jvgavila.com/xm.htm

I got the FD-91 just last week. I got it at a very good price, $180 (and here in Spain also!). It was more used than the FD-91 but still in great shape (an 8.5 on a 1-10 scale). Its 14x _optical_ (i.e. real, not digital) zoom is amazing. Yes, it 'only' does 1024x768. But at 14x zoom, it is a lot.

I love Sony 'Info-Lithium' Li-ion batteries. They last lots of pictures and tell you, accurately, how much time you have left.

And using 1.44Mb FDDs is also very easy and cheap.

OTOH, I got same time than the FD-81 an HP-215 (1.3 Megapixel). It has an LCD trouble since I got it and the results are always poorer than with the FD-81.

So I recommend Mavicas for everybody who doesn't need higher resolutions.

Just my 0.02 Euro worth, of course.

Regards from Spain,

JOSE

I have a number of Swan radios and accessories that I am selling for a friend, who due to health problems is having to liquidate his ham gear. The gear looks good, cosmetically. Some of the cabinets look like they have been repainted. Operationally, most of it is unchecked.
I did plug the amplifier in and it blew a fuse. Items FS are:
1. Swan 700CX Transceiver. Looks complete except no 8950 final tubes.
2. Swan 500 Transceiver. Looks complete including final tubes.
3. Swan 117XC Power Supply, Speaker Console.
4. Another Swan 117XC Power Supply,. Speaker Console.
5. Swan Cygnet 1200X HF Amplifier. Has a new set of four 6MJ6 Tubes installed. Correct Tubes?
6. Swan VX-2 Vox unit.
7. Swan WM 1500 Watt Meter.
8. Swan ST-1 KW Antenna Tuner.
9. Several tubes. New set of 6LQ6s, 2 new 6KD6s, 1 6MJ6, 1 6JS6.
10. copies of most manuals and some original factory literature.
I can take a digital picture of the gear and e-mail to you if your interested. I wish that I could be more specific about the operational condition of equipment. I do know that is has not been on the air in many years. Some of it probably needs some new caps. Price for the entire lot is $875. Thanks, Charlie Hugg, K5MBX

I think you should actually READ the previous posts before you start
quoting things that were never said.

HANDLING has NOTHING to do with the charge, that is just a term used
to screw consumers out of more money for supplies the businesses
should supply.
They changed the amount AFTER the order was placed and charged a
HIGHER charge then quoted.

Call me cheap, or whatever you like, but stealing is stealing, no
matter what color you want to paint the picture, $5.00 or $1500.00 its
all the same.

Also they state that all orders that TOTAL less than $100 get charged
$4.99 shipping..no HANDLING charge as you mention is ever stated.

I don't see anything rediculous about wanting companies to treat
customers fairly and to charge what is on a written quote..

I hope the next time you buy something from a store, they charge your
credit card $5.00 more for the bag they put your items in, 2 days
after you bought it.

I am tired of being ripped off.

Also I could not care less if you buy out the whole store. This could
be an isolated incident and should not reflect badly upon everything
that they do.

I am unhappy with the customer service and unwritten policies, that
does'nt mean I expect everyone else to be.

geez Dick, no need to be an asshole. I was just shocked to see an obsolete camera for that much money. For a few bucks more you can get a used G2 (or something similar), and not have to deal with the terrible lens system in that Sony model, all the problems they had with low light due to the cheap CCD used, the high jpeg compression problems (artifacts) etc etc.

Good luck, i hope you sell it.

> Thanks for being a cheapskate & whiner.

If I'm told that shipping is going to be $4.99, then I expect that shipping
will *be* $4.99, not $9.99. I don't think someone who complains when
a price is $5.00 more than represented is either a cheapskate or a whiner.

That said, the buyer probably had a chance to cancel his order after seeing
the total cost -- if so, then he should have noted the shipping cost and
total cost for the order, stopped the purchase, and questioned then.

Sean.

393. ARNewsline 1326 - Jan 10 2003

Amateur Radio Newsline™ Report 1326 – January 10, 2003

Amateur Radio Newsline report number 1326 with a release date of Friday, January 10, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio gets two new satellites and the F-C-C tells a radio club that it wont get involved in an internal club dispute. The details on Amateur Radio Newsline report number 1326 coming your way right now.

(Billboard Cart Here)

**
HAM RADIO IN SPACE: RUBIN-2 / SAFIR-M IN ORBIT

Two new ham radio satellites are in space. One is from Germany and the other from Saudi Arabia. Q-News Graham Kemp, VK4BB, has the details has the details on a German payload called SAFIR-M:

--
Audio Only Report. No text available. Hear it in MP3 at
http://www.arnewsline.org
--

More information is available i on the SAFIR-M website http://amend.gmxhome.de But be advised that it is in the German language. There is no English translation provided. (ANS, Q-News)

**

HAM RADIO IN SPACE: SAUDISAT 1C ALSO IN ORBIT

The other new satellite is called SaudiSat 3. Its also known as SaudiSat One C and now as SO-50 – its ham radio designation.

As it name implies, this is the third in the unique SaudiSat series. It was also on board the same Russian launcher that orbited SAFIR-M.

Accordiing to AMSAT North America, this latest bird in the SaudiSat series comes by way of the Space Research Institute of the King Abdulaziz City for Science and Technology. For ham radio operation it carries what amounts to closed but available on-demand cross-band F-M repeater. The input uplink is on 145.85 MHz. The output channel is 436.775 at 250 milliwats into a quarter wave antenna.

And like a growing number of terrestrial repeaters, this orbital one requitres use of an access tone. In the case of SaudiSat, that tone frequency is 67.0 Hertz.

And there is one other similarity to closed terrestrial repeaters. SaudiSat-1C also requires that a designated control operator activate it on each pass so that it can be used by the general ham radio community. (ANS)

**

THE 5 MEGS EXPERIMENT: ARRL SAYS ITS WAITING FOR A NEW BAND

The ARRL is out of the 5 Mhz experiment and is now hoping for for the creation of a new ham band. Amateur Radio Nerwsline’s Norm Seeley, KI7UP, has the rest of the story:

--
The ARRL has permitted its WA2XSY experimental license for 5 Mhz to expire on January 1st. The League says that it is now pinning its hopes on the FCC to establish a new ham band in that spectrum but admits that it is facing some stiff opposition.

An ARRL bulletin says that starting in January 1999, 15 Amateur Radio clubs and individual hams took part in the 5-Mhz experimental operation that basically concluded in 2002. Through these operations the ARRL says that it obtained sufficient information to justify its petition for creation of the new band.

Last May, the FCC proposed going along with the ARRL's request to create a new domestic secondary High Frequency allocation from 5.25 to 5.4 Mhz. But in August the National Telecommunications and Information Administration requested that the Commission not go forward with the proposal. The NTIA says that several government agencies with allocations in the proposed spectrum had expressed reservations about sharing the spectrum with hams.

But the ARRL is still very hopeful the new band can be created. In fact, it has been working with the government to resolve the impasse. Meantime, the FCC has yet to act on the 5 Mhz request.

For the Amateur Radio Newsline, I’m, Norm Seeley, KI7UP.

--

The ARRL says that the new allocation at 5 MHz is an urgent priority for Amateur Radfo. It says such an allocation would enhance emergency communication activities by filling a propagation gap that exists between the 80 and 40 meter bands. In the meantime, experimental operations on 5 MHz continue on a limited basis in the United Kingdom and in Canada. (ARRL)

**

RESCUE RADIO FOLLOW-UP: THE GUAM SUPER TYPHOON

Guam continues to recover from the super typhoon which hit last month. Amateur Radio Newsline’s David Black, KB4KCH, has the latest:

--
By far, the best source of information during and after the December 8th super typhoon that hit Guam has been Duncan Campbell, KF6ILA. Campbell lived through the storm and reported on it and the welfare of Guam’s ham radio community through his postings to the QRZ.om website. In his latest report Campbell says

that the focus has shifted to recovery from the giant storm.

Campbell says that utility services are slowly being restored. As his report was filed about 30 percent of the island had both electricity and water. He says that the electrical restoration is hampered by a lack of transformers on the island. A shipment is expected shortly.

More signs of recovery Schools were slated to re-open on January 6th. Three schools which are too damaged to reopen. These students will be bused to other schools which are open.

As to ham radio on the island. As reported earlier all of Guam's radio amateurs are safe. There was s damage to some homes due to windows being blown out but no homes were destroyed. And two members of the Marianas Amateur Radio Club radio reportedly rode out the storm in their boat moored in the harbor.

Campbell says that a pair of Guam's more senior hams were not able to get their antennas down in time. He explains that the younger operators usually take care of them before a typhoon when there is notice. This time the typhoon was being reported as missing Guam by 100 miles up to 12 hours prior to landfall. So their antennas were still up when the typhoon hit. Needless to say the antennas and towers were destroyed.

Having talked to these two, Campbell reports that they do not know when, if ever, they will be able to replace their antennas. But help may be on the way. The Marianas Amateur Radio Club is already in discussions to install some wire dipoles for the high frequencies and some copper J-Poles for 2 meters at their homes.

Finally, Campbell says that the Red Cross, Salvation Army and FEMA are doing an outstanding job here on the island. Though he hears that the national news outlets are not covering this disaster, he wants the world of Amateur Radio to know that Guam is not being neglected..

For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

According to Campbell, the Army field hospitals he reported having been flown in have now shut down and the medical professionals have now returned home. The hospitals have been stabilized with power and water, and the damage occurred has been patched, though final repairs are still months away. (KF6ILA, ARNewsline™)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W5MCC New Orleans VHF Club 2 meter net heard Monday nights on their 146.86 MHz repeater.

(5 sec pause here)

**
ENFORCEMENT: ITS NOT OUR BUSINESS

If you are having a personal disagreement with a member of your radio club, don't bring it to the FCC. That's the message sent by the regulatory agency to a Texas group where it says that it will not iget involved. The agency's Daryl Duckworth, N-N-Zero-W, explains:

--
Duckworth:"The complaint of the Texas Soputhmost Amateur Radio Club concerning actions by a former trustee was dismissed. The club was told that the matter was Civil and best handled by the local courts."
--

By way of background in January of 2002 the San Benito, Texas, based filed a complaint with the FCC. It requested that the Commission issue a Cease and Desist Order to Thomas A. Tanner directing him to stop unauthorized operation of the club repeater. It also wanted him to remove his personal equipment from club property and discontinue unauthorized use of other club equipment.

But says the FCC says that setteling what amounts to interpersonal disputes is not within is jurisdiction or purview. Rather its a civil matter and not one that the Commission does not plan to pursue any further. (FCC, RAIN)

**

ENFORCEMENT: NO MUSIC ON 2 METERS

The FCC has told an California ham that he could face some strong punitive action. This, following allegations that he transmitted music in the two meter band.

The warning comes in a December 12th letter to Mark T. Sprague, KF6WAF of Antioch. In it the regulatory agency says that monitoring information indicates that on numerous occasions in October and November of 2002 that Sprague transmitted music on 146.415 MHz simplex and also failed to properly identify his station. The FCC says that direction finding bearings led them directly to Sprague's home.

The agency tells Sprague that these charges are violations of Sections 97.113 and 97.119 of the Amateur Service Rules. It adds that he could be subject to license revocation and suspension proceedings, as well as a monetary forfeiture or fine. (FCC)

**

ENFORCEMENT: STAY OFF 20 METERS

One last chance to straighten out your act or we we act against your ham license. Thats the jist of a warning from the FCC to a Michigan ham. Amateur Radio Newsline's Mert Garlick, N6AWE, takes an in-deoth look:

--
The threat of stern enforcement action comes in the form of a letter to to Michael E. Guernsey Sr., ND8V, of Parchment Michigan. Its from FCC rules

enforcer Riley Hollingsworth, K4ZDH. In it, Hollingsworth says that his agency continues to receive complaints of Guernsey's alleged appropriation of certain frequencies and interference to certain operators who attempt to use them. Among the frequencies mentioned in Hollingsworth's letter are 14.262 and 14.275 Mhz – both in the 20 meter band.

And the FCC notes that this is not the first time that it has taken up enforcement issues to Guernsey. Hollingsworth letter reminds ND8V that the agency has contacted him before regarding such incidents. Specifically on November 14, 2000 and May 20, 2002. And after the November 2000 incident Guernsey's authority to operate below 30 MHz was removed for a period of nine months.

And says Hollingsworth, he is not going to warn Guernsey again. He tells ND8V that if it writes to him another time it will be to notify him that the FCC is taking punitive action. Hollingsworth says that future incidents of such operation -- even a single incident -- will result in a fine being issued and revocation proceedings against Guernsey's ham radio license being initiated. That says the FCC, is the way that it is.

For the Amateur Radio Newsline, I'm Mert Garlick, N6AWE.

--

Meantime, Hollingsworth has taken one step to defuse the overall problem. He has told Guernsey to stay off of the 20 Meter Amateur Band until the issues surrounding the allegations of his operation are resolved. (FCC)

**

ENFORCEMENT: HAM JAILED FOR SPYING STILL HOLDS HAM TICKET

A ham who is serving a life sentence for espionage still has his ticket. This even though he will probably never be permitted near a piece of ham gear again. Amateur Radio Newsline's Kenn Locke, N8PJN, tells us why:

--
Remember Robert Hanssen the former F-B-I agent convicted last year of spying? If you do, you will also recall that he held the Amateur Radio service call sign K-9-Q-V-L.

Well guess what. He still does.

Contrary to what many hams thought would happen, the FCC has not acted to revoke his Amateur Service licenses. The reason? Most likely nobody has bothered to ask it to.

While Hanssen may have been one of the highest profile cases in 2002, the charges against him did not involve prosecution by the FCC. It was a matter for the Department of Justice and Federal Prosecutors. As such, its very unlikely that anyone in either agency sat down to write a letter to their counterparts at the FCC asking them to cancel Hanssen's ham radio license.

The bottom line: Unless someone files a formal request, the chances are that Robert P. Hanssen will remain as K9QVL until his ticket expires. Maybe longer if he decides to try to renew it from his cell in the Federal Penitentiary where he will probably live out the rest of his natural life.

For the Amateur Radio Newsline, I’m Ken Locke, N8PJN.

--

Thanks Ken. (ARNewsline™)

**

REPEATER LISTINGS: ARRL SEEKS REPEATER LISTINGS FROM COORDINATORS

This note to frequency coordinators. The deadline for this year's submissions of listing for the 2003 ARRL Repeater Directory is Friday, February 7, 2003. As has been the case for many years, the ARRL only accepts listings from recognized frequency coordinators unless no coordinator exists in a specific region. For more information on how to list repeaters please contact Brennan Price, N4QX, at ARRL headquarters. His e-mail is n4qx@arrl.org. (Repeater Owners Remailer)

**

ARRL: LICENSE RENEWAL AND OTHER SERVICES TO NONMEMBERS

The ARRL is now providing F-C-C Amateur Radio license renewals, address changes and other license modification services to nonmembers. For a $12 fee, the League will renew a nonmember's Amateur Radio ticket within 90 days of expiration, file an application to change address or name or request issuance of a new sequential call sign.

For several years, the ARRL has been handling renewals, address and name changes and modifications free of charge for members. Nommembers were directed to the FCC's free Internet or hard-copy application options or to other providers of such services. (ARRL)

**

GOOD INFORMATION SOURCE: NEW RFR WEB SITE

Our friends over at the CGC Communicator report that RF Safety Solutions has a new web site dealing with that very subject.

As its name implies, RF Safety Solutions is a company that provides consulting for those concerned with human exposure to RF signals. It was founded in 2002 by Richard Strickland who is a well-known expert in the field of RF safety and who has developed RF safety programs and conducted training for a number of major wireless communications companies and broadcasters

The RF Safety Solutions web site covers RF safety reporting, safety programs and training. There is also a good overview of what RF radiation really is. Its really one of the best thought out places to learn about R-F safety. Look for it in cyberspace at www.rfsafetysolutions.com. (CGC)

**

NAMES IN THE NEWS: CHANGES AT THE CGC COMMUNICATOR

And speaking about the CGC Communicator, word of a major change at that broadcast industry publication. Editor - Publisher Bob Gonsett, W6VR, has announced that Steve Blodgett, W7RNA,
has assumed the helm as Letters Editor.

Formerlly WA7GFV, Steve Blodgett is well known to broadcasters nationwide. He holds an Adcanced class Amateur Radio license and has been actively engaged in broadcasting operations and engineering for nearly 35 years, with stations in Montana, Arizona, and California. For 14 years he worked as the Chief Engineer and Radio Engineering Manager with the late Gene Autry’s Golden West Broadcasters in Los Angeles. He also used to operate an on-line bullrtin board for Chapter 47 of the Society of Broadcast Engineers and served as chairman of the Southern California Frequency Coordinating Committe. Thats the group which handles broasdcast remote pick-up recommendations.

In making the announcement, Gonsett says that having Blodgett on board will allow him more time to concentrate on CGC's consultant radio engineering practice along with frequency and spectral monitoring services. It will also permit W6VR time to to pursue a number of new opportunities as well. (CGC)

**

FREE STUFF: WABA DIRECTORY ON THWE WEB

The Diamond DX Club reports that the new WABA or Worked Antarctic Bases Award Directory for 2003 is now available for free downloading. Its in Portable Document Format on the club's web site at www.ddxc.net. The new version includes a 12-page revised Antarctic bases listing with the latest corrections and a new column for Islands on the Air reference numbers. It also sports a a new section containing historical notes. Again that URL is www.ddxc.net. (Diamond DX Club)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: GRONK RADIO NETWORK FOUNDEER - SK

One of the pioneers of repeater interlinking has died. This, with word that Gary Belda, K6ENS, has become a silent key

According to a report from Bruce and Melanie Forestal -- thats WB6ARE and K5QQA -- Gary Belda was one of the principals behind the Gronk Radio Network. Gronk

is one of the oldest 440 intertied remote base systems in the South-Westen United States and stretches the most of the Calidornia coastline.

As one of its archetects, Gary Belda among the berst liked hams in the world of F-M and repeaters. He worked in the two-way radio industry for Advanced Electronics for many years before leaving to join the field of traffic control systems. He was an expert in the aera of two-way radio and always willing to lend a hand on a ham radio repeater project.

Belda died in whats described as an unfortunate accident possibly related to antenna work. No other details are available at this time. A memorial service was held for him on Thursday, January 9th, at the First United Methodist Church in Redondo Beach California. (W6KGB)

**

ON THE AIR: COMMEMORATING HISTORY

History is coming to the ham bands. This, with word from UT5UKY that special event station EM60USB will be active from January 23rd through February 2nd to commemorate the 60th anniversary of the Battle of Stalingrad.

The Battle of Stalingrad was one of the decisive World War II Russian victories. It stopped the German army’s southern advance and turned the tide of the war.

Now, 60 years later, ham radio will be an integral part of the commemoration of that historic event. And if you get to work EM6-0USB you are advised to QSL to UT5UKY either direct, or through the bureau. (UT5UKY)

**

INTERNATIONAL-CHINA: RADIO MAG LIFT TRAIN RUNS JAN 1

The world's first magnetic levitation or mag-lift passenger train began running in Shanghai China on January 1st. The radio controlled train reached 312 miles per hour in testing. In regular service it will carry passengers and freight at a top speed above 250 miles per hour between Pudong International Airport and Shanghai's financial district. The distance is 30 miles an the trip will take mere 7 minutes -- not even enough time to make a quick cell phone call. (Technology Online)

**

PROPAGATON ASSISTANCE: C6AFP BEACON MOVING

Steve Rutledge, N4JQQ, says that he plans to move the C6AFP beacon on 50.062 Mhz in the near future. It is currently located at Treasure Cay, Great Abaco, Bahamas in grid FL-16. It will be going to a new home on Green Turtle Cay, Bahamas which is about five miles away. This is another island, same grid. C6AGN has agreed to let Steve put the beacon up at his QTH. (VHF Reflector)

**

CONTESTING: LINDHOLM TO CQ WWW VHF CONTEST

Turning to on the air operations. Word that John Lindholm, W1XX is the new Director for the CQ World Wide VHF Contest. Lindholm replaces Gene Zimmerman, W3ZZ, who left to take over writing the World Above 50 Mhz column for QST magazine. (VHF Reflector)

**

DX

In DX, DK9GG and DJ4KW will be active as V31GW and V31YN from Belize until February 25th. On February 8th they will be joined by DL2SWW and DG2TM. The four plan to operate from NA-073 on the 21st through the 23rd of February. QSL direct to each operators home call. (DL2VFR)

And K9YNF reports that he will be active as K9YNF slash HR9 from Roatan Island. This, from January 11th to the 18th. He will operate SSB only on 14.260, 18.128, 24.950, 28.460 and 28.560 Mhz. This, plus or minus a kew kilohertz to compensate for any Q-R-M. QSL via his home call -- either direct or via the bureau. (425 DX)

**

THAT FINAL ITEM: DOGGIE TALK AND THE IG NOBEL AWARDS

And finally this week, word that an inter-species communications device has received special recognition. Amateur Radio Newsline’s producer Bill Pasternak, WA6ITF, has more:

--
No, we are not kidding. An inter-species communications apparatus -- as in a dog-to-person translator -- is one of the winners of the 2002 Ig Nobel Awards.

What are the Ig Noble awards you ask? They are a spoof of the famed Nobel Awards ceremony and are given annually at Harvard University to recognize achievements that cannot or should not ever be reproduced.

Winners are selected by a secret committee from thousands of nominations. Actual Nobel Laureates present the Ig Nobel’s at a
ceremony where the winners are hailed with cheers and a flurry of paper airplanes. And if a recipient feels insulted or slighted by the award, it is withdrawn.

For 2002 those victorious included the people behind the definitive study on bellybutton lint and an inquiry into what arouses ostriches. But by far the dog to person translator was one of the most popular. Its works by listening to the tone of a dog's bark converting that data into an interpretation of the dogs mood.

The device is already on the market in Japan. An English language version called Bow-Wow-Lingual -- nope -- we are now kidding -- Bow-Wow-Lingual -- It may be on the market here in the U-S-A in about a year. And we thought that you’d want to know.

For the Amateur Radio Newsline, with my dog Daisy, I’m Bill Pasternak, WA6ITF.

--

Hmmmm. If it happens, we wonder what breed will be honored with an Ig Nobel for being the first to dog to get a ham radio license and make DXCC.

More about the Ig Nobel awards is in cyberspace at http://www.improb.com/ig/ig-top.html (Science Frontiers)

**

NEWSCAST CLOSE

I don't approve of anyone jamming Baxter, who is an interesting and
bright fellow with an independent streak, though I don't really get
anything out of "scheduled bulletin" transmissions in general and
think they are a nuisance whether they come from K1MAN, WA0RCR, or
W1AW. But I do think that Mr. Baxter is making a point which cannot
be ignored: If W1AW can come on a "scheduled" frequency without
asking or checking to see if the frequency is in use, then Baxter or
anyone else should be able to do the same, and have exactly the same
legal protections in doing so.

>

> the FCC monitoring station here locally in Raleigh will be the first to know
> and the people I recently killfiled will not know what happened.

Best of luck to you in your jammer-identifying efforts. I am sure
that Victor, W1WCR, would be happy to share his considerable file of
information on the jammers who plague his weekly Liberty Net.
Perhaps a sharing of intelligence would lead to the identification
of the perpetrators. It would not surprise me if the ever-morphing
crude person on the newsgroups is also polluting the airwaves with
similar unwanted garbage.

With every good wish,

Kevin.

>Gary

Gary,
I live in Charleston and the fest here has been on the decline for the last 4 years,
It used to be hosted in a local high school, now it has moved to the exchange park just off
I-26. I can't understand the logic for the move..

There is NO dealers, cash door prizes that always won by a ham who is a member of the club
who puts on the fest, ''go fiquire'' most of the other prizes are junk bought at the dollar
general store and most of the stuff on the tables here was obsolete right after Moses
parted
the Red Sea and usually winds up in the dumpster after the fest.

Charleston has the potentail of having a great fest but folks in the club think they can
draw
a crowd with coffee, hot chocolate and world famous hotdogs, I hate to be the stick in the
mud
for folks who plan to attend.. but until the clubs get rid of the ''clique'' this fest will
follow the path of other fest.. no longer held because of non-attendance

You probally are asking yourself why the bad comments? I used to be a member of the clubs
who
put on this fest and it appears the ''clique'' is not interested in beating the bushes to
have
a successful fest, Guess the coffee and hotdogs draw more attendance than dealers and door
prizes given only to non-club hams attending the fest...

Anyone care to debate???

Greetings

I get the feeling I am somewhat out of date. A friend at work told me that now voice repeaters are being link via the internet.

I found a site www.ip something.... I went to it and there was a line that said you could like in on a link from a repeater. When I clicked on it I felt like I had been sent to a commercial radio link.

Does anyone know of a dependable link that can give me information on this new linking system?

Apparently that rock Wussman has been hiding under isn't big enough to keep
him there. Ignore Wussman, Dan. The little Steven King look-alike troll has
to post from anon remailers, has a heart that is about ready to send him off
into La-La Land any day now and has no job.
Oh, don't forget that Wussman is never far from the scrutiny of Chief
Stenger, who has had the lad in custody in the past. While you are at it,
ask Wussman about the cluster fu** wire antennas he had in his adoptive
mother's yard. Ask him if the Glen Dale city officials did not ask him to
move them back from over the public sidewalks.

Hey, Wuss. That last episode with Chief Stenger stress you out too much? Your old ticker went haywire and they had to haul you off in an ambulance. Remember? How's the blood pressure going, Wussman? Eating Cumadin for breakfast? Story is that rat poison thins your blood, too, and it is a whole lot cheaper. Maybe you should try it.

It would not surprise me if the ever-morphing
> crude person on the newsgroups is also polluting the airwaves with
> similar unwanted garbage.

Yes, and this brings up another important point. In addition to the stalking which happens on the airwaves, for which anti-stalking laws have always applied in general, is the relatively new "internet" cybercrime anti-stalking legislation enacted by many states, with particular significant of the powerful North Carolina laws. Quoting from the North Carolina legislation:
"(b) It is unlawful for a person to:

(1) Use in electronic mail or electronic communication any words or language threatening to inflict bodily harm to any person or to that person's child, sibling, spouse, or dependent, or physical injury to the property of any person, or for the purpose of extorting money or other things of value from any person.

(2) Electronically mail or electronically communicate to another repeatedly, whether or not conversation ensues, for the purpose of abusing, annoying, threatening, terrifying, harassing, or embarrassing any person.

(3) Electronically mail or electronically communicate to another and to knowingly make any false statement concerning death, injury, illness, disfigurement, indecent conduct, or criminal conduct of the person electronically mailed or of any member of the person's family or household with the intent to abuse, annoy, threaten, terrify, harass, or embarrass.

(4) Knowingly permit an electronic communication device under the person's control to be used for any purpose prohibited by this section.

(c) Any offense under this section committed by the use of electronic mail or electronic communication may be deemed to have been committed where the electronic mail or electronic communication was originally sent, originally received in this State, or first viewed by any person in this State. "

Most significantly, Legal officials in North Carolina have provided an online form on a Cyber911 "tipline". In order for this to work, complainant must be able to provide "a" valid email address in order for them to begin a trace of the perpetrator either directly or via the newsgroup host and/or the ISP, both of which are also liable under North Carolina law. Having seen what you have seen in this thread by the one or more perpetrators who have slandered me and others under fakes id's (the fake persons represented also

have a case for complaint), it is easy to form a legal opinion (not 'rocket science') we already have the basic conditions under which to launch an investigation and criminal complaint in North Carolina against UseNet hosts, ISP's or, more to the point, specific individuals that that Cyber911 tipline may be able to identify.

In short, this post is fair warning to any/all potential perpetrators who may engage in in (QUOTE) Electronically mail or electronically communicate to another repeatedly, whether or not conversation ensues, for the purpose of abusing, annoying, threatening, terrifying, harassing, or embarrassing any person. (UNQUOTE). I am deadly serious.

Thank you form your comments, Kevin. I am certain that similar statutes appear in many other but it is nor necessary for the alleged violation to occur inside North Carolina borders. For many years such laws have also applied to radio communications but have rarely been acted upon. What makes this even more significant is that legal remedies are completely independent of the FCC enforcement bureau and actually applies criminal penalties without regard to any of alleged violations of Part 97 of the CFR.

The complaint process in NC is extremely easy to initiate and I will not hesitate to use it if the cyberstalking by the "anonymous" (not really!) perpetrators continues.

Regards...

Sadly, as ham radio has been in a steady decline since the 60s, so have the corresponding hamfests. Long gone are the days when "gentlemen" attended hamfests with their "ladies" and a formal "banquet" was held on Saturday night. Gentlemen in coats and ties attended various technical forums and particiapated in policy discussions. As you pointed out, today's "hamfests" are attended by a weird and wacko assortment of fruits, nuts, druggies, alcoholics, ex-cons, CBers with ham calls who mentally have never left the CB or their CB operating habits. Fat slobs in filthy wrinkled clothing parade around trying to get something for nothing, while the flea markets have more CB equipment than ham gear. The only thing more sickening than the greasy food served at today's "hamfests" are the digusting fat ugly old women these guys drag along behind them to these "fests."
R.I.P. ham radio.

This is to demand that you remove the above stated post from all AOL news servers over which AOL has control. Pursuant to North Carolina statute N.C. Gen. Stat. § 14-196.3. Cyberstalking, I believe I am wrongfully damaged by your company for hosting the above slander and I will take the Legal remedies that are available as provided for in the above North Carolina statute, including a trace of the offending individual and criminal prosecution of all partries resulting from your Corporate involvement in the above slander. If you agree to remove this post from your newservers, I will consider the matter settled and refrain from additional remedies in accordance with the provisions accorded me by the statute.

Sincerely,

410. Cyberstalking Part 1

Lessee - I believe there were something like 300,000 hams in the 60's,
and now there are over 600,000. Population doubled since then? Don't
think so. I don't call that a decline. You've been reading too much
W2NSD/1.

>so have the corresponding hamfests.

Nooo... Dayton Hamvention peaked about 4 - 5 years ago, at 33,000 in
attendance, and is now down to 22,000. Reason? Ebay, pure and
simple.

>Long gone are the days
>when "gentlemen" attended hamfests with their "ladies" and a
>formal "banquet" was held on Saturday night.

Hamvention still has a banquet. I don't ever recall hams I know
bringing their wives or girl friends, unless they were hams too. Its
a guy thing...

>Gentlemen in coats
>and ties attended various technical forums and particiapated in
>policy discussions.

A whole lot more people loathe dressing up in uncomfortable clothes to
please someone else nowadays...

>As you pointed out, today's "hamfests"
>are attended by a weird

Hey, I attend hamfests...

>and wacko assortment of fruits,

Nope, I'm not gay...

>nuts,

Nor mentally ill...

>druggies,

Not me...

>alcoholics,

Don't drink...

>ex-cons,

Never convicted...

>CBers

Only to be able to find smokey...

>with ham calls who mentally
>have never left the CB or their CB operating habits.

Not been there nor done that...

>Fat slobs

Hey - I could lose 20 lbs, but not slob fat...

>in filthy wrinkled clothing

Now wait a minute...

>parade around trying to get something
>for nothing,

That's called being a ham - biggest tightwads on earth...

>while the flea markets have more CB equipment than
>ham gear.

Come to Dayton...

>The only thing more sickening than the greasy food
>served at today's "hamfests"

Well, that is universal. Go to a big league baseball game - same
deal. Stop at Cracker Barrel on the way in...

>are the digusting fat ugly old women
>these guys drag along behind them to these "fests."

Haven't noticed this - its mostly guys, y'know...

>R.I.P. ham radio.

What? Just 'cuz maybe there's something you don't like about
hamfests? I don't think so...

412. Logger 8.07 DXCC report for Digital modes (RTTY) and QSL flag changes

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-15 12:19:36 UTC
From: spatari@cc.hut.fi
Message-ID: <fdb53f20.0301150419.abe1499@posting.google.com>
Source record: 70007

Hi,

I installed the great Logger 8.07 and did recalc for my logs, which include CW,SSB and RTTY mode QSOs. I did check the DXCC report for CW and SSB and the both work fine, but for Digital modes I have only 0 records on the table. I suppose the RTTY QSOs should be calculated in the Digital report?

What did I wrong or is this a bug in the software?

I checked also the Bandplan file and it does not say if a mode is digital, cw or ssb type. How does the program know which mode belongs to which category?!?

Second question: Is there a way to list in a txt-file all the QSOs and their details which are used when the DXCC listings are made? It is quite frustrating to check one-by-one all the qsos in the DXCC table.

Third question: Is there a way to change the QSL-flag for a number of QSOs at the same time? I tried to select many of the QSO-lines, but it did not work. Well, one can allways export the log to ASCII and use the brutal editor way to do this and then import the log back, but if there is an elegant way to do this I would appreciate to know.

You are referring to the IRLP or Internet Relay Link Project.

It is a broad band connection of numerous repeaters each connected
to the internet through its own node. Each node connects to a reflector
like a hub with other nodes..... you therefore have repeaters from Britain
and India linked into your local 2 meter machine.

I have found AES to be a great company to purchase from.

They treat you like a true customer, they realize that without you
as a customer that they would not be in business and they want
to help you in such a way so that you come back to them for your
next purchase.

I have found R & L Communications and Texas Tower's to have
similar "customer service" oriented attitudes. I can not say the same
about HRO!

I probably have no area of agreement at all with "Brother" Stair,
and it would not surprise me at all if it was discovered that he has
committed crimes. If he is guilty, I agree that he ought to be
punished.

But I cannot agree with the idea that anyone should be subjected to
homosexual rape by Negroes, which is increasingly common in "our"
prisons, and which an alarming number of people seem to think is
acceptable since it "only happens to people who ought to be punished
anyway."

This disgusting and illegal practice ought to be stopped no matter
what it costs, and we ought never endorse its happening even to our
worst enemies. It is the epitome of the cruel and unusual punishment
which our Founding Fathers sought to prevent.

With all good wishes,

Kevin.

I see that AES doesn't include handling. (Most mail order companies do...) And its NOT up to the mail order company to supply that stuff. Mail order is used to save time, gas and to buy things that are not common. If you want something that doesn't involve shipping, DRIVE to a store and buy it.

Before you shoot off YOUR mouth, maybe YOU need to do a little reading YOURSELF before ordering. In that same table that shows your shipping charges, at the bottom in BOLD and DUAL colored print:

"Please see POLICIES PAGE for complete information."

Now when you go to the Policies Page, it states: "The order amount on which charges are determined is pre-coupon and pre-tax."

THIS IS NOT STEALING.

It's probably a case of an employee not being familiar with the policy, because this type of incident is rare enough...let alone having someone cry and whine about it. Tell me Steve, have you used up $5 in phone calls and effort spent in trying to get back that $5??? I know..."It's the principle of the thing".

I challenge you to find ANY company that can ship that item to you insured for only $4.99. Cuz you can't.

Who Me?

There is also the Vertex Standard WiRES-II system for linking. This system has been growing, slowly, but just recently its picking up some steam. AES sells the HRI-100 interface. I'm one of the lucky few who received the HRI-100 free from vertex to establish the WiRES system in the US. Just recently Vertex started selling the interface retail... since that, there has been a boom in growth..... and you do not need a high speed internet connection for it.

http://www.vxstd.com/en/wiresinfo-en/
be sure to check out the node ID list ... there is quite a few world wide.

Hi,
I'm having a problem. I installed my htx-202 in the car, and I'm getting a pop, scratching noise on the speaker of the handheld. When I turn off the car,
the noise goes away. Its only on the speaker and not when I'm transmitting.

The noise comes and goes, but mostly stay when listerning to a conversation.

Any ideas ?

425. High Sierra Antenna (Excellent Customer Service)

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-15 23:34:48 UTC
From: "Donnie (N4JZH)" <n4jzh@knology.net>
Message-ID: <mvrb2v402n16cupaubh7bdssie1lt0io9i@4ax.com>
Source record: 70020

Good Evening All,
I just wanted to share with the group my experience with Jim Heath and High Sierra Antennas,
I purchased my HS-1500 from Jim over 4 years ago, I have made several vehicle purchases in the last four years and have moved the antenna everytime I made a vehicle upgrade.
Anyway my 1500 finally developed a problem with the motor, so I contacted Jim and he instructed me to try some simple test all that indicated my antenna needed to be serviced.

I spoke with Jim and requested a box to ship my antenna to him safely BAM! it was at my door,
I shipped the antenna to Jim last Friday, over the weekend he communicated to me via email and
telephone the options I had to get my antenna back in AS-NEW operation for a nominal fee.

My antenna arrived today, I opened the box and to my suprise I found the antenna that resembled nothing to the antenna I sent him. Jim took my antenna and in short order turned my
antenna into his new HS-1800 also enclosed was a new control box to get the antenna up and down
with ease. I called him after I opened the box and expressed my thanks and I asked him why?

His answer plain and simple, I had to completely disassemble the antenna so I decided to give
the antenna a full upgrade, boy did he- internal antenna parts, new motor, control box, paint,
new covers, quick disconnects e.t.c. he in turn thanked me for the phone call. In my closing
comments to Jim I thanked him for his contribution to ham radio with a fine antenna and stated
I don't know how ham radio lasted this long without his antenna.

In closing, I am not a payed employee for HS and have nothing to gain or lose from this thread,
I am a ham in S.C. who spend alot of time in his mobile that requires a antenna that installs
with no problems if you follow the instructions, customer service ''second to none'' and a antenna that will stand up to the normal wear & tear, the elements, minor abuse from tree branches and STILL get a 5-9-9 anywhere I call. If you are thinking about purchasing a High Sierra Antenna, It will be the best money you have ever spent!

''Behold how good and pleasant it is for Brethren to dwell together in unity''

I seem to hear the shriek of a child molester, named Stagger lee who doth
protest too much.

> who was spanked off

Wrong again, fuckhead, I cancelled BOTH Altopia and OVIS....found a much
BETTER service with competent system administrators unlike those at OVIS and
I canceled Altopia, and besides, why did Chris say he'd cancel my account
around Sept. 26, when I asked him to cancel my account? He said I could
return anytime to his server...you fucked up again, but why did Chris cancel
yours? after al, you've got a new account with Altopia now.

> Has Chief Stenger

You really want to suck Stenger's dick, don't you, Faggot Lee? Hmm that's a
swich from the little boys you usually like to suck off.

You been on he neworleans group lately, Fuckup Lee?
Too bad he's too busy getting involved in civil lawsuits for abusing his
zoning positoin with the city.

>let you out yet,

The city of Glen Dale doesn't have a jail facility, dickbreath.

> or are you simply forgetting to take your medications again?
>
> P.S. Be sure to keep your antennas above neck height so that the
> Glen Dale police don't visit you yet another time for that violation.

They didn't ever visit me for my antennas, you blithering asshole. They have
no authority in that regard, but if you were really a ham, you'd know that
PRB-1 and the recently passed WV amateur radio antenna law makes them have
to give me and allthe other hams in WV a resonable acomodation. but you

can't even find the right Marshall County ARES website, can you fuckup?

"FUCKUP Lee" <SLee@houston-hunks.com> geography idiot and imbecile fucks up
as usual when he thinks Marshall County, Alabama
and Marshall County, West Virginia are the same place in message
<afvsc2$6aa$1@pita.alt.net>:
" Then what is at http://www.geocities.com/skywarncanwarn/ doodle brain?
It sure looks like the Marshall County ARES, and it even has a place to
send email."

> ====================
> "And that fat hog Pam shouldn't caterwaul with her hunchbacked fatass

Yeah...you found a better service. Sure. AFTER you were KICKED OFF Ovis and Altopia. It is your story, Wussman. Tell it like you want but several of us know better. I think Arf! Arf! had something to do with it if I remember. And your "better service" is, what? An anonymous server?

> The city of Glen Dale doesn't have a jail facility, dickbreath.

Never said they had a jail, only that the Chief had you in custody...and you DID have a cardiac "event" and you DID get taken to the hospital. Chief Stenger later said, "Whew! I thought we lost him there."

Byline: Phil Sheridan

NPS Press Release: Independence National Historical Park
to Unveil Preliminary Designs for President's House Site
For Immediate Release
Phil Sheridan 215-597-0060

Independence National Historical Park will present preliminary
designs for the site of the President's House during a meeting
at the African American Museum in Philadelphia, Seventh and
Arch Streets, on Wednesday, January 15 from 6:00 p.m.
to 8:00 p.m. Interested members of the public will be able
to see a presentation on the design and to comment or ask questions about
the proposal.

Presidents Washington and Adams used the residence at
190 High Street (now Market Street) in Philadelphia as the
Executive Mansion when Philadelphia was the nation's capital.
Washington's household staff included servants paid wages
for service, indentured servants and slaves Washington
brought to Philadelphia from his home, Mount Vernon.
After the beginning of the 19th century, the building became
a hotel and was also used for shops until it was demolished in 1832.

Recent public interest in 190 High Street focused on concerns
that the existence of slavery at the site would not be adequately
recognized. In the summer of 2002, the House Appropriations
Committee called for the National Park Service to
appropriately commemorate 190 High Street and the slaves
who worked there.

INHP met with representatives of local groups to explore the themes
and design possibilities for the site. These representatives
included: Harry Harrison, of the African American Museum in
Philadelphia; Stevie Wolf, representing the Ad Hoc Historians;
Michael Coard, from Avenging the Ancestors Coalition;
Karen Warrington, representing U.S. Representative
Bob Brady; Tanya Hall of the Multicultural Affairs
Congress and Ed Lawler, representing the Independence Hall Association.

Vincent Ciulla Design, an interpretive firm from Brooklyn, New
York, and the Olin Partnership, developers of the master plan
for Independence Mall worked with the participants to develop
a preliminary design for the site.

Source record: 69885

See also: http://www.ushistory.org/presidentshouse/index.htm

http://www.ushistory.org/presidentshouse/controversy.htm

To Quote the site: "We want the outline of the footprint of the house marked in the
paving so future generations can experience where the first two Presidents of the United States lived and worked and can see where the slaves lived during that period. This opens the opportunity to discuss free blacks and slaves, Washington, and Adams (who was opposed to slavery), and the complex issues of those days and how they help us understand the issues and challenges of our times."

"With the help of historians, our public officials in Washington and locally,
and concerned citizens, the NPS will need to listen. The outline in the pavement is not expensive, so the only obstacle is for them to refocus their misdirected plan and agree to be responsive to the needs of all Americans who come to visit the park in historic Philadelphia."

(..to which this retired [white] Army CO says - "Here-Here" !)

Ok, I will shoot off my mouth and accept your challenge..

Hro will ship orders over $100.00 for FREE...
So I could have purchased the radio and one low priced item and got
it shipped for less than what I payed with insurance.

Also, I did read the policy and also have copies of the polices
stated, and I can tell you what you quote is NEVER stated, however
since my complaint they may have added it as an after thought.

It is always stealing when a price is agreed on and someone takes
more behind your back.

I of course never could cancel the order because I was charged after
the fact.

I will never be able to change your mind, so this is my last response to you.

Just let me say I am not stupid, and I know what happened to me and how it happened, and it was'nt right.

>Bro. John

OK, I'll bite - find something else that has increased in quality
since the 60's.

People had a lot of time to spend on hobbies in the 60's when compared
to today. Yes, we could study, study, study electronics, and build
stuff, etc. Nowdays, there are tons of other things competing for our
time. More TV channels. Internet. Easier and cheaper travel in more
reliable cars gets people to ski slopes or other activities more
often.

OTOH, see if there are anywhere as much or as high capability public
service in the 60's as there is now. Little or no handheld radios.
Great long distance communications, but poor local communications in
the 60's. Now, we have great long distance communications and even
greater local communications. Repeaters. Channelized communications
on all the VHF bands. People can find each other and work effectively
together. Etc.

Anyway, the original poster went off on a tangent about fat hams and
ugly women and drunks and gays and addicts and criminals that are just
so much hogwash, so I had to get involved. <G>

There's no such thing as a free lunch. Somehow, somewhere, they make it up on something. They have to. Retail and wholesale businesses simply don't have profit margins high enough to sacrifice it on shipping. It's only a marketing ploy to get you to buy from them. Lots of companies do this but don't fool yourself, it only looks like you're getting free shipping.

Oh, to the contrary, Wogie. Chief Stenger is on record as stating that you
have been twice arrested.
Keep up the denial and I will contact the Marshall County DA and make a
request for your records...easy
to do if one wants to take the effort.
Besides, only YOU would know that Glen Dale has no jail facility.

> >and you
> > DID have a cardiac "event" and you DID get taken to the hospital.

It is not unusual for arrestees to suffer seizures. They do so for one of
two reasons.
1. To forestall the arrest.
2. The strain and shock of being arrested brings on seizures, real or
imagined.

> > Chief

If I heard correctly, AF2Y is spending most of his time walking on a creaky/squeaky treadmill while talking on a 46 MHz hands-free phone. (Sounds awful.) OTK... I think someone said he has gone back to school to get his sixth grade diploma. And TEW? I understand he has changed his ways and no longer makes a fool of himself on ham radio. Exactly where he is now making a fool of himself is unknown.

Those clowns are gone. KV4FZ returns. Good does triumph over evil.

Yep. Keep up your lies, you're following in the footsteps of the king
of all liars, Jesus...bwhahahahahaha!!!!!

>You were booted off both and told not to return.

Wrong agin, dickhead. Chris Caputo said I could return ANYTIME. I
wouldn't want to go back to poorly run OVIS, they can't even keep their
servers online.

Wrong again, dickhead. Stenger is on record as fucking up a neighbor's zoning in the city. And he doesn't give out information like that. He said he would be looking into some anonymous fuckheads like you though.

You are right Joe, lloyd da toid is the eternal no code wannabe. He is from
Missouri. Of course, he lives in Athens, Alabama (home of Deliverance extras),
it is also where the toothbrush was invented. If it had been invented anywhere
else, they would have called it a teethbrush.

lloyd da toid is like a boil in the crack of your ass, always irritating!!!

I received this email today form a YahooGroups Users.
Please pass the word to your friends.

Yahoo has been spying on your computer.
I have finally figured it out and here is their admission
and how you get out of it. They are using something they
call "Web Beacons" to track Yahoo Group users around the net
and see what you're doing -similar to cookies.Take a look at
their updated privacy statement:

http://privacy.yahoo.com/privacy/us/pixels/details.html

About half-way down the page, in the section "Outside the Yahoo!
Network", you'll see a little "click here" link that will let you
opt-out of their new method of snooping.
Once you have clicked that link, you are opted out. Notice the
"Success" message at the top of the next page.

(If this URL doesn't work, then go back to
http://privacy.yahoo.com/privacy/us/pixels/details.html
and you will find Web beacons in the section on Cookies.)

BE CAREFUL because on that page there is a "Cancel Opt-out" button
that, if clicked, will *undo** the opt-out.

What a vapid comment. A bench warrant for an inquiry? You idiot.
You sound frightened, Wussman. Afraid someone may get your records
and post them? It is easy to do and you know it.
Too bad your "stay" in the mental health facility is not so easily attained,
but there
is a way to do that, too.

Hey, Troll. The guys in Scanner.flame.fest have words for you...none of them
good.
But you already know that.

494. Low voltage transformer

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-18 14:48:24 UTC
From: Oris <oris@dirtball.com>
Message-ID: <3E296944.6090506@dirtball.com>
Source record: 69939

Does anyone know where I can find a Low Voltage transformer for a
Johnson Viking Valiant II. Peter Dahl wants 165, I'm looking to see
what are my other options are or maybe other sources for transformers. I
have been told that that is high price for the transformer. The voltages
on the secondary of the transformer are
215 V Blue to red yellow
215 V Blue to red yellow
310 V Red to red yellow
310 V Red to red yellow
2.6 V Brown to Brown
6.8 V Green to green
5.4 V yellow to yellow
Also I am looking for a 5R4 rectifier. Under advice I was told to
trash the 5V4 tube. They say that it shorts and will cause the
transformer to let the smoke out.
73 and thanks
Oris

Can someone tell me where in New York City, there is a Amateur Radio store beside Radio Shack. Most Radio Shack doesn't carry Ham Radio stuff anymore.

Thanks!!

Amateur Radio Newsline™ Report 1327 – January 17, 2003

Amateur Radio Newsline report number 1327 with a release date of Friday, January 17, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australian telecommunications regulators oppose the Amateur Radio fix for 40 meters and hams on Fiji provide aid in the wake of cyclone Ami. These stories are first on Amateur Radio Newsline report number 1327 coming your way right now!

(Billboard Cart Here)

**

SPECTRUM ISSUES: AUSTRALIAN REGULATORS FAVOR 40 METER STATUS QUO

A disagreement over the future of the 40 meter band between Australia's national amateur radio society and that nations telecommunications regulators. The Australian Communications Authority -- the A.C.A. favors the status quo. The Wireless Institute of Australia says its time for a change. From Brisbane, Q-News Graham Kemp, VK4BB, picks up the story:

--

The 7 MHz issue. Currently A.C.A. is against the motion at WRC 2003 -- which is of course at variance with the current allocation in Australia. At present the A.C.A. are steadfast in their opposition to the motion notwithstanding numerous attempts at lobbying them. The WIA position is in support of the IARU motion and WIA will continue to lobby A.C.A. to support the full 300 kHz allocation at 7 MHz on a world wide basis.

WIA President Ernie has asked: "If anyone can think of any additional justification that we can provide to A.C.A. to make them change their minds please let the A.C.A. Liaison Committee know and we will try and push the matter with A.C.A. again".

--

What impact the A.C.A.'s stand will have on the outcome of WRC 2003 cannot be assessed at this time.

**

RESCUE RADIO: CYCLONE AMI HITS FIJI

A Cyclone named Ami has torn across parts of Fiji, destroying homes and unleashing floods across northern islands. And it appears that once aghain, Amateur Radio has come to the rescue, It all happened on January 14th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has what we know so far.

--
Packing sustained winds in excess of 90 miles per hour and gusts of 125 miles an hour, the Cyclone Ami whipped up mountainous seas, cut communications and left the tourist hub of Labasa, on the main northern island of Vanua Levu, under four feet of water. All normal lines of communications with Vanua Levu were cut at about 17:00 GMT as the storm approached. Vanua Levu is where a quarter of Fiji's 800,000 people live.

According to news reports, emergency officials did manage to restore partial communications with Labasa and the town of Savusavu late on Tuesday using Amateur Radios circuits. Over them they learned that Labasa was under four feet of water after a nearby river overfload its banks. Also that there had been extensive damage throughout the area.

But even these communications efforts were hampered by extensive flooding. Also, the extent of the involvement of hams is still unclear since news reports did not give the names or call signs of the operators handling the emergency operations.

Here in New Zealand the government has already sent an air force surveillance plane to assess damage. Another aircraft was scheduled to arrive in Fiji the same day and, carrying aid experts and some relief supplies.

For the Amateur Radio Newsline, I’m Jim Meachen, ZL2BHF, reporting from Auckland, New Zealand.

--

The cyclone is the second to hit the South Pacific in as many weeks. Thousands of inhabitants of a remote part of the Solomon Islands chain northwest of Fiji survived powerful Cyclone Zoe, which hammered the area with 190 mph winds.

**

RESCUE RADIO: HAMS AID IN WAKE OF TYPHOON ZOE

And speaking of Cyclone Zoe, ham radio is helping in recovery efforts following that storm after it hit the Solomon Islands a few weeks ago. Jeramy Boot, G4NJH, is in Nottingham England has more:

--

Students and graduates of the Solomon Islands Amateur Radio Training School have been on the air from the capital Honiara in the wake of Cyclone Zoe.

The storm hit the islands of Tikopia and Anuta in the Solomon's remote Temotu Province last week. The amateurs are volunteers at the National Disaster Management Organisation and are providing assistance to the staff of three at NDMO HQ during the current state of disaster in the Solomons.

Using donated equipment received last year fromoverseas amateurs and CB operators, the first on the air was Moffet, H44MD. He was told that three 100-watt HF transceivers were donated by an American amateur and sent by air mail three weeks before the cyclone.

--

As we go to air, reports say that the Solomon Island radio school graduates are still providing post cyclone aid. (GB2RS)

**

COMMUNICATIONS LAW: BIG BROADCAST TOWER WIN IN NH

Back here in the United States, a big tower case win for a broadcaster could have a trickle-down effedt for ham radio. This, after the New Hampshire Supreme Court has rejectes a city's zoning ordinance limiting the height of new communication towers to 42 feet. It says that regulation conflicts with federal law.

The ruling clears the way for Koor Communication Inc. to obtain local construction permits to begin constructing broadcast towers for WQTH-AM in Lebanon, New Hampshire. According to Radio World Online, Koor Communications first filed for variances to the ordinance in 1999 seeking to construct four antennas to the height of 266 feet in accordance with its FCC license and Construction Permit. The broadcaster's attorneys argued that Lebanon's restrictions effectively prohibited the construction of new radio stations.

Koor Communication lost several lower court decisions. This lead to the appeal to the state's highest court. That court has now said the lower court findings were incorrect and it reversed their rulings. (CGC Commuinicator, RW-ONLINE)

ARRL: BOARD IS MEETING

The American Radio Relay League’s Board of Directors is holding its first meeting of 2003 as this newscast goes to air. For a full wrap-up on what actions the Diirectors might take, go to the news pages on the ARRL website. Its easy to find at www.arrl.org. (ARRL)

**

ENFORCEMENT: HAM JAILED FOR SPYING FOLLOW-UP

Two interesting follow-ups to last weeks story on convicted spy Robert Hanssen, K9QVL. The first came in a note from the FCC which takes issue with our account.

It says and we quote: “the assertion that we need a complaint to pull Hansen's ticket or anyone else's ticket is dead wrong.” Endquote.

But thats all the spokesman says. No other information was provided.

The other item is even more interesting. After the story ran, we began getting reports that Hanssen's call had been deleted. We went over and checked the FCC's database. It was still there. It was also on the Buckmaster websire, but ther was a surrprise when you inputted the K9QVL call over on QRZ.com. It came back stating that the K9QVL listing was no longer in the QRZed database. (ARNewsline™)

**

ENFORCEMENT: FCC RESCINDS ND8V WARNING LETTER

The FCC has canceled its recent warning letter issued to Michael Gurnsey, ND8V, and has told the Parchment Michigan ham he can resume operation on the 20 meter band.

As reported last week, the agency's Riley Hollingswoth, K4ZDH, had written a very sternly worded letter to Gurnsey. It stated that it would initiate stern punitive action against him if it received any more complaints that he was appropriating certain frequencies on the 20 meter band. It also told him to stay off 2o meters until the issue could be resolved.

But on January 3rd the Hollingsworth wrote to ND8V once again. This time it told Gurnsey that he could disregard the warning letter and resume 20 meter operation. It also went on to thank him for his cooperation in resolving the matter. No further information was provided by the FCC. (FCC)

**

ENFORCEMENT: NY HAM FACING REVOCATION

The FCC has written to a New York city area ham telling him he may face license revocation proceedings. The Commission's Daryl Duckworth, NN0W, explains:

--
Duckworth: "A Warning Notice and Notice of Intention to Designate a Revocation and Suspension Proceeding was issued to Alexander Sandbrand N2NNU for operation outside of his Technician class priveleges on numerous occasions and after warnings."
--

Sandbrand lives in Yonkers New York. That's a few miles due North of Manhattan. Back on August 17th of 2001 the FCC issued Sabndbrand a first Warning Notice regarding operation outside of his license privileges. The Commission says it now has information indicating that at least nine times since his receipt of that initial warning that Sandbrand operated out of band.

And in a related item, the ARRL Letter reports that Sandbrand called FCC rulers enforcer Riley Hollingsworth after receiving the first Warning Notice. He reportedly complained that it wasn't fair that he had to pass additional examination elements to operate on High Frequency phone. Hollingsworth supposedly told Sandbrand that if he wants to operate on H-F, he has to take the test like everybody else. (FCC, ARRL Letter)

**

RADIO LAW: TEEN ARRESTED AND CHARGED IN DIREC TV CASE

A 19-year-old college has been taken into custody on charges that he pilfered information about a new security system used by satellite broadcaster Direc TV and distributed it over the Internet. FBI agents in Los Angeles say that they arrested Igor Serebryany and have charged him with stealing information related to DirecTV's latest access cards. These are the access cards Direc TV uses to regulate what services its subscribers will receive.

According to several news reports, Serebryany who is identified as a University of Chicago student, allegedly took the information from a Los Angeles area law firm that was doing legal work for Direc TV. He ithen is supposed to have distributed it to web sites dedicated to the hacking of DirecTV's security systems.

According to the criminal complaint against Serebryany, DirecTV spent more than $25 million developing the high security "Period 4" card. This, after the three previous versions had been successfully hacked by pirates. Serebryany faces up to 10 years in prison, a fine, or both, if convicted. (Published news reports)

**

RADIO LAW: FCC SIMPLIFIES FILING PROCEEDURES WITH ECFS EXPRESS

The Federal Communications Commission has launched ECFS Express. This is a simplified version of its Electronic Comment Filing System or ECFS.

According to an FCC news release, ECFS Express is designed specifically with the consumer in mind. The FCC claims that it is easy to use, focuses on topics rather than docket numbers, and requires minimal input by consumers seeking to participate in the Commission’s public rulemaking process. People wishing to comment simply click on a topic, fill in their personal information, write their comments and hit “send.”

To access ECFS Express, users need only click on the “File Comments” logo found on the front page of the FCC’s Web site at www.fcc.gov The original version of the Electronic Comment Filing System, which includes all docketed Commission proceedings is still at the FCC website as well. (FCC)

**

COMMUNICATIONS LAW: A WARNING TO DOMAIN NAME SELLERS

A warning to Internet domain-name sellers. Keep better track of your customers or Congress will be forced to step in.

The warning comes from California Representative Howard Berman. He claims that domain-name sellers have an obligation to keep accurate records of their customers to ensure they can be contacted if they are improperly using trademarked names or engaging in other illegal activity.

According to Berman. Internet users must provide a contact name, address and other information when they buy a domain name. But the Congressman says that few name sellers run checks to make sure that the contact information is

accurate. Berman says that this lax oversight allows scam artists and cybersquatters looking to sell domain names to their rightful owners or others to hide their true identities. This he says, provides a barrier for law-enforcement officials investigating such crimes.

Berman says that he would like to see all the top-level domains start to implement these types of checks on their systems. He also warns that if self regulation does not work that Congress may have to step in. (Published news reports)

**

CONVENTIONS AND HAMFESTS: VIENNA VIRGINIA IN FEBRUARY

Turning to the hamfest and convenbtion scene, if you are in or near Vienna Virginia on Sunday, February 23rd, 2003, then plan to stop by the Vienna Wireless Society's 27th annual Winterfest. The venue is the Northern Virginia Community College in Annandale. Look for lots of equipment along with helpful information on how to get started in the hobby. More information is in cyberspace at www.viennawireless.org (KG4OJT)

**

CONVENTIONS AND HAMFESTS: HAM-EX 2003 CANADA IN MARCH

A bit to the North, the Ham-Ex 2003 exposition is slated for March 22nd at the Brampton Fall Fairgrounds in Brampton, Ontario, Canada. Sponsored jointly by the Peel and Mississauga amasteur radio clubs the March 22nd event will feature manufacturers displays, equipment vendors, Canadian ham radio exams and everything that goes into a great hamferst or convention including a gala banquet and lots of prizes. For more information please visit the shows website. Its in cybersace at www.peelarc.org (press release)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE WAR ON TERRORISM: NYC REBUILDS WITH A NEW TV TOWER IN NEW JERSEY

A broadcast tower almost a half mile high to replace the structure lost when terrorists felled New York's World Trade Center could rise across the Hudson river in New Jersey. This, as an alliance made up of eleven broadcasters release a report as to why they favor proposed site in Bayonne over one in Jersey City. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--
In a 17-page letter to New Jersey's environmental commissioner, the broadcasting alliance says the new tower would restore quality television reception for about three quarters of a million people in the metropolitan area. This is especially important to the regions poor and elderly who cannot afford to pay for cable or satellite reception. And the alliance called the Bayonne site far superior in terms of size, security, environmental concerns, cost and construction timetables.

And the groups president, Edward Grebow said the $200 million project would also be a boon to construction workers in the region. He also noted that the city of Bayonne wants to make the tower a central element in plan to transform the location into an area of offices, homes, stores and marinas. In addition to its television antenna system, the alliance suggests that the structure might also be used for scientific studies. This could include long term investigations into weather, climate and air pollution.

If constructed the new tower would not only become the world's tallest free-standing structure. It would also be the worlds tallest broadcast tower built at near sea level. For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.
--

While New Jersey has the support of the regions broadcasts, other locations are still believed to be under consideration by local politicians and community leaders. (ARNewsline™ from listener reports)

**

EMERGING TECHNOLOGY: GENERATING ELECTRICITY WITH HOT AIR

Meantime, another would-be tallest man-made structure could soon be towering over the Australian outback. This, as part of a plan to capitalize on the global push for greater use of renewable energy.

By 2006, the Australian power company EnviroMission Ltd hopes to build a 3,300 foot high solar tower in southwest New South Wales state. The 200 megawatt solar generating station will cost nearly $563 million dallars to build and will be the width to a football field.

The technology behind its operation is very simple. The sun heats air under the tower’s glass roof. As the hot air rises, a powerful updraft is also created by the tower that allows air to be continually sucked through 32 turbines, which spin to generate power.

EnviroMission hopes to begin construction on the solar tower before the end of the year. It says that it plans on generating enough electricity to supply 200,000 homes around the beginning of 2006.

Currently, the world's tallest free-standing structure is the Canadian National Tower in Toronto. Its about 1650 feet high. (W8HDU)

**

CHANGING OF THE GUARD: DON MACKAY, ZL3RW - S.K.

The changing of the guard in Amateur Radio continues. This, with word that NZART Honorary Life Member and Past President Don Mackay, ZL3RW has passed away.

MacKay died at his home in Christchurch on January 14th after a long illness. Among his many accomplishments was his work in the introduction of Amateur service repeaters to New Zealand. This, at a time when that nations Post Office was opposed to such operation.

ZL3RW used his experience in emergency communications to sway the agencys decision in favor of permitting repeater operation. For many years it was this aspect of Amateur Radio that ensured their continuation.

Don MacKay is survived by his sister Margaret. A service in celebration of his life was held Saturday January 18th in the city of Christchurch. (NZART)

**

HAM RADIO IN SPACE: NO PACKET TO THE ISS
Packet users are being requested to not send e-mail messages to the all ham crew on board the International Space Station at this time. This, according to the AMSAT News Sercice which reports that they are not answering e-mail, and are realkly not expected to do so in the near future. No specific reason was given, but according to news reopprts the current all ham crew is very busy with many non ham radio related on-orbit duties. (ARISS)
**

HAM RADIO IN SPACE: ISS ALABAMA EXHIBIT FEATURES HAM RADIO
Ham radio will play a part as the City of Mobile, Alabama is hosts a four month exhibit of the International Space Station. This at the new Science Exploreum building.

The exhibit consists of a full scale mockup of the main parts of the ISS along with other aspects of living and working in space. According to N4UXY the Mobile Amateur Radio Club " W4IAX " will host a ham radio station that will attempt to talk to the real space station durinvg the exposition. The club also plans to demonstrate other aspects of the Amateur radio to an expected 80,000 visitors.

The show began on January 9th and ends on April 5th. More information is on the web at www.exploreum.net (N4UXY)
**

CONTESTS: 2003 WINTER 6 METERS CONTEST

The 2003 winter 6 meter contest is will commence at 2300 U-T-C on Friday February 7th and conclude at 03:00 U-T-C on Saturday February 8th. The rules are very simple. Each in-country QSO is worth one point. Out of country contacts score as two points. Hawaii and Alaska count as separate nations in this one.

Scoreing is total Q-S-O points multiuplied by the number of grid squares worked. Entries go by e-mail to w4wrl@aol.com before March 15th. They can also be sent snail-mail to Wayne Lewis, 3338 South Cashur Drive, Florence, South Carolina, 29501. (VHF Reflector)

**

DX

In D-X, PA3GIO will be active as ZK2GI from Niue from about the 18th to 26th of January. He will operate SSB only with 100 watts and a dipole antenna. If you work him, Q-S-L as directed on the air.

Also, KM1E is active from the Bahamas as C6AGN. He’s on 160 through 6 meters from now through the 4th of March.

And lastly, some good news about famed D-X’er Ron Wright ZL1AMO who suffered collapsed lungs in late November. According to Judy Rausch, AA7UC, of the International D-X Network, Wright returned to his home on January 13th to complete his recocery. (AA7UC, INDEXA)

**

THAT FINAL ITEM: CELEBRATING A NEW LICENSE CLASS

And finally, a big success for a big operating event celebrating a new license. That’s the word out of the United Kingdom as reports on the first ever Foundation Class Q-S-O party begin to filter in. Again to England and GB2RS news presenter Jeramy Boot, G4NJH:.

--
The M3 'QSO Party' on 40 metres on the 1st of January was a huge success with hundreds of newly-licensed M3 amateurs and their friends wanting to take part. Richard Jolliffe, G3ZGC, said: "I planned just to join in but when I switched on there were two M3s looking for a net controller. So as one of the Newbury club's Foundation Licence instructors I volunteered.

The pile-up was certainly the largest I have ever heard and I had to go to letters in the suffix and ask for M3 Alfa stations and work through the alphabet. In two hours I worked 112. At least half as many again were 'gotaways'."

Richard added, "What was very noticeable was that the standard of operating was fantastic by the M3s. It was noticeable how appreciative most of them were at having passed their exams. Many messages of thanks were passed to their local clubs. An excellent event."

Douglas Nixon, M3BKC, was one of the numerous Foundation Licensees joining in the fun. He said, "Richard did a splendid job as net controller during the hectic conditions that followed at times during the next two hours. Roger, G4RUW, also from Newbury, took over at 1200, followed by John, G4TSN, from Nottingham. Many thanks to all concerned."

Jeramy Boot, G4NJH
--

Obviously, the concepts behind the U-K Foundation Class license are rock solid and it is most likely the way other nations will go as they seek too increase participation in the hobby. (GB2RS)

I KNEW it! Wiseman is that chubby little purple Teletubbie, right? I just knew it! I could tell by the way he walks!

501. Cronkite Leaves Baxter For ARRL

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-18 19:10:24 UTC
From: franktheham@juno.com
Message-ID: <715f8c2a.0301181110.4b022b5f@posting.google.com>
Source record: 69946

I found this on the ARRL website. Guess it answers the earlier posts about K1MAN and Walter Cronkite. Looks like the most trusted man in America really trusts the ARRL not K1MAN.

ARRL Announces Amateur Radio Today CD-ROM Presentation

NEWINGTON, CT, Jan 17, 2003--The ARRL is offering a new video presentation, Amateur Radio Today, that tells Amateur Radio's public service story to nonhams. The video presentation, directed by Dave Bell, W6AQ, and narrated by former CBS news anchorman Walter Cronkite, KB2GSD, runs approximately six minutes.

"We wanted to have something for people to take to nonhams and civic clubs," said ARRL President Jim Haynie, W5JBP. Haynie also anticipates that the CD-ROM production will come in handy during his visits to Capitol Hill. The presentation focuses on Amateur Radio's role in emergency communications.

"Dozens of radio amateurs helped the police and fire departments and other emergency services maintain communications in New York, Pennsylvania and Washington, DC," narrator Cronkite intones in reference to ham radio's response on September 11, 2001. "Their country asked, and they responded without reservation." Amateur Radio Today also highlights ham radio's part in helping various agencies respond to wildfires in the Western US during 2002 and mentions ham radio in space.

Haynie said he and Bell discussed the project, and Bell agreed to take it on. Alan Kaul, W6RCL, authored the script, and Keith Glispie, WA6TFD, edited the production at Suite Sixteen, a production facility in Burbank, California, that he co-owns. Haynie said Bell, Kaul and Glispie donated a lot of their own time and effort in making the the video presentation a reality.

"Someone once said, and it's probably true, that Amateur Radio is the only fail-safe communications system in the world," Cronkite says in his final remarks, noting that he has ham gear aboard his sailboat. "It really is the best back-up communications system in the world," he concludes, adding, "and that's the way it is." That phrase was the one Cronkite always used to close out his nightly newscasts during his tenure with CBS.

The League has made the presentation available for downloading via the ARRL Web site. The 70-MB file is in MPEG video format, which can be played by Windows Media Player, Apple Quicktime or RealPlayer. To view

the video directly from the Web you'll need to be able to receive data at 1.5 Mbit/s. If your connection speed is slower than that, you should download the file to your local hard drive and play it from there.

Individuals may order a copy of the CD-ROM from the ARRL on-line catalog. Plans are under way to also make Amateur Radio Today available in VHS videotape format.

Haynie says Amateur Radio Today will be the first in a planned series of at least three presentations. The second will point up the "fun" aspects of Amateur Radio. The third--but not necessarily the last--will offer a tour of ARRL Headquarters and its activities on behalf of ham radio.

Bell, a Hollywood TV producer, is a past chairman of the ARRL Public Relations Committee.

502. Any Marconi freqs for this weekend?

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-18 19:24:20 UTC
From: fallguy7@hotmail.com
Message-ID: <83b0139e.0301181124.623a4791@posting.google.com>
Source record: 69947

I was wondering if anyone knew the times and freqs for the Marconi anniversary today. The only thing I have is:

3.539 CW 7.039 CW 14.039 CW 0000 UTC(7:00PM EST)
3.885 AM 7.260 LSB 14.260 USB 0030 UTC(7:30PM EST)

...however I thought I had read that some hams would be in that area today making contacts.

Any info would be very helpful!

Mark

SWL Places to be:

The infamous Liberty Net: Saturday evening 10:00 PM Eastern 3.947 LSB (+/-
alligators)

The Regional Militia Patriots Net weeknights 8:00 PM Eastern 3.860 LSB (+/-
wide signal porto-rickans)

Jerimiaha 33.3 [LP RPM records?] Ministries weekdays 17.495 at 1:00 PM EST &
5.050 at 9:00 PM EST
(rantings from a former South African kook preacher that makes Brother
Stair & Hal Turner
look like the Rev Al Sharpton & Ted Kennedy by comparason...)

K1MAN's "Jump up on my shoulders naked facing me and say
I-Luv-You-you studded Leather clad Stud Muffin with beer-bellys
Net"...... 14.275 all freakin day long plus spill-over on 14.313
gloryhole (the name sez it all folks.....Woooo Hooooo!!!!!)

507. VX5R going deaf? HELP!

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-18 22:49:28 UTC
From: Toscano <toscano2@ix.netcom.com>
Message-ID: <b0cbgcqod1@slb0.atl.mindspring.net>
Source record: 69948

I've had this radio for about two months, purchased it used in excellent condition from someone I know who bought it new. I know this radio has been trouble-free in the past, but now it seems to have a slowly growing RX problem.
Last Saturday...RX was perfect on 70cm ham band. Using it as a scanner on 800MHz public safety I noticed it did not seem to pick anything up. But I did not worry...
A few days later, it was not receiving on 70cm anymore. I could transmit fine, but when it comes to receiving I can not hear a thing, not even with squelch wide open with a transmitter just inches away.
Now (about three days after radio stopped receiving on 70cm) it seems "deaf" all the way down to the 160MHz range. I can not even receive weather on the local high-powered NWS transmitter on 162.55.
I still get 2 meters and 6 meters, but I am worried that 2 meters will be the next thing to go.
Any ideas on what may cause this, or a remedy, are appreciated.

Thanks and 73s de KB1ILS

Hey... I'm currently working at getting my license and have been thinking about possibilities for my first radio. I think I will most likily get a hand held 2-meter radio and my question is this. From what I understand hand-held radios do now have much output power, so basically just for a general idea, how far away can I expect to be heard using a hand held? How much would it improve if I attacted an external antenna to it?

Any Help would be greatly appreciated,
Thanks
G

Here is my spin on the first radio.

YOUR FIRST VHF/UHF RADIO

Typically the new licensee purchases a Handi-Talkie (HT) for VHF/UHF where they really will be using their first radio mostly in a mobile installation or home base station. A mobile rig can be easily switched back and forth between the vehicle and a base location and offers considerable advantages over an HT. Keep in mind that the VHF/UHF radios are for the most part line of sight transmission and reception. Repeaters can extend the range considerably. HF is the spectrum for long range skip communications.

HT's are low power (5 Watts or less) and most folks use battery power and thus constantly recharging batteries. Having two battery packs is almost a necessity. If an HT is frequently used for base station operation, consider using a DC power supply. Be aware that the standard battery chargers will not usually support transmitting (not enough capacity).

Many HT users with a stock rubber duck antenna are forced to use max power to access repeaters and the batteries drain quickly. Because of the poor performance of a rubber duck antenna, depending on their location, you can hear many HT's users barely getting into the repeater and frequently dropping out. Also HT's operating at max power can get quite hot and curtail long transmissions.

Stock HT antennas although convenient are very inefficient, performance can be greatly improved with better antennas. However adapting an HT to mobile or base use can present problems. The typical HT is designed for rubber duck operation. When you put on a good antenna, HT's can overload on strong signals and have severe intermod problems, especially in high RF environments like the big city.

This is not to bad-mouth the HT's, they are great for carrying in your shirt pocket or belt clip for pedestrian use, public relations activities and traveling light. Just be aware of their limitations and intended use. They certainly can be used for base and mobile applications, but better antennas and DC power sources are definitely something to consider.

A mobile radio on the other hand puts out up to 50 Watts, operates off of car DC power or a DC power supply at the base location and requires an antenna which typically is vastly superior to a rubber duck on an HT. Prices are about the same. So evaluate your needs and decide which starter radio you want. Many eventually end up with both mobile and HT rigs.

Consider your needs over a longer period of time. You may want a single band transceiver typically 2 Meters, or for access to another popular band a dual band 2M/440 transceiver. Some go full boat and get one of the newer

multi-banders which variously cover 6M, 2M, 220 MHz, 440 MHz, and even cover the AM/FM broadcast bands as well as the 3-30 MHz HF bands for listening. HT examples are the Yaesu VX-5, VX-7, Kenwood TH-F6 as well as many others.

If you have a general or higher class license or intend to upgrade, consider the new mobile/base multi-band multi-mode radios that cover HF/VHF/UHF &#65533; with transmit in many bands and modes. Examples are the Kenwood TS-2000, ICOM IC-706 Series, and Yaesu FT-100D or FT-817 radios. Some of these have matching antennas for mobiles.

Which brand to buy? See eHam reviews, Mobiles, HT&#65533;s

An HT might get 4 or 5 miles on level terrain. VHF is essentially line of sight.

See URL: http://www.artscipub.com/simpleton/simp.range.html
for transmitter range

Here in San Diego my HT gets into the local repeater (altitude 5600 feet) -- I am about 25 miles from the repeater. The repeater covers all of San Diego county down into Mexico -- 70 miles and out to 150 miles into the Pacific. Some high level machines have even a greater range.

A rubber duck has been described as a dummy load. An external antenna will do wonders - but watch out for front end overload and intermod.

For rubber duck performance -- see URL:
http://www.races.org/docs/msg008.htm

Good luck on the new ticket

HI,

I`m looking for information and tips about splitting and combining few power amplifiers in range from 80-120 Mhz. Power is about 300-500W for amplifier.

Input signal from driver stage must be divided to 2, 3 or 5 power amps and than combined again for output to antenna system.

Any information about software, strip-line design or any alternative is welcome.

Thanks in advance..

518. A famous 75 Meter personality has returned !!!

Well, last night I was looking for the Liberty
Net. Could not find them anyplace. The band
was packed solid from 3.940 thru 3.970
so I guess I's just forget about them and listen
to k5blb and his group on 3.947.9 - when
out of the blue a MIRACLE occurred.....

I hear someone with an s-5 signal ranting in
the background...he's going on and on and
on in a tirade....quoting bible verses...making
non-sensible rhymes.....talking to himself...and
others.....like a demented Energizer Bunny
on Crack or Speed.....

No.....!!!!.....Yes.....???.....CAN IT REALLY
BE???.....YES!!....OH SWEET JEEZUS STRAPPED
DOWN ON A ROCKET POWERED SLED AT THE
BONNEVILLE SALTFLATS.....IT...IS...REALLY..
.....HIM.....WOOOOO...HOOOOOO!!!!!!!!!!!!

I nearly fell out of the chair. I had to pinch myself to
be sure I was awake. Was it live or was it Memorex?
No.....IT'S REALLY HIM.....Hams of 75 meters
and beyond.....get ready once again people...for HAM
RADIO FUN in it's ultra-purest virgin Bertolli olive-oil
form.....because...(hope your sitting down reading this folks)...

N X 0 T HAS RETURNED TO THE AIRWAVES !!!!!!!!

Yes...I mean that NX0T people - the one and only!

Jone was one of the few would drive David - WA9KJI absolutely
INSANE and turn whatever frequency they bumped heads
upon - into one big gigantic sandbox filled with 5 year-olds
on a chocolate and sugartit high that made even the best days
of the infamous "Mike and Judy Show" pale by comparason.

Please, PLEASE will somebody please tell KJI that his old pal "NX" is
back on 75 meters and was tearin up BLB's crew a new
bunghole on 47.9 last night. Rest assured we ain't heard the last
of our pal John folks! (I'm so happy over this development folks that
I could just shit in my BVD's)

WELCOME BACK JOHN!! We missed ya boy!
Please get back in there and up on 14.275 to "straighten
things out" (KJI bounces back in-between 275 and 313

please be sure to say "hello" to him sometime)

Another altopia post (same person as before). Hey, I don't disagree with you. You have great points. But why the anonymity? You could bring credibility to your statements if you would not hide behind the anonymous. And why hide? Is it because you are a quarmer and do not wish to be caught? If so, that is a problem you need to fix all by yourself. Or am I wrong? I cannot understand why anyone would be afraid of free speech unless they were not properly defended from the kooks via 2nd Amendment, or were simply cowards...and I hate to even infer that you are a coward because I agree with what your are saying, whoever you are. Try getting on the net and letting your opinions be heard. Don't worry about the lunatic kooks, they will not come after you as they are the biggest cowards of all.

Barry Electronics is still around. I was there a few weeks ago. They're on 2nd Avenue and around E. 8th Street or so if I remember right. There was one guy who I used to haggle with and get things for a reasonable price, but he no longer works there. He would pretty much match what AES, HRO and R&L would get. They really don't have a lot of stuff on display, it's not like visiting HRO where you can get on the air...

PRESIDENT DENOUNCES MICHIGAN ADMISSIONS QUOTAS: "DESERVING LEGACY 'C' STUDENTS ARE BEING DISPLACED BY UPPITY NEGRO TRASH!"
Address by the President to Assembled Students of Malcolm Shabazz High School

THE PRESIDENT: Good morning. It's a real pleasure to be here at Malcolm Shabazz High School. You know it's rare that I feel so totally comfortable and safe in the company of this many young coloreds. But then how could I not? Your school lobby has more metal detectors than O'Hare Airport.
(Boos.)
Now as one or two of you may have heard on the Hot 97 FM "Phat Newz Minute," the shining star of your race – United States Supreme Court Justice Clarence Thomas – will soon hear arguments on a potentially landmark case filed against the University of Michigan. It's all very complicated, but to put it in a nutshell: some common white trash with shit grades who weren't rich enough to buy their way into even a lousy school like Michigan are lashing out in anger through the courts – and as such have provided my administration with a wonderful opportunity to irreversibly dismantle three decades of affirmative action legislation.
You see, in the programs under review by the Supreme Court, the University of Michigan has established an admissions process which we like to say is "based on race." Fact is, it's based on achievement, but by saying otherwise, Karl Rove can whip swing-state crackers who didn't finish high school into a racist frenzy believing you darkies are stealing the Chef Boy-ar-dee right out of their babies' mouths.
Of course, I realize that some of you might actually believe that affirmative action is a good thing. Hell, you might even know older black folks who went to college and seem to be better off for it. But did you know that for every last one of them that illicitly savored the nectar that pours forth from formerly white-only University water fountains, there was some other, more-deserving person – an upstanding blue-eyed legacy C-student exactly like my younger self – who was unjustly displaced by that uppity negro trash? Well there was. And THAT, my young Lincoln-lovers, is the problem. Fortunately, Yale and Harvard still know how to pay homage to a political dynasty – and rightly look past such trivial matters as academic achievement and criminal records when admitting members of my family to their hallowed, disgustingly intellectual and tweed-wearing-faggot-infested halls.
You know, I speak often of the "soft bigotry of low expectations" – and I mean it. In fact, I speak for all Republicans when I manage to not burst into laughter while stating that we really want you people to believe that we have HIGH expectations and great respect for you. Don't believe me? Listen to Trent Lott. And that's why it pains us when we hear you all still clinging to this affirmative action nonsense. I mean, how are you people ever supposed to pull yourselves up out of the gutter if you're not going to leave advancement to the nice white folks, whose pennies will miraculously "trickle down" to you while

you're cleaning the toilets in their vacation villas?
In closing, I think it's worth spending a minute to attempt to emphasize our common ground. Yes, I may be a white omnipotent millionaire and you all are just poor helpless nobodies, but deep deep down, we share something very meaningful. We both know that the notion of higher education for minorities is bunk - that it's nothing but a silly product of liberals conspiring to convince colored youth that college is something they want, when in fact we all know you people are perfectly happy chanting your rap-hop songs, stealing Cadillac Escalades, shooting each other over crack, and having a grand old time lollygagging around on death row until such time as a good Republican Governor demonstrates true compassionate conservatism by putting you out of your misery. And I'll tell you something, it's that knowledge that brings our two seemingly diametrically opposed groups closer together every day.
Thank you, and God Bless.

The ever-morphing one-man-army from pita.alt.net is now implying
that the Liberty Net is somehow at fault when the Net is the victim
of malicious interference.

What a strange mentality it is that can reverse victim and criminal
in that manner. It reminds me of both Bush and Clinton, who share
that ability.

With all good wishes,

For the technician class license -- a no code is available.
Hams enter the hobby as Technicians by passing a 35-question multiple-choice examination. No Morse code test is required. The exam covers basic regulations, operating practices, and electronics theory, with a focus on VHF and UHF applications.

Technician Class operators are authorized to use all amateur VHF and UHF frequencies (all frequencies above 50 MHz). Technicians who pass a 5 WPM Morse code examination are entitled to limited power outputs on certain HF frequencies. "Technicians with HF" may operate on the 80, 40, and 15 meter bands using CW, and on the 10 meter band using CW, voice, and digital modes.

For the other classes of license - see URL:
http://www.arrl.org/FandES/ead/classes.html

AC6V did a great job explaining the difference between HT's and mobiles.
Great job, AC6V. I just wanted to point out three things in my limited
experience;

I bought a Alinco DJ-S11 (from AC6V). The Alinco puts out 340mW on high
power. I live about 30 miles from the repeater, but can still make the
repeater and talk to other Hams over several hundred square miles!
Repeaters are great.

Second experience. I am able to use my Kenwood TH-F6, 2m, 220, and 440, to
hit the CONDOR http://www.condor-connection.org/ and WinSystem
http://www.winsystem.org/ repeaters and talk to other hams all over
California, Nevada, and Arizona.

Third, I can talk to the WORLD using a HT and a repeater linked to the
Internet. See http://www.irlp.net/ and http://www.echolink.org/el/. Using
my HT at 2 watts I am able to talk to India from San Diego county in the
USA!

Ham radio is great and you can do more all the time.

Hi, I got a noise filter from Radio Shack. Its 270-0055 20amp for the car, but I dont know how to install it. Anyone ever installed one of these, please get back to me either via the newsgroup or email..

Thanks..

Try it as close to the radio as possible. That may or may not work. Make sure it has a 'real' ground to vehicle chassis.

Place the 'hot' side to the positive voltage from the vehicle, through the filter and hook the 'hot' side to the plus of your radio. Ground is obvious.

What sort of noise do you hear?

Sometimes I'm told its a Alternator noise, other times its a popping noise like a spark plug, but that plugs and cable has already been changed.

P.S. What's the hot side. There's a Black cable, which is ground. A red Cable which is postive, and a Blue cable. Does that cable (blue) go to the postive of the radio ?

Hope to hear from you soon..

Black is ground. Red to the voltage source. Blue is the output of the filter (probably). A filter like you have is basically a simple LC (inductive, capacitive) device. Some are Pi-net. But all are series connected.

Try it like I said. And see if that does the trick.

If you have a meter. Measure the Blue lead and make sure it is at vehicle battery potential, just to be sure.

Also try a short bit of braid, 1/2" wide is good, between the hood and the firewall (bridging across the brackets on the hood's hinges to ensure the hood is well grounded). Others swear by grounding the backend of your tailpipe to the frame, too. Never tried that, but makes sense.

Most people's problems with the code stem from trying to learn it too fast
without sufficient drilling before they move on to each new letter. The
average person needs about 30 hours of study and practice on the code to hit
5 wpm. Now this is an average. Some will take longer and some will take
less.

Covering the latter-day, ham history of Glenn Baxter a/k/a K1MAN a/k/a IARN a/k/a AARU et al, the following exchange of emails is the definitive word on Baxter, his operations and his mental state.

Answering W4ASX editorials, today Baxter fired back. In the attachment which follows, we learn that he equates himself to Bill Gates and Ted Turner, that people in Dayton ask for his autograph, that AARU is a registered trademark and that www.K1MAN.com had 64,582 hits during the month of December. But more to the point: "My wife Bonnie says I am a narcissist."

Bonnie is on the money. DSM, the internationally accepted manual of mental disorders, defines narcissism as "An all-pervasive pattern of grandiosity (in fantasy or behavior), need for admiration or adulation and lack of empathy, usually beginning by early adulthood and present in variety of contexts."

We all have characteristics that track DSM, but the difference between an order and disorder is dysfunction. If the characteristics give rise to a "presenting problem," then the person is said to have a disorder.

Quite simply, the issue comes down to whether Glenn's narcissism is all pervasive, invading, penetrating, and molding every aspect, nook, and cranny of the personality, which is, granted, a subjective judgment.

The moment I witnessed the forays into foreign policy in Bougainville, I thought that line had been crossed. And now listening to Sam and Glenn talk about operations in Iraq, Jordan, Israel and Somalia, I know they've entered forbidden territory.

Their activity violates the Logan Act, which prevents private citizens from conducting foreign policy. Glenn's response: "And we have done some wild things around the world over the years. But in violation of the Logan Act? Come on Bob, who is deluded now?" In fact, Glenn embraces some of the same people we, worried about homeland security, oppose. Shouldn't a responsible leader be open, in the very least, to the possibility of adverse consequences?

As Brian, K3VR, who has compiled an amazing dossier on Baxter operations in the arena of foreign policy, writes: "Whether he is ill, naive, stupid, or a bona-fide spy, won't matter one iota to the agencies who have questions about his actions. They will want

satisfactory answers to significant questions." Our security demands no less.

As to his respected Wife's assessment of narcissistic mental state, Baxter drops one more hint in the attachment. "Anyway, I sent Bob the $25 and he said he never got it. It did not come back so, being paranoid, I figured Bob was stiffing me." Unbelievable, this after the closest working relationship where I had proved my honesty time and again. Characteristic of Baxter, he does not disclose in the attachment whether the $25 check ever came back, leaving, for the readers, that cloud of suspicion remaining, a classic Baxter tactic.

DSM identifies the narcissist as " 'interpersonally exploitive,' i.e., uses others to achieve his or her own ends." It gives us closeup insight into his apparent view of himself: of the omnipotent, worldwide, IARN Network with offices girding the globe engaged in missions befitting Mother Teresa, his views sought out by leaders of the free and non-free worlds as well as important media, such as the Wall Street Journal and major TV Networks.

We are left with an impression of grandeur, when, in fact, this is but one person, Glenn Baxter, and his Radio Shack recorder on timers and a loop. We would be less than honest if we didn't acknowledge a certain value in the production and distribution of such a bulletin.

To read the DSM criteria for narcissistic disorder is to gain full insight into Baxter. Having 5 of the following qualifies him: 1) Feels grandiose and self-importance (e.g., exaggerates achievements and talents to the point of lying, demands to be recognized as superior without commensurate achievements), 2) Is obsessed with fantasies of unlimited success, fame, fearsome power or omnipotence, unequaled brilliance ..., 3) Firmly convinced that he or she is unique and, being special, can only be understood by, should only be treated by, or associate with, other special or unique, or high-status people (or institutions), 4) Requires excessive admiration, adulation, attention and affirmation -- or, failing that, wishes to be feared and to be notorious (narcissistic supply), 5) Feels entitled. Expects unreasonable or special and favorable priority treatment. Demands automatic and full compliance with his or her expectations, 6) 'interpersonally exploitive' ..., 7) Devoid of empathy. Is unable or unwilling to identify with or acknowledge the feelings and needs of others, 8) Constantly envious of others or believes that they feel the same way about him or her, and 9) Arrogant, haughty behaviors or attitudes coupled with rage when frustrated, contradicted, or confronted."

Quoting Baxter: "He (meaning me) has been on Prozac for several years now and recently a mood regulator as well ... . While apparently making him happier, I now find Bob to be a different functioning human being with regard to his great intellectual abilities."

For sure, Glenn; thanks for the kudos. Deprakote, a mood regulator, prevents those leaps into grandiosity, bad judgment, irritable episodes, pressured speech. The intellect remains, albeit, for more productive pursuits. There isn't a person in my inner circle, including myself, who has failed to notice a vast change for the better. For some, Deprakote can be a miracle drug.

Consider it Glenn. Just a bit of harmless Deprakote can make you the achiever you've only imagined thus far.

Bob Sherin, W4ASX

In a message dated 1/21/03 9:59:55 AM Eastern Standard Time, K1MAN14275 writes:

Scroll to bottom se see Bob Sherin's epistles that prompted this K1MAN Editorial:

K1MAN Editorial - ED030121

Does Glenn Baxter Need Medical Treatment?

Bob Sherin, W4ASX, is a generally well meaning, intelligent, and kind man. He has been on Prozac for several years now and recently a mood regulator as well, according to what he tells us when he gets on 20 meters. While apparently making him happier, I now find Bob to be a different functioning human being with regard to his great intellectual abilities. The last time I talked with Bob on the phone he assumed that I, like him, had just gone through a nasty divorce. Not so, of course, since I have been happily married to my angel wife Bonnie (my first and only marriage) for 23 years now. We have no children.

Bob keeps bringing up Hurricane Andrew and the now world famous $25. IARN was indeed activated for Hurricane Andrew, and we had operators in parts of South Florida where the communications was out. No, I did not personally run down to Miami and hold Bob's hand.....I ran the net from Maine, as I always do during a large scale communications emergency. No, I have never asked Bob about his troubles since he resigned as an IARN Director. I am a busy man.

Regarding the $25, Bob said he made some phone calls and photo copies with regard to my appeal to the five FCC Commissioners and the bogus $3,600 in fines they mailed to me in the early 1990's The appeal was never addressed by the FCC, by the way, Real rebellious of me, right? Anyway, I sent Bob the $25 and he said he never got it. It did not come back, so, being paranoid, I figured Bob was stiffing me. I then sent him $50 and that made him happy for a while. Now, years later, he talks about it almost daily. Bob needs to let go. And it's "paltry" Bob, not "paultry."

When Riley Hollingsworth, FCC Special Counsel, sent me long letter in December 2001 (see www.arrl.org and search under K1MAN), saying, essentially, that K1MAN (and W1AW!) were now somehow illegal, I

responded that he, Riley, should request a refund from wherever it is that he claims to have attended law school. How else is one to respond to a guy who was sick on the day they taught law at law school?

IARN has had hundreds of volunteers since 1985, and there have been many who have dropped out over the years and even started splinter groups, some quite important such as Dave Larsen's (KK4WW) FAIRS, and Hap Holly's (KC9RP) RAIN (An acronym that I coined with Hap one day on 20 meters). Great! IARN continues to evolve and is now the IARN Amateur Radio Peace Corps Foundation, Inc. complete with 501(c)(3) status from the IRS. AARA is a registered trade mark with the U.S. Trade Mark and Patent Office, and www.K1MAN.com had 64,582 hits during the month of December, 2002.

We are just starting to get warmed up! Bob's diagnosis of me doing what I do for my own "self aggrandizement" is another way saying that I do what I do to "self actualize" in a healthy and natural way instead of feeling good about myself in a totally artificial manner by using drugs such as Prozac. My wife Bonnie says I am a narcissist. My Webster Collegiate Dictionary defines this as:

"Erotic feelings aroused by one's own body and personality."

Isn't this exactly what Prozac is supposed to do for you, Bob???? I deny the erotic part Bonnie AND Bob!! You want to hear about erotic? My wife Bommie arouses my erotic nature, big time! The radios just don't do that for me in quite the same way!

Bob goes on saying I am:

"Inauthentic, grandiose, voluable (I had to look that one up), paranoid, rebellious of authority and generally a threat to the well being of ham radio and homeland security."

I hope Bob doesn't charge me another $25 for the paranoid diagnosis and his recommendation that:

"....with treatment, he could clean up his act and make a genuine contribution without the overriding negative."

Here is how Webster defines paranoid:

"A chronic mental disorder characterized by systematized delusions of persecution and of one's own greatness, sometimes with hallucinations."

I can see it all now!

"Doctor, Riley is trying to shut down K1MAN! The ARRL ignores AARA and IARN. ND8V is a meanie to me on 14.275. Bob Sherin says that I am '....generally a threat to the well being of ham radio and homeland security.' K1TP's 14.313 Web Site (go to www.qrz.com

search under K1TP) is comparing me to Hiram Percy Maxim
who started ARRL and also invented the machine gun.....
etc., etc." By the time I got done talking ham radio
politics for a solid hour, the Doctor would either have
me forcefully sedated, confined in a straight jacket, or
else commit HIMSELF to our local mental hospital.

I might be well known by many hams. People at my banquet table at
Dayton always ask for my autograph.....that's a hoot, of course. And
we have done some wild things around the world over the years. But
in violation of the Logan Act? Come on Bob, who is deluded now?

Can AARA, the American Amateur Radio Association, inherit the role
of representing our precious hobby and service if ARRL goes down like
the Titanic or suffers the same fate as the Dinosaurs who once ruled
the earth? Sure.....this is America.....look at Microsoft over
shadowing IBM and look at CNN who had to sue to be allowed to cover
the White House. Ted Turner and Bill Gates sure as hell are not
modest, and they don't need to be "souped up" daily with Prozac!

As I said, Bob Sherin is a well meaning, kind, and intelligent man. I
have my own dysfunctions, to be sure. We all do. What the hell is
"normal" anyway? Let the free market forces of ideas determine how
my career continues to play itself out and what the fate of AARA and
IARN will be. This national and, indeed, international arena of free
ideas is a rough and tumble playing field and sometimes gets a little
nasty. I do what I have to do to get the job done. So does Bill
Gates and Ted Turner. This is America.......hellllllllllllooooo!!!!!

I really don't know which list this is but I do scan these emails with
interest. Having known Glenn since the 80s and being credited by
Glenn with constructing his legal defense, I am long on experience and
insight.

It goes without saying that an independent organization with its own
outlet to disseminate information has vast potential. Without
question many of the Glenn's activities have helped folks. And so,
the idea of ham radio and kids is surely worthwhile. If it weren't
for Glenn's history, many would join him; however, he has alienated
virtually everyone who has worked with him -- save for a few
exceptions.

Quite simply, many question his judgment. When you tinker with
foreign policy in Iraq et al. you have crossed the line into bad

judgment and pose a threat to Homeland Security. I know that Sam and Glenn see their actions as well meaning and maybe they are. But the Logan Act commands citizens to stay out of foreign policy, a law that Sam in Australia would have little knowledge of. Since Bougainville, I have been agahst at what I hear.

Two other incidents turned out conclusive as to my opinion. One was reimbursement of $25, a paultry sum one would relegate to insignificance. So when Glenn began tilting with me over this very simple and clear reimbursement, I knew there was some problem inside. (He eventually antied up.)

The second incident was the ultimate trier of fact for me. When Hurricane Andrew demolished our community here, I was perhaps 2nd in command (if anyone is in command there, other than Glenn). I knew that this is where we shine, so I awaited IARN. To date, it hasn't arrived, nor has Glenn ever inquired about the extent of damage and resurrection.

Thus, reality developed: that Mr. Baxter is in this for his own self aggrandizement. We all do things so that we will become better, but in Glenn's case it's this exagerrated sense of self importance. I have watched this "disorder" worsen over the years, as the text books tell us. He is inauthentic, grandiose, voluable, paranoid, rebellious of authority and generally a threat to the well being of ham radio and homeland security.

I do believe, with treatment, he could clean up his act and make a genuine contribution without the overriding negative. I write these "truths" at the risk of Glenn's threats notwithstanding firm foundation.

God bless you all,

Bob Sherin, W4ASX

Gentlemen, before we are overcome with mob mentality, let's step back and take a deep breath.

That's what I did, as I gathered my past journalism on Glenn Baxter and
the IARN to send to Brian, K3VR. Brian is involved in a major journalistic project on this subject which is worth reading. I had written two cover stories in January and February, 1989, and a follow-up
in March, 1989 that were published in Florida Skip Magazine.

Among other things in that dossier was an IARN accord with the Young Communist League of the then-Soviet Union. I must admit here and now, I
was an "official" participant.

Transfixed by mulling this earlier time, I lost myself in reading the record. Picking myself up, I began wondering how we've come to the present time in which we're accusing Baxter and his organization of nefarious conduct.

At the time of the Soviet initiative, we hams in the West were starved for communications with Soviet hams after having lived through the trigger-happy Cold War. So when the Armenian Earthquake struck and UB5WE, Victor from the Ukraine, came on announcing he could handle third
party traffic, everyone involved thought a watershed had arrived. The technicalities of obtaining permission paled to no consequence.

Ever since, Glenn Baxter has carried on this nonchalant attitude toward
what is essentially foreign policy. Bougainville, Somalia, Jordan, Israel and others. He, his organization and his associates are violating the Logan Act, which limits foreign policy to our federal government. At the sound of Bougainville, I took flight.

Glenn Baxter: Misguided, irresponsible, yes. But terrorist, no. Let's
survey his sincerity. When the cameras are running and the broadcast waves crackling, he is at his charismatic best. I sent several video tapes to him of me representing the network on Miami television during natural disasters. Though he vowed to return them, he hasn't.

We so advertised our emergency capability that when Andrew hit, demolishing my community and home, I awaited my leader. We had no food,
telephone, electricity, law enforcement. A week. Two weeks. A month.
Six months. To this day, Baxter has never as much as asked me a thing about it.

Like a magician, his total pre-occupation is the aggrandizement of his own image. One must listen with a wary ear and read with a wary eye lest the magic trick you. The U.S. Supreme Court did not hold that his
bulletins are legal, as he would have you believe. Rather the Court propounded the principle that once a thing is litigated, that decision is a bar to another suit on the same issue. Known in legal parlance as
res judicata, Baxter bootstrapped this principle and his bulletins, taking a giant leap. We are thus led to believe, the Supreme Court would annoint his bulletins, let alone busy itself with hearing an appeal on them. Nonsense.

In the 80s, the FCC declared, with some measure of formality, Baxter's broadcasts legal. But with the arrival of Riley Hollingsworth, Esq., our regulator at the FCC, Baxter and his bulletins have fallen under scrutiny again.

Hollingsworth mailed Baxter a certified letter on January 29, 2002 detailing the FCC's complaints. In it Baxter is warned concerning "complaints we are receiving about deliberate interference, threats against those who do not relinquish the frequencies for your use or who
would complain, or who have complained, erratic operation, broadcasting,
unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control ... ." Up to the time of this writing Baxter has failed and refused to comply.

Meanwhile, he continues enlarging his broadcasts. Hams, wanting to use the frequencies, are livid. Uncomprehending, Baxter sees some kind of plot against him, as well as an ARRL highly-paid agent behind it.

But Baxter's conduct is more sufferable. He's defaming Mr. Hollingsworth as nothing but a cheap crook, a claim this writer finds bold-faced slander and completely contrary to fact. As Americans, we cannot allow a well defined controversy to weaken the power of government nor to throw our community into anarchy.

The wheels are grinding on that letter of January 29, 2002. And when action is taken, Baxter will lose his ham radio license, this commentator predicts.

Who EXACTLY is this guy Lloyd and why does "Ed Norton" follow him
around so much?

>>

ST CROIX, VI (AP)

In what has been described as a case for the record books, doctors at St Croix General Hospital surgically removed a missing Alabama man from the rectum of a well-known local resident this past weekend.

Herbert Schoenbohm presented to the hospital emergency room on Saturday, complaining of abdominal discomfort and extreme constipation. After performing a CAT scan, physicians were flabbergasted when the images showed a full-grown 250 lb adult male lodged completely within Schoenbohm's lower colon.

Schoenbohm revealed that the intestinal blockage was none other than Lloyd Davies, reported as missing from Athens, Alabama last week after failing to show up for work at Papa John's Pizzaria and Catfish Emporium.

Mr. Schoenbohm, who formerly held the amateur radio callsign KV4FZ, recently lost a long court battle with the Federal Communications Commission which resulted in the permanent revocation of his amateur radio operating privileges. He revealed that Mr. Davies, who has been a long-time friend and supporter during the litigation, made a special trip to the Islands to cheer up his mentor by engaging in a protracted session of ass-kissing.

According to Schoenbohm, the analingus got somewhat out of hand. Mr. Davies apparently performed his duties with such enthusiasm that he was sucked bodily into Schoenbohm's lower intestinal tract by the involuntary muscular contractions associated with orgasm.

Neither Davies nor Schoenbohm appear to have suffered any permanent injury from this unusual incident. Doctors successfully removed Davies using copious quantities of canola oil, and with the assistance of plumbers from a local septic tank cleaning service.

Davies, who explained that he is quite used to eating excrement, evidently found more than enough nourishment to survive his 3-day stint in Schoenbohm's rectal cavity.

After a thorough hosing-off, Davies was put on an airline flight back to the mainland.

Lloyd Davies was the best sponge boy I ever had!

It's in the backyard of a house I'm trying to sell. The coax got chopped in half while I've been gone, but that would be easy enough to fix, and I'm only wanting $150obo for it and all the stuff below...
I've still got the original instructions, a box full of parts, about 50ft & 25ft of "RG-U/8" (I thought it was RG-58 all this time, but that's what's printed on it) with connectors on one end of each, about 50ft of aluminum grounding-wire (and an 8ft ground-rod if you can pull it up.. HAHA), lots of guy-wire, etc. that you can have with the antenna..

561. 14275 Harmonica QRM

Newsgroup: rec.radio.amateur.misc

It's 2:20 PM here in Jacksonville Fla., and I am
hearing malicious jamming of 14275 by someone using
a harmonica. My beam heading is toward Memphis, TN.
The same harmonica songs used to be played on 14313 and
on top of wb2otk on 3901. It doesn't take a rocket
scientist to figure out who the jammer is. At the moment a
phone call was placed to his qth, the harmonica jamming
stopped.

Found this posted on: http://members.aol.com/jcunham/
Seems to refer to the alleged k1man broadcast
posted in the original message....make of it what you will
it is amazing is not how both sides in this ham radio operators and stuff
like it
expend all so much wasted energy on nothing but bluster and
posturing? They should all be working for North Korea's Ministry
of Propaganda! I hope I have this much free time when I am an
old fart with nothing but ham radio to play with...

(and the band plays on while the angels sing high-hyms!)

---------- cut here ---------

Email from Brian Crow:

*****To Prevent Panic and Unnecessary Frequency Abuse*******

Regarding the Mexican Earthquake in the Colima and Jalisco region:

After conferring with Carlos Gelista, Mexico's Director of Emergency
Management for the Civil Protection Agency, the Mexican Embassy, in
Washington D.C. reported to this writer at 10 AM this morning, that "no
international assistance is required, requested, or needed," for the recent
Mexican earthquake occurring on the Pacific coast west of Mexico city,
Tuesday evening at 9PM EST.

Salvation Army Team Emergency Radio Network on 14.265 mHz is
monitoring, but not activated, in case assistance is required. Satern
reports,
"Communications there are up and operative. The situation there is under
control."

The SATERN net control reported, and I quote, "The Mexican government is not
requesting International assistance. Stay away from the operator on 14.275
mHz with the 1 call. That station is illegal and has been fined by the FCC
on numerous occasions. He must be a millionaire, to have gotten all those
fines and still have his license," end quote.

Yes folks, the credibility gap continues to widen ... And that's the way it
is.

"K3VR reporting on Wednesday morning, January 22, 2003."

From: Stew <spam@aol.com>
Message-ID: <A4FX9.156387$j8.4092354@twister.tampabay.rr.com>
Source record: 69861

our new home is being built with Radiant Barrier in the attic (nailed to roof, not the floor of attic) to keep a cooler house. It's also being built in an area that prohibits antenna of the roof...

will radiant barrier completely ruin my 2m and 440 action? If it's a 1 or 2 db loss, I can handle it. If it's 20 db, plan b will need to be designed.

anyone have any experience? any ideas? I've thought about hiding it next to the chimney as an option...will the nearby bricks cause a crazy pattern?

thanks!

if you want to read about radiant barrier,

I'm going to build a lightweight SSB rig for backpacking, 10 watts out to a dipole. But I'm torn between 20 and 40 meters. Not interested in DXing for this application. Which band do you think is best for all around any time of day communications? Which would be most reliable in an emergency situation? 20 or 40 meters?

Thanks,
Bruce AF8F

Forget it. It will trash ur signal big time.

You will have windows in the house I assume? Build a 300 ohm twinlead
J-pole. Tape it to the window and let the curtain cover it from view.
Enjoy.

Latest QST has a nice 2m/440 design.

Just a thought.

In a brief statement to the Mold Street Journal today, K THREE VR of Silver Spoon, PA stated:

"It hardly seems sporting, given how easy it's been, but it can finally be revealed that the Raelien's have paid me an incredible sum to remove Gland Bagster from the airwaves. They needed a brilliant operative, and I was available at the time. In fact, I had just finished polishing my Johnson (Matchbox) and dusting my pristine glass ham shack operating table when I got the call.

See, the Raelien's desperately need Bagster's DNA to clone an army of retarded communists in their effort to overthrow the human race. If Gland leaves the air, for even a moment, they can finally nab the deviate strand of DNA that will make the commie clones possible.

I promised not to reveal the mission, but Gland's self-destruction and total lack of any credibility whatsoever, has made my job obsolete. I mean, imagine calling an Emergency Qrmmunication Net when there isn't even an Qrmmunication Emergency? What is that bone-headed phony smoking? Anyhow, given the current situation, I hereby resign my position with the Raelien's.

Hey, Gland doesn't need any professional detractors. He is his own worst enema."

==========

And your reasons for this choice are what?

I posted the same question at alt.ham-radio.hf and the opinion was 40-meters. Yours is twenty. My dilemna continues.

It can be said that 40-meters is better at night and 20-meters is better during the day. On the flipside it seems that 40-meters is more often good during the day than 20-meters is good at night. So I am leaning towards 40-meters.

At the peak of the solar cycle I agree that 20-meters takes the cake. Perhaps I should rephrase the question. In low-sunspot years which band gives the most reliable communications?

> day communications? Which would be most reliable in an emergency situation? 20
> or 40 meters?

40 meters DURING THE DAYTIME has worked the best for me, when using low power and low antennas. Typically during daylight signals of up to several hundred miles away are fairly strong and usually easy to work. But 40 meters at night can sure be tough when the skip starts "going long", and the foreign broadcasters roll in.

With the marginal gear I often use, I just have not had much luck with 20 meters. At times it can be very crowded and full of feverish DXers.

Good luck with your project. 73 from Leigh Marrin/KM6JE

PS: My current station is an old XTAL-controlled WRL Globe Chief transmitter and a Hammarlund HQ-100 reciever. Running about 20 watts CW into a 50' long wire antenna, I've had a lot of low-powered "boat anchor" fun.

Baxter DOES NOT consider himself to be a "Privare Citizen".
As the self-appointed CEO of the IARN which is a *registered
NGO* under IRS and other US Code Law, he is now legally a
"Public Citizen". (anyone can do this provided they register their
Org properly, hold proper Credentials and maintain Board of
Directors)

I prefer a good old fashoned Chivas Regal, Jageimeister or
Seagrams 7 plus 7Up every now and then, plus seein the old
lady in a "naughty nightie" or better yet a Wicked Weasel
Swimsuit (Wooo - Hooo!!!!!!) every now and then is good too..

> Consider it Glenn. Just a bit of harmless Deprakote can make you the
> achiever you've only imagined thus far.
>
> Bob Sherin, W4ASX

Bob, Glen needs to turn off his tape player and fly down to
Miami to meet you. I highly suggest Spring Break when all those
cute College Girls head down to Key West and South Beach
and dance an show off ("show me yer t-ts!") like they do
in that Girls Gone Wild video. It's an all-night party which really
re-vitalizes the ole male testoserone glans and can give the
both of you a whole new perspective on life apart from all
this 20 Meter Ham Radio bull shit. Airfare is quite reasonable
now and Glen can get a non-stop from Portland to Miami and
be at you home for dinner on the same day if he leaves early!
Afterward you can both go bar-crusing in South Beach or simil;ar
venues and have yerselves one heck of a good time! Consider it
OK?

Check it out---> http://www.southbeach-usa.com/

The answer is still twenty.

1. Smaller antenna
2. Less absorption
3. Less antenna height needed.
4. No Broadcast stations too fight.
5. This part of the cycle 20 stays open into the evenings but 40 is usually clobbered with QRM/QRN.

Just my opinion,

> Who Me?

I used to give them my work address and telephone.
Of late however, I've not stepped into one of their
stores in over 6 Months. No need to do so either.
The two RS outlets near me no longer carry electronic
components, RF connectors, technical books, even the
scanners are now gone and have to be special ordered!

All they now stock rict Consumer type goods.
Sprint Telephones, Home Dish TV antennas
and toys. Not much else. All junk you can
get for half as much $$$ at the local WalMart
and with a much better warranty also.

At this point, I wouldn't shed a single tear if RS declared
bankruptcy and closed 70% of their stores. They have
become another redundant and overpriced copy of the
defunct "Circuit City" retail chain - staffed by a youthfull
employee base which "ain't got a clue". A sure fire course
to retail business oblivion.

I'll give RS two Years before they file Chapter 11.

Since the material is metalic and thus conductive I don't think anything in the attic will do much radiating.

Here is an off the wall thought. Cut a path through the material in the direction of interest. Then stick it back on when you leave the QTH. Just another wierd thought.. hi.

Now here is something wierd...Perhaps someone out there could help you with this one. Make a 'slot' antenna. They do it with aircraft all the time. I have just read about them.

My experiences with the LOCAL rat shack here in Ny is that most
(90%) of the employees could care less about helping the
customer. If they have something in stock, sure they will
sell it to you because the salepeople here work on commission.
Try asking them if another rs in the area has it, and they say
"we can sell it to you here (ie so I can get my commission)
and you can go get it there." My usual response is
"if I have to go there to get it, I will pay for it there
as well"

I do like rs, just not the "sale people" (some call em droids)
who could care less about the customer. Most of the
"sales people" here are teenagers.

God bless

Since when is "Circuit City" defunct? They're doing just fine in my neck of
the woods.

Other than that, I agree with you 100%. Rat Shack ain't going to last much
longer at the rate they're going.

I just passed my code test at 5 wpm for a Canadian basic licence, and for study I downloaded the W1AW audio files. Also, the programe, Winmorse.exe is really helpful, because you can cut a block of text (say from an online newspaper), and it will turn it into code. I found that practising at 6 or 7 wpm helpful to prepare for 5 wpm. Also, convert the cipher groups from the old ARRL code practise book into code--cipher groups are random letters and numbers, so you can't guess the next letter. In the same book, there is a list of common words and endings, such as "the" "with" "ing" "tion" etc., that are helpful to learn as complete sounds.

Nothing beats practise.

Two Eddystone Connectors (spring loaded) . These are very, very rare and are in unused condition. They fit a variety of Eddystone Receivers used as aerial or earth connections etc. Because of the weight and build of Eddystone Receievers, people usually pick them up with the handles and lean them back breaking these connectors on the rear. If you are an Eddystone collector and or restorer you'll know how very rare you see these and how difficult they are to obtain

Heck, while we're at it, let's get Allied Radio back, too. Now, that was a
store!

Man, I sure do miss the old Rat Shack from my youth. If it wasn't for them,
I highly doubt that I would have the interest in radio, electronics, and
even computers that I have today.

I guess I'm still a little lucky with my local RS store...

The store is actully "River City Electronics" and still carries most of the electronics that RS still has (which is getting dismal in selection). But I've made friends with the store owner and have suggested an alternate place for which he could buy some very useful stuff for me (www.digikey.com). Hopefully, he'll keep some of the fun stuff on hand and be a place for me to make special orders.

And the thing is... This is in a very small town of all places. If he goes to "just a kiddie toy store"... I'll do my kiddie toy shopping at Wal-Mart... I say,... he best keep the kind of toys *I* like.

605. Lloyd's Lobotomy

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-24 02:03:56 UTC
From: Nosey <Jewelz@Anon.com>
Message-ID: <b0q6sf$av5$0@pita.alt.net>
Source record: 69750

Lloyd Davies visited his family proctologist (yes, his whole family needs one) to have a check for polyps. Lloyd is, after all, at that age when this kind of thing is important. You know, aging, getting a bit of a paunch, being a Democrat and all that...
Lloyd's appointment for his colonoscopy was going according to procedure until the Proctologist discovered what appeared to be a large, fibrous growth midway up Lloyd's colon. The doctor attached a drill-like attachment to the device and proceeded to "grind" the mysterious polyp from the walls of Lloyd's colon, placing the detritus in a garbage container.
The recovery had a bit of a strange twist in that Lloyd, after the procedure, seemed to be stricken with some sort of speech impediment. The doctor examined Lloyd closely and discovered a small, round hole at the base of Lloyd's skull. After thinking about this and consulting the x-rays the Proctologist discovered what had gone amiss.
"Lloyd", the doctor said, "I know how that small hole at the base of your skull came to be."
Lloyd, eyes looking two different directions said, "Wuffa pwoblum wif me why I talk f-f-f-funny and poo my pants?"
The Proctologist said, "Well, Lloyd, it seems that when we drilled out that large tumor your head was so far up your ass that we didn't see it. We drilled out a large part of your brain by mistake."
Lloyd said, "Will I be awright, Doc?"
The Proctologist replied, "Sure you will, Lloyd. You'll be just fine and nobody will even be able to tell the difference."

NuMorse Pro from http://www.Nu-Ware.com does all that and much more. As well as a selection of different training courses it will generate QSOs and add QSB/QRN for extra realism.

Lloyd Davies visited his family proctologist (yes, his whole family needs
one) to have a check for polyps. Lloyd is, after all, at that age when this
kind of thing is important. You know, aging, getting a bit of a paunch,
being a Democrat and all that...
Lloyd's appointment for his colonoscopy was going according to procedure
until the Proctologist discovered what appeared to be a large, fibrous
growth midway up Lloyd's colon. The doctor attached a drill-like attachment
to the device and proceeded to "grind" the mysterious polyp from the walls
of Lloyd's colon, placing the detritus in a garbage container.
The recovery had a bit of a strange twist in that Lloyd, after the
procedure, seemed to be stricken with some sort of speech impediment. The
doctor examined Lloyd closely and discovered a small, round hole at the base
of Lloyd's skull. After thinking about this and consulting the x-rays the
Proctologist discovered what had gone amiss.
"Lloyd", the doctor said, "I know how that small hole at the base of your
skull came to be."
Lloyd, eyes looking two different directions said, "Wuffa pwoblum wif me why
I talk f-f-f-funny and poo my pants?"
The Proctologist said, "Well, Lloyd, it seems that when we drilled out that
large tumor your head was so far up your ass that we didn't see it. We
drilled out a large part of your brain by mistake."
Lloyd said, "Will I be awright, Doc?"
The Proctologist replied, "Sure you will, Lloyd. You'll be just fine and
nobody will even be able to tell the difference."

610. Lloyd's problem revealed

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-24 02:59:50 UTC
From: dafirebottle@aol.comnojunk
Message-ID: <20030123215950.26381.00000181@mb-fd.aol.com>
Source record: 69756

After Lloyd's last jail stay, he complained of a pain in the rectal area.

(Be careful Lloyd, one of the first signs of AIDS is a sharp jabbing pain in your rectal area)

After being examined by Dr. Seymour Butts, Lloyd's rectal passage was found to be as large as a # 4 washtub. Lloyd's cellmate Big Bubba claimed full responsibility. Big Bubba said, "Lloyd likes it and I know he's a queer, 'cause when I was poking him, he had a boner".

Lloyd was told he has PBDS by Dr. Butts.

Lloyd was at first ecstatic at having something to blame his erratic behaviour on.

Recently however, Lloyd found out what PDBS meant.

Thats so true for me. Starting off in electronics and radio was when I saw a man buy a scanner in radioshack. I still go there for some things. The manager is friendly with me and most of the sales assosiates are knowledgable. Now the internet and 1-800-the-shack is a whole other picture.

Well I was a little behind time in the history area of Allied it says it was purchased by Electrocomponents of the United Kingdom, in 1999 but that may also be a Rat Shack Company, they own many companies, that people do noot know about.
Allied has a web site at
http://www.alliedelec.com/catalog/indices/product.asp

Source record: 69765

Radioshack had a strategic change several years ago based on a walkin study. 90% of the walkins buy 10%, being the parts' and 10%of the walkins buy 90%, being the large ticket items. So, they eliminated a lot of the parts, leaving only 10% floorspace for the rest, hoping to increase the percentage of people who would buy large ticket Items. All they succeeded in doing was eliminating most of the 90% walkin traffic, because people would come in for the small stuff, and see the large stuff, get interested and buy it. Now they have no reason to come in because there is much less small stuff available and no one wants to pay 7 dollars shipping for a 39cent capacitor.
So, Radioshack has a problem. They cant get people to come into the store. They thought about having 2 different types of stores, one that only sells parts, and one that only sells the big ticket items. Problem is, not enough money in parts, no one is building their own except for a few hams, and no one goes to a store called "RadioShack" to buy consumer electronics, they only sell radios right?
So, Radio Shack has a problem. They are now a dinosaur, and anacronism, something left over from an earlier time. What should they do?
I think they should change their name to something more appropriate for the electronics they sell, lets think up some.
how about
The Electronic Stuff Store
The Phones, Stereos, and Toys Store
The Junk Store

The second thing they should do is bite the bullet and pay shipping on the parts, it is idiotic to think that one could pay individual shipping on each and every part of a homebrew electronic thing. That killed it for me in using RadioShack as a source. Instead of making money be having me pay the shipping, and either picking it up at the store or in my mail box, they get squat, zip, nada, nothing, zilch. I dont buy parts there anymore, thus dont go in, thus dont buy ham radios there, or anything else, and dont get annoyed by the stupid 'wanna buy a phone mister?' pitch from some salesman that has nothing better to do. Why should I drive all the way to the store to get a part just to find out they dont have it, and have to special order it, especially when they used to carry it, and if you call and ask, some dumb punk will tell you it is there just to get you to come, just to find out it must be special ordered, why do that when I can just order it from someone on the internet. Same shipping price, probably less, and I dont have to drive anywhere. Again, not looking at the cool stuff that way, not buying big ticket items, and guess what, RadioShack again gets squat, see above.

==========

30-meters was my favorite CW band, and I built many tiny radios for this. But my CW is getting rusty so I thought I'd try voice. Which way to go, up or down?

20-meters was mt first reaction for SSB. It's great for DX and uses a smaller antenna. But for emergency backpacking use I don't really want DX, better to have local contacts, so I'm thinking 40-meters.

I think most of 40 and 80 meters local nature is due to the NVIS effect. Its not easy to get an antenna up high enough to get a low radiation pattern on these bands. By the same token a 20-meter antenna at 10 feet off the ground migh do as well?

But 20-meters is frequently dead where 40 stays open most all the time. I'm so confused.

There's at least one in Memphis, and they have EXCELLENT
prices on DVD's...far, far better than those of Best Buy and the
mall music/video stores.

And, the selection is, at the very least, as equally impressive.

ALABAMMY'S YOUR MAMMY NEWSWIRE

AYMN- 1-24-03

Surgeons reported last night that the operation to remove Lloyd from the rectal orifice of Gland Bagster was unsuccessful. "He is just too far up there," an unidentified physician proclaimed. "We tried and we failed," said Chief Of Proctology at the Alabama Medical Center for Indigents and Mental Defectives.

Noted cranio-rectal expert Dr. Manny Bumphucke, stated, "In this type of surgery, the lodgee must WANT to become dislodged. In this case, Lloyd was inserted so firmly, and so fixedly, he simply resisted our efforts at dislodgement. He appears to be permanently, parasitically, and symbiotically fixed in Bagster's lower rectal region. This case, is SO UNFORTUNATE."

>confused.

I think you are correct... over all, 40 would be your best bet for
more local or regional emergency comm.

The biggest downside to 40 is what happens when the band goes long,
later in the afternoon all the way through to the following morning.
But there are a few spots you can sneak in on between the foreign
broadcast and you can alway use CW at night, too.

Another huge plus on 40 is that you have access to MIDCARS and ECARS
which are nets that run almost contiunously (until the foreign
broadcast comes in) on 7.258 and 7.255. If you're trying to meet
someone for a QSO, these nets are perfect. The net controls will even
pass messages when your other party checks in and you're not still
around.

I think 40 is your better choice in spite of the downsides.

my 2 cents

Hi - I picked up a 13 pin DIN for my Kenwood. I'm just going to use pins 3 and 4 to get some line level audio from the rig. I could not believe my eyes when I got the 13 pin DIN - is there some trick to soldering to those pins? Or am I missing something here? Thanks - Scott.

Scott,
It'll certainly make you 'bone up' on your soldering!
If you only intend to use certain pins, one option is to
cut off the pins you won't be using, near the pins you
will be using. Don't try to use 14ga. wire! (LOL)
Have fun...
'Doc

Scott,

I use a pair of Vise-Grips and gently hold the connector in them when
soldering. Grab the thickest pair of glasses you can find (2.50x) and go to
town. Take your time and it will be smooth sailing.

I found the best way to learn morse was to listen to letters at 15wpm with
enough spacing to slow the total wpm to a speed at which I could take then
as I progressed shorten the timing between the letters. Four or five months
at 20mins a day got me to approx 15 wpm.
THEN I got a key out and started sending...

Well, when I wired up a RASCAL to my Kenwood, I just took a small pair
of diagonal cutters / wire nippers, and carefully trimmed back all of
the pins I didn't need until they were flush with the plastic
headshell. [Look twice or thrice, cut once!]

Aside from that, it helps to have a soldering pen with a small tip, a
steady hand, small-gauge solder, and one of those magnet-and-alligator-
clip-and-articulated-arms "third hand" holders to keep the plug in a
convenient, stable position during soldering.

I live in the Northeastern USA (NY/NJ) and, not only have no stores been
closed, they are opening new ones all the time - like the brand new store
in Woodbridge NJ that just opened this winter.

> those pins? Or am I missing something here? Thanks - Scott.
>

Strip the insulation of the wire to a length slightly longer than needed. Tin the wire. Cut the wire to the correct length. Go to the plug and put it in a holder of some kind (maybe a small vise) with the pins up. With some very fine solder try to just fill the little cup with solder. Let it cool. Then heat the pin back up. When the solder melts insert the wire in the connector, remove the iron and let cool. There will be enough wire in the cup and on the wire to make a good connection if done properly. That way you only have two things in the hands at one time, wire or solder while trying to deal with the plug.

I like taking texts, such as a computer version of "My Utmost for His Highest," and running it through code. Good practise.

Hmmmmmmmmm......funny you should ask!

December 20, 2001 3:29 pm.

Athens,Alabama Police Dept. Transcript of interrogation of Mr. Lloyd Davies:

PD: Please state your name for the record.

LD: Errr, aaaaaah, gulp, Lloyd Davies.

PD: Did you deliver a pizza to (address deleted) at 7:30pm December 19,2001?

LD: I uh think so, err, aaahh, yes I did.

PD: What kind of pizza was it Mr. Davies?

LD: Pepperoni with extra cheese I think.

PD: You think?

LD: It was I remember now.

PD: Did you put some extra "secret sauce" on it?

LD: I uh, errrrr, gulp, I don't know what you are talking about.

PD: Mr. Davies, you should know that your employer had a hidden camera
installed
in your vehicle because of previous complaints.

LD: Camera? I don't know what you are talking about.

PD: Well Mr. Davies, we have you on film putting "secret sauce" on the pizza in question.

LD: I uh need to call my lawyer.

PD: No problem Mr. Davies. This interview will cease until you retain counsel.

LD: Errrrr, aaaah, I don't have any money.

PD: An attorney will be provided for you Mr. Davies.

PD: End tape session at 3:37 pm December 20, 2001

Firebottle

Yes they are Tom. Mr. Davies has an extensive arrest record. Please read below for one of many, many arrests:

Mr. Davies,

If you continue to put your nose where it doesn't belong, I will continue to post your past criminal records and copies of Police Interrogations.

Well Mr. Davies, you have had more than an ample amount of time to confess about your arrest and criminal record.

So, without further delay, we will tell everyone what a liar and pervert you are.

Date: July 4, 1998 caught masturbating in the back row of the movie theater. Lloyd claimed he saw " a bug on my pee pee and I was trying to shake it off".

Date: September 12, 1998 caught showing two young boys his " willie ". the parents moved and didn't prosecute.

Date: December 21, 1998 caught jerking off behind the local porno magazine store to pictures of naked men.

Date: March 8, 1999 caught putting " secret sauce ' on pizza just before delivering it.

July 4, 1999 (you have something to tell us about july 4th Lloyd?) caught putting his penis in the cotton candy machine at local fair, then offering

some special cotton candy to young boys.

October 14, 1999 caught cornholing a friend in back seat of car at local park (a pickle park?) claimed he got stuck while playing leapfrog.

Date: January 12, 2000 Caught at local traffic light with no pants on and jerking off.

Date: August 16, 2000 Caught at pickle park at rest stop soliciting oral sex.

Date: October 20, 2000 caught screwing a pumpkin outside of Athens, claimed he was making pumpkin pie filling for a friend.

Date: January, 2001 caught cornholing a cow, contracted the mad cow disease, as evidenced by his bizarre behavious lately. Acting tough etc.

These record are on file in our Atlanta office Mr. Davies.

653. Walter Cronkite's Lawyer sends Glenn Baxter a Letter

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-25 03:22:52 UTC
From: rfburns2003@yahoo.com
Message-ID: <634e00e4.0301241922.4860eb6c@posting.google.com>
Source record: 69798
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave,rec.radio.amateur.policy

If you've ever wondered why Walter Cronkite would ever allow Glenn Baxter to use his name or likeness, or have anything to do with Glenn Baxter, read on.

A good question for Glenn Baxter might be this: If Walter Cronkite has requested that you NOT use his likeness and his voice and he CLEARLY is saying he wants NOTHING to do with you, why are you STILL doing it?

Those requiring verification of authenticity should call Walter Cronkite's office and ask his secretary Julie to verify that this letter has been sent. This letter is now in the public domain and you may freely distribute it to anyone anywhere.

Walter Cronkite's Attorney, Ronald S. Konecky, Attorney at Law, 488 Madison Avenue, NY, NY, writes to Baxter:

"Dear Mr. Baxter, we are the Attorneys for Mr. Walter Cronkite. Mr. Cronkite, as an accomodation, previously furnished an audio recording, to be used by you merely as a station ID.

Since your use of the recording extended beyond the agreed upon and intended limited station I.D., Mr. Cronkite previously requested that you refrain from any further use of the audiotape or from any suggestion that he endorses your station, operation, or other Associations. You have improperly refused to comply with such request and have continued to use the tape for purposes beyond its intended use.

We have now been advised that without Mr. Cronkite's permission or authorization, you have produced and are now distributing an approximately six minute CD video using Mr. Cronkite and the station identification which he previously furnished.

Such Video constitutes a violation of Mr. Cronkite's rights, is totally improper, and is in addition to your use of the audio identification, a cause of serious damage to his name and reputation.

We accordingly demand that you immediately cease and desist from any use of the audio station I.D.; from the production, publication and distribution of the CD video, and from the use of Mr. Cronkite's name and likeness; in any medium, and on any basis whatsoever."

(signed) Attorney for Walter Cronkite

Anyone out there with the correct formula for the crystals on a Motorola
ht90 (ht440)?

I just picked one up and inside it has 4 crystals reading:
55387.50
55395.31
17206.01
17203.7

It transmists on 464.5000 ch 1 and 464.5625 on ch 2
Both simplex

Thanks for any help!

Chris

Note first and foremost that the poster deleted the alleged attorney's name. Clue number one. Next, re-read the alleged letter and take note of the misuse of capital letters, i.e., in all the wrong places. Take note also of the odd and misplaced useage of punctuation.
In light of the numerous gaffes one would be on good ground to hold this alleged "notification" highly suspect as originating from an attorney. I wonder if the poster himself wrote this letter in hopes of passing it off as as a factual notification. It is also possible that the poster of this alleged "notification" saw it elsewhere on one of the newsgroups, believed it to be factual, and is ignorantly passing it on.
One would be wise to take this and other such statements with a grain of salt.

657. Re: Radio Shack no longer taking addresses.

Newsgroup: rec.radio.amateur.misc

It's really sad to see how Radio Shack has gone downhill. I remember playing on some store demo TRS-80 "Trash 80" Model II and III computers back in high school, learning how to program in BASIC as I went. The store owner knew I couldn't afford one of my own, so I'd show up every Friday and Saturday night after dinner and he'd just ask me "Ya gonna buy anything today?" with a wry grin, pointing the way to the seat in front of the computer. He'd even open up boxes of software -- some disk and some cassette (boy that's bringing back memories) to let me load them up and play with them.
It was such an exciting time of discovery, one that I wish I could somehow recapture.
Thanks to this fellow I learned how to program in BASIC, which led to some computer programming classes in high school, and that has led to three college degrees and my career in higher education.

In a way, those Radio Shack computers and that nice fellow in the mall started me on a path that has taken me to places of which I had never dreamed. To see it degenerate into a glorified DirectTV/Sprint PCS mouthpiece is sad.

Welcome to the fascinating area of "technical writing", i.e., "specialized
writing. Strike Number Two.

Erroneous conclusion based on self-induced erroneous premises. Strike Number
Three.

Three strikes, no balls, you're out.

So noted. Consider also that the secretary in this case is a dolt. In this
case it would be wise for the alleged attorney to replace her or him. You

just cannot get good help these days.
And how is your pocket protector doing? No more ink-stained shirts?

Yeah, yeah. Big deal.
I, too, humped the boonies as an E-5 squad leader.
Camp Evans, Firebase Eagle. 101st Airborne, Master Blaster.
1st Brigade, 5th Div.
CIB, Purple Heart (shrapnel)
My days in the military are NOT one of my high points. I do not wear my
service on my sleeve.
Except for an occasional bout of jungle rot between my toes I have put this
behind me.
You should do the same, bro.

In article <b0t2pe$9gs$1@news1.usf.edu>, john@somewhere.com says...

> Anyone out there with the correct formula for the crystals on a Motorola
> ht90 (ht440)?

Youbetcha.

TX = Crystal F times 27
RX = Crystal F times 8, plus the first IF (21.400MHz).

International Crystal can provide rocks for ham freqs if you want.
You should have the service manual and a service monitor handy to do the
alignment.

(SHAMELESS PLUG ALERT)

If you do not have access to either of the above, I have both, and
I can install the new rocks and tune the radio(s) up. See
http://www.bluefeathertech.com/rf.html

and
> 3980 khz (LSB). Just look for the malicious jamming, you can't miss it.

Should be even more fun as NX0T is back on the air
again and showed up last week to crash k5blb's
"frequency panty raid" on 3.947 Haven't laughed
that much since the old days of 14.313 and MUJ's
drunken rantings. I hope that KJI shows
up as him and NX used to go at it like alley
cats in heat on the air which was so darn funny
my sides would ache from laughter

While waiting for the Great Liberty Net (their words, not mine) I guess we can while away our time listening to Dumb A** Donnie drone on and on and on. Donnie was enthralled with the retired Dept. Of Corrections chaplain and told him, "I've been incarcerated" and went on to explain how special Sundays were to him during that time. Duh! Its too bad the jammers drove Donnie away.
Now I see how Donnie earned his nickname.

Ed,

I checked up in Athens and Llllloooyyyyddd was banned from all FM frequencies several years ago. This accounts for his 'interest' in HF. He can't play anywhere without making a mess it seems.

hey i have seen the black helocopters.....the army does this thing
around here where they practice insertions in urban areas, like they
are fighting in a urban setting.....makes me
nervous.....sometimes they try and take over a town, exploding
ordinance , etc.....you watch my words,....one day they will use
that stuff on you and me.....people need to keep
alert.....freedom isn't just a word.....

Yep, old radio still kick'in on packet except for the memory battery backup
so :

Is the battery still available for purchase, and where ?

and

I don't have the "jumper used for charging" so I need a wire configuration.

Thanks for any help....

G.

The boys are offering some comic relief with their discussions about Viagra.
Talk about a bunch of goons! To top it off, another one is recommending that
instead of Viagra he should try a Thai Stick. After listening to these guys
for ten minutes it is pretty obvious that most of them are under the
influence of some sort of chemical or other.
These guys are almost as goofy as Glenn Baxter.

>which they stole it many years ago.

Dan, I believe that hams stole that term from the maritime industry.
The very first installations of "wireless" aboard ships consisted
of small wooden shacks built on the decks to accomodate this new
fangled gear and the operators. The term "shack" followed those
radiomen even after space was made for them below decks.

I can't believe all the high power stations on the new MURS channels..
Especially Channel 1.. (151.82 Mhz.) Guess a lot of guys are cutting
the little wires in their 50 watt Alincos!!

Good ol' high band CB.. (But the range is good..)

Much better coverage than FRS.......

Lol just kidding there..... I tuned into the net last night for the
first time and listened for an hour or so. Absolutely hillarious, you

had this one guy jamming the net with CW by literally pounding on the morse keyer. These other guys were saying "this isn't CB turn your microphone gain down now" And then this other guy came on and "nicely" asked for them to turn down the power.

lmao!!

I went in to get a coaxial power connector that I needed and couldn't find
anywhere else, and the stupid guy wanted to sell me a cell phone, even after
I told him I already have one. He then proceeded to ask me who I had
service with and if I was happy with it.

If I had cell phone service through Radio Shack, I don't think I'd ever tell
anyone. The name "Radio Shack" seems to be on the same level as "Mattel."

What a circus there was to be had on 14.313 a while ago. Old Bob is as one-track minded as usual. The oldster droned on and on with his sarcastic comments about President Bush. He didn't say much, but he talked a lot. Then along comes David Tolassi, Midsummers Eve, to stir up the pot. David tried to egg old dry balls on by urging him to support Bush and that was when another less than brilliant Ham decided to tune his rig. I missed Old Bob's comments but they would have been more of the same old negatives. That was when I turned the VFO. Listening to Twinlke Toes and Dry Balls for more then ten minutes gives me a stomach ache. It could have been worse, though, had Dumb Ass Donnie checked in. Those guys are just as bad as Glenn "Full Of Himself" Baxter.
And how was YOUR day?

I'm going to climb out on a limb here, and predict that K1MAN will get an FCC letter in the first week of February. The contents are anyone's guess, but my GUESS is, the contents will be based on previous letters written to the baby broadcaster. I predict the new letter will tell Baxter his license is suspended and scheduled for a revocation hearing, and will follow a format like this:

Dear Glenn A. Baxter (K1MAN),

The commission wrote you last year about deficiencies in the operation of K1MAN. You have had one full year to correct these deficiencies. Despite the commission giving you ample opportunity to correct those deficiencies, you have failed to do so. The following continued deficiencies were noted this past year:

Broadcasting

The format of the so-called K1MAN bulletin resembles a broadcast more than a bulletin. Accordingly, we will refer to it as a broadcast henceforth. K1MAN broadcasts news and views that could alternately be provided through other services. To the extent that K1MAN did not observe the prohibition regarding this practice; this practice was in violation.

Failure to Observe Frequency Sharing Rules

K1MAN has commenced broadcasting over numerous QSO's in progress. When asked to delay the K1MAN broadcast, the response from K1MAN was "No, I am not going to ruin a nine year precedent." This shows a gross misunderstanding of the basis and purpose of part 97 and the amateur service in general. No licensee is authorized exclusive use of any frequency. This practice was in violation.

Lack of Control Operator

Numerous stations from the US in the South; the Midwest; and the Northeast, attempted to contact K1MAN's control operator over the phone and on the radio. The fact that there was no response on several occasions indicates that either there was no control operator at the control point, or that the control operator was negligent, by beginning the K1MAN broadcast over ongoing QSO's and ignoring advice that the frequency was in use. This practice was in violation.

Defamation

Numerous incidents of defamation per se of other amateurs have occurred on the K1MAN broadcast. This practice was contrary to the basis and purpose of part 97 and was therefore, in violation.

Threats

You advised amateurs to visit the K1MAN web site for information. On the web site, K1MAN advised "foolish amateurs" to QSY or QRT, when the K1MAN was about to commence, or risk the filing of criminal charges. These threats were the subject of a commission letter dated January 2002; a letter from the office of US Attorney, Jay P. McCloskey in Maine; and a letter from FCC Counsel John P. Greenspan. You also advised other amateurs to file their own felony affidavits against amateurs who used the frequency on which you intended to operate, after being advised that this practice was illegal. This practice therefore, was also in violation.

Routine Solicitation of Donations for Benefit of a Business

Soliciting contributions for IARN on a daily basis constituted using amateur radio for the routine benefit of a business. This practice was in violation.

Use of Unauthorized Tape Recordings.

There have been numerous instances of unauthorized use of tape recordings played over the air. This practice was in violation. Walter Cronkite's Attorney recently wrote you a letter indicating you do not have authorization to use his tape recorded voice identification on your broadcast. This practice was in violation.

Copyright Infringement

The ARRL recently advised you that your distribution of the Walter Cronkite CD to AARA life members was in violation of their copyright of that material. You advertised the giveaway of copies of this CD on your broadcast. This practice was in violation.

Poor Engineering Practices

Distortion, malfunctioning equipment, drifting transmitters, and erratic starting and stopping times characterized your broadcasts over the past year. This practice was in violation.

Lack of the Character Qualifications to be a Commission Licensee

The FCC's John P Greenspan letter, and the Assistant US Attorney's letter, written by Gail Fiske Malone, pointed out that your actions indicated that you may very well lack the character qualifications to be an FCC licensee. Greenspan also stated, "You certainly lack the maturity but that is, unfortunately, not grounds for revocation." After reviewing ongoing complaints by numerous amateurs and after reviewing the record of your correspondence with the commission, we concur with the previous opinions. You do not possess the requisite character qualifications to be a licensee.

Accordingly we have suspended your station and operators licenses, effective immediately, and have designated your license for a revocation hearing before an administrative law judge, where you will have the burden of proving why you should remain a commission licensee.

Sincerely,

The Enforcer

I wonder if, after just 12 hours of our
announcement of bombing in Baghdad, if Baxter
will start calling for his "jump teams" to go into Iraq...?

Hmmmmm.....great potential publicity for ham radio eh?

Can't you just picture a CNN video in the future
showing some of Saddam's elite Republican Guards
captured in a bunker alive someplace, along with
a cache of small arms, chemical munitions and
2 or 3 Yaesu or Kenwood HF rigs with 14.275
stored into adleast one of the channel memories?

I am selling my nearly-new, MINT condition Yaesu FRG-9600 communications receiver/scanner.It is absolutely flawless (not even any DUST on it!)and has all accessories as from the factory (except for wire tilt-up stand).This unit has probably been used for an hour AT MOST since was bought new a few years ago, and has been in storage since.
Radio covers 60-960 Mhz continuous (no cellular block)and has 100 memories in 10 groups of 10.The flourescent display is bright and the radio is in PERFECT working order.Purchase price includes the radio, power supply, antenna, box, packing, owner's manual, and OPTIONAL, INSTALLED TV ADAPTER ACCESSORY (allows radio to receive video signals thru a monitor (monitor and cabling not provided).Adapter was an additional $139 at time of purchase.
This is probably the cleanest, nicest FRG-9600 you'll ever find so, if you have been seeking one of these units for your collection or radio shack, this is THE one.This radio sold NEW for well over $700.00
You can own it for $400 plus $18 insured, double-boxed S/H fee.Payment by money order only, please, and radio ships to you SAME or VERY next day M.O. arrives here.Please Email any questions to me directly: ALL serious replies answered.Sorry, but NO trades or "offers". Can NOT accept PayPal, online credit, or personal checks.THANK YOU.

I have a '97 Ford Ranger that I want to put an Icom V8000 in. I am having trouble finding a spot to mount the radio. Has anyone mounted one in a Ranger and could tell me where and how they went about doing it? I have thought about a mount like the ones made by IIX, but I do not think that I really have the room.

All suggestions are welcome.

Riley Hollingsworth recently visited our local club. One of the things he said in his talk was that he had never heard of a complaint of a CW op jamming. It occurred to me at the time, although I didn't get the chance to tell him, that I had heard someone sending 'fuck' repeatedly in CW on a repeater. It's a myth that there's no jamming or swearing on CW.

Boliver,

Go to http://www.stewartproducts.com and take a look at their "Rail Systems - EM Series". under the Economy Radio Mounts section. You can also download a catalog which gives more detail. No drilling necessary, they even have legs that bolt right to the seat bolts.

I have been tempted to get one of these more than once for my Ranger, but have just not "pulled the trigger" for no other reason than laziness. If you contact john@stewartproducts.com and explain exactly what you have, console or not, bench or split bench, etc...they can put the whole thing together and tell you what you need.

730. vegitative absorbtion and wireless data

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-27 12:31:36 UTC
From: Matthew Fowle <thefowle@wam.umd.edu>
Message-ID: <3E3526A8.A045114D@wam.umd.edu>
Source record: 69725

i'm a long time embedded systems developer with a budding interested in experimenting with wireless data networks. the one archilles heel i keep stumbling on though is that it seems the two bands i could potentially ever use: 2.4 and 0.9 ghz both seem to dissipate into nothing with any vegitation in the way. strategic use of higher ground is a must for any long distance communication, it seems. a sacrifice not always available.

someone once got me convinced that certain frequencies are less prone to absorption by vegitation, correct me if i'm wrong.

i love 802.11b, and would use it everywhere if i could, but this is really a nail in the coffin for many of my overly optimistic ideas.

are there any bands i could use not susceptible to this effect? from what i understand, i cant use amateur radio, since i'll be encrypting my traffic.

or is this just not a possibility in today's regulated world? assumably so.

Myren

That's really bizarre for someone of such vast experience and
reputation as Riley to make such a claim. If Aaron Jones were still
on here he would add it to his Morse Myths list.

Nearly every case of "jamming" I've ever heard was with CW. Even
K3LT's "friend" is reported to send "QFU" on code.

Riley is the model PR man, makes it up as he goes along,
always pleasant. Enough reliable information from the proverbial
"informed sources" in the commission has leaked out about what
Riley's marching orders were when he assumed his current position.
Ever notice how there are not any license revocation hearings, even
for the worse of the worst offenders? Don't count on any either,
especially all you experts who think K1MAN's license is going to
be suspened or revoked. Don't hold your breath! Riley is aware
of amateurs who have used their licenese privliges in the commission
of felonies, and he has done squat, as far as suspending or
revoking their ham radio licenses.

Unless the post says from: "Haaaynorton@aol.com", they didn't come
from me.

I despise glenn baxter and his little suck boy lloyd da toid davies.
lloyd da toid is a follower of anything that is wrong in this world,
such as Profit Stair, Hal Turder, and all the other "Wackos" who are
present on SW and the internet. glenn is just like a boil in the crack
of your ass, constantly irritating......

Ed Norton

All that shows is that a SSB operator remembers four letters of the
International Morse Code. Considering the 'fists' and the 'speeds' I
seriously doubt the offender is a real CW operator.

What SSBer would sit there and do that over and over?

Well, OK, there are a few.

But MUCH more likely is someone just put that into a memory keyer.

Now how many SSB only types would own a keyer?

I wonder... How many rigs would have that capability 'built in' nowadays...

Mike

That still don't make him a CW operator.

From what I have heard (CW Jammers) they are not bright enough to realize
they need to put an offset to make the 'note' readable. Unless their rig
just happens to offset they end up being zero-beat.

For you slopers zero beat means...you hear nothing. Your carrier is dead on
frequency.

As mentioned earlier the fists I have heard is just a example of a very
poor sender. Bad spacing, slow and choppy. etc.

No...its not a CW guy doing this trash.

The douchebag sending vulgarities on CW on 14.279 is likely
located in 9-Land. Rumored to be one of the "Polish Bozo Net"
as Mike calls them, who hang out several KC's down
from 14.275 and QRM's Mike and Rube almost every day.
They ain't the brightest bulbs in the chandelier and qrm Baxter's
taped broadcast using reduced power trying to fool others
into think it's the regulars on .275 doing the QRM'ing.

How pathetic!

'X-No-Archive: yes'

Yes folks, your favorite MAN on 20 meters is about to go down for the count and the count is at 7. He is woozy; he is punch drunk; and he is about to fall flat on his flabby ass. After dishing it out with the best of them for years, he now realizes he has phucked with the wrong contender, as K Three VR delivers punch after brutal punch by proxy.

First, there was the devastating news of involvement with repressive regimes. Next was the fact that the Bag's organization is the darling of nearly every anarchist and radical socialist group in the known universe.

After the Feds chew Bagster's lunch, what will be left?? Plenty say lawyers for an ex leading network hero, who the Bag has ripped off for years. Plenty say the folks at A dubbya R L who the bag is ripping off with his bogus copyright infringement scheme.

The ass pounding is fast and furious and only Lloyd Le Retardoid is still in the Bag's corner. Even a famous amateur lawyer from Miami has left the Bag high and dry in his time of need, suggesting the Bag turn to chemical solutions for his ever present, maniacal need to bore the living shit out of Amateur's world-wide!

Never has a fatter ass deserved to be slapped and pummeled as the Bag deserves this righteous spanking. This putrescent boil on the hind end of the Lobstah State has caused quite enough damage, thank you, and the powers that be are about to make sure this tub of rancid lard is on ice for a good long time to come.

Yes, fight fans, the punches are fast and furious, and they never stop! From the halls of network super-stardom; from the moldy donut-laden halls of the A dubbya R L; and from the paper-shuffling corridors of the FCC, the word is about to come out on the Bag's demise.

Will the FBI join in the fun, or is the Bag just a sack of shit that can be flushed by a smaller garbage detail? Will the State Department weigh in, or will the civil courts and the Lobstah State's DOJ reduce the Bag to a bloody brown smear on big Bubba's boxer shorts?

Time will tell, fight-fans, but we do know this... Time grows short for the one time Smallgrade Fakes, Heavy weight, Champeen of the Bad-boy-baby-broadcasters!

Stay tuned and grab the smelling salts, your favorite talking Fat-head is going down!

There's too much discussion in this group concerning Glen Baxter (K1MAN). I think if everybody would ignore K1MAN, he would go away. He has effectively hijacked 14.275 by resorting to extremely long transmission times. He may go back to his normal long-winded schedule if we just leave the guy alone. I think y'all know what I mean.

The ONLY way to get rid of ham radio creeps who break the rules, is for the FCC to remove them from the bands. Do you approve of the behavior Danny? Of course you don't, and neither do I! Do you think it's legal? Read on. Only Lloyd and a few other misguided souls approve. So why would we ignore it?

The ONLY way to stop criminals, creeps, and bullies, of all kinds, is to BUST them, and REMOVE them from polite society, to a place where they are unable to harm law abiding citizens.

Read the letter from the FCC (below) and tell us which rules violations noted in the letter have been corrected since last year?

January 29, 2002

Mr. Glenn A. Baxter
RR1 Box 779
Belgrade Lakes, ME 04918

Re: Amateur Radio license K1MAN

Dear Mr. Baxter:

On May 14, 1999, after numerous complaints about your Amateur station regarding broadcasting, deliberate interference, failure to identify, poor signal quality and erratic starting and stopping times, personnel from the Boston office of the Commission monitored your station and attempted to inspect it. There was no one present at your station while it was transmitting on Amateur Service frequencies. The transmissions continued while Commission personnel went to your residence at 1 Long Point Road, but there was no one present there either. Again on May 15 while your station was transmitting, Commission personnel attempted an inspection but there was no one present.

Since the Amateur Radio Service rules require that Amateur stations be under the control of a control operator, and that the control operator must ensure the immediate proper operation of the station, we requested by letter dated June 25, 1999, that you provide information to the Commission, pursuant to Section 308(b) of the Communications

Act of 1934, as amended, regarding the operation of your Amateur station. You responded by letter dated July 25, 1999, but your response failed to provide the information we requested. We notified you of that fact by letter dated August 4, 1999, and detailed the inadequacies of your response.

Specifically, you did not provide the name, address or phone number of the control operator for any of the "broadcasts" or "bulletins" such as prerecorded interviews, transmissions of answering machine responses, live interviews, or live, pre-recorded or automated station identifications transmitted by your station. Among other deficiencies of the response, you did not provide dates and times Amateur station K1MAN transmitted without a control operator.

You also stated in your July 25, 1999 reply that you had not received our June 25 letter by certified mail and that our letter had "misrepresented itself as Certified Mail". We reminded you that you had signed the certified receipt for that letter, and we provided you with a copy of that certified receipt.

You responded to our August 4 letter by letter dated August 24, 1999. During our review of the information you provided, your Amateur station ceased operation. As a result, we held our inquiry in abeyance. The U.S. District Court in Maine subsequently dismissed your lawsuit against the Commission, and dismissed your petition for reconsideration of that dismissal as well.

You recently resumed operation of Amateur station K1MAN. In view of that resumption and the resulting complaints we are receiving about deliberate interference, threats against those who do not relinquish frequencies for your use or who would complain, or who have complained, erratic operation, broadcasting, unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control, we have resumed our inquiry into the operation of K1MAN.

In reviewing your letter dated August 24, 1999, referenced above, and your actions subsequent to coming back on Amateur frequencies, it appears that your understanding of certain Amateur Radio Service rules may be incorrect. We will outline the apparent misunderstandings below.

Amateur Station Control

With regard to control of an Amateur station, your letter of August 24 indicated that the control device for your station was a "Radio Shack timer", and that the control points for the station were "the main power switch at the transmitter site" and at the location of the control operator, wherever that may be". You further stated that on the dates in question, May 14 and 15, 1999, you were the control operator and were in "both Belgrade Lakes and Augusta in either mobile or portable modes".

Section 97.7 of the Commission's rules states that "when transmitting, each Amateur station must have a control operator". Section 97.105 states that "the control operator must ensure the immediate proper operation of the station, regardless of the type of control (emphasis added). Section 97.109 states that "each Amateur station must have at least one control point", and that the control operator must be at the control point when the station is locally controlled or remotely controlled.

Section 97.7 further states that a control operator need not be at the control point if a station is automatically controlled. However, as Section 97.109 also explains, only stations specifically designated in Part 97, such as a space, repeater, beacon or auxiliary station, may be controlled automatically. There is no provision in Part 97 that allows an Amateur station transmitting information bulletins to be automatically controlled.

In summary, your control of the station by a "Radio Shack timer" while you are absent from your Amateur station is a violation of the Commission's Rules. You were not in control of your station on May 14 and 15, 1999 while you were in "both Belgrade Lakes and Augusta in either mobile or portable modes". Your statement in your response that "K1MAN has never transmitted during the current license term without a control operator acting in full compliance with rules 97.105 and 97.109 as well as all other applicable FCC rules" is untrue.

Simply put, to comply with Commission rules, you must be at the transmitter, or at the transmitter control point, every moment your station is transmitting, when your station is locally or remotely controlled. If the station is controlled by telecommand from the control point using a radio link, the frequencies used for telecommand must comply with the Section 97.201 requirements for an auxiliary station (may transmit only on the 1.25 m and shorter wavelength bands, except 219-220, 222-222.150, 431-433 and 435-438 MHz segments).

Publishing a Transmitting Schedule & Interference

It appears that you may be under the misconception that by publishing a transmitting schedule of K1MAN, you have certain rights under Commission rules regarding the control operator and frequency sharing requirements that you would not otherwise have.

With regard to the requirement for a control operator, publishing a schedule does not relieve you of that requirement in any way whatsoever. Section 97.113(d) of the Amateur Radio rules states that by publishing a schedule of transmissions at least 30 days in advance, a control operator of a club station may accept compensation for the periods of time when the station is transmitting...information bulletins, providing certain additional conditions are met. Publishing a schedule of proposed transmissions, therefore, relates only to a club station control operator accepting compensation. We note that this is irrelevant to the operation of K1MAN because K1MAN is not a club station.

Simply put, to the extent that you start your transmissions on top of ongoing communications of other amateur service stations, you will be engaging in deliberate interference, in violation of Section 97.101 of the Commission's rules. No amateur service frequency is assigned for the exclusive use of any station. Your publishing an intended transmission schedule does not exempt you from that rule.

Threats to Complainants and Other Users

Your sending "Felony Complaint Affidavits" to other Amateur Service licensees who complain or intend to complain of your operation, or who do not relinquish frequencies to you, was the subject of a Warning letter to you dated December 11, 2001. You have also been warned about such "Felony Complaint Affidavits" by the United States Attorney in Maine.

The Commission will view any threats made by telephone, through the U.S. Mail or on radio frequencies to Amateur Radio licensees who file complaints with the Commission, or who do not relinquish frequencies for your use, as very serious.

Broadcasting

We also note that on your web site and in your radio transmissions, you refer to your transmissions variously as "broadcasts, programs, talk shows, bulletins, pre-recorded interviews" and so forth. We have received complaints that you have broadcast comedy shows and commercial messages. We caution you that Section 97.113(b) of the Amateur service rules prohibits amateur station from engaging in any form of broadcasting. Certain one-way transmissions, such as information bulletins, are allowed as specified in the rules.

Tape Recording and Broadcasting Telephone Conversations

We have received and have under review complaints that you have tape-recorded telephone conversations without the consent of the recorded party and that you have broadcast such tape recordings. We caution you that such recording without consent may be in violation of state or federal law. We will contact you under separate cover regarding those complaints.

In summary, it is very important for you to understand that we will review all valid complaints concerning the operation of your Amateur station, and that Commission personnel will again inspect your station. The rules of the Amateur Service are straightforward and easy to understand. To the extent that you do not comply with Commission rules regarding the Amateur Radio Service, then to that extent enforcement action will be taken against your licenses. That enforcement action may include revocation of your station license, suspension of your operator license, a modification proceeding to restrict your operating privileges, or monetary forfeiture.

It is also important for you to understand that if these matters are not resolved, your operator/primary station licenses will not be

routinely renewed; but instead will be designated for hearing before an Administrative Law Judge. In such a proceeding, you would have the burden of proof to show that your licenses should be renewed.

The best advice I got (after the fact, unfortunately) was to get a
9-pin subminiature-D female connector kit from RadioShack. You want
the ones with loose pins. Make your solder connection to the solder
cups on the female contacts and then slip them oveer the pins on the
back of the DIN connector. You could also slip a piece of heat shrink
over the contact before pushing on to the DIN pins.

Regards,
Ed - N5KZW

I think the 14313 Radio Wars produced a longer list of infamous characters than 14275 has or ever will. Help me recall some of the most infamous characters and misfits who performed on 14313 over the years and what they were known for.

For example, KA4MUJ was known for his illiterate speech and mispronouncing almost every word in the English language. Also his blind allegiance to Herbie.

Others?

Oklahoma Okie

Yeah, Polly. However, I suspect his 3-500Z burned out a long time a go and he doesn't how to plug a new one in. Sounds weaker than AC5IU . _ _ . . _ _ . .

KT4TR: Roll call. Plus 100 proof vodka.

WB2OTK. Gotta admit it, he knew his amplifiers and was one of the most interesting hams on the radio.

Barstool Walter. I think W2YEE. And what's her name, Ruthie from intercon. Wonder if she's still around.

Herb KV4FZ was the only well-spoken operator on 14313 and he was VERY good. He had the sound of a professional radio announcer, still does, and may have missed his calling.

In the above, I mean to advocate NO political views. Basically because I have none wrt to ham radio.

I have a 96 Ranger with the 5 speed manual transmission. The only
place I could find to put my Alinco 2 meter rig was to take out the
ashtray, drill two small holes in it, bolt the mounting bracket to the
ashtray, then slide it back in place. I already had a public safety
radio mounted to the back wall between the seats so that location was
out..

Good luck and 73 de Jim, W8EMS/9

**

RESCUE RADIO: HAMS HELP IN FIRE COMMUNICATIONS IN VK3 WIKLDFIRE

Hams in down-under are hard at work assisting in emergency communications as widfire rage in several Australian states. Q-News Graham Kemp, VK4BB, is in Brisbane with the latest:

--
Audio report only. No text. Hear it at www.arnewsline.org
--

(Q-News)

**

RESCUE RADIO: REPEATER APPEARS LOST IN VK1 WILDFIRE

Meantime there is some good news regarding hams living in and around the city of Canberra. They are all reportedly O-K, but one of their local repeaters may have been lost in a widlfire thats has been sweeping the area. Phil Longworth VK1ZPL who is the WICEN Coordinator Canberra:

--

Longworth: "We have a couple of repeaters around town. One which is actually located at the NASA site down at Cape Mc Villa. We haven't heard it since Saturday. The scouts cannot get close to there because they have lost a lot of infrastructure. So we are assuming that we have probably suffered some damage."

--

The repeater being referred to is VK1RAC. So far radio operators have not been called in the Canberra area because there have be no major failures in the nations telecommunications system. But hams are standing by even though they may have to do without one major repeater.

(Q-News)

**

RESCUE RADIO: US HAMS NOT NEEDED IN MEXICAN QUAKE

Mexico's telecommunications system is working properly following a major earthquake and communications assistance from the United States is not needed. The quake hit in Nortth-West Mexicio. It registered 7.6 on the Richter scale, toppled dozens of homes, killed at least 24 people and injuring at about 175. And while telephone service in several remote areas was knocked out for a time, the Mexican government got it quickly restored. Also, Mexico's own ham radio community has decasdes of experience making outside aid not necessary in many cases.

Here in the United States, Gordon West, WB6NOA, has been monitoring the situation from his home in Costa Mesa Claifornia. Thats about 150 miles North of where the quake hit. And hes been taklking to hams in the area and confirms that United States hams going to assist are just not needed:

--

West: "In communiocating with the maritime mobile operators near Manzinello Mexico, many ofd the mariners rowed ashore and asked whether or not their ham radio gear on 40 meters might help relay messages back to the U.S.A. The villagers on shore evidently indicated that their communications were still up, and, that while they apreciated the boaters going ashore to ask for relays, none were needed.

The mariners did indicate that they felt a slight tidal movement. That was reported the following morning on many of the Baja maritime mobile nets."

--

West says that immediately after the quake hit he began monitoring the various frequencies known to be usaed by Mexican hams for emergencies on 40 and 75 meters. West says that not a signal on the air indicated any apparent need for mutual communications aid from the United States. Don. (ARNewsline™)

**

SPECTRUM ALLOCATIONS: FCC ON WRC-03 PROPOSALS

Back here in the U-S, an ARRL Bulletin says that the FCC is seeking comments on draft recommendations the World Radiocommunication Conference Advisory Committee adopted January 8th. Amateur Radio Newsline's Ken Locke, N8PJN, has more details:

--

The FCC's International Bureau says that based on its initial review of the recommendations, it tentatively concludes that it can generally

support the proposals recommended by the W-R-C 03 Advisory Committee. And if adopted, United States delegations will use the proposals at bilateral, regional and international meetings.

One agenda item of interest to hams involves examining the adequacy of the frequency allocations for High Frequency broadcasting in the vicinity of 4 to 10 MHz. The FCC also has draft proposals developed by Executive Branch agencies, and the agency is requesting comments on those as well.

The Public Notice was released January 15th. The deadline for comments is January 31st. Complete texts of draft proposals are available via the FCC's WRC 03 Web site. You reach it from a link at www.fcc.gov.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

Comments may be filed via e-mail to wrc03@fcc.gov. You can also submit them by mail the Office of the Secretary, Federal Communications Commission, 445 12th Street, SW, Washington, DC 20554. (ARRL)

EMERGING TECHNOLOGY: PLC MAY BE COMING TO THE USA

P-L-C could be coming to the United States -- but not right away. This according to a top official at the FCC. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

P-L-C stands for Powerline Communications and the idea is to use the same wires that bring electricity to your home as a pathway for high-speed Internet access. And as previously reported, in nations where P-L-C has been evaluated or approved it has caused moderate to severe degradation to a good portion of the electromagnetic spectrum. In fact,. several nations have decided against implementing P-L-C even though it holds the promise of becoming a less expensive alternative to cable modems and D-S-L telephone lines as a way to get broadband service.

And the FCC appears to be optimistic about P-L-C. On Wednesday January 15th, Edmond Thomas, chief of the Federal Communications Commission's Office of Engineering and Technology said companies developing the

technology have overcome many hurdles in the past year.

The FCC has been studying P-L-C technology for several months and Thomas says that the agency will pay more attention to it this year. He notes that there are no regulations that prohibit the technology, but the agency is concerned that Internet data transmissions carried over power lines could radiate signals inside and outside the home that could cause interference.

And Thomas indicates that the widespread introduction of Powerline Communications wont happen very soon. He says that the FCC wants to be certain P-L-C is not going to cause problems to your TV. And that's certainly good news for all communications services including Amateur Radio.

Reporting from Los Angeles, I'm Bruce Tennant, K6PZW.

--

Obviously this is an emerging technology that can impact negatively on ham radio and will have to be watched. (Published reports)

**

ENFORCEMENT: FCC CANCELS EXPERIMENTAL LICENSE WC2XZV

The FCC has cancelled an experimental license to California company because the agency says its being used for other purposes. According to the CGC Communicator, the FCC cancelled experimental authorization of WC2XZV after Enforcement Bureau monitoring confirmed the operation.

In a short letter dated January 17th, the Commission stated that the California station's emissions were not in compliance with the terms of its experimental radio license. But a story on recnet.com says a lot more. It says that that there were published reports of an alleged pirate station operating in the Antelope Valley area prior to the experimental license grant. The station was operating on 104.7 MHz and identifying as Frequency Radio with its website at www.1047.fm A check of the website makes no mention of the experimental license or the FCC action to cancel it. Acopy of the FCC's letter is posted in cyberspace at www.recnet.com/fcc/wc2xzv_cancel.pdf (CGC Communicator)

**
NAMES IN THE NEWS: MITNICK FREE TO REJOIN THE WWW

Former computer hacker Kevin David Mitnick, N6NHG, has completed his probation and is now free to once again use a computer and surf the web. After being released from prison three years ago on probation, the Mitnick had been barred from contact with computers until last year. He was not allowed to access the Internet until this his probation ended Monday January 20th.

But simply roaming the web may not what Mitnick has in mind. Since his release he has turned his efforts to becoming a consultant on computer

and Internet security issues. He hosted a radio program on Los Angeles talk station KFI, has written a book and has even testified before a congressional committee on ways to make computing more secure.

Only a few weeks ago the FCC agreed to permit him to renew his Amateur Radio license. The Administrative Law Judge hearing the case said that Mitnick was rehabilitated and would likely adhere to all of the agency's rules. And in a recent interview with the Los Angeles Times newspaper, Mitnick said - quote : "The truth is, I learned my lesson."

Kevin Mitnick, N6NHG, also learned a lot about computers and the world-wide-web from his days of hacking. Now he appears to want to use this knowledge for the benefit of all in society. (ARNewline™ from published news stories)

**

PROMOTING THE HOBBY: "AMATEUR RADIO TODAY" - THE VIDEO

The most trusted man in America has lent his name and callsign in support of the hobby. This as retired CBS newsman Walter Cronkite, KB2GSD, tells the story of hobby's public service efforts to the non-ham public in a new ARRL produced video titled Amateur Radio Today.

Cronkite narrates the program from his office in New York City from a script developed by Alan Kaul, W6RCL. Kaul is the West Coast Producer of NBC Nightly News and a former anchor here on Amateur Radio Newsline.

Amateur Radio Today was directed by Dave Bell, W6AQ, who is responsible for many ham radio films including the all-time classic "The Hams Wide World." Bell, Kaul, Bill Baker, W1BKR, of PBS and Bill Pasternak, WA6ITF served the co-producers. The show was edited at Suite Sixteen Post in Burbank California with Keith Glispie, WA6TFD, at the controls of the all digital Quantel Edit Box. But its really Walter Cronkite that takes you on a fast-paced six minute trip into the very soul of ham radio.

The only legitimate authorized source of Amateur Radio Today is the American Radio Relay League which holds the copyright. It will be available on video CD in the very near future and -- eventually -- VHS tape. Visit www.arrl.org/catalog and order item number 8861 (ARRL, ARNewsline™)

HAM RADIO VIDEO: WRTC 2002 VIDEO NOW AVAILABLE

Another video is aleady being called the best ham radio sports show ever to hit the street. This with the announcement that the official video of the Amateur Radio Olympics 2002 is now available on DVD and VHS.

The world premier was held in Helsinki Finland on January 18th before an overflow crowd at the Contest Club Finland meeting. Unlike previous

ham radio videos, this one is produced from a 100% "pro-sports" perspective.

In order to capture as much of the action as possible, three camera crews taped as many teams and events as they could during the actual 24 hour competition. Supporting all this great footage are high-end 3D graphics, scoreboards, top-ten boxes, team profiles, and everything else that you might expect when watching a professional sports event on television. And the production is even narrated by one of ESPN's top sportscasters

The program's total running time is 60 minutes. The DVD version contains lots of extra features like full score breakdowns for each team, continental line-ups, competitor rulebook, and even all the past W-R-T-C scores dating back to 1990.

If you've ever wanted to watch the worlds top radiosports teams in action, now is your chance. Copies are available for a nominal fee from the website: http://home1.pacific.net.sg/~jamesb (WRTC)

RESCUE RADIO: FISHING BOAT CREW DISAPPEARS BUT CELL PHONE TURNS UP IN INDONESIA

A strange story from Taipei. A mobile telephone belonging to the missing chief engineer of a ship found abandoned off Australia has been used to make more than 80 calls from Indonesia. Australian police said they are baffled by the discovery of a fishing boat full of rotting fish and its lifeboats in tact, but no crew. News reports say that the boat was found drifting off the remote northwest Australian coast. The phone calls from Indonesia add to the mystery of what happened to the missing crew. (PacificRimOnline)

COMMUNICATIONS MAGAZINES: POPTRONICS CEASES PUBLIC ATION

Popular Electronics -- better known as Poptronics Magazine is the latest hobby electronics publication to fail. This with the announcement that its publisher Gernsback Publications is no longer in operation.

Gernsback was in the publishing business for 94 years. The January 2003 issue was the last. Negotiations are reportedly under way to provide an alternative publication to Popular Electronics current subscribers. (W8HDU)

**

HAM LICENSING HELP: OH-KY-IN OFFERING HAM CLASSES

If you live in Ohio, Kentucky or Indiana and have a friend wanting to become a ham, this is for you. The OH-KY-IN Amateur Radio Society will offer ham radio license classes in the Cincinnati, Ohio area. Training

is scheduled to begin on Thursday evening, February 20th.. Training will cover Technician through Extra grades along with Morse instruction to 5 words per minute. At the conclusion of the ten week course, Amateur exams will be offered. More information is in cyberspace at www.ohkyin.com. (OK-KY-IN release)

**

WITH THE HANDI HAMS: THE CALIFORNIA CAMP

The Handi Hams California Radio Camp is the week of March 2 through 9th. This years special guest speakers include Bob Zeida N1BLF, Gordon West WB6NOA and Bill Pasternak WA6ITF.

Also, those of you contacting camp special event station W0EQO will be eligable for a special QSL. More information about the camp and the station is on the web at www.handiham.org (HandiHams)

CONVENTIONS AMD HAMFESTS: THE MIAMI TROPICAL HAMBOREE

The 2003 convention seasons gets off to a bang the 1st weekend in February. Thats when the 43rd annual Tropical Hamboree and ARRL Florida State Convention will be held in at the Fair Expo Center in Miami Florida.

The Tropical Hamboree is truly a fun filled convention with loads of new and used radio gear for sale along with a host of terrific programs and top notch speakers.

The hours of operation are 9 am to 5 pm Saturday February 1st and 9 am to 4 pm on Sunday the 2nd. For everything you might want to know about this years Tropical Hamboree take your web browswer over to www.hamboree.org (Tropical Hamboree)

**

HAM RADIO ASSISTS: THE MIAMI MARATHON

Another activity scheduled for the same weekend in the same place is the 2003 Miami Marathon. Sponsored by Toyota and The National Diabeties Association, the Miami Marathon is a 26 mile foot race starting at the famed Coconut Grove, across Biscayne Bay, to Miami Beach and back again

to Miami.

The date for this event is Sunday February 2nd. Ben Nemser WA4DZS, owner of Nemal International Electronics is coordinating the amateur radio communications. His assistant, all the way from New York City is none other than that well-known 'marathon man', and former ARRL 1st Vice President Steve Mendelsohn, W2ML.

With two major events involving ham radio the same weekend, its going to be a major challenge for the South Florida ham community. Its also looks to be a very memorable weekend in Miami as well. (Tropical Hamboree)

**

TECHNOLOGY: EIGHTY ONE MILLION PEOPLE WATCH FREE TV

According to the National Association of Broadcasters, approximately eighty-one million television sets in the U.S. receive programming exclusively from free, over-the-air TV stations. In comments filed with the Federal Communications Commission, the NAB noted that while the total number of television sets in the U.S. is 267 million that more than three out of every ten TV sets relies exclusively on "free TV" for programming. This means that the TV set is not hooked up to cable, satellite or any other subscription TV service.

Other figures noted by the NAB say that twenty-five percent of all cable and satellite homes have at least one TV set in the household that receives signals solely from free TV. Also, 24 percent of African-American and 32 percent of Hispanic households rely exclusively on free TV for their television viewing.

The National Association of Broadcasters analysis was provided to the FCC as part of the Commission's "Annual Assessment of the Status of Competition in the Market for the Delivery of Video Programming." The N-A-B says that its comments demonstrate the considerable extent to which consumers still depend on over-the-air broadcast television signals. (NAB)

**

INTERNATIONAL - IARU

On the international scene, the Radio Society of Great Britain passes along word that the national amateur radio societies of Cameroon and Macau have been admitted to the International Amateur Radio Union. A-R-T-J in Cameroon was formed in 1998 and has 14 members, seven of whom are licensed. Macau's ARM was founded in 1992 and now has 85 members. Both societies were inducted as of last December the 9th. (RSGB)

**

ON THE AIR: AO-40 QSO PARTY

The operating period for the first AO-40 QSO Party has been extended to 4 days in order to give more operating windows to Amateur stations world wide. The QSO Party will begin at 0000 UTC on the 24th of January and conclude at 2400 UTC on January 27th. Currently stations from over 30 countries have indicated their intention to participate in this years event. (ANS)

**

DX

In DX, a team of operators that includes SM0BSO, SM0LQB and SM1TDE will operate from the QTH of JW5E on Spetsbergen between February 24th and March 1st. Look for them on 160 through 2 meters running CW, SSB, RTTY as well as SSTV and other soundcard modes. QSL to each operators home call direct or via the bureau. (GB2RS)

**

THAT FINAL ITEM: SPANNING THE ATLANTIC

And finally this week, the story of history being celebrated. Of the earliest days of radio being commemorated by the people of the 21st century. And those who were there said it was like the past catching up with the future on a cold day at Cape Cod Massachusetts.

The event was the 100th celebration of the first ever radio transmission from the United States being received in Europe. It was made by radio pioneer Guglielmo Marconi in 1903. And it was his daughter, Princess Elettra Marconi, who lent her voice to begin the 100th anniversary celebration of the first trans-atlantic radio message. A message that probably sounded something like this:

--
Audio Here
--

That sound was supplied by Bob Doherty, K1VV. He along with members of the Marconi Radio Club and Marconi Cape Cod Memorial Radio Club were the people behind KM1CC. That was the on-the-air celebration of the two club's namesake making the first wireless transmission to Europe. And quite an affair it was.

Princess Elettera Marconi began the festivities in a brief contact with Ken Bowersox, KD5KBP. That's Commander Ken Bowersox on board the International Space Station. A bit later, Bowersox spoke with Cape Cod area school children who asked questions about life on-orbit. Both contacts were made possible by ARISS -- Amateur Radio on board the International Space Station.

The January 18, 1903 contact by Guglielmo Marconi used an early form of hand sent code to span the Atlantic. A short time later Marconi predicted that mans voice would eventually span the globe using wireless. Now, precisely a hundred years later on a frigid January 18, 2003. Marconi's daughter returned to near the scene of that first

contact and got to speak to a man in space. If he were alive today, Guglielmo Marconi would justly be proud. (K1VV)

Impress a non ham even more. Take them to a ham radio club
meeting or better yet, a hamfest. Here the non ham will see no
code techs, fresh off the CB, who have brought all their CB habits
with them to ham radio. Then there is the over 75 segment, bent
over and hunched, who do nothing but bitch about all that is wrong
with ham radio today and how the good old days were so good.
View the assortment of ex-cons, wife beaters, alcoholics, druggies,
nut cases, slobs, fruits, and societal misfits who make up the crowd that
attends hamfests and ham club meetings today. Then view the obese
slobs in wrinkled filthy clothing who haven't bathed in months, as they
charge the food table and stuff a dozen donuts in their mouths while
talking at the same time, soda spilling all over their clothes. Oh, and
be sure not to miss the guys with five HTs on their belt with microphone
cords wrapped around them and several microphones clipped to their
shirts. They'll be wearing four or five badges with their ham call sign, a
belt buckle with ham call, a shirt with a call sign, and a hat with their
call
sign in six places on the hat! Hams will tell you they are war heroes,
former Navy SEALs, Green Berets, and the president of their own high
tech company, making millions a year. Or they work for a large high
tech company, just got a big pay raise and make $100,000 a year. Oh,
and last but not least, check out the cars hams drive. The vehicles will
have at least five antennas on it, call signs plastered all over the
windows,
ham call letter license tags on the front and back and bald tires. YES,
DO impress a non ham friend with today's ham radio hobby!

By jove, I think Herbie's got it!

:) :) :)

ps: don't forget to give those non-hams a taste
of k1man's redundant poor-audio quality
broadcasts. we need more psudeo RF
ambulance-chasing "jump teams" you know.

pss: saw one guy at a ham club meeting here last week.
3 HT's on his belt....belt/waistline being what looked
like a size-58. (he actually had to *turn sideways* to
go thru a standard 30 by 76 inch door frame) Great image
for ham radio eh? Someone should videotape him trying
to get into a phone booth at the next hamfest and send it in
to America's Funniest Home Videos before he drops dead
of a massive cornary and they bury him in a piano crate.

784. Glenn Baxter, K1MAN, FCC, Cronkite, ARRL

Newsgroup: rec.radio.amateur.misc
Date: 2003-01-30 16:04:02 UTC
From: drakeswl@hotmail.com
Message-ID: <c0588492.0301300804.69039ba9@posting.google.com>

I'm new to this topic so don't flame me, but if W1AW has a bulletin, why can't Baxter have one? What is Baxter doing that is so bad that the FCC would want to shut him down? He has been on a long time and they haven't done anything... so doesn't that mean he is perfectly legal as far as the FCC goes? Last question. If Cronkite gave Baxter that announcement he uses, why should Baxter have to stop using it now? I heard Baxter used to call people and the government names and sent out some felony complaints, but isn't interfering with Baxter's show illegal?

I know I'm new and I'm not a ham, but I started to listen to Baxter's show this month, and it just sounds like he is trying to help minority kids and some kind of peace corp, plus he is putting other people's material on, like newsline and arrl and rain and the like. So where's the beef?

Please, no flames, I'm just trying to learn and keep an open mind.

Paul

Blustruous Baxter's transmission are nothing more that a radio
talk mostly for the benefit of a few hams who like to hear
themselves brag on the air about how great they are. 99% of his
transmission have nothing to do with bulletins pertaining to ham
radio. He assumes he owns certain frequencies, which he does not.
The best thing that could happen to ham radio would be to take
k1man off the air.

On 30 Jan 2003 08:04:02 -0800, drakeswl@hotmail.com (Paul) wrote:

Although this has all the earmarks of a troll, I'll give one shot at explaining it to you. However, the second clause in the first sentence of your second paragraph is a serious impediment to your understanding of the issues.

W1AW is the station of the ARRL, which is the sole effective representative of amateur radio to Congress, the FCC, and other governing entities. The bulletins that it transmits meet every standard of permissible transmissions set forth by the FCC.

The principle standards are set out in Part 97, Sections 111 and 113, the pertinent excerpts of which are shown below:

Authorized one way transmissions:

97.111 (b)
(5) Transmissions necessary to assisting persons learning, or

improving proficiency in, the international Morse code;

(6) Transmissions necessary to disseminate information bulletins;

Prohibited transmissions:

97.113 (b)
An amateur station shall not engage in any form of broadcasting,

nor may an amateur station transmit one-way communications except

as specifically provided in these rules; nor shall an amateur station engage in any activity related to program production or news gathering for broadcasting purposes...

Baxter doesn't fall into the Morse code practice category, and it may be a stretch to characterize his tramsmissions as "information bulletins" given the vitriolic and personal nature of much of them.

The more important consideration is that to listen to W1AW bulletins, the format is clearly that of a bulletin. They are about amateur related topics, they are a recitation of the text, and that is all.

Baxter's transmissions include call-ins and interviews, and he refers to them as programs. They may not even be amateur radio related. In short, they sound like a broadcast, they feel like a broadcast, they look like a broadcast. They fail the duck test. They are broadcasts, and they are prohibited.

The other significant point is that W1AW has been providing its service for about 80 years, give or take a few. There is every reason to believe the service will still be provided 80 years from now.

Baxter, on the other hand has only been broadcasting his programs for a few years, and given his age, are unlikely to continue more than 15 or 20 years.

So, who is providing an amateur radio service and who is broadcasting illegally? Not too hard to figure out.

There are other legal issues regarding station control, etc., that will probably be his ultimate downfall. For me, the broadcasting is the part that sullies amateur radio.

The Cronkite "issue" is one that will ultimately be settled by attorneys, and is not really an FCC issue.

The slander and the felony complaints are also legal issues that will eventually bite Baxter, too. However, no matter what illegal acts others may do to him does not mitigate in any way his illegal acts. They are an entirely separate matter.

Be sure to check out ham radio's answer to kooky broadcasters
on short-wave, the "Eastern Regional Pay-triot Net"
that's on every weeknight at 8:00 PM Eastern on 3.860 LSB

Last night a check-in said that there was an active air pursuit of
"hostile Russian or Cuban aircraft" over US airspace
on an 11 MHz USB frequency. The source of this report
was someone calling himself "Orange Blossom" (what the
f--k kind of a ham call-sign is Orange Blossom ?) who
allegedly monitors H.F. frequencies for evil Russian and
Cuban airplanes. Of course these poor misguided
souls also seem to see the "new world order", whatever the f--k
that is, hiding under their beds and in their closets
with tape recorders and microchips in their flu shots.
A real hoot of a net that's truly kooky. Hollingsworth
should also MONITOR this freq. as it's a hotbed of non-ham
licensed stations who check in using fake callings and
tactical names - all of which are Midwestern Militia loons
operating ham gear without the benefit of an FCC license.
You would think that Hollingsworth would have taken an
interest to these bootleggers and clowns on 3.860 by now eh?

Unfortunately they are on at the same time as Pastor John
Lewis is so better break out that spare Sony 2010 to tape
PJL's rantings and ravings for something amusing to
listen to during that morning drive time to the office.

Curious to note also that the ERPN was allegedly started by ex-aa8dp
Steve "Loose Cannon" Anderson, and one of his Kentucky hillbilly
militia pals who would check into 3.860 using the "ham call-sign"
of "Wolfman Jack". (a $5 cigar will be sent to the gentleman who can
correctly name "Bipolar Disorder" Stevie's ham cohort "Wolfman Jack"
who is also now off the air)

All Hail Yog ("BoB") ! Novus Ordo Seclorum

Commercial shortwave has kooks and loons. Amatuer radio operators who use the ham bands for broadcasting their political and religious views are just "tacky".

Well, okay, quite a few are "trashy", too.

The ARRL doesnt speak for all amateurs. That's the problem here. They actually think they do.

>The bulletins that it transmits meet every
> standard of permissible transmissions set forth by the FCC.

WHOA! Hold on a minute buddy. Im no fan of K1MAN or his antics but the W1AW station isnt conforming to Part 97 or Good Amateur Practice either.

Try holding a CW QSO on any of the W1AW Bulletin frequencies right before the ARRL CW bulletin commences. What you'll find is that the bulletin will begin REGARDLESS of the existing QSO which means that the W1AW station is either: A. Not following good amateur practice by knowingly interferring with an ongoing QSO or B. The bulletin begins broadcasting automatically at the scheduled time, which means that there is no control operator present in the shack at the W1AW station in Newington. Either way, whether preadvertised or not, these are both clear violations of Part 97 and Section 33. No-one has taken them to the mat yet.

Keep in mind, just like K1MAN, the ARRL doesnt own those frequencies either. Out of 636,000 U.S. hams, only 157,000 are league members. The bands are supposed to be for EVERYONE, not a vocal minority.

Try this experiment, I have.

Why does he need a phone? He'll just whip out one of his
handy dandy snazzy do-all 2-meter CB radios and do an
autopatch to order a double-cheese works pizza.

Exactly. I have been saying this, but you have expressed it in more detail and more eloquently than I have. One just has to go to a Hamfest and/or club meeting and non-Hams will see the typical Ham. Societal misfits, fat, obsessed, cult-like, and a fantasy of importance.

ARRL? K1MAN? Who cares? By your count there are 479,000 of us out here that
do NOT belong to either. And why bother? Why waste the money on either one?
They do not speak for me.

Why would you do that? There is only one reason, with all the vast
allocation of CW frequencies (that is, every single frequency ham
radio has), why anyone would do that, and that is just to try and make
a point. And a poor point at that.

In all of ham radio, is there anyone who doesn't know when and where
the code practice/bulletins are transmitted? You sound like someone
who would jump in front of an oncoming truck and then while lying
broken on the pavement, proclaim, "I was here first."

> What you'll find is that the bulletin will begin REGARDLESS of the existing QSO...

Well, duh. Are you new?

>which means that the W1AW station is either: A. Not following good amateur
>practice by knowingly interferring with an ongoing QSO...

Nonsense. See below.

>or B. The bulletin begins broadcasting automatically at the scheduled time, which
>means that there is no control operator present in the shack at the W1AW station
>in Newington.

Uh, huh. Have you ever been there? Have you seen the operation? Do you even understand how they do all of that?

>Either way, whether preadvertised or not, these are both clear violations of Part 97
>and Section 33. No-one has taken them to the mat yet.

Sure, if you want to take the narrowest possible construction of the rules, you may be right. The reason given and the slack cut is because of the fact that W1AW transmits their bulletins on 7 or 8 different bands simultaneously, and that it is impractical to "check" each frequency for squatters trying to pick a fight.

The consensus among right thinking amateurs is that the greater good from the bulletin/code practice service overwhelmingly outweighs the apparent violation of the rules because the occasional muck raker wants to jump in front of a truck.

Why don't you file a complaint with the FCC? See how your interpretation of the rules jibes with theirs.

>Keep in mind, just like K1MAN, the ARRL doesnt own those frequencies either.
>Out of 636,000 U.S. hams, only 157,000 are league members. The bands are
>supposed to be for EVERYONE, not a vocal minority.

I repeat, compare the purpose and the service to ALL amateurs of the respective parties plus the history and expected continued effort of the respective parties and weigh them against the common good of ALL amateurs and there is no issue, except for a few rabble rousers.

>Try this experiment, I have.

No thank you. I'm blessed with a little common sense. Find some other windmills to tilt.

For someone who hasn't been on "top" of this you seem to know soooooo
much about Mr. Baxter. HE WILL GO DOWN.

A quick question for you. When you go blue fishing what kind of lure
do you use? I figured asking such a troll you would have the perfect
answer!

Back to you.

Hello Folks,
Looking for info on the cable for programming a Tekk NT-8.
Prefer to build as I have Maxim 232 Chip. I usually build most of my
programming cables and converters, but need specs for Tekk NT-8 cable.
Can you help!
Thanks!
Chris

> I didn't say they did. I said they are the sole effective
> representative. That remains unchallenged.

What planet do you live on? Please prove to the group that the ARRL is effective. They've lobbied the FCC for the 60 meter band, the return of half of the 220 band that was previously taken away, and implentation of CC&R administrative law passage.....all for naught. They are losing in excess of 4000 members per year, not to metion that they've been tapping into cash reserves to stay afloat because of their ill funded agendas. The 440 band is on the verge of being taken away. A "Band Defense Fund" was started that has raised about $400K over the last 3 years which is about 5% what a commercial carrier will pay the FCC for a decent amateur band. During the 9/11 disaster the information coming out of Newington was 3 days old in addition to Jim Haynie not even setting foot in NY until Sept 25. Now they are promoting the "Hinternet" which is a pathetic, ill conceived attempt to recruit Technicians more interested in computers than amateur radios as a ploy for these individuals to join their ranks. Even the FCC has recognized that the ARRL doesnt carry any clout any longer, which is why the government doesnt give them the time of day anymore! Where I come from this is called a joke, NOT efficiency. My local Welfare office is more efficient, at least they give out vouchers for free blocks of cheese to people who really need it. Lets not forget that big score they made by getting us the 160KC experimental band. The only problem is one needs an antenna the length of Long Island, NY to work it.

> Why would you do that?

You're contradicting your own previous statements. The league, nor anyone else has the right to interfere with a frequency thats being used by others. Your ill conceived and malafide rationale is that the league has some sort of squatters rights to a particular frequency. I hate to tell you but league membership is dropping by the thousands every year because of the very modus operandi that you're spouting. Just think, in 5 more years you and your league will have less than 100k members while at the same time licensees are on the rise. How do you explain this one? Its thinking like yours that is driving people out and preventing newbies from joining in. In the former Soviet Union, the Politbureau of 42,000 really believed they could control 150,000,000 people. This is the same mindset. THE LEAGUE DOES NOT SPEAK FOR THE HOBBY BECAUSE THEY ARE IN THE MINORITY. And getting smaller every day.....

>> Well, duh. Are you new?

I was first licensed in 1968. What does this have to do with good amateur practice?

> Uh, huh. Have you ever been there? Have you seen the operation? Do you
> even understand how they do all of that?

As a matter of fact I have, and Im still not impressed. Although I must say that I do have a problem with pulling up into the league parking lot and seeing a dozen or so new Jeep Cheokee's owned by the people that cry poverty and desperately want my $39 per year. Personally I liked the old building much better.

> Sure, if you want to take the narrowest possible construction of the
> rules, you may be right.

I know Im right. There is no such thing as narrowly breaking the law. In the future if you're going to lay on the tracks for the league and defend them at least have your facts (and quote the law) straight. The law is the law, and the law is for EVERYONE equally.

The only cure for the ARRL demise (that is the organization of volunteer rank and file) is to move HQ to Atlanta or Fort Wayne or somewhere far away from Newington and clean house. IMHO this latest K1MAN thing is a canard foisted by the Newington crowd to provide a cause celeb for shutting down W1AW. Then, with no apologies to the rank and file, they can blame it all on Baxter, and with the operating savings and station sell off give HQ another raise. My local bookseller has taken QST off of the shelves so I don't keep up anymore. What did the HQ folks do with their homeland defense grant?

My only problem with k1man is that he doesn't relinquish the frequency before his bulletin. He can't claim its pre-scheduled because thats for club stations only - and k1man is not a club callsign.

Guess there's two problems I have with k1man - to be honest his group (aara), and bulletins attract a lot of wierdo's.

> station isnt conforming to Part 97 or Good Amateur Practice either.

I've read a lot of the material pro and con since my last post, including Part 97 and procedures for revocation. W1AW is also in violation if it fires up on ongoing conversations. RAIN and ARnewsline are broadcasts too, and the definition of bulletin in Part 97 is god awful, so the bulletin/broadcast argument is moot. Whenever definitions are vague, they are held to be meaningless, and the courts always boot any argument until the definition can be clearly stated.

If FCC prosecutes K1MAN for firing up on people, they need to prosecute W1AW for the same thing. Otherwise it is blatant favoritism. Same with K1MAN's bulletin. If they shut him down for his "show", they need to shut down everyone who carries RAIN and newsline. Those are definitely pre-prepared broadcast programs of a pretty high quality. All of it could be, AND IS, "alternately delivered by other services."

K1MAN has said he has a control op, he just didn't open the door when FCC came over to inspect. Since they didn't get in, they don't know if anyone was there or not, although it "appeared" no one was there.

So if the ALJ tosses the broadcasting argument, the control operator argument, and tosses the argument that K1MAN fires up over conversations in progress, what is left?

Lack of popularity and perceived obnoxiousness and the fact that he hasn't been around for 100 years like W1AW, can't be used to justify yanking someone's license.

Someone said there were character issues involved, and the FCC could use those because they are an administrative body and that was a precedent used as recently as the Herb Schoenbaum case. Can someone with the facts (not hearsay or rumors) tell us the character issues involved?

There better be better and different arguments out there, or the guys that want K1MAN off the air are going to be disappointed. My guess is there must be more issues than just these. What are they?

If you were a lawyer you'd understand Part 97 rules just a tad bit better - K1MAN and W1AW do claim temporary ownership of these bulletin frequencies - which you can do. It is after all why k1man claims he can just ride over the top of 14.275 and send his "bulletin" - the fact that its scheduled.

look up 97.113 section D) which specifically states,

"The control operator of a club station may accept compensation for the periods of time when the station is transmitting telegraphy practice or information bulletins, provided that the station transmits such telegraphy practice and bulletins for at least 40 hours per week; schedules operations on at least six amateur service MF and HF bands using reasonable measures to maximize coverage; where the schedule of normal operating times and frequencies is published at least 30 days in advance of the actual transmissions; and where the control operator does not accept any direct or indirect compensation for any other service as a control operator."
97.113 is rules for amateur broadcasting. Schedules and bulletins can only be made by club stations. K1MAN call sign according to the uls data base is classified as "Amateur Individual"

Just like Riley's original letter to k1man,

"It appears that you may be under the misconception that by publishing a transmitting schedule of K1MAN, you have certain rights under Commission rules regarding the control operator and frequency sharing requirements that you would not otherwise have.

With regard to the requirement for a control operator, publishing a schedule does not relieve you of that requirement in any way whatsoever. Section 97.113(d) of the Amateur Radio rules states that by publishing a schedule of transmissions at least 30 days in advance, a control operator of a club station may accept compensation for the periods of time when the station is transmitting...information bulletins, providing certain additional conditions are met. Publishing a schedule of proposed transmissions, therefore, relates only to a club station control operator accepting compensation. We note that this is irrelevant to the operation of K1MAN because K1MAN is not a club station.

Simply put, to the extent that you start your transmissions on top of ongoing communications of other amateur service stations, you will be engaging in deliberate interference, in violation of Section 97.101 of the Commission's rules. No amateur service frequency is assigned for the exclusive use of any station. Your publishing an intended transmission schedule does not exempt you from that rule."

I'm curious of the name of your law firm btw.

If I were the ALJ, it would be "cease all BC in the phone portions, conduct BC-like stuff on OOK Morse, 15 wpm, on a frequency of your choice in the non-voice portions of the ARS bands, include no more than two subsequent retransmissions on the latest digital fad mode(s), same frequency". Why?, because this is the "alternate service of delivery". Case closed, K1MAN gone. W1AW saved.

> allocation of CW frequencies (that is, every single frequency ham
> radio has), why anyone would do that, and that is just to try and make
> a point. And a poor point at that.

I have been interfered with by W1AW in the past. I was engaged in a
legitimate QSO on the freq, not knowing it was a W1AW bulletin time/freq.
If a regular ham did that to another ham, it would be a violation of the
rules. It's hard to compete with 1500 watts when you're only running 100,
or even QRP.

> In all of ham radio, is there anyone who doesn't know when and where
> the code practice/bulletins are transmitted?

Obviously I don't, and I'm sure most other hams don't, either. I'm not an
ARRL member, so why am I supposed to know when & where W1AW will pop up?
It's not my responsibility to stay clear of the freqs they use, since I'm
licensed to use them too. Obviously, if I know when a broadcast is going to
start, I'd stay clear, but if I'm in QSO already, they should wait for me to
finish.

> > What you'll find is that the bulletin will begin REGARDLESS of the
existing QSO...
>
> Well, duh. Are you new?

And this is legal how?

> he reason given and the slack cut is because
> of the fact that W1AW transmits their bulletins on 7 or 8 different
> bands simultaneously, and that it is impractical to "check" each
> frequency for squatters trying to pick a fight.

So if I wanted to transmit a CW bulletin on several different bands whenever
I want, I can go ahead and do it because it's "impractical" to check for
people already using the frequencies? That's not good practice. The ARRL
is taking it upon itself to transmit on all those different bands at the
same time, so they should find a way to ensure the bands aren't in use.

> The consensus among right thinking amateurs is that the greater good
> from the bulletin/code practice service overwhelmingly outweighs the
> apparent violation of the rules because the occasional muck raker
> wants to jump in front of a truck.

The frequencies belong to all amateurs, not just W1AW. If someone honestly doesn't know a particular frequency is going to be used for a broadcast and is engaged in a QSO, then they should be able to carry on their QSO without being interfered with.

Nevertheless, I don't think much of K1MAN's broadcasts either. Neither he nor the ARRL owns any particular frequency. I think if an organization or an individual takes it upon themself to transmit an information bulletin, they should first check to see of the frequency is in use or not, regardless whether it's an inconvenience.

is
> classified as "Amateur Individual"

This is a weak argument and sounds great on paper, but it DOES NOT preclude or give advantage to ANY club or organization from interfering with an on going QSO. Good Amateur Practice calls for requesting the frequency from those in the QSO, or having provisions (in advance) for moving up or down in frequency. It does NOT mean W1AW or K1MAN possess the right to start broadcasting on top of anyone, regardless if they meet the aforementioned criteria or not.

Remember last year that PA contester that was fined for broadcasting on top of two guys who were QSOing in LA? He lost his argument with the FCC and to top it off, the guys who he was interfering with were on the side of his beam which he himself couldn't even hear their transmissions.

The down and dirty facts are the ARRL has gotten away with this for years because no-one has challenged them on it, plus they had the governmental clout. Now their clout is waning due to declining numbers and others are looking to gain from the same applicability of the rule and regulations.

Read my post again. My argument was/is K1MAN CAN'T fire up on
frequency over other hams legally. So if FCC wants to prosecute K1MAN,
they will have to prosecute W1AW, for the same thing, and they
probably do not want to do that. Therefore, they will not want to use
that argument in any real enforcement action, like in front of an ALJ.
No one has ownership of any frequency. Use is all on a first come,
first served, basis.

They also will not want to use the broadcasting argument, since RAIN
and ARnewsline sound like broadcasts too. If they use the broadcasting
argument against K1MAN, then no one could carry RAIN and ARnewsline
either. According to the duck test, all 3 go quack, quack, quack.

The FCC CAN use character issues in enforcement. People have said
there are character issues to consider in K1MAN's operation. My
question was, what are they?

Paul

> and also people like K1MAN keep an eye out to protectify us.

You mean they "protectify us" like the Dalkon Shield prevents
unwanted pregenancies and fuel tanks in the Ford Pinto and
saddle-mounted GMC Pickup were "100% Safe" in the
event of a car crash?

Oh boy whoop-diddle-dee-doos I feel much better already!

> Be glad for them and tune in to 3860 LSB every night at 8pm to find
> out the real truth from these great Americans.

...more like Glad-baggie wrapped AmeriKKKans - grin.

The night before last "Orange Blossom" came up on 3.860 LSB
[without the benefit of a proper FCC issued callsign I may add]
and informed the assembled bib-overalls wearing masses
that the USAF was in a "live fire aerial dogfight" over Mexican
and USA (Texas) airspace with Russian and Cuban MIG's.

This all had something to do with illegal
aliens [...from the planet Remulac ?] allegedly
crossing the border to pick or pack lettuce and
cucumbers in crates for Texas growers...I think.....
it was a rather surreal moment you see.

Guess what, these nitwits on 3.860 believed it!
But then again what do you expect from a pack
of fools who thinks that Alex Jones and Jeff Rense are
accurate sources of news and information? I bet they
really miss Art Bell too - grin

Oh well, enjoy these RF militialoon clowns on 3.860 now before
their each hoisted up by their own pitard from paranoid
stupidity, thus ensuring by their own from their actions
when they go the way of David "boylover" Koresh, Tim "OKC"
McVeigh, William "pale of horseshyte" Cooper, Steve
"Col nutcase" Andersen and shoebomber Richard Reid.

Yup, 3.860 LSB from 8-9 PM! It draws em in
just like rednecks flock to an NASCAR

or Earnhardt #3 memorbilia show. Plus more
bootleggers too using fake callsigns - just like that
KB8--- what checks in nightly
and don't appear on qrz.com or the FCC database....

Hmmmmmmmmm..... (*ring* Hello...FCC..?)

Okay Mr. V., see if you concur,

Ab initio, the K1MAN bulletin was predicated on a faulty definition. A bulletin is not a broadcast. Ab extra, the bulletin sounds like a broadcast. The argument could go on ad infinitum. As an amicus curiae, I find his arguments specious and ei incumbit probatio qui. If the program were a bona fide bulletin, then by consensus, cadit quaestio. After researching some of the output of that station, I certainly find some of the statements made by him to be contra bonos mores. However, coram non judice, it is up to the ALJ, in its jurisprudence to decide de lege lata de intego. De jure, Riley Hollingsworth should be able to effectively communicate that as the representive of the de facto corpus. Ex facie W1AW and K1MAN are both probably ex cathedra non, barring faciendum. After studying the facts, I find them both in delicto. Inter alia, I find them both redundant, in the sense that print and internet supercede any need to disseminate their material on the ham bands. Apparently the locus in quo is about to shift to 14.275 on Saturday, probably indicating mens rea. Although, that move is non constat, vis a vis its permanence. I still think K1MAN bears the onus probandi if he wants to continue his "bulletin." Although prima facie, prima impressionis, I think he would lose, and ergo, begin the process of winding up, if he ever appeared in front of an ALJ. On the other hand, I would probably defend either Baxter or ARRL pro bono, if they asked, just because the FCC definitions of broadcast and bulletin are just so much bovine scatology, and deserve to be shot down, so they could be replaced with meaningful definitions.

Paul J., (Harvard Law '87)

> broadcast. The argument could go on ad infinitum.

Agreed. I believe the real test here will be whether the presence of any previous equitable enforcement of (or lack thereof) by the government on the part of W1AW et als will be cited a presidence. Lets face it, this statute was originally written with W1AW in mind and W1AW has never really been challenged. Res judicata not withstanding, the matter will be one the outcome of which could cause inter alia kaos (from an organizational and futher enforcement POV). Having stated this, an ALJ will have to take into consideration whether K1MAN was in fact culpable by not subscribing to any of the acceptable relevance criteria and his actions were those of a blatent scienter. Personally, I think they both need exemplary damages per curiam.

The FCC long ago gave the ARRL permission to broadcast messages of
benefit to the ham community. This permission is not given to
everyone for obvious reasons...pretty soon the ham bands would be just
another BCB.

Baxter is generally not listened to by anyone. His broadcasts are done
just to aggravate the small group of politicos who don't care about
ham radio, but are anal retentive when it comes to the ARRL.

That's not what he said. Read the sentence from start to finish;
your only conclusion is that it's completely true and it's been
true since about 1916. It would be even more true if he had
included the U.S. Armed Forces.

You're looking at it from the ARRL's perspective to others, but he
wrote it from the perspective of others to the ARRL.

>Out of 636,000 U.S. hams, only 157,000 are league members.

Doesn't matter. Only a small minority of gun owners are NRA
members, but the government et al see the NRA as representing
all owners and the industry. We see the same situation with
the AAA -- not all drivers are members but AAA is considered as
the representative for all drivers.

You might honestly believe that the ARRL doesn't speak for you, but
amateur radio exists today *only* because of the ARRL. One of dozens
of examples: There would not have been any ham radio after WWI if it
hadn't been for the ARRL's efforts fighting the Navy's desire for all
radio to be under military control.

840. Best method of learning Morse Code?

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-01 02:36:15 UTC
From: fj40dana@hotmail.com
Message-ID: <9a118507.0301311836.7c501601@posting.google.com>
Source record: 69631

Hi Guys. I'm trying to find out the best method of learning morse code. I've found two methods, the Farnsworth and the Koch, both of which sound promising.

The similiarity is: Both methods send the characters at a rate of 18 wpm.

The difference is: The Farnsworth method sets the overall send speed at around 5-6 wpm, with large spaces in between the characters. After you know the alphabet, you gradually increase the send speed.

The Koch methods sends the code at a full 18 wpm, and you start by learning two letters, then when you've got that mastered, add one more, etc. They claim this method will cause you to learn the code "reflexivly", and you will be able to copy at 18wpm much easier than any other method.

Anybody use either of these? Comments? Suggestions?

thanks

Dana (wannabe general licensee!!)

You are going to find as many opinions on this as you will
operators!!!

I like the Gordon West method, it is farnsworth based and is
straight forward, some friends have had luck with code quick but
that seems only a good way to get started, to increase your speed
you have to go beyond code quick.

The bottom line is, WHEN is Glenn going to be shown the door?
Will Riley ever act?
Anybody taking bets?

What is it gonna take? Glenn has expanded his Blabcasts to over 4 hours per jam session and what is to stop him from expanding to ever greater lengths per session?
What's next? Will Glenn go 24/7 on 14.275?

This idiocy perpetrated by K1MAN has to have an end somewhere. Or does it?

I remember a judge telling a young 15-year-old (me) that "...ignorance
of the law is no excuse..." (riding a motorcycle without a license...)

The times and frequencies of the ARRL bulletins are published and
publicly available. Ignorance of them is no excuse.

>It's not my responsibility to stay clear of the freqs they use, since I'm
>licensed to use them too.

It *is* your responsibility and if you continue your QSO during their
bulletin, *you're* the one in violation of intentional interference.

Their bulletins have been aired daily for over three-quarters of a
century; how long have you been on the air?

>So if I wanted to transmit a CW bulletin on several different bands whenever
>I want, I can go ahead and do it because it's "impractical" to check for
>people already using the frequencies?

The FCC regulations specify the exact procedures for doing just that.

I like the Farnsworth method.

Koch was mind boggling for me... WAY too fast. I got frustrated and gave up and didn't try again for about 2 years. I do understand that some folks swear that Koch worked for them. I wonder, though... can the Koch method graduates copy someone sending at slow speeds?

The key to CW, no matter what method of learning you choose, is to practice it at least 10 minutes EVERY day... and 20-30 minutes a day whenever you can.

Good luck on your upgrade! Stick with it and you'll do fine. If I could do it, anyone can.

Learn the code first using a Farnsworth approach (characters at 18wpm with spacing so words are at 5wpm). Once you can copy code reasonably well this way, switch to the Koch to get your overall speed up.

In both cases, your character speed is the same. But starting at the Farnsworth setup, your brain has more time to react. At first you need this time. Your "reflexes" will pick up speed in time.

Using the Koch method, it will probably take you longer to get all the characters down as you are going to go for a speed that is overall higher.

To get to 5wpm at a character speed of 18 will take the average person about 30 hours of combined study and practice using a Farnsworth method approach. This is the way the tests are given by the way.

To get to 18wpm at a character speed of 18 will take the average person about 100 hours of study & practice regardless of method used. You can start with the Farnsworth and speed it up as you get better at it. Or you can start with the Koch approach.

So the Koch will take longer to get ready for the testing because you are bypassing the lower speed and going straight to the higher speed. However if your goal is 18wpm and higher speeds anyway and don't mind taking a little longer before you are ready to test, it would be fine to start right from the beginning this way.

This has turned into a pretty interesting thread. After doing a lot of reading, it looks like the majority of folks on this NG don't like K1MAN, but some people like W1AW, and think W1AW's bulletin service is worth preserving. So how would the FCC prosecute K1MAN while leaving W1AW intact?

Regarding 97.111(b)(6).

The FCC didn't give "anyone" the "right" to "broadcast."

Licensees (not anyone) are accorded the privilege (not a right) to use the amateur bands by the administrative body (FCC) pursuant to obtaining a license and following the rules set down by the FCC. One of the privileges licensees may avail themselves of, is the dissemination of certain types of bulletins (which are specifically NOT broadcasts).

When W1AW and K1MAN begin their bulletins on top of other licensees using the frequency, is that legal? In Riley Hollingsworth's opinion, no. "No station has exclusive use of any frequency." See his January '02 letter to Glenn Baxter.

Do I think W1AW and K1MAN should be prosecuted for that apparent rules violation? No I don't. W1AW has a long history of helping hams learn code. It's a real service to the community. Most hams move when W1AW fires up over top of them, probably in deference to tradition, and in recognition of W1AW's long service. So, I'd like to see the FCC look the other way on that issue.

The FCC should not pursue a broadcasting complaint either, because that shotgun would hit RAIN and ARnewsline, and other programs that sound like broadcasts. I like RAIN. ARnewsline has some interesting stuff once in awhile. Therefore, I'd like to see the FCC look the other way on the alleged broadcasting violation too.

The FCC should really just clean up the language in Part 97. That would prevent future problems like this from popping up again. However, if the FCC wants to prosecute K1MAN, they should go after some OTHER infraction(s). The question remains; if the FCC prosecuted K1MAN, what violation(s) should they target, assuming they'd like to remove the chaff, while preserving the wheat?

Dana,

I used both methods to learn the code. I first used the Farnsworth method via the ARRL's "Your Introduction to Morse Code" CDs. I also downloaded the free G4FON Koch trainer for practice on random letters and to increase my speed. You can use both, but I think you might find it easier to start with Farnsworth and supplement it later with practice using Koch. A good thing about the Koch trainer software is that it shoots out random characters, so you cannot memorize the practices like you can with CDs and tapes.

I don't have the G4FON website URL, but if you do a Google search on it, I'm sure you'll find it.

true, in fact they specifically prohibit 'broadcasting' in 97.113(b).
97.111(b)(6) specifically allows the transmission of 'information
bulletins'. you must go back to 97.3 to understand the definitions of
'broadcasting' and 'information bulletins'. so on this matter the only
quetion is if k1man's transmission is 'of direct interest to the amateur
service'. this part is of course open to much discussion, some of k1man's
stuff obviously is of direct interest and so is probably ok. but some of
the stuff he does like editorializing against the fcc and other individuals
could arguably be catagorized as being of interest only to individuals and
not the 'amateur service' as a whole... but that is probably such a gray
area that he could tie up the fcc in court for a long time.

on the automatic startup... i seem to remember there was an fcc ruling or
opinion many years ago about bulletin stations starting up on top of
existing qso's. as i remember it the statement essentially allowed the
stations to start up without notice as long as it was a well published
schedule. this makes sense for well published and frequent operations like
w1aw, especially when they occur on multiple bands at the same time....
should it extend to k1man? probably, he has been doing it for a while, and
i assume he has a published schedule somewhere even if i have never seen it.

the one point where the fcc would seem to have a case against k1man is the
purely technical one of station control. according to published reports
they paid a visit to his station while a bulletin was being transmitted and
could not find a control op. this is an obvious violation of station
control rules. that the transmissions are not monitored all the time is
also obvious to listeners at times when the tape breaks or something else
happens and you get dead air, i haven't heard this recently but in the past
this seemed to happen fairly frequently. on this point there can also be no
backlash against w1aw as they have the paid operator there to run the

station.

1st of all, he is not religious at all, which is why Al-Qaida hates him, and would like to see him dead, since Iraq is the most westernised country in the Arab world. 2nd, Saddam gives Jews & Christians more tolerance than in any other Arab country. But Zionists, esp. those who claim to be Christians but are not, he hates, esp. Bubya. Even the National Council of Churches condemns Bubya for being a Christian hypocrite, and the message is delivered by Bishop Talvert from Bubya's own denomination in the Methodist church. Tune into KTBN or WWCR, and you'll probably hear those spots.

> CAN YOU IMAGINE THE HAY THAT SHORTWAVE
> RADIO BULL SHIT ARTISTS LIKE ALEX JONES AND

> FROM ALL OF THIS.....??????????????????

Gov't trained kooks are bad enough. On VOR there was a report read from Pravda that a UFO was spotted over Iraq during the last Gulf War, and had to make a forced landing. They speculate that Saddam has alien weapons. No doubt the NASA-trained kook Dr Richard Hoaxland will be on Coast to Coast 1st thing next week to flog an even bigger magic bullet theory.

You can do either. Once you pass the General exam, you will be given a form to fill out and on that form, there is a box you can check if you want to have the FCC assign you the next sequential callsign. Or, if you'd rather keep your old one, don't check the box. Your choice.

As expected he came up on 275 and announced everyone had to leave because he wanted to run a bulletin. Why did he vacate 272??? Well he NEVER intended on using it anyway but he claimed a QSO Party was going on and he couldnt run a bulletin there.....???.... do any of you see a problem here????

Why is it he is so considerate of 14.272 and to hell with 14.275? Answer is simple...he is a asshole. And no matter what he 'says' is intent on causing more and more trouble.

I forsee Mr. H. will be making a move real soon on Mr. B.

And BTW Llllooooyyyyddd shut up...no one cares what you have to say.

Your right Carl.
There is an awful lot of sickness out there!
It makes me wanna PUKE

Just check out:

"SPACE SHUTTLE COLUMBIA DEBRIS" on E-Bay now!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2909705555&category=1468

Plus other "valuable Columbia collectables" now being huckstered like:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3205182333&category=13904

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2156914118&category=4150

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3112168639&category=19184

HURRY and get those bids IN before prices go up!

(not to mention that carnival sideshow now takeing place as
I type this on 14.275 with Baxter grandstanding as usual.....)

And you can be sure that all the
kooks on WWCR, WWRB, WHRI
will make more of this than you can believe.
(....their already doin it FREAKIN BIG TIME with the conspiracy fun
in alt.fan.art-bell like you cannot imagine - sit back, watch em spin and
roll Carl! it's the greatest show on earth - not only on 14.275 Ho-Ho!)

Wanna see something VERY curious...?

Go to www.ebay.com and do an Item Search
on the words "space shuttle Columbia"

In just the past hour not less than 100 auctions for
Columbia memoribilia have gone up...

I ain't seen anything like in since Dale Earnhardt
crashed and every redneck in the Southeastrn USA
suddenly put up every bit of Earnhardt Memorbilia they had
in their tacky collections for immediate auction.....

Glub bless human psychology and capatalism eh?

Be sure to check ont 14.275 also! there's a radio
war going on *right now as I type this* btwn k1man's
coverage of the 'Columbia disaster' and the usual
bunch of refugees from the old 14.313 and 75 Meter
wars -

You may keep your call sign if you wish. Simply be sure that you do NOT
check the box for a new call sign.

By the way since the 1x3 call signs are all used up, there is no point in
getting a new call sign when you upgrade to general. All that is available
for the general class licensees are the 2x3 call signs like the one you have
now. You'd have to try for a vanity call sign to try to get a shorter one.

Hi fellas

I am about to purchase a Kenwood TS520 and was wondering if there is anywhere i can download a copy of the operators and/or service manual. It seems that there are places that will sell them at a premium but i was hoping not to have to do that. I am mainly interested in the transmitter tuning procedure as it has been years since i had a valve transmitter to tune. Any help would be greatly appreciated. My email if anyway can help is tstone12002@yahoo.com.au

Cheers

Tony -- try URL:
http://hamradio.online.ru/sch_eng.html
I haven't downloaded anything myself from there - so not sure how well it
works.

Also Sams may sell a manual reasonably or any of the vendors at URL:
http://ac6v.com/manuals.htm
At least one of them there has the service manual for $23
But postage to VK may be prohibitive

Hey Lloyd! Are you sure you didn't write
that stuff for Alex Jones while he was cornholing your
bung whilst wearing a red beehive hairdoo wig, and you were
in a pique of "creative writing" thought as the result...?

Cool,

to a great degree the Russians are our allies, maybe they
will come on over and help us protect or borders from all of
the illegal mexican aliens who are breaking our backs economically.

"SPACE SHUTTLE COLUMBIA DEBRIS" on E-Bay now!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2909705555&category=1468

Plus other "valuable Columbia collectables" now being huckstered like:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3205182333&category=13904

This one will be good for the pool this Summer......

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3205225290&category=13904

This morning there were 28 Pages of item on E-Bay if you
did a search on the word "Space Shuttle" - when I last checked
1/2 hour ago....there were 54 PAGES and still growing........

Wonder if some kook hams from 20 or 75 Meters will
get an old emissions ECU computer or transaxle parts from
an old Chevy, stencil "NASA" on it andput it on E-Bay
as shuttle parts..? I can see some kook ham in ------------
pulling this kinda stunt..

Every one of these vultures should be locked up and the keys thrown away. Perhaps at some point making memerabilia (sp?) available would be acceptable.. but these creeps had the stuff up on ebay before the debris cooled. I hope that the one selling debris is already in jail. These people have no conscience, no empathy, no morals..

May the astronauts rest in eternal peace.

I would hope that to be not true. I expect "some" Muslims (those
radical extremists that simply hate all and anything American)
to probably rejoice, but not "all". I pray I am right.

Ah. You have no idea how any of this works. No troublemaking code hater
ever
learned even enough of it
to get on his favorite 2meter repeater and utter a few obscenities in
Morse.
We see.

Just for your enlightenment, the *REAL* CW operators are found on the
south
end of each HF band. THAT is where there are no problems with
violations, as
evidenced clearly by the FCC Enforcement logs and by Riley's
statements..
That one of your kind would stoop to swearing in Morse on a VHF FM
repeater
is certainly believable.

Hey, even YOU could learn enough code to do that.

Boy did I just get an eyeful! I got an email from a Ham in Pittsburgh named Brian. He sent me a link to his website and sent me some original documents that convinced me he knew what he was talking about regarding the subject of this thread. I should interject here and say the FCC is the least of Baxter's worries if the material I read is even halfway accurate. Brian also did some excellent reasearch, which, if I were an ALJ, would convince me to revoke Baxter's license. The Part 97 research is as good as I've ever seen in court.

I cut and pasted Brian's opinion below:

ï¿½97.101 General standards.

(a) In all respects not specifically covered by FCC Rules each amateur station must be operated in accordance with good engineering and good amateur practice.

Apparent Violation #1[Distorted, drifting transmitters, and frequently broken tape recorders are apparent violations]

(b) Each station licensee and each control operator must cooperate in selecting transmitting channels and in making the most effective use of the amateur service frequencies. No frequency will be assigned for the exclusive use of any station.

Apparent Violation #2[No frequency is assigned exclusive use of any station, bulletin stations notwithstanding. Broadcasting on top of other hams is an apparent violation]

(d) No amateur operator shall willfully or maliciously interfere with or cause interference to any radio communication or signal.

Apparent Violation #3[Again, broadcasting over top of hams already using the frequency is an apparent violation]

ï¿½97.103 Station licensee responsibilities.

(c) The station licensee must make the station and the station records available for inspection upon request by an FCC representative. When deemed necessary by an EIC to assure compliance with FCC Rules, the station licensee must maintain a record of station operations containing such items of information as the EIC may require in accord with ï¿½0.314(x) of the FCC Rules.

Apparent Violation #4[Missing at least 2 FCC visits due to lack of a control operator at the transmission point is an apparent violation]

ï¿½97.105 Control operator duties.

(a) The control operator must ensure the immediate proper operation of the station, regardless of the type of control.

Apparent Violation #5[Tapes that break, repeat, and automatically replay themselves without correction, indicate a lack of station control, and are an apparent violation]

ï¿½97.109 Station control.

(a) Each amateur station must have at least one control point.

(b) When a station is being locally controlled, the control operator must be at the control point. Any station may be locally controlled.

Apparent Violation #6 [The only control ever alleged by K1MAN is local control. To the extent that he is not in the station during the broadcast, he is out of control, which is an apparent violation]

ï¿½97.111 Authorized transmissions.

b) In addition to one-way transmissions specifically authorized elsewhere in this Part, an amateur station may transmit the following types of one-way communications:

(6) Transmissions necessary to disseminate information bulletins

Apparent Violation #7[ARnewsline and RAIN are already stretching the bulletin rule. A call-in and talk-show is beyond the pale and is an apparent violation]

ï¿½97.113 Prohibited transmissions.

(a) No amateur station shall transmit:

(3) Communications in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer. Amateur operators may, however, notify other amateur operators of the availability for sale or trade of apparatus normally used in an amateur station, provided that such activity is not conducted on a regular basis

Apparent Violation #8[K1MAN has an obvious pecuniary interest in the success of his charities, the International Amateur Radio Network, and the Amateur Radio Peace Corp Foundation, as well as the American Amateur Radio Association, which he soliticits donations to on a daily basis. On his website, to which he also refers his listeners, are all kinds of items for sale and solicitations for donations.]

(5) Communications, on a regular basis, which could reasonably be furnished alternatively through other radio services.

Apparent Violation #9[Every bit of the K1MAN broadcast could be alternately furnished on Short-wave]

b. nor shall an amateur station engage in any activity related to program production or news gathering for broadcasting purposes, except that communications directly related to the immediate safety of human life

Apparent Violation #10[K1MAN has routinely engaged in newsgathering and production for the purpose of retransmitting same on his broadcast. The Sam Voron interview, the John Palmer interview and the Joe Fairclough interviews in January 2003 are just a few examples in a long list]

ï¿½97.117 International communications.

Transmissions to a different country, where permitted, shall be made in plain language and shall be limited to messages of a technical nature relating to tests, and, to remarks of a personal character for which, by reason of their unimportance, recourse to the public telecommunications service is not justified.

Apparent Violation #11[Publicly calling for the resignation of an FCC official and criticizing the Federal government are not technical or personal and unimportant transmissions. To the extent that K1MAN can be heard in other countries, this is an apparent violation]

ï¿½97.3 Definitions.

(10) Broadcasting. Transmissions intended for reception by the general public, either direct or relayed.

Apparent Violation #12[Remarks directed toward non-hams, for example, offering code practice tapes to short wave listeners, during the K1MAN broadcast is an apparent violation]

(23) Harmful interference. Interference which endangers the functioning of a radionavigation service or of other safety services or seriously degrades, obstructs or repeatedly interrupts a radiocommunication service operating in accordance with the Radio Regulations.

Apparent Violation #13[Another reference indicating an apparent violation is the harmful interference to stations operating in accordance with the radio regulations who are using the frequency prior to the broadcast]

(25) Information bulletin. A message directed only to amateur operators consisting solely of subject matter of direct interest to the amateur service.

Apparent Violation #14[K1MAN is apparently in violation to the extent that his transmissions are aimed toward non-hams]

(30) Local control. The use of a control operator who directly manipulates the operating adjustments in the station to achieve compliance with the FCC Rules.

Apparent Violation #15[To the extent that K1MAN is not in the shack or using telecommand to control the station, this is an apparent violation. A radio shack timer does NOT take the place of station control]

Also Paul, many of these issues were supposed to be immediately corrected LAST YEAR on receipt of Riley Hollingsworth's letter of January 2002. Also consider the alleged apparent lack of cooperation with the Federal licensing authority; alleged threats to other hams who refuse to relinquish the frequency; and the alleged practice of sending bogus felony affidavit complaints through the US Mail, and you have a nice recipe for an immediate suspension, followed by a license revocation hearing in front of an ALJ.

End of email summary

Well, there you have it. If the FCC wants Baxter off the air, I'd say all they need to do is copy this page and send the letter.

-PJ

TWO CRIMINAL ACTS

The material from the Columbia is US Government Property and part of
an Accident Investigation.
Count One: Removing it is a Crime in and of Itself.

Offerring the Real Material from the Columbia on eBay ia a Second
Crime.
Count Two: Profiting from a Criminal Enterprise.

Or, offerring the Phony Material Claimed to be from the Columbia on
eBay ia a Third Crime.
Count One: Fraudulent Represetation of Material Condition or Facts in
interstate commerice.
Count TRwo: Profiting from a Criminal Enterprise.

Hope Everyone of the Sick B*st*rds is charged and Does Real Time in a
Lock-Up.

May Gods Infinate Peace and Mercy be with the Crew of the Columbia and
their Families and Friends ~ Amen.

Bert
I listened to some of the Ten-Ten contest today. I don't have
a number so I didn't try to join in. How did you do in it?
BTW I heard about the accident during the Mid-CARS net
on 7258 kHz, I wasn't watching any TV today either.

<<<<<<<<SNIP>>>>>>>>>>

Wow! so this is how a lawyer thinks!!

What if K1MAN's advocate would establish that W1AW, has over time, done essentially all of the same things? (The only stipulated difference is bulletin "content".)

What if K1MAN's advocate could produce sworn depositions that W1AW used to swing its BC frequencies a few hertz to avoid starting up on on-going QSO's? (ed. This occured up into the '70's but was dropped along about the time that W1AW simultaneous multi-frequency broadcast was upgraded to commercial transmitters on fixed frequencies with robot control. -- Note that this suggests that there may not be control operators in attendance, according to Brian's rules).

Perhaps some more research is required before going before the ALJ?

Again, IMHO, the only rational way out of this is to require all bulletin stuff be restricted to the Morse/Data segments. W1AW saved, K1MAN gone.

73,
Clay N4AOX

Amateur Radio Newsline™ Report 1329 - January 31, 2003

==========

A NOTE TO THOSE WHO ONLY "READ" AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the "spoken word." It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. On site free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

de
The Newsline Production Team

==========

Amateur Radio Newsline report number 1329 with a release date of Friday, January 31, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio assiastance continues at the Australian wildfires and the ARRL asks the FCC to go slow on spectrum reorganization. Find out the details on Amateur Radio Newsline report number 1329 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: AUSTRALIAN FIRES FOLLOW-UP

Amateur Radio is still supporting firefighting efforts in Australia. Q-News Graham Kemp, VK4BB, is in Brisbane with the latest.

--

--
vk1zpl audio
--

That's the voice of Phil Longdon VK1ZPL WICEN - ACT Coordinator speaking from Canberra.

As these Wildfires, or as we "downunder" call them "Bushfires" raced through South Eastern Australia they came dreadfully close to the Deep Space Network antennas at the NASA's site at Tidbinbilla. Here four giant antennas including Deep Space Station 43 - a 230-foot steerable antenna - the largest in the Southern Hemisphere are located.

The world famous Mount Stromlo Observatory west of Canberra was totally incinerated by the fires - a nearly $12 million loss.

Luckily for the Amateur Population, their main repeater was spared.

--

"The VK1 Black Hill repeater: Well if the hill wasn't black before it is now. It will be two to three weeks before they can gain access to the site, all the coaxial cables on the mast have been melted or damaged in some way.

A contractor for the tracking station will be removing and replacing them. Unfortunately these VK1 cables are not part of the contractors work, VK1 hams intend to try and get a price from the contractor to install their cables as they do the work for the tracking station. The equipment in the hut appears to be undamaged however will need to be checked out".

--

And the current scene in VK1 Phil?

--
Audio Here
--

Further South from Phil in VK3, The number of radio amateurs involved in providing communications assistance during the three week long fire disaster in north-east Victoria is growing DAILY, with two separate and distinct activities taking place.

WICEN Victoria has radio operators at three Incident Control Centres and two airbases in the north-east, while Red Cross is using its RECOM data communications system.

WICEN Victoria State Coordinator, John Kerr VK3BAF expects the provision of radio operators to the Department of Sustainability and Environment in the north-east could continue for at least another two weeks.

Additionally, John Kerr VK3BAF said, "WICEN has now been requested by the Victoria Police to be on a much higher level of standby to provide point to point communications should other radio or telephone networks fail".

--

"WICEN Victoria has now set up a statewide HF-radio network using the 40 and 80 meter bands. 3.6 and 7.075 MHz +/- QRM with 'W' abbreviated callsigns. Operators at Corryong will use callsigns 'WIC', Mt Beauty

'WIB,' etc. and net control AWI to the designated listening post on each band.

Schedule times are 0700 and 2000 hrs for 80 meters, 0900 and 1800 hrs for 40 meters with a continuous listening watch at all other times, especially on the hour up to three minutes past".

--

In other activity, the Australian Red Cross National Registration and Inquiry System is using three teams of radio amateurs at three entres - Eskdale, Bright and Omeo registering thousands of people who have been displaced.

A Red Cross WICEN communications system known as RECOM relies on radio amateurs in the field to transmit to a State Inquiry Centre the registration details of emergency evacuees.

This information is transmitted by radio amateurs at the Red Cross registration centres using laptop computers linked to amateur radio transceivers using PACTOR II.

WICEN Victoria's Division 4 Region 4 Coordinator, Peter Weeks VK3YZP reported late 29 January that currently there are 12 radio amateurs in the field - ten at Incident Control Centres, and two at airbases for fire bombing radio traffic. WICEN has been sourcing radio amateurs for the airbases who have aircraft experience.

Peter VK3YZP stresses that no radio amateur should enter the Alpine region without being assigned by WICEN Victoria, authorised by the other authorities, have been properly equipped with clothing, and provided an entry escort.

Reporting from Brisbane Australia, Im Graham Kemp, VK4BB, of Q-News for the Amateur Radio Newsline.

--

Meantime, Phil Longdon, VK1ZPL reports that Australia's Wireless Institute Civic Emergency Network or is providing operators at the Yarralumla Shire Fire Control Center. Longworth says that WICEN is supplying a total of ten operators with others on standby if needed. (VK1 WICEN, WIA Victoria and QNEWS)

**

REGULATORY: ARRL ASKS FCC TO GO SLOW

The ARRL has registered mixed feelings about the FCC's Spectrum Policy Task Force Report issued last November. In comments filed this week, the League called the report a positive first step in developing a comprehensive spectrum management approach but stopped short of endorsing it as presented.

In a bulletin to its members the ARRL says that the report fails to address the needs and goals of the Amateur Service. It also says that the report's orientation toward commercial services makes it not wholly applicable to the Amateur Radio which cannot pay for spectrum access.

And says the ARRL there's not been enough time to study the report's recommendations thoroughly, much less deploy them immediately. The League urged the FCC to not abandon longstanding allocation policies that are based on engineering.

But the ARRL reaction is not entirely negative. It says that it was encouraged that the FCC had worked to involve all portions of the telecommunications industry in developing a spectrum policy. And the ARRL has asked the FCC to consider greater use of "negotiated rulemaking" to expedite allocation decisions. (ARRL)

**

RADIO LAW: GOVERNMENT TOLD IT CANNOT RECLAIM FREQUENCIES

The United States Supreme Court has ordered the Federal government to return billions of dollars worth of unused wireless licenses to NextWave Telecom Inc.. This, as the court tells the government that it cannot take back what has been bought, even if it was not paid for.

Nextwave had defaulted on payment for the licenees it purchased at auction and the FCC had moved to reclain the bandspace. Nextwave went to litigation to stop the government seizure.

It all ended on Monday January 27th. At that time Justice Anthony Scalia, writing for the court, said the Commission could not justify intervening in the bankruptcy proceeding to take the licenses by claiming a regulatory motive.

The spectrum has been hanging limbo during the protracted court battle. (Published reports)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world Xerox Amateur Radio Club repeater -- WD6CZH -- serving El Segundo California.

(5 sec pause here)

**

ENFORCEMENT: COORDINATED REPEATER VS. COORDINATED REPEATER

Two coordinated repeaters in the North-East have squared off over the use of a repeater pair. And if the FCC does decide to try to solve this one, it may need the wisdom of a King Solomon. Bill Pasternak, WA6ITF, has more:

--

Connecticuts Northville Amateur Radio Association's NA1RA machine is coordinated by the Connecticut Spectrum Management Association. This is a relatively new repeater coordinator that was formed a few years after the failure of the Tri-State Amateur Repeater Council. Tri-State was the group used to serve parts of New York, New Jersey and Connecticut.

And now Northville has complained to the FCC about interference to its NA1RA operation coming from the W2KGY repeater. This is a system operated by the West Point Military Academy Amateur Radio Club at West Point New York. But unlike most cases where one repeater is coordinated and the other is not, W2KGY holds coordination from UNYREPCO -- The Upper New York Repeater Council.

When one repeater is coordinated and the other is not, the answer is simple. The uncoordinated repeater bears the majority of responsibility to clear up interference to the coordinated machine. But in this case, both machines appear to hold legitimate coordination but from different adjoining coordinators. In other words, at least at this writing, both repeaters appear to be on the same channel pair becasuse a coordinator says thats where each respective systems should be.

So far, the only action by the FCC has been to send out an information gathering letter to UNYREPCO. UNYREPCO has responded and a copy of that response has been forwarded to the Northville group for its reply along with a recommendation that
a response from the Connecticut Spectrum Management Association be included as well. Only after digesting that response is the FCC likely to render a decision as to whether or not it will get involved. Well let you know what the agency decides.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

In the past, on verification that all systems in a dispute held bona fide assignments from a recognized frequency coordinator the FCC has opted to stand aside and permit the coordinators solve any disagreements that might arise. (FCC)

**

ENFORCEMENT: HAM WHO OPERATED UNLICENSED STATION TURNS IN LICENSE

A Berkely Michigan ham has submitted his license to the FCC for cancellation after being accused of operating an unlicensed transmitter in the FM broadcast band. According to the W5YI Report, Thomas Brothers, may not reapply for another Amateur Radio license for the next five years. He was also fined $10,000 after direction finding and an inspection of his premisis found the transmitter on 88.3 Mhz in the F-M band. (W5YI)

**

ENFORCEMENT: OPERATION BEFORE LICENSE ARIVES BRINGS SET ASIDE

The FCC has set aside of General Class license of John Gregory, W3ATE, of Lake Placid, Florida. This, for operation outside of his Technician class license privileges prior to recieving his General class license grant.

According to the regulatory agency at various times in 2002 Gregory apparently checked into a net on 14.300 MHz while still licensed as a Technician. He was issued Warning Notices regarding this matter on May 6 and June 6, 2002 but letters were returned to the FCC marked unclaimed.

Now the FCC has issued another notice to Gregory that gave him 20 days to explain his actions. If he fails to respond the FCC says that his General class application will be dismissed. (FCC)

**

ENFORCEMENT: UNLICENSED OUT OF BAND WARNING

Ten radio operators, eight of whom are hams have been sent warning notices by the FCC. This, regarding their alleged operation on 26.555 and 25.540 MHz.

In each case the warning letter recipient was told that operation of radio transmitting equipment on these frequencies without a license is a violation of Section 301 of the Communications Act . As such he could be subject to a fine or imprisonment if he continues on the air. Fines normally range from $7,500 to $10,000. (FCC)

**

NAMES IN THE NEWS: AA6JR NAMED TO HEAD ARRL PR COMMITTEE

On a much more positive note, word that Jeff Reinhardt, AA6JR, of Agoura Hills, California, has appointed by ARRL President Jim Haynie, W5JBP, as 2003 chairman of the League's Public Relations Committee. Reinhardt, who was recently elercted Mayor of Agoura Hills is also Public Information Coordinator for the ARRL Santa Barbara Section and Public Information Officer for his local club. (ARRL)

**

PROMOTING THE HOBBY: "AMATEUR RADIO TODAY" - THE VIDEO - FOLLOW-UP

This word to those who are wanting to obtain a copy of the new ARRL ham video "Amateur Radio Today." Please remember that the American Radio Relay League holds the legal and intellectual copyright to this program and that it is the one and only official, legitimate source for the new show. No other individual or group has been authorized to distribute it -- be it free or for a charge.

The ARRL plans to make Ham Radio Today available on both Video C-D and VHS tape. To get on the list for a copy please take your web browser to www.arrl.org/catalog and follow the instructions to order item number

8861. (ARRL)

**

HAM RADIO TRAINING: OMARC IN NEW JERSEY

OMARC - New Jersey's Oceam Monmouth Amateur Radio Club is sponsoring ham radio training classes again this winter. The sessions begin Tuesday, March 18th 2003 and run through the end of May. Classes will be held at the InfoAge Center OMARC Diana site, building 9116 on Marconi Road, in Wall Township. All classes will be begin promptly at 6:30p.m., each Tuesday night. For information on the clsees, ham radio testing and directions visit www.qsl.net/n2mo (OMARC)

**

CONVENTIONS AND HAMFESTS: NAB HAM RADIO RECEPTION IN LAS VEGAS

The annual National Association of Broadcasters Ham Radio Reception will take place during the NAB Convention on Wednesday April 9. The reception venue is the Hilton Hotel adjacent to the Las Vegas Convention Center.

Again this year the reception is co-hosted by CQ Magazine and Kenwood Communications and runs from 6 to 8 PM. This gives anyone planning to attend ample time to see one another yet ending early enough so that people can enjoy a night on the town or grab a flight nome.

More information on the Ham Radio Reception will be posted at www.cq-amateur-radio.com. Information about the convention and on-line registration is at www.nab.org/conventions (CQ)

THE WEB: NEW BUG SLOWS DOWN THE WWW

If you had problems surfing the World-Wide-Web last weekend you were not alone. A fast-spreading worm-like infection called Slamm SQL is being blamed for dramatically slowing down Internet traffic, interfering with Web browsing and delaying e-mail delivery. Bruce Tennant, K6PZW takes a look at what happened:

--
Agencies assigned to monitor the Internet say that the latest bug hit on

Saturday, January 25th. That's when at least 40,000 infected computers were found to be transmitting a flood of data that was disrupting hundreds of thousands of other servers worldwide.

The virus-like attack, which began about 12:30 a.m. EST, sought out vulnerable computers on the Internet to infect using a known flaw in popular database software from Microsoft Corp. According to the Computer Associates Virus Information Center, the SQL Slamme worm exploits a buffer overrun security vulnerability in Microsoft SQL Server 2000 and the Microsoft Desktop Engine 2000. The worm scans randomly generated I P addresses for vulnerable systems and sends out numerous packets, which may effectively cause a denial of service attack on the infected network. That translates into a lot of useless data clogging the Internet and causing it to bog down.

The only good thing about this worm -- if there can be anything good -- is that it does not go after home computers unless they happen to be running Microsoft SQL Server as an operating system. Also, this worm does not infect files and does not send any e-mail out. It exists only in the memory of the successfully exploited system. The downside is that there is no file based anti-virus signature available to detect this worm.

Monitors reported significant slowdowns, although recovery efforts appeared to be succeeding. A spokesman for Microsoft Corp. confirmed that Internet congestion was interfering with administrators trying to download the crucial software patch that Microsoft made available to protect vulnerable computers. The spokesman said that the congestion was also preventing consumers from contacting Microsoft over the Internet to unlock the anti-piracy features of its latest products.

According to a statement from Bill Murray of the Federal Bureau of Investigations National Infrastructure Protection Center, the overall Internet began to normalize by early Monday the 27th. And while everyone from on-line publishers in the United States to a telephone company in Finland seemed to be hit by the latest worm the world's largest Internet provider, America Online, reported no problems with any aspect of its service.

For the Amateur Radio Newsline, I'm Bruce Ternnant, K6PZW, in Los Angeles.

--

A check of our own statistics shows that Amateur Radio Newsline was not badly affected by the worm. Comparing downloads to the previous weekend we saw no significant change. (ARNewsline™ from published reports)

**

EMERGING TECHNOLOGY: PORTABLE PEOPLE METERS ARE WATCHING YOU

Media ratings company Arbitron has released some initial ratings results for its new television, cable and radio audience measurement system that it calls the Portable People Meter or P-P-M. The Portable People Meter has been undergoing U.S. market trials within the Philadelphia market since December of 2000. The PPM is pager-sized and is carried by consumers. It automatically detects inaudible codes that TV and radio broadcasters as well as cable networks embed in the audio portion of their programming using encoders provided by Arbitron. (TV Technology)

**

HAM RADIO IN SPACE: AMSAT PRESENTS THE FUTURE

Slow Scan TV and a possible plasma cloud experiment were among possible future projects discussed at a recent meeting of the Amateur Radio on the International Space Station or ARISS International Team. According to the ARRL Letter, the group included representatives from ARISS partner countries, their national ham radio societies and several national AMSAT groups.

Among other experiments discussed was a slow-scan television system camera that could be launched later this year. It would allow school groups to see as well as hear the astronauts during ARISS contacts.

Also discussed were a number of other future possibilities. These ranged from crossband operation from VHF to 10 meters using PSK-31 and a full-duplex voice repeater to comparing the performance of various solar arrays and even conducting a plasma cloud experiment. No details were available on what that might entail but plans are well under way to activate a 70-centimeter station from the I-S-S. (ARRL, ARISS, CQ)

**

RADIO IN SPACE: EDUCATOR ASTRONAUT RECRUITMENT PROGRAM

The National Aeronautics and Space Administration says that recruitment is currently underway for the Educator Astronaut Program. Applicants must be teachers who are U.S. citizens, certified to instruct Kindergarden through 12th grade with a minimum three years in-classroom teaching experience within the past four years. They must also hold at least a bachelor's degree in physical science, biological science, engineering or mathematics, or an education degree with a concentration in physical science, biological science, engineering or mathematics. An Amateur Radio license is not required. Applications are being accepted through April 30th. More information and the application package is available at http://edspace.nasa.gov. (NASA)

**

INTERNATIONAL - ISRAEL: TREES REMEMBER 911

Hagal International reports that the Israel Amateur Radio Club will plant one hundred and nineteen trees in that nations Silent Keys' Forest. These trees are in memory of the ham radio operators who lost their lives in the September 11th 2001 terrorist atacks in New York

City, Washington D-C and Pennsylvania.

Hagal International is the English language on-line edition of the Israel Amateur Radio Club's monthly magazine. It can be found in cyberspace at www.iarc.org. The planting of trees in rememberence is a tradition among people of the Jewish faith. (Hagal International)

**

INTERNATIONAL - UK: CLUB GETS LOTTERY FUNDING

Now how's this for getting money for club projects. The Telford and District Amateur Radio Society in Great Britain has received confirmation of receiving U-K National Lottery funding to the tune of 2,908 Pounds. This, for its Foundation and Intermediate class Amateur Radio licence training programes.

The monies will cover the purchase of training materials, room rental expensse, equipment, tools and everything else needed to do the job properly. Currently, 16 beginners are undergoing training at the home of G3JKX on weekends. The club is also a certified examination center and offers all levels of Morse and written testing. (RSGB)

**

DX

In D-X, word that Marti Laine, OH2BH, and several of his friends will be active from Johnston Island through February 5th. Laine made the destination of his latest D-X adventure public on a stop over for lunch with some friends in Los Angeles on Friday January 24th. The multi-member team will operate the High Frequency bands plus 6 meters on SSB, CW and RTTY. Q-S-L direct to OH2BH. (Various)

And the second DX'pedition to Ducie Island is scheduled to begin on March 8th and last about a week. According to the C-Q website, the new operation will include nine operators from five countries, with stations on all bands from 160 through6 meters plus the AO-40 satellite, on CW, SSB and RTTY. The callsign will be VP6DI2. Yes, that's a number two at the end, not a zee or zed. Very apropos don't you think. (CQ)

Lastly, word that IV3NCC is active portable A 4 from Oman for a the next several months. Look for him on the usual frequencies on the High Frequency bands and QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: BE PREPARED

And finally this week, as the world grows more tense with each passing day, it is important for ham radio communicators to be prepared for any eventuality. Lloyd Colston, KC5FM, is with the Mayes County Emergency Management in Pryor Oklahoma. He says that the first step is to form a Community Emergency Response Team:

--
Audio only report. Hear it at http://www.arnewsline.org
--

Lloyd will be back next week with some ideas on how you can personally be ready to cope with any emergency or disaster in your area. (KC5FM)

**

NEWSCAST CLOSE

The easiest thing for the FCC to hang its hat on is the lack of control operator. Baxter admits using a "Radio Shack timer" W1AW has 1 or 2 fully licensed operators at the transmitter controls during all of its operations. That in itself should be enough to rid us of Mr. Baxter with no collateral damage to W1AW. The time has come to drain this festering boil.

You must be joking. To jam or send obscenities using CW you don't have to be able to read it atall. A computer or a piece of paper listing the code would work for that. All you can assume is that the person doing it doesn't want their voice recognised.

> We see.

I would never do that, but why do you assume I can't read code? I passed the 20 wpm test, but I still hate code. All I said was I couldn't read by ear unless it was slow (maybe 10 wpm, and that's pushing it), and that I have to write it down at higher speeds (20 wpm, and I would be missing a lot). Doubtless if I actually liked code I would be using it and could do better than that, but so what? Equally, if the test speed had been dropped to 5 wpm by then, I wouldn't be able to copy even that well. Again, so what?

So the requirement to learn and then be examined on Morse/Farnsworth
code is superfluous without a requirement to become a *REAL* CW

operator?

Dick, you could petition your government to allow only one mode on amateur radio, and save the FCC all kinds of enforcement money.

> That one of your kind would stoop to swearing in Morse on a VHF FM
> repeater
> is certainly believable.
>
> Hey, even YOU could learn enough code to do that.

But if everyone that swears in Morse, swore using your cw sending techniques, no one would know they was swearing.

Dick, I've said this for years: What I fear most about reducing the Morse code requirements in restructuring is a lack of enforcement. And what I fear most about maintaining the Status Quo in restructuring is a lack of enforcement.

A lack of enforcement was a 25 year problem that isn't going to go away by just throwing Riley at it.

>
> 73,
> Clay N4AOX

Clay, let's examine your second statement first. I agree 100%. One of my first arguments in this thread was that many of the definitions in Part 97 are AWFUL! Those definitions should be changed, first and foremost. If hams change the language, through a Notice of Proposed Rule Making, then hams can do whatever the ham community wants to do, e.g., re-define bulletins, eliminate bulletins... whatever.

Now, again using one of the documents Brian sent me, let's look at how W1AW reportedly differs from its competition.

The list below refers to alleged character and lack of cooperation issues which can be used by FCC to revoke a ham license.

Does W1AW send felony affidavit complaints to people who complain? No.

Does W1AW play recorded diatribes against the Federal Government? No.

Does W1AW call Riley Hollingsworth a cheap and sleazy politician? No.

Does W1AW sue Hams who complain about its operation? No.

Does W1AW defame anyone, on any basis, routine or otherwise? No.

Does W1AW call its competitor a shallow sham of a hobby politics organization? No

Does W1AW call ANYONE names of any kind? No.

Does Walter Cronkite want to sue W1AW for copyright infringement? No.

Does W1AW have ANYONE alleging copyright infringement against it? No.

Does W1AW harass anyone using its email system or website? No.

The next list refers to Broadcasting, which is a HUGE no-no on Amateur Radio. The TV, AM, FM, and ShortWave bands are for broadcasting, not Ham Radio.

Does W1AW conduct a call-in and talk-show? No.

Does W1AW engage in a "newsgathering" type of "program production?" No.

Does W1AW record phone calls from the general public for playback? No.

Does W1AW direct its transmissions to non-hams at any time? No.

Does W1AW replay pre-recorded interviews? No.

The next list is about proper engineering practices.

Has W1AW ever been AWOL for inspection? No.

Does W1AW use distorted transmitters? No.

Does W1AW use drifting transmitters? No.

Does W1AW use a recording device that malfunctions on a routine basis? No.

Does W1AW use Radio Shack timers that routinely fail to operate properly? No.

The next list refers to other rules violations under Part 97.

Does W1AW record and play back phone calls without permission? No.

Does W1AW routinely solicit donations to QST or any other ARRL service? No.

Does W1AW refer listeners to ARRL's website to sell it's services? No.

Does W1AW sue the FCC, lose, and still refuse to conform to the rules? No.

There are 7 more pages but, I'll spare the members of this list. After a very exhaustive review, what K1MAN is doing now, is alleged by the FCC to be in violation in several major ways. Hollingsworth wrote K1MAN over one year ago asking him to change the way the K1MAN operates.

It is interesting to note that extra penalties routinely apply to the scofflaw. A scofflaw is someone who behaves as though rules do not apply to him. Apparently, operating procedures at K1MAN are much the same as they were over one year ago when K1MAN received the Hollingsworth letter.

I'll save the conclusions for the ALJ.

Hi William, (Bill?)

I don't have a number either. That's the reason I worked the contest. Each
contact gave the other station a point and I got to log another Ten-Ten

number for my membership. I'm not a contester, it was just fun for me. I "casually" worked (...or attempted to work, hihi.) 30 or so stations. Take care now.

What's so sick about capitolism and free enterprise Keith?
After a Tornado blew thru parts of Texas in the mid 90's
A fellow and I were selling chain saws and generators (for
a modest markup) from the back of a panel truck a mile outside
of the area. In two days we quadrupled what we paid for
them, we were happy and the buyers were happy they had
gasoline powered tools to clean up with as the stores were
all gone. If we'd had 20 more we could have sold them too.
All cash & carry. Ain't nothin wrong with making a profit
caus other folks do it every day.

Just look at this link below this line for a moment.....

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3003546952&category=546

And then you tell me that you WISH that you'd had this item up for
bid......!!

Yes. And then they whined that NASA was not releasing the last thirty
minutes of the taped conversations between the shuttle and ground crews.
Like, what is the big deal with that? It never occurred to those kooks that
the NASA folks have security as well as personal reasons.
Yeah...leave it to these kooks to see a conspiracy behind every door.
Listenting to the Liberty Net is almost always funnier than Saturday Night
Live and twice as sad, because these kooks are serious and actually believe
what they say.
I think the Lib Nuts should adopt the theme from The Twilight Zone as theirs
also.

So are we comparing W1AW operation, content and operator(s) character to K1MAN operation, content, and character? Looks like it.
One thing that makes it difficult to compare is that K1MAN BC is a one to three man (creeps?) operation some where in Maine. W1AW BC is a multi-man (angels?) operation, in content and operations, particularly, somewhere in Connecticut. How do you judge the character or compare the character of a multi-man organization with Washington lobbyests and communcation law firms on retainer to a one-three man operation on a low budget?
>
> The list below refers to alleged character and lack of cooperation
> issues which can be used by FCC to revoke a ham license.

As a barrister, one will recognize the following as libel proof innuendo, of course.

> Does W1AW send felony affidavit complaints to people who complain? No.

This implies that K1MAN sends affidavit complaints to people who complain. I believe the record will show that K1MAN has sent affidavit complaints to protest those who jam his on-air BC attempts. I "complain" about K1MAN. I did not get named on a felony affidavit.

etcetra.
>
> The next list is about proper engineering practices.
>
> Has W1AW ever been AWOL for inspection? No.

Knowing something about W1AW operations, I don't think you want to use this for your case.
>
> Does W1AW use distorted transmitters?

Amateur equipment failure is prohibited????????

etcetra.

If you quadrupled your money, you weren't selling for a "modest markup", you were profiteering, which is illegal, even in the US.

This was not the case with the auction you linked to.. which started a week before the shuttle disaster, and was simply a bizarre case of good timing on the part of the seller and a case of deep pockets for the buyer.

How is making a profit off of a sale illegal?

I have a big problem with selling crash
scene evidence Dave. I have NO problem
whatsoever / however with selling collectables
or necessities in a well-timed market opportunity.
Wall Street and the CBT does it every day
so theree is no issue whatsoever.

Greg

Actually, on Wall Street it's illegal to sell for profit (or to cut a loss) if you have any knowledge about what is happening with your holdings, or what will happen. This is called "insider trading"... read about in in the news.. (Martha Stewart).

Ask the gas station owners that gouged people for gas immediately following 9/11.. or, try looking in old newspapers from 1974, where the government forced gas stations to actually give away free gas as compensation for overcharging during the Arab oil embargo...

Since the Columbia tragedy is public knowledge, I imagine it's legal (though perhaps distasteful) to sell things like the franklin mint coins, and mission patches. It's up to the buyers to be rational.

The silly thing is many of the items being sold for high prices will remain in production - you can still buy new Challenger 51-L mission patches for $5.

<http://www.christa.org/giftshop.htm>

STS-107 mission patches are also available new for $5. They were selling for $75 on ebay yesterday.

If you look at the value of Challenger momentos today, they're quite inexpensive.

So the person who paid $13,000 for a Columbia coin yesterday may be lucky to sell it for $25 six months or a year from now.

Oh what misinformation. It is not illegal to "have any knowledge about what is happening with [one's] holdings." What is illegal is to ACT on knowledge that has NOT BEEN MADE PUBLIC.

As for the E-bay items, all except one that I have noted so far seem to be pre-disaster items.

In bad taste, there is one item "Final Voyage, Columbia" which is really a photograph of the Challenger explosion.

I am glad to say that although there were about 2,900 items that matched "Shuttle Columbia" on an e-bay search, only three of them also matched the word "debris" - and those matches were for items saying "NOT debris".

I have absolutely no problems with making an honest dollar. What I
have a problem with is those using a horrendous situation and
profiteering from it. An example I have a friend who resides in NYC,
he makes a decent amount on Ebay selling collectables that he picks up
here and there, the day of 09/11 he canceled his own auctions because
he didn;t want to do exactly what I am talking about, he had small
hand made metal scupltures of the world trace center he was selling on

Ebay. Instead of selling them he held them, he gave one to me when I went to NYC for 3 months to help out in the aftermath, I still have it sitting here at my desk as a reminder of the friends I lost there that day.

Hurricane Andrew, all the houses destroyed and damaged, and the lumber yards charging for the material much more than it was worth, thats just plain robbery, as well as illegal, and as someone else mentioned, after 09/11 the gas stations raising their prices, a few in my part of Ohio did that and got nailed by the state, and I applaud the state for the actions they took against these crooks.

Ahhhh, but you did *not* say "price gouging" in your original post. You said
profiteering, i.e. making a profit. A business won't be around for very long
if they don't make a profit.

First of all, Ebay isn't Wall Street.

Second, I think that the people who were selling debris from the Columbia tragedy should be arrested and prosecuted to the fullest extent of the law for theft of government property. I see no problem, however, from making a profit off the sale of collectables such as coins, plates, pictures, etc.

A fair question. The code tests I took were multiple guess. Answer 7 out
of 10 to pass, with questions like - was the other operator's name Hank,
Frank, Bert or Gert? If, say, I copied F??nk, and answered Frank, that
would be one of my right answers, and I took it (at 20 wpm) three times,
two of them within a few minutes of eachother, the other time being a few
weeks earlier. A bit of a joke, really, but I don't use CW, so I don't
really know why I had to do it atall. Passed fair and square, though.

This isn't 1912, and they both have the same root word. The term you should have used is price gouging...

...and ISPs tend to frown on posting files in non-binary newsgroups.

'X-No-archive: yes'

Was anyone under the impression that the FCC has to "prove" anything in front of the ALJ? No mon freres, it is the licensee, not the FCC, that has the burden of proof in front of the ALJ. The licensee must show the ALJ why he should remain a licensee, after being hauled before the ALJ by the Commission.

Remember we are talking about an administrative body here. It isn't the kind of court where we are talking about citizen's rights. The Commission is charged by Congess with overseeing a body of administrivia. They are presenting information to a Judge of administrivial matters, who will rule in the FCC's favor. Who knows more about FCC administrivia than the FCC?

Here's how it works. The FCC says, "According to our records, we sent you a letter over a year ago about a bunch of stuff we thought was wrong in the operation of your station.

You sent us back a letter that didn't convince us you understand our rules, or our right to enforce them. Now, a year later, you still haven't fixed what we asked you to fix about the operation of your station. Let's go see the Administrative Law Judge."

So it's off to see the ALJ.

On the happy day, the ALJ says, "OK Mr. licensee, tell me why you should remain a licensee? Sitting in front of me here is a pile of FCC monitoring info, records of trips to an apparently empty ham shack that was on the air at the time it was apparently empty, a bunch of complaints from other licensees, another list that the Compliance and Information Bureau says are thirty-five apparent violations, quite a few tape recordings of you stomping all over people who were already using the frequency, that were submitted by impartial OO's with accompanying affidavits regarding their legitimacy, and several felony affidavit complaints you illegally sent out to people who complained about your station. You may explain Sir."

After the licensee explains, whether it takes five minutes or five hours, the ALJ says, "Thank you sir," (then he shuffles some papers for effect) and then he says "this body rejects your explanation, which is indicative of your lack of understanding of the Commission's rules and accordingly, your privilege to operate a ham radio station is hereby revoked, as is your primary ham station license. Have a nice day. Next case please."

And that's how it goes. Don't be too upset by it. You need to remember it is only a hobby. It's not like the ALJ is saying he can't worship freely or vote in the next election.

If the ALJ could speak in plain English, he would say, "Look dude, I hate to tell you this, but it is the Commission's game, not yours. They decide who is playing nicely, and following their rules, and who is acting like an asshole. If you can't convince them you are on the up-and-up, they send you to me. And I break the news as gently as I can. Game over, turn in your ticket, hasta la vista baby. Try stamp collecting or something. There are lots of fun hobbies that don't have as many rules. Now get out of my Court, you clown."

And that my friends, is that. It really is that easy. If you don't believe it, obtain and read the record for any ALJ proceeding in Amateur Radio.

-PJ

Yes, especially as I didn't notice what it said, as I couldn't be bothered to decipher it. Abuse in CW doesn't grab anyone's attention, so most can't be bothered to do it in the first palce, and if they do no-one can be bothered to report it, since they don't really notice it. That's pretty much what I've been saying.

Please get out your dictionary. "Profiteering" is synonymous with "price
gouging". It does not correspond to making normal and reasonable profits.

Your comprehension is right in line with all of your other "skills."
If you think that a "lawyer" who can't spell 'precedence' is
believable about anything then I can see why you'd be confused.

Much like a fathead who can't spell 'equally.' But your record is
unblemished in both regards.

Regardless, "profiteering" goes on every day. It's only because people bitched that the government did anything about it. In New York, there were street venders selling umbrellas for $3, until it began raining. The price was then raised to $5, yet no one shut these venders down.

Please read the instructions and directions in the front of your dictionary.
The date 1912 does not mean that it was only used then. The date means that
is when it is known to have entered our language in the described usage.
Unless the dictionary states that the usage has changed or become obsolete,
it STILL has the meaning with which it entered the language.

Typical... most nutjob conspiracy theorists don't think that any major event
just happens, it's always part of a massive dark conspiracy. Kind of the
way they were all saying that the 9/11 terrorist attacks were all planned &
carried out by the government.

I like to shake his hand Keith, however, remember what the Ole Sage
had to say about the topics of honesty and money:

"....honest men are few when it comes to themselves."
- quoted in My Mark Twain, William Dean Howells

"As a rule, we go about with masks, we go about looking
honest, and we are able to conceal ourselves all through the day."
- speech 1902, Mark Twain Speaks for Himself

"Some men worship rank, some worship heroes, some worship
power, some worship God, & over these ideals they
dispute & cannot unite--but they all worship money."
- Mark Twain's Notebook

It was my understanding that shuttles reentering the atmosphere are always
visible and sonic booms are heard, so I didn't think the article was all
that creepy. However, it does kind of give a sense of foreshadowing of
yesterday's tragedy.

>publicly available. Ignorance of them is no excuse.

But the ARRL doesn't own those frequencies, nor does K1MAN or any other ham. Just because their schedules are published doesn't mean they have exclusive right to them. If Joe Blow wanted to transmit a bulletin and published his schedule on a website or somewhere, is it my responsibility to look for the schedule and make sure I stay clear of the freq?

> It *is* your responsibility and if you continue your QSO during their
> bulletin, *you're* the one in violation of intentional interference.

No, they are in violation of intentional interference. It's not likely that my 100W or 2W QRP station can compete with their 1500 watts anyway. As good practice, I will relinquish any frequency for a net or bulletin when asked, but to just come up on the air and start transmitting over me is a violation on their part. Just because they have a set schedule doesn't mean they own that frequency.

> Their bulletins have been aired daily for over three-quarters of a
> century; how long have you been on the air?

Doesn't matter. I've been on the air for 10 years, but that doesn't give me the right to start transmitting on a frequency in use by a newly-licensed ham.

> >So if I wanted to transmit a CW bulletin on several different bands
whenever
> >I want, I can go ahead and do it because it's "impractical" to check for
> >people already using the frequencies?
>
> The FCC regulations specify the exact procedures for doing just that.

Yes, they will let the ARRL use whatever freqs whenever they want, but nobody else. I'm just saying that the op at W1AW should check to see if the frequency's in use first, and politely ask permission to use it, regardless of convenience to them.

Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave

Mark the calendar, set the alarm, have the tape
recorders ready folks!

Jerimiah 33 & 1/3rd Ministries.
WBCQ 17.495 mHz
1:00 to 2:00 PM tomorrow afternoon Eastern Time.

This xian tuba playing (!) fruitcake is WITHOUT DOUBT the biggest KOOK on
domestic shortwave radio today. If you ain't heard J-33 & 1/3
yet, are you in for a treat. Imagine if you will, in your most
paranoid nightmare, if you somehow managed to squeeze together Alex
Jones, Brother Stair and James Lloyd into one brain cavity.....AAAAAARGH!

This guy is that good! ---> He makes Alex Jones look
like Ted Kennedy. He is almost as kooky as Col Steve...

You can be sure tomorrow he will rant about the events of this weekend.

Toon in tomorrow shortwave listeners and be prepared to
take a trip into the Twilight Zone. Have a tape ready.

Not so oddball at all. I've seen those connectors, and there's
nothing really exotic about them. Take a look at http://www.amp.com, and
look for the 'CPC' (Circular Plastic Connector) series. Bet you could
even talk them out of a sample if you just need one or two.

Good hunting.

970. Has HF radio ever saved a backpacker?

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-03 05:59:00 UTC
From: "Bruce W.1" <bw1@NOSPAMcore.com>
Message-ID: <3E3E0521.E02B148D@NOSPAMcore.com>
Source record: 69415

I go backpacking a lot. At times I've taken along an ultralight homebrew 30-meter CW rig. My CW is getting rusty these days so I was thinking of building a 40-meter SSB rig.

But I'm left wondering if amateur HF radio has ever saved anyone's life in the backcountry. CW presents has its own complications like someone being able to do CW while having a broken bone or frozen fingers.

I'm thinking that an EPIRB might be better than amateur radio for emergency purposes.

Has anyone here ever heard an account of amateur HF radio being of use in an emergency situation in the woods?

> Bunch of sick and demonic individuals who do this kind of stuff.

It's more like human nature. The only "saving glory" is that e-bay is
reporting that many of the outrageous bids for sts-107 items
made were placed by non-registered individuals, thus any seller
who got a $2000 bid for a Columbia Coin will be very luck if
he ever collects payment on the same.

E-Bay has also set up a special BBS on their page to discuss
this issue here: http://forums.ebay.com/db1/forum.jsp?forum=107

and also here: http://forums.ebay.com/db1/forum.jsp?forum=127

I don't know of any specific backpacker saves but last Spring we came
upon a roll over accident on a remote section of the Alcan Highway.
Cell phones and even the satellite phone did not work because of the
topography so our only way to summon help was 20M to Toronto and
a phone patch to the RCMP.

That got us Park Rangers who summoned a helicopter the entire rescue
took almost 6 hour from roll over to helicopter lift off. I understand
the flight to Ft. Nelson and the hospital was another couple of hours.

Bottom line HF was the only way we had to get help none of the modern
high tech stuff would work.

I do alot of hiking. I bring my 2 meter HT along because it is lighter, less antenna to deal with, and for the most part I could always hit a repeater if needed. I rotinly keep my HT on listening with an ear piece. I have mde contact on simplex with other hikers but never for an emergency. Well one guy was lost. Then again I do my hiking in the North East. A light wieght SSB rig may be your answer if your hiking in Alsaka, Canada or other places where 2 meter repeaters are rare. EPIRB is always an option. What you need to weigh,(no pun intended) is the wieght of the system you bring along. If wieght is not a problem, bring two systems with you. Do not forget batteries and for those extended trips, a solar recharger for those batteries.
But as far as your question " Has anyone here ever heard an account of amateur HF radio being of use in
> an emergency situation in the woods?" I have not heard of any. But hay, there is always a first.

What you say is 100% correct as far as you go. But you fail to mention the remainder of the FCC administrative process that permits a ham or CB operator to appeal the decision of an Administrative Law Judge to the entire FCC and then to the federal courts up to and including the Supreme Court and continue to operate a CB or ham radio until all appeals are done.

Maybe I'm being cynical, but I have to vent...

On Saturday, there were seven kids killed in an avalanche in Canada. Becasue of the Columbia tragedy, this story was buried in the back pages of most newspapers, and received very little air time by broadcast media. Why are the astronauts deaths more worthy of attention than the kids who were killed? Neither group went on their journey never expecting to return, but if you think about, that's a risk every one of takes every time we get into a car, onto an airplane, etc. Why is one death or deaths worthy of so much attention, and another isn't?

I don't have to, you did that when you started the name calling.

>

In an amateur radio group it's nice to KNOW that the other person
responding to posts is a real amateur and not a wanna be. And I'm
not talking about coded vs non-coded hams either.

There are jerks everywhere. Including but not limited to this NG.

I commented on Dan's Morse code "screw you"
to Dean Authur's comment, nothing else. You
on the other hand called me a lid without knowing
anything about my "on air" operating abilitys.
If you were to have a qso with me on air you
would find out I'm a VERY polite operator and
not a lid at all. If you don't believe me ask Larry
Roll K3LT, we had a very nice qso in 4 different
modes one day. (That is if you can count a long
distance telephone call as a mode :)

Perhaps you should have made a little more certain of obtaining an operating/maintenance manual before agreeing to buy the equipment. It happens all the time!

"Some don't realize why their deaths in particular have such a great
magnitude on society. Sure hundreds of others will die today and any
other day. But those that lost their lives on that shuttle lead lives
dedicated to knowledge and bettering humanity as a whole. So I guess you
could say they died for their country, you could also say they died for
their world. To think otherwise, as far as I've thought it through,
would be plain ignorance."

While the deaths of the children you refer to is tragic, and I can
certainly feel for their families, I hardly think you can equate going
into space and coming back at the same risk level as going skiing,
getting into a car, onto an airplane, etc... Space flight is extremely
complex and dangerous, and as the above poster pointed out, these people
do this in the pursuit of knowledge, not for a weekend holiday.

Thats the way it works in todays American society. Any death is a shame, or course.

But the Shuttle was much more visible of a tragedy.

In the same way we have several miners killed in Alabama digging coal during the 9/11 events. Ever hear of it? See what I mean. Whatever sells and thats the way it is.

Hi...

No one life is worth more then the next. And if there is judgement to be done, it's up to the "Great Architect Of The Universe".

Simple answer to your question, though. It's a matter of the facts of modern mass media.

The shuttle program, or any other space program is an "out in front media sweet heart". When milestones like the first man in space, or the first man to set foot on the moon are achieved, the world as a whole is enriched and inspired by it. We celebrate together and all share in the achievement together because we all see it together via the mass media. The same goes for mourning a tragic failure.

It's a simple matter of coverage.

For all other great accomplishments and tragic failures that we know of personally, by aren't publicized, it's up to the individual or individuals that witness them to celebrate or mourn them in our own thoughts and circles.

Because this is a short-wave ng, I've got to tie this up to short-wave listening and say that because of short-wave, I have been made aware of news, thoughts and ideas that I wouldn't have been exposed to without it.

Respectfully,

Michael

1) The "seven kids killed in an avalanche in Canada" probably were not as well known as the astronauts,

2) They didn't affect the American "image" as much,

3) They don't affect the American (NASA) budget as much.

4) There was nothing to cover up and nothing to gain by advertising the deaths of the skiers.

The crash of the shuttle has galvanized, for now, the American people and Dubya's ratings and is supposed to make us all join hands and forces and go gung-ho after ol' Saddam!

We have laser weapons that could bring the shuttle down and needed testing - to prove it! Every time we develop a new weapon we have to "test" it on something.

We probably also have technology far superior to the shuttle but the people would find it far too expensive to add to the budget -- unless we had such an event as the disintegration of the shuttle to galvanize the people together, reinforce our commitment to the space program and soften the hearts of the American people toward the new budget -- to come soon.

Look for more catastrophic events all through this year and into the next year or two -- until we surrender every right we have to the globalists!

Sit back. Drink your fluoridated water. Have another beer, and some potato chips while you're at it. Watch another sitcom that's so funny they have to tell you when to laugh. Turn in all your guns, if you have any. Believe every politician - and most of the preachers. Buy some more stocks - your commissioned brokers wouldn't lie to you, would they? For goodness sakes don't get any real money -- paper is the rage, these days! Don't listen to those nuts on shortwave -- the controlled media is all you need! -- NOT!

Thanks. I've been considering venting a little too! Wheeeh! ;-)

Al

Surely the death of those chilren is very tragic as all deaths are.

If you can't figure out why the shuttle story is a bigger story then
something is wrong with you. I'd imagine that the local papers where the
children are from had it front page though. That is what's important. IF
they didn't then your issue is with those newspapers.

The shuttle tragedy is a *national* tragedy. Really a multi-national
tragedy considering that 2 other countries lost one of their best as well.

I'm sorry to hear about those children however,as I'm sure everyone here
is. Your post is the first I've heard about it. My condolences to thier
families from N.Y. State.

Source record: 69443

for starters this particular 756 only puts out 80 w's cw carrier and less on 10m.
receiver is not as sensitive as my 765 even with preamp 2 on. about 10 db light.
also using the same cables from 765 to the 756 acc1 jack for psk and sstv, receives fine, cannot transmit or modulate the modulater even at full volume but same cables work on my 765 and ft-990 so i rule out the interface cables. bum radio? anyone with similar experiences? would like to hear from you. i would hate to ask seller to buy back radio. i allways wanted to play with a 756 but not very pleased at this point. maybe needs a trip to icom? i don't have a service manual but maybe a rf or receiver gain pot out of adjustment? maybe the internal regulator that gives the radio circuits its 13.5 volts needs adjustment? this is a possibility because even at the highest settings the meter seems dim.is the power output pot internal other than the pwr control on front of radio?

There were probably more people killed in auto accidents on
Saturday than on the shuttle and by avalanches combined. I would
also wager more died in other accidents as well. You want a
detailed news report on all those as well? What areas of science
were those kids advancing besides their own pleasure of skiing?
Yes, their deaths were just as tragic, even more so to their
families, but the space program is quite a bit more higher profile
than someone skiing in the back country.

You have made good points. Baxter has been given "all systems go" from
Robert H. Macamera, back in 1989.

If the ARRL even REMOTLY offers ANY SUPPORT
WHATSOEVER to this Orwellian proposal by K8AD
than it will signal the **DEATH KNELL** for ARRL.

Anyone (...and I mean anyone) who would lend their
support to this insane proposal is aiding totalitarian
style controls to the private ownership of a radio
transmitter.

I wonder if K8AD went to the "Soviet Gulag School" of
Ham Radio? The Govt. or anyone else has no damm
business AT ALL knowing what makes and models of radios
I may purchase or own G-DDAMMIT!

What the frig? Are we to now have HANDGUN STYLE
Registration Requirements for Ham Radio and CB Equipment???

IF THE ARRL GOES ALONG WITH THIS PROPOSAL -
IN ANY CAPACITY WHATSOEVER, YOU WILL SEE THE
BIGGEST ABANDONMENT OF ARRL MEMBERSHIP
SINCE THE INCENTIVE LICENSING DISASTER OF
THE 60's and 70's.

-----> Do not support or touch this proposal W1AW - unless you
want to go the way of the Spark Transmitter and Rotary Dial Telephone.

Both tradgedies made the front page of Monday's Edmonton Journal. The reason being that the kids were from a private school in Alberta and the shuttle, of course, being a high-profile incidence. The paper did a good job of giving equal coverage to both.

Guess what?

I dug in the "Archives of Ham Radio" and found:

K1MAN interview with Steve Anderson!

This is a interview from 1999 - before the 2 year "exile" of Mr. Baxter

Also have "other" recordings as well

K5BLB at his best......
WA9KJI and W4NTI in a "radio cat fight"

Also have some more current recordings of 14.275mhz

e-mail me at lloyd_vfp@msn.com if you would like to arrange to have these
awesome recordings of past greats of Ham Radio!

For an interesting viewpoint, check out Uncle Bob's thoughts:
http://unclebob.diaryland.com/ , and for those who view this link after 02/03, check out that day's entry, as the url above is for his current posting only. It makes you think. This guy is just an average joe who happens to have some media exposure as a tv journalist, but he may be onto something, as callous as his perspective may seem at first. Worth a look and some consideration, IMO.

Near Vertical Incident Skywave on 80 or 40 meters SSB with 20 foot
antenna laid out horizontally and 50 watts will be picked up by anyone
operating same mode out to radius of 300 miles regardless of terrain.
Read up on it. It could save your life where no VHF/UHF repeaters exist.

Was polishing motorcycle in driveway one day. Car drives up and couple get out. Look at motorcycle then fellow asks if peculiar antenna on roof is mine. I say "Yes." Out comes papers. "You have been served." Went to court with Order for judge to sign requiring Plaintiff to reimburse me for time off and costs of researching law at law library plus travel and meals and listed miscellaneous expenses. Judge signed, they balked. I said, "Pay up or I freeze all accounts and assets." The rep of company asked judge if I could do that. Judge answered in the affirmative. They paid.

It's so much fun when you know the law and they don't!

Conspiracy is latent in all of man even the US Government.. been going on
for years.. so stop bein illogical and saying conspiracy is impossible..
conspiracy is the root cause of all wars.. allthough Alex went a little far
on the spaceshuttle thing i must admit. But the New World Order is real.. it
has been quotes by multiple politicians.. and Gary Hart even talked about it
on C-Span the day after Sept.11th. He said this disaster would help bring in
a "New World Order" at the council on foreign relations meeting

Weight is most definitely a concern. I'm looking at the MFJ-9440 right
now. Also this summer PLB EPIRB's become legal in the US. This will
bring many new product offerings to the market.

When cell phone's work I take one along. Also I'll usually take a
2-Meter HT if there's a repeater nearby.

But some places I backpack offer no cellular or VHF communications.

I maintain that abuse is very rare among hams using CW in the
CW/digital subbands. Such abuse happens far more often on voice modes.
> >
> > I used to do a lot of CW work, especially when I had limited power

That I can agree on.

> > But CW ops can be just as rude as any SSB user.

In theory, yes. In practice, no.
> >
> > Example one: Frequency grabbing.
> >
> > You'll be sitting on a relatively clear frequency and will call a
> > general CQ.

Hold on - "relatively clear frequency"? What's that mean? Nobody
within 10 Hz, 100 Hz, 1000 Hz?

> > At that point, a contester comes back to you and asks you
> > for confirmation and an exchange of RST reports. So you give him what
> > he asked for, turn it back over to him, and then he starts to call "CQ
> > contest" without ever skipping a beat. You have just been quite
> > rudely shoved off frequency by a CW lid.

What contest requires RST? Not SS, not FD, not the DX tests I know of.

Contest exchanges are quick and short. If you wait for more than a few
seconds after a QSO the other folks think you moved and they pounce on
the freq. CW contest ops use sharp filters, so to them a few hundred
unoccupied Hz is a clear spot. To someone trying to work CW with an
SSB filter, it sounds like a mess o' QRM.
> >
> > It happens all the time.

When was the last time it happened to you?

> > When it happens to some people, they don't
> > move on. A jamming contest ensues as both stations call CQ on top of
> > one another.

See above. How wide was your filter when this allegedly happened to
you?
> >
> > Example two: The other station goes deaf.

> >
> > Some operators want to know your QTH and their RST report, and once
> > they get that information, they simply move on to another QSO without
> > ever saying 73.

In 35+ years of HF CW ragchewing, this has never happened to me. A few
folks want fast QSOs, others want nice 'chews, but they all say 73 and
sign off rather than just disappearing.

> > As a result, people play little coy games and don't
> > give out a signal report until the other guy has been forced to listen
> > to several transmissions.

Not me.

> > Once you do give out a report, too many of
> > the CW gang will just turn the vfo to a new frequency and look for a
> > signal report from someone else.

Never had that happen to me. Sorry.

> > Another sizeable minority will start
> > telling you that you're fading away in order to escape the QSO.

How do you know you're not?
> >
> > Bottom line: Too many people don't really want to get into rag chew on
> > CW, and their QSOs are consequently predictable and boring.

Hmmm - could it be that you don't make the conversation interesting?
> >
> > Example three: The ego dominance battle.
> >
> > A persistent subgroup of CW operators generally hang out in a de facto
> > net, using break-in transmissions and automatic keyers of some kind.

Is that bad? Same sort of thing is common on 'phone.

But I have rarely heard this on CW. The CW nets I've been part of have
been very formal.

> > These guys get strange when a newcomer arrives, and keep on bumping

> > a QSO with such stations is unpleasant, and most people don't return.

Whoa, hold on a sec.

Some hams who obviously know each other are having a QSO and you just
butt in without invitation? Would you do that on HF 'phone?
> >

> > All of that having been said, the rude operators are in the minority,
> > and either end of the band can provide hours of enjoyable QSOs with
> > the many good operators that can be found there.

And those are the ones to focus on.

> > It's just the notion
> > that CW ops are "special" that pulls my chain.

When's the last time FCC cited a ham using CW in the CW bands for a
violation involving jamming, obscenity/profanity, etc.? (Yes, folks,
FCC CAN copy what's being sent on CW.)
> >
> > And before any of you "eleet" coders start your testosterone-speak of

That's fine, too.

Others have different opinions.

> > That is, I'm not at all impressed by code skills,
> > but I am impressed by technical skills.

Did technical skills confer special virtue on anyone?
> >
> > But that's a different subject.

Not really. Some of the worst (and best) stuff I've heard on the ham
bands has come from folks who were technically very skilled. But why
should technical knowledge beyond the level needed to understand and
comply with the rules & regs be "forced on other licensees"?

Talk about killing the messenger. The ARRL let you and everyone else
know what is being filed with the FCC. Their announcment in no way
indicated support. I would think you would be thanking the ARRL for
letting you know. I am sure that you have filed your comments with
the FCC concerning this issue. I suggest you send a thank you note
and contribution to the ARRL for keeping you informed. N4VOX

Baxter is NOT transmitting bulletins. He is sending 1 1/2 hours of taped talk show and copied stuff from RAIN and the ARRL. Never intended for HF use.

He is also in violation of the 'control operator' rules. Plus countless other alleged offenses.

Oh and don't pay any attention to Llllooooyyydd he supports all idiotic causes. You know like bro Stair, BARF, etc.

He is right about how 'some' CW operaters act. Everything he said I have
seen happen. Well actually heard happen.

I believe his point would be that its not the mode that makes a lid...its
the person. And he is right.

Andy,
No, most Russians are better educated than 'Bill',
and write a more coherent sentence. 'Bill' is a typical
American excitable fool who can't seem to string a few
words together intelligently. Just another example of
our great school system who seems to be trying for a
political career. In other words, just a manipulative
politician 'wannabe'. Or even in more simple terms,
he's stupid...
'Doc

Re-sell them, and the other radios on E-Bay
Brenda. E-Bay is the ultimate sellers market!
E-bay is actually better than being the owner of a
used automobile lot as your not accountable
as long as you sell "as is" but include glowing
embelishments and reviews of your merchandise.

(...to think of all the 6L6GT's. the 5881's and
12ax7's that I THREW AWAY 20 years ago!
I must have tossed 30 glass 6L6's away cause
I needed room in the shop and had not sold
a single tube in 2 years...
I bet I could dig em up at a landfill, run em thru
the dishwasher - which is a great way to clean
tubes so they look like they're "new" - sell em
and make a killing...as others do every day)

Ya know.... most of the terminology like "for ID" or "destinated" or "first personal" and many other terminology/phrases that I have heard being used have been used by the "old timers" in my area, people who have been licensed at least 20 years or more.... If anything they are setting a bad example for the newbies coming into the hobby as they may have a tendancy to think that is the way it is supposed to be done since the "old timers" are doing it that way. Prime example, the use of "for ID" was a learning experience for me. I listened (and still do) to the ham bands on scanners for quite a while and heard that particular phrase quite often. Therefore I deduced it must be a standard practice since I have not seen a book that truly handles how a QSO should be handled on voice modes. The ARRL text barely covers it. Maybe someone will write a book about that eh??

Another one is the usage of the word "clear." In other services the word is used often, and there is no problem with it. I view it as a courtesy to others who were courteous enough to wait until you were done trying to call the person you were trying to call and letting them know you were done.... But I am sure there are others with a different opinion. In the absence of text or rulebooks covering a particular issue, I guess a person needs to make their best common sense guess.

My original post was intended to generate a discussion as to why the media sensationalizes certain tragedies, while leaving others virtually untouched. "Uncle Bob" is a first rate jerk. Let's all go live in caves and dig for worms every day. Stop researching medicine and new energy sources and engine design. Toss out all the computers and TV's and burn down all the homes. Then we could all run through the forests and hop skip and jump and... die an early death from diseases we could no longer cure and watch people starve because we don't have technology anymore!
Just because this asshole dosen't know the benefits of space research doesn't
mean they haven't affected his life in more ways than could ever be dreamed. We have all benefitted from Space Exploration. Life has to move forward or it stagnates.

I believe the phrase came into use as a means of indicating compliance with
FCC rules requiring identification every so often, as opposed to
communicating your call with the other station(s) you were in QSO with.
The other guys know who you are, the FCC presumably doesn't.

In that context, it makes sense.

Hook it up to a KNOWN ACCURATE freq counter. Most have a output of the reference oscillator. Hook it there and adjust the RS one. Assuming it can be adjusted that is.

Message-ID: <3E4154A3.439C09E2@heartbeat.wustl.edu>
Source record: 69343

Hello ladies and gentlemen,

I just bought a 2003 Toyota Corolla and wish to mount a dual-band radio
in it.
The transceiver will go in the trunk and the control head will go on the
dashboard.

Toyota had a few suggestions, such as avoiding the wiring harnesses,
ECM(?)
modules, and assorted sensors. Unfortunately, they didn't tell me where
these
items might be located.

Do you have any practical advice for running the power cable or control
cable
(such as a good location to broach the firewall)?

Thank you.

Good catch Burr! I recall during the Anthrax letter
scares there were an average of 8 calls comming into
dispatch centre per hour, most often from sincere but
misinformed people who found half-open packets of Sweet-&-Low
or SugarTwin on the counter... (then they wonder
why so many get burned out babysitting civilian populace)

In the meantime, be sure to listen into the Eastern Regional
Patriots (..NOT to be confused with the NFL team) Net
on 3.860 LSB from 8:00 PM Eastern Time. Last night a
8-land kook was claiming that a "particle beam equipped"
USAF 747 had shot down Columbia... You really got to
wonder if these shit-heads are hearing this BS from domestic
shortwave during the day or are making it all up themselves
as they go along. Same fruit loop who put this blather out
also relays "Orange Blossom" into the net. (no valid ham
call sign - another bootlegger checkin to the ERPN.
One would think Hollingsworth should have an easy
time of it, as they all are in one place each night....)

Kooks, boobs and crazies....SWL fun! whhhheeeeeee!!!

Answer: NOBODY needs pop-up's !!

Get "Pop Up Stopper 3.0 (new release)

Description

From the developer: "Stop Netscape, Internet Explorer, Mozilla, and desktop pop-up windows with the latest upgrade of this small tool, now with added support for Mozilla and new technology to block Messenger Service and GAIN adserver desktop ads. There's no need to adjust proxy settings, or add sites to a list. Pop-Up Stopper will not strip Web images or slow your browser. You can allow pop-up windows only when you want them. User settings allow various pop-up notifications, such as a flashing icon or new, fun sounds. Simply hold down the Control (CTRL) or Shift key to allow selective pop-up windows; but most new links should open automatically. Pop-Up Stopper is not advertising supported, nor does it require registration, and no information is collected from or about product users.

"Pop-Up Stopper is very small and easy to use. It is complete with full install and uninstall, a complete setup wizard and online help file, and free unlimited tech support. The latest version includes automatic updates, new ad-blocking technology, an easier user interface, more sound and visual notifications to play when an ad is blocked, and a full online help database."

> And he talks of the golden goat? How about the Golden Calf?

I heard the Reverend 33 & 1/3 RPM today also........

It ain't a Golden Calf.....it's a GOLDEN TUBA !!!

(if I may explain......this won't take long....)

A guy and his wife goto a party, He gets drunk, so much so that
he can hardly stand up, let alone drive. He finds he needs to relieve
himself whilst still at the party. He knocks at the door to the bathroom.
It's occupied. He's about ready to shit his pants, so he goes three
doors down, opens the door and sees a golden toilet. Shutting the door
he drops his shorts, and makes a deposit. (what relief - whew!)
He didn't know it but he dropped his watch in "the bathroom".
Next day he's lookin for his wristwatch with a big hangover.
Asks the wife if she's seen it. She said why don't you go back to
the Jonse's house and see if you dropped it there. He goes back,
knocks on the door, asks the woman of the house if she's seen
his watch. She asks what it looks like....he says "all that I can
remember from last night is a Golden Toilet" Wifie goes to the
base of the stairs, and yells upstairs to her husband: "Harry!....I found
the guy who SHIT in your tuba...!!"

PHLOOOOOOOOOOOOOOOTTTTTTTTTT!!!!!!!!!!!!!!!

> must be a standard practice since I have not seen a book that truly
handles
> how a QSO should be handled on voice modes. The ARRL text barely covers
it.
> Maybe someone will write a book about that eh??

Much ado about nothing. The language we use on the air
isn't cast in stone. The three phrases above I hear and have
used myself. Who cares?

> Another one is the usage of the word "clear." In other services the word
is
> used often, and there is no problem with it. I view it as a courtesy to
> others who were courteous enough to wait until you were done trying to
call
> the person you were trying to call and letting them know you were done....
> But I am sure there are others with a different opinion.

I use "Clear" myself. If I transmit "K2UNK listening" on a repeater
and no one responds, I'll usually then say "K2UNK Clear" if
I'm going to change to a different repeater. It tells anyone that heard
me that I'm not listening anymore.

> In the absence of
> text or rulebooks covering a particular issue, I guess a person needs to
> make their best common sense guess.

We have too many nonsense rules. If it isn't the law, then personal
operating practices that differ from what some unwritten rule or
practice that others believe is sacrosanct just doesn't both me.

Cheers,
Bill K2UNK

==========

I considered that at one time. Commercial aircraft are only required to
monitor 121.5 MHz while over water (oceans).

I'll tell you what does look promising, this:

NVIS is effective with 1 kW going to the antenna, but not with 5 watts.

1073. Vanity Call question

What was the purpose, or thinking behind vanity calls being able to pick a new call that isn't consistant with your location? A person from NY taking a "x9XXX" call makes no sense to me. Am I missing something?

Could be sentiment for a previously held call. Could be he just wants to
be different. Doesn't really matter much since people are free to relocate
without getting a "consistent" call nowdays. I'm surprised the FCC hasn't
given up on assigning consistent new calls and just randomized it.

Sounds like John Aschcroft is gettin' bored again. How did this jackmeat get so much power, he wasn't elcted to office. Come to think of it, neither was his boss.....What the F**K is Ashcroft doing, just 'cause he got beat in the last election he ran in by a dead guy doesn't mean he has the right to totally trash OUR Constitution and OUR rights. "OUR" includes you..... Thank God we only have 2 more years of this crap. Hopefully we'll survive it but I have my doubts.

Sounds good to me.... "listening" or "monitoring" after a call is nice,
short and sweet and gets the point across. I usually use "clear" after
making a direct call to another, and if I am going to a different frequency
I will say something like "KC8PMX clear, switching to _____ frequency," as
opposed to QSY which must be one of the deadly sins apparently on FM voice
as I have heard.

I would agree with a part of that statement. For me the rules that are
clear as a bell are fine, it is the ones that are completely open for
interpretation that need to be cleared up.

Thank you, Dean. Toyota said that as long as it is a FCC type accepted
radio and
it is properly installed, I can go up to 100 watts. (The radio goes up to
50 W max.)

put it as close as you can to the color burst xtal in your TV and see if it
can pickup the 3.579545 MHz. signal...
I don't know how sensitive it is but it worth a try...
the other thing to do is drive close to a radio broadcast antenna and it
should ppick that up with less than a peper clip for an antenna..
once you measure a known frequency you can adjust the trimmer if there is
one and you can get to it..
if you can't then you know the amount it's off...
if the counter has a "standard" time base like 5 or 10 MHz you could compare
it to WWV by ear or with a scope.
good luck

1080. Re: Vanity Call question

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-06 14:50:07 UTC
From: AC6V <none@nowhere.com>
Message-ID: <zCu0a.21684$tq5.862766@news1.west.cox.net>
Source record: 69374

Well it happened long before vanity calls. From Ham History URL:
http://ac6v.com/history.htm

Quote: Somewhere in this period (late 1970s), the FCC requirement to change callsigns when moving to a different district was removed. No longer could a US ham's location be determined solely by the callsign.Unquote

W3HF reported -- "This actually happened in the late 70s, coincident with the new callsign system you discuss under 1978-9. (This was significant to me at the time. I had received WA2FKS while in college in 1976. When I got my license, the old rules were still in effect. But by the time I graduated in 1979, they had changed, and I could take WA2FKS with me to California.) My 1976 License Manual, for example, states that when moving from one district to another, you would get a new callsign."

If there was any "thinking" behind all this it may have been that a Ham's callsign was like a second (or first) name and folks cried when they had to give up that precious call sign. Or the FCC was tired of all the paper work -- who knows???? Certainly is a puzzle when you answer a W2 on a California repeater and he/she has been in California longer than you have!! W2xyz portable 6 has long been dropped.

The vanity call program was "About March 24, 1995, Vanity calls for a price was opened up. See URL: FCC Ruling. Several "gates were set up for eligibility over the ensuing 18 months. The ARRL's suggested method is to open the system gradually through four "starting gates." Gate One would allow a previous holder to apply for that call sign or, where the holder is deceased, a close relative could apply. Gate Two would allow the 66,000 Amateur Extra Class operators, who have passed the most difficult license examinations, to apply. [Extras could apply for a vanity call in September 1996]. Gate Three would allow the 112,000 Advanced Class operators, who have passed the second most difficult license examinations, to apply. Gate Four would open the system to any licensee. A club station license trustee could also apply for the call sign of a deceased former holder."

I myself don't use "destinated" or "KB9TMP for ID" but I do use
the QSY and some other "Q" signals. It just seems shorter to say
"KB9TMP QSY to 146.58" than it does to say "KB9TMP switching
frequencies to 146.58". I also do a lot of "public safety" type radio
comms and the use of "10" codes are a large part of that, just like
"Q" codes are a part of the ARS.

Larry as I have it - there was "Vanity" for extras - URL:
http://ac6v.com/history.htm

Effective July 1, 1976, any Extra class licensee who had been a licensed Amateur for 25 years or more could select one specific 1x2 call sign. This added the ability to pick a specific call, but did not change eligibility.

Effective October 1, 1976, anyone who had held an Amateur Extra class license prior to November 22, 1967, could select one specific 1x2 call sign.

Effective January 1, 1977, anyone who had held an Amateur Extra class license prior to July 2, 1974, could select one specific 1x2 call sign.

Effective April 1, 1977, anyone who held an Amateur Extra class license prior to July 1, 1976, could select one specific 1x2 call sign.

Effective July 1, 1977, any Amateur Extra class licensee could select one specific 1x2 call sign. Effective March 30, 1978 this was all replaced by the strict "sequential" system until the advent of "vanity" call sign selection in March 24, 1995.

One minor correction: while the ability for an Extra to get a specific call ended on 30 March, 1978, Extras continued to be permitted to select a call, in sequence, from any call sign group. That ability was not extended to other licensees until later.

I know this because I took advantage of it. Although I got my Extra before the 30 March cutoff, at the time I was not interested in a 1x2 call; I wanted a 1x3 call, which no part of the program would permit, so I skipped getting a 1x2.

However, when the FCC announced that Extras could ask for a new call in any group (around August, I think), I asked for a Group C call and received N9AKE, which I held until 1996. By that time, I had reevaluated my thinking on a 1x2 call and applied in the first wave of the vanity lottery.

When they mean by "two way" radio coms does that also include things like FRS and CB Radios? That's just ridicious. Maybe soon they will require people registering television sets.

Before you get your panties in a wad, it is not the government trying to
force registration.

It is a proposal for rule making submitted to FCC by a ham radio operator.

The chances of it being adopted are little and none.

The thinking is that since one no longer needs to change a call when moving to a new area, there was no need to have the call belong to the area of the applicant's current residence, so the call may be from anywhere.

Consider replacement car/vehicle "keyless entry" remotes.
Some (Audi and Porche) operate "near" 318 Mhz.

That's good; I was very active with it, so there might be a few who recognize it. I replaced it with N4SI, for a CW advantage in contests, but when my friend, world class contester NT1N, mulit-op'ed with me in ARRL 160 one year, he wound up sending it twice when CQ'ing. He said it was the shortest call he'd ever used, including WRTC. I figured if we had to send it twice, we weren't gaining anything. Plus it was horrible on phone. There were zero, nada, zilch, zippo, bupkus phonetics that were effective with it.

So, I turned it in a couple of years later for K4QG. Better on CW, much better on phone. If you'd use that plus N9AKE, I would be grateful.

Thanks for the response.

watts.

Didn't mention 5 watts. Said 50, and 50 does the trick from my setup.
1kW would probably punch out and head for the forgonesphere.

No, if anything they would like as many people to park
themselves in front of the Great Pacifier Tube for as long
and as often as possible. Or more accurately, go to work,
come home and be pacified, and simultaneously stimulated as
a consumer to buy things to be a useful economic widget.

While actively talking with someone, some naughty subversive
thought might be unleashed. We must not have that! Approved
drivel, entertainment, and commercial messages only, please!
;)

So licenses for anything that might make a person more
involved and active, and incentives for anything that makes
you passive, lazy, content, and manipulatable. That's why
TV is still free. :)

Back in the seventies (before the 'net) we would set up a table
at some good spot, and accept messages for students to
send to their boy or girl friends attending some other college.
Then that went thru the ham message system. It was a great]
way to get exposure of the ham club to 1) get new members,
and 2) have the student government fund see us as doing something
of value for the students.

Of course today students can easily email their lovers, and not
need the ham message system....

I am going to Pigeon Forge! Gonna be a BIG singles shin-dig! About 800-1000 singles!

I am taking my Ft-817, so I can work 6 meters and 2 meters, and listen to K1MAN and profit Stair and the Great Liberty Net!

See ya!

He made a brief showing on 14.275 this afternoon.
I think perhaps it MAY have to do with the fact
that last week or before, I hear that his arch nemesis
NX0T made a "grand-re-entry" on 3.947 with K5BLB
and company and tore that freq a new bunghole...or so
the story goes. I for one cannot wait to hear the day when
NX0T and WA9KJI finally cross paths again on 75 or
20 Meters. I don't know if you remember their earlier
encounters Dan, but let's just say it sounded like what it
would be iffen a person was tied up inside of a big
100 pound burlap potato sack with 5 feral cats and
this sack (and the person inside) was then secured to the
new "Superman Ultimate Flight" Roller Coaster ride
at Six Flags Over Ga in Atlanta..... Teee Heee!!!!!

Well I did mention QRP. In my NVIS research I've found people that did it with 100 watts with a mobile whip laying on the ground. And the military normally uses 1000 watts off of Humvees.

I hold little hope for NVIS at 5 watts. However I'm very interested to hear your experiences.

I've never actually tried NVIS, have you? I'd be interested to hear the results of your experiments, what antenna you were using and how many watts..

Hello everyone,

I want to change the relay that is inside my HF, IC-730. This relay has the following information ontop of it : 12v 2083 and also it says SR-202 SANWA.

This is the relay that "changes" from transmit to recieve and recieve to transmit when you press the ptt...

Anyone out there changed it by yourelf ? How to i remove this relay from the HF ?

Please advice here or using AX.25 packet: sv2evs@sv2dxc.tsl.grc.eu

1118. Are you a ham or a CB'er?

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-07 14:32:30 UTC
From: ricknj10@hotmail.com
Message-ID: <3e43c111.45180926@news.optonline.net>
Source record: 69313

If you have graduated from CB to ham radio and want to stop sounding
like a CB'er........

CB'ers say "The personal here is Tom."
Hams say "My name is Tom" or "The handle here is Tom."

CB'ers say "Your signal here is a 5 pounder." ????
Hams say "Your signal report is 5 by 9."

CB'ers say "The working conditions here are a Yaesu FT-101."
Hams say "The rig here is a Yaesu FT-101."

CB'ers say "What's your 20 there?"
Hams say "Where are you located?" or "What is your QTH?"

And never under any circumstances use 10-4, or other 10 signals.

Flame away if you must.

Rick K2XT

Hmm, the name Richard Jewel comes to mind. Remember the security guard in Atlanta who discovered a bomb and warned people away, probably saving a dozen lives. The FBI destroyed the man in an attempt to convict him of placing the bomb. They got him fired from his job, destroyed his reputation in the community by releasing false stories about him, and even tried to get his family to turn on him. The real bomber is still on the loose and went on to bomb two more establishments while the FBI ignored him and went after the innocent.

And now we also have all the death row prisoners who have been released since the advent of DNA evidence. Yea, right, if you havent done anything wrong, then you have nothing to worry about. Now that is one ignorant statement!

One still hears the No-Coders uttering phrases such as, "I heard that, I did." or, "All like that out there." and , "Seventy-thirds out your way." Notice, too, how the practice of giving one's call sign is followed by, "W4xxx for ID". Duh! Is this redundant or what?

The topper is always the classic newbie repeater user that tells his buddies, and this happens a LOT, "You got a good signal and you are hitting my meter 30 over." (It is a REPEATER, Dummy!)
(not to mention the old CB'ers that put an overdriven D104 in line with their new Alinco rigs.....)

Below is a list of How To Be An Official Amateur Radio Operator...

1) Use as many Q signals as possible. Yes, I know they were invented solely for CW and are totally inappropriate for two-meter FM, but they're fun and entertaining. They keep people guessing as to what you really meant. i.e. "I'm going to QSY to the truck." Can you really change frequency to the truck? QSL used to mean " I am acknowledging receipt," but now it appears to mean" yes" or "OK." I guess I missed it when the ARRL changed the meaning.

2) Never laugh when you can say "hi hi." Nobody will ever know you aren't a long CW rag chewer if you don't tell them. They'll think you've been on since the days of Marconi.

3) Utilize an alternative vocabulary. Use words like "destinated" and "negatory."

4) Always say "XX4XXX (insert your own call) for I.D."

5) The better the copy on two-meter FM, the more you should phonetically spell your name, especially if it is a short and/or common one. i.e. "My name is Al . . .Alpha Lima" or "Jack . . .Juliet Alpha Charlie Kilo."

6) Always give the calls of yourself and everyone who is(or has been) in the group, whether they are still there or not. While this has been unnecessary for years, it is still a wonderful memory test.

7) Whenever possible, use the wrong terminology. It keeps people guessing. Use "modulation" when you mean" deviation" and vice-versa. And even if the two-meter FM amplifier you're using is a Class C type amp, and thus not biased for linear amplification, be sure to call it your "linear." Heck, refer to all FM-style amplifiers as "linears." You'll be the king of the wrong terminology

8) If someone asks for a break, always finish your turn, talking as long as possible before turning it over. Whenever possible, pass it around a few times first.

9) Always ask involved questions of the person who is trying to sign out. Never let him get by with a yes or no answer. Make it a question that will take a long time to answer.

10) The less you know about the subject, the more you should speculate about it on the air. The amount of time spend on your speculations should be inversely proportional to your knowledge of the subject.

11) If you hear two amateurs start a conversation on the repeater, wait until they are 20 seconds into their contact, and then break-in to use the patch.

12) You hear someone on the repeater giving directions to a visiting amateur. Even if the directions are good, make sure you break-in with your own "alternate route but better way to get there" version.

13) Use the repeater for an hour at a two at a time, preventing others from using it. Better yet, do it on a daily basis. Your quest is to make people so sick of hearing your voice every time they turn on their radio, they'll move to another frequency. This way you'll lighten the load on the repeater, leaving even more time for you to talk on it.

14) Give out wacky radio advice. When a newcomer's signal is weak into the repeater, tell him he can correct the problem by adjusting the volume and squelch knobs on his radio. Or tell people they're full quieting except for the white noise on their signal. Or. . .well, you get the idea.

15) Use lots of radio jargon. After all, it makes you feel important using words average people don't say. Who cares if it makes you sound like you just fell off of Channel l9 on the Citizen's Band? Use phrases such as "Roger on that," "10-4," "You're making the trip," and "Negatory on that."

16) Start every transmission with the word "Roger" or "QSL."

17) When looking for a contact on the repeater, always say you're "listening" or "monitoring" multiple times.

18) Give out repeater FM signal reports using the HF SSBR-S system ("You're 5 by 9 here.") Sure it's considered improper for FM operation and you may even confuse some people, but don't let that spoil your fun!

19) Always use a repeater, even you can work the other station easily on simplex--especially if you can make the contact on simplex. The coverage of the repeater you use should be inversely proportional to your distance from the other station.

20) If you and the other station are both within a mile or two of the repeater you are using, you should always give a signal report. ("I'm sitting under the repeater and I know you can see it from there, but you're full quieting into the repeater. How about me?")

29) Never say "My name is. . ." It makes you sound human. If at all possible, use one of the following phrases: a) "The personal here is. . ." b)"The handle here is. . ." Normally, handles are for suitcases, but it's OK to use them anyway. Don't forget this has worked just fine for CB'ers for years.

21) Use 73 and 88 incorrectly. Both are already considered plural, but add a "s" to the end anyway. Say 73's or "88's." Who cares if it means "best regards" and "love and kisses." Better yet, say "seventy thirds." (By the way, 70 thirds equals about 23.3)

22) Make people think you have a split personality by referring to yourself in the plural phrase. When you're in conversation and are alone at your radio, always say" We're" or "We've" instead of" I'm" or "I've" (i.e. "we've been doing this . . ." "we're doing that. . .","we're clear").

Well, Opie, you messed up on that one.

"For ID" means "as required by FCC rules", not because the other station doesn't know who you are. You are identifying your station for legal purposes, not for QSO purposes.

Back to the fishin' hole.

> (......make sure your sitting down before you look at the final bid)

I'll have 50,000 similar coins printed up by this afternoon. Hopefully I can find enough suckers willing to pay even a tenth of that final auction price.

Seriously, why would anybody in their right mind pay that much money for coins pumped out of a machine? They're not even officially recognized by NASA. In other words, absolutely ANYBODY can produce a "tribute to Columbia" coin.

A cop.

Neither CB'ers nor hams have any real use for 10-lingo. Cops use it for a couple of reasons: To standardize expressions when clarity is critical and to obfuscate when civilians are listening. Neither applies to CB/ham radio.

Really? Well around 1950 and for a few years when 6 meters FM was the only VHF around we ALL in this country used the 10 codes on 6 meters FM. But I guess you wasn't around then to know. And 11 meters was really a good DX band. But thanks to the FCC now it's worthless. Well almost. On long fast trips it did save me a few speeding tickets, That and my FuzzzzzzzBuster :)
Damm I must be getting old.

"for id" is redundant, when you give your call, that is the id as
required by the FCC. Do you hear broadcast stations giving their
call and then "for id"?

---

1. In the '50s FM was never popular on six - it was all AM. Been there,
done that.
2. Nobody except cops used 10-codes back then. That wasn't until CB
arrived.
3. 11 meters (when it was a ham band) was never a good DX band because
hardly anyone ever used it.
4. You are indeed getting old if that's what you remember (not).

You're not listening. The "for ID" indicates the reason you're giving your call is different from simply identifying yourself to the other station. Nobody says "for ID" when initially calling someone; it's only after contact is established.

I own a good working FTC 1143 handi that I need to re-program. I have
not used this rig much and have moved three times in the last 8 years.
During one of ther moves I seem to have lost or mis-placed the
programming instruction sheet.
Please help if you can. I need to add Pl tones to a couple of the freq
pairs that are in there now so I can use thew local repeater on 440.
I have searched the web with no results.

Thanks for any help you can provide. E-mail or reply to thread.
Ron

It is still redundant, anytime you give your call you are id'ing.
Why else would one give their call, it is for identification purposes.

Actually they do. At the end of the broadcast day, some stations
play a tape that says, among other things, that "This is station xxxxx for
ID purposes, licensed by the ....." and so on....

Actually, I use it because of habit. And the habit got started years ago
when someone bitched about it being a pet peeve...

Sorta stuck with me ever since. About 21 years now!

Mike

1173. Application Form

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-09 02:44:02 UTC

Does anyone know the name of the FCC form you need to apply for a license?
The books I've read refer to it as a 610 form, but it appears the FCC may
have changed the form's name.

Any help would be greatly appreciated,
Thanks
G

Ok Loosy, I splain it one more time.

Think of it as "This is N0GUD for ID [as required by FCC rules]" which is different from "This is N0GUD [do you have my call correct?]". It's not the identification per se that's different, it's the motivation for sending it. Using "for ID" informs whoever give a rip that it's for the former, not the latter.

Pretty subtle, I admit. Think it over and get back to us in a couple of months.

Giving you call in identifying, whether you say "for id" or not.

The form is 605 - but you are also aware that one must first pass a test to
obtain a license, aren't you?

I hear it on the repeaters here all the time. I have used it too, but only because the people I'm talking to use it. I usually just say, "this is KC0ODY", and then just continue my conversation; but if the person I'm talking to says, "BLANK for ID", I will follow in stead. Big f'ing deal in the grand scheme of things.

I tend to say my callsign when I hear a repeater ID itself. I suppose you don't *have* to do this, but the repeater's ID can serve as a reminder for you to do the same. I can also see a scenario where if someone happens to cut into the middle of a conversation you've got going on a repeater, and catches a callsign, how do they know whose it is? It could be you, talking about another friend and referring to their callsign. Not that this probably matters 99.9% of the time in the grand scheme of things.

If a person listens in on a repeater QSO and hears the operators say their callsigns now and then, and bothers to follow the conversation, they will know who is who. How many conversations on a local repeater does the average ham listen in to for an extended length of time (excluding nets and such)?

Of course, commercial broadcast stations on AM and FM announce their calls and frequencies quite often throughout the day, but every now and then you still sometimes here them say, "and now we pause for station identification" (although I have not heard that on FM for a long, long time).

Not subtle, Rickey. Nonsense is more like it, but you may persist in the
nitpicking.
Giving one's call sign IS meeting the FCC regs and adding "for ID" is again,
redundant.
You do it your way, and I shall do it mine. End of nitpicking.

Good point. Broadcast stations often state that they are pausing for station
identification. This gives the listener a 'heads up' and meets FCC
requirements.
It is still NOT necessary for two Hams to use the 'for ID purposes'. All

that is REQUIRED BY THE FCC is to give your callsign. Period.
Got that, Loosie? If saying "for ID" implies adherence to the regs, then so also does simply stating one's call without the unnecessary declaration.
Gee. W7TI must have entirely too much time on his hands.

Amateur Radio Newsline™ Report 1330 - February 7, 2003

++
+++

A NOTE ABOUT WHAT YOU ARE ABOUT TO READ

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would strongly urge you to listen to the audio version this week. Our service is best described as "audio intensive" and all Amateur Radio Newsline (tm) scripts are specifically written for the "spoken word." Because of this there is no way to convey in print the emotion of what you "hear" when you listen rather than read.

Candidly, you are really missing what Amateur Radio Newsline is really all about by only reading it. The newscast is recorded each week by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP downloadable MP3 files or dial-in telephone.

Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. Free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

Amateur Radio Newsline report number 1330 with a release date of Friday, February 7 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The space shuttle Columbia falls from the sky and all on-board are lost. Three were radio amateurs. More on the tragedy and the search for answers comes your way right now:

(Billboard Cart Here)

**

HAM RADIO IN SPACE: HAM RADIO OPERATORS LOST IN COLUMBIA TRAGEDY

Three ham radio operators were among the seven member crew of the space shuttle Columbia who were killed when the orbiter broke up during re-entry over Texas on Saturday February 1st. Amateur Radio Nesline's Norm Seeley, KI7UP, has the details:

--
President Bush Audio: Audio only report. Hear it at
http://www.arnewsline.org
--

Those were the words of President George W. Bush expressing the grief of the world on learning that that the spaceship Columbia had fallen from the sky. That it's crew of seven astronasuts was lost.

On board was a 7 member crew that included three ham radio operators. Killed in there tragedy were Mission Commander Rick Husband, and Pilot William McCool. Also lost were Mission Specialists Michael Anderson, David Brown KC5ZTC, Laurel Clark, KC5ZSU, Kalpana Chawla, KD5ESI and Israeli Payload Specialist Ilan Ramon. Ramon was a well-known Israeli Air Force pilot became the first man from his country to fly in space.

Columbia was at an altitude of about 203,000 feet over north-central Texas and traveling at 12,500 mph, when Mission Control lost all contact and tracking data. It was about 9 a.m Eastern time. That was almost the same moment when residents in the Dallas area reported hearing a gigantic sonic boom. The loudest anyone had ever heard. Witnesses who looked up reported seeing a bright flash followed by smoke plumes streaking across the sky. Several people grabbed their home video cameras and caught the tragedy. Tape shows debris appearing to break off into separate balls of light and falling back to Earth.

What actually happened is still very much unclear. The shuttle is essentially a glider during the hour-long decent from orbit. It is covered by some 20,000 thermal tiles to protect against temperatures as high as 3,000 degrees.

The space agency is already looking at a liftoff incident where a part of the center fuel tank's foam insulation broke away and impacted one of the Columbia's wings. NASA saus that just before it disintegrated Columbia experienced an abnormal rise in temperature and wind resistance. That forced the shuttle's automatic pilot to make rapid changes to its flight path. Some experts say that this is possible evidence that some heat-protection tiles were missing or damaged.

Administration officials said there was no immediate indication of terrorism but accounts from those on the ground have lead to speculation of a explosion somewhere on board the orbiter. Others say the abnormally high sound level was the result of multiple pieces of Columbia all breaking the sound barrier at slightly different times and creating an ongoing sonic boom.

Debris from Columbia fell along Northern Texas and into Louisiana. NASA declared an emergency after losing contact with the crew and sent search teams to the Dallas-Fort Worth area. It also warned people to stay well clear of any debris field they might encounter because of chemical contamination from the very toxic fuel. But that was easier said than done. Residents of the town of Nacogdoches say they found bits of metal strewn all across the city and a local dentist reported that a metal

bracket about a foot long crashed through his office roof.

STS-107 was NASA's 144th shuttle mission.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

On January 28th, 1986, the space shuttle Challenger exploded shortly after liftoff but in 42 years of U.S. human space flight, there had never been an accident during the descent to Earth or landing until now. NASA has grounded all of its space shuttles, but there's no word yet that the Columbia tragedy will affect the current Expedition 7 crew's future aboard the International Space Station. (ARNewsline™ from published news reports)

**

HAM RADIO IN SPACE: TEXAS HAMS ASSIST IN SHUTTLE DEBRIS HUNT

Amateur Radio played a signifigant role in the debris recovery efforts after Columbia broke up over Texas. Amateur Radio Newsline's David Black, KB4KCH, has that part of the story.

--
A family member gets a close-up view to the tragedy. One of the Columbia's heat protective tiles was found near my nephew's college dorm in north central Texas. My newphew took a picture of it, which you can see on the Amateur Radio Newsline website. While the tile survived re-entry, the Columbia did not.

Within hours of the accident, Amateur Radio Emergency Service volunteers with the Nacogdoches Amateur Radio Club began helping Emergency Management officials and NASA teams in locating and cataloging debris falling from the shuttle.

Tim Lewallen, KD5ING, is the Public Information Officer for the Nacogdoches Amateur Radio Club. He says the hams worked in tandem with students from a local college's Geographical Information Systems lab. Together, they surveyed the city and county looking for shuttle debris. When any was located it was photographed and its exact position determined using a G-P-S. The data was later downloaded into a database that will be superimposed over terrain maps. Local officials say debris was found in nearly 2,000 sites, including some 1,200 places in Nacogdoches County.

As we go to air, well over 12,000 pieces of Columbia had been found, from as far west as New Mexico eastward into Louisiana. NASA hopes the position of the debris field will give it some insight into what caused Columbia to disintegrate.

Reporting for the Amateur Radio Newsline, I',m David Black, KB4KCH.

--

Lewallan says that the entire effort was coordinated by the ARES group. He adds that ARES volunteers were also directed to coordinates given by NASA that the space agency believed might contain missing parts of the Columbia. The recovery and cataloging effort went on for several days. (Nacogdoches Amateur Radio Club via KD5ING)

**

HAM RADIO IN SPACE: AMSAT MOURNS COLUMBIA LOSS

Its no secret that Amateur Radio and the space program have had a very close association since the very first Orbiting Satellite Carrying Amateur Radio or OSCAR was launched back on December 12th 1961. It was carried into space by a United States built Thor Agena launch vehicle from Vandenberg Air Force Base in California. OSCAR 1 was a tiny 4.5 kg package that made only 312 orbits before re-entering the Earths atmosphere. But it set the stage for four decades of ham radio in space. A lot of it took place from the space shuttles including Columbia. In fact it was from Columbia that ham radio's first man in space, Owen Garriott, W5LFL, talked to a senator and a king:

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

And so it was when news of the Columbia's demise began to settle in that the representatives of AMSAT groups from around the world began paying their respects. Perhapps none was more poignant than the words of AMSAT North America President Robin Haighton, VE3FRH. His statement is read by Amateur Radio Newsline's Newsline's Henry Feinberg, K2SSQ:

--

"It is with great sadness that I have learnt of the Columbia disaster. AMSAT has always been a strong supporter of the Shuttle program and of ARISS. We have had many interactions with the astronauts who have fearlessly ridden the shuttle into space. Currently several are AMSAT members and supporters.

On this sad occasion on behalf of the Board of Directors, Officers and Members of AMSAT, I wish to send our deep sympathy to the families, relatives and friends of those who undertook this Columbia mission. Their understanding of the risks taken on this and other missions did not prevent them from performing at the highest level, and, unfortunately paying the ultimate price.

To our friends at NASA, we at AMSAT send our understanding and our sympathy,
knowing that the exploration of space and carrying out important experiments
for the benefit of humanity will continue to be your mission."

--

AMSAT France, AMSAT Germany, AMSAT Itlaly, AMSAT Sri Lanka and other AMSAT groups the world over also offered words of condolence an consolation.

Frank H. Bauer, KA3HDO, the Chairman of ARISS International issued a statement that read in part -- and we quote: "This is a difficult time for all of us. Let's work together to keep the torch of space travel alive in the hearts and spirits of humans worldwide. And most importantly, please keep the astronauts, their family and friends in your thoughts and prayers." (AMSAT-NA, ARISS, others)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W4BBB Radio Amateurs Club of Knoxville repeater serving Knoxville Tennessee.

(5 sec pause here)

**
RESCUE RADIO: TENNESSEE HAMS HELP AFTER TORNADO

The January 8th issue of the Knoxville News-Sentinel tells the story of Sheila Tailent, KB4G, and how she came to the rescue after a tornado ripped through Morgan County Tennessee. Tailent is the state ARES coordinator realized a need to provide reliable communications following the storm. Thanks to her efforts, within 15 minutes after the twister struck hams with emergency communications gear were on their way.

According to the News-Sentinel, for the next 48 hours ham radio volunteers relayed communications among police departments, firefighters, rescue squads, demolition units, repair crews the Red Cross and many others. The article says that dozens of radio amateurs worked around the clock with many taking vacation days from work and donating the time to the community.

The newspaper says that a conservative estimate of the value of the communications provided free of charge by hams to Morgan County could be upward of $80,000. (W5YI Report)

**

RESCUE RADIO: BE PREPARED - PART 2

The Columbia tragedy and the Morgan County tornado are two incidents that again bring home just how important it is for ham radio operators to be prepared. The ARES members in Nacogdoches Texas had no idea that their training would involve them in trying to find out why a space shuttle fell from the sky. But thats excatly the role that they played -- and continue to play.

Last Week, Lloyd Colston, KC5FM, was here to explain the importance of emergency preparedness. Now says Colston, its time for some personal

preparations:

--
Audio only report. Hear it at http://www.arnewsline.org
--

Lloyd Colston, KC5FM, is with the Mayes County Emergency Management in Pryor Oklahoma. He will be back from time to time with other tips on how hams can be ready for any emergency that may come their way. (KC5FM)

**

RADIO LAW: FCC AND NTIA TO IMPROVE FREQUENCY COORDINATION

The FCC and the Commerce Department's National Telecommunications and Information Administration have signed a new Memorandum of Understanding on spectrum coordination. According to the C-G-C Communicator, the agreement calls for the FCC to responsible for non-federal frequency users such as broadcast, commercial, public safety and even Amateur Radio. The N-T-I-A will hold responsibility for all federal government users. The full document is on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230835A1.doc (CGC Communicator)

**

SPECTRUM ISSUES: FCC REALLOCATES SPECTRUM FOR NEW WIRELESS SERVICES

Also from the C-G-C Communicator word that the FCC has reallocated 30 megahertz of spectrum from the 2 GHz Mobile Satellite Service to fixed and mobile services. The purpose is to provide frequencies for a variety of new wireless applications. The Commission is seeking comments on potential uses of an additional 15 megahertz of spectrum previously identified for new wireless services. It also wants comments on increased flexibility in the Unlicensed Personal Communications Service band. This too is on the web. You will find it at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230754A1.doc (CGC Communicator)

**

CONVENTIONS AND HAMFESTS: SUPERFEST 2003

A-E-S has gotten it's Superfest 2003 registration form online. The Superfest takes place April 4th and 5th at Amateur Electronic Supply in Milwaukee. To register take your web browser to www.aesham.com and take the link to the Superfest menu. If you need help or have any questions, please contact Molly Schreiber at A-E-S. Her e-mail is molly@aesham.com (AES)

**

HAMFESTS AND CONVENTIONS: RADIOFEST IN SEASIDE CALIFORNIA

The Naval Postgraduate School Amateur Radio Club will host RadioFest 2003 on Saturday, February 22nd. This is a West Coast hamfest and will be held at the General Stilwell Community Center in Seaside, California. The show includes a flea market, vendor booths, demonstrations, license exams, door prizes and more. Among the forum presenters scheduled are Leslie Ragghianti from the 911 Emergency Communications Center, Jeff Orr, K-G-6-K-C-O, discussing "Echo Link" along with Don Carlson , KQ6FM, and Glenn Thomas, WB6W discussing ARES. Sound interesting? For more information go to the web at www.radiofest.org (W6FVI)

**

RADIO MEETINGS: SCADS IN SEAL BEACH CALIFORNIA

Also in the Golden State the Southern California Area DXer's shortwave listeners monthly meeting takes place on Saturday February 15th from noon to 4:00 p.m. Pacific time. The venue is the F&M Bank Community Room in Seal Beach California. This months subject is Radio Communication Listening Worldwide. For more information e-mail Bill Fisher at billfishernow@netzero.net (SCADS)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**
THE FUTURE: HOW TO MAKE HAM RADIO MORE KID FRIENDLY

"How to Make Ham Radio More Kid Friendly" is the topic that Amateur Radio Newsline has chosen for this years Ham Radio Town Meeting and we are looking for some younger hams who might want to take part.

The Town Meeting is held each May at the Dayton Hamvention. This years Hamvention theme is the "Year of the Young" and planners tell us that the three day show will focus on the young ham and on bringing 12 to 18 year olds into amateur radio.

Its no secret that recruiting youngsters into the hobby is getting harder and harder. Keeping most of them is all but impossible. There is organized sports. There are those numerous after school activities. And lets not forget the lure of the World Wide Web with its license free ham-radio like chat rooms. All of this makes it a real challenge to get youngsters licensed and keep them interested.

Obviously the old ways of recruiting young people no longer work. So we are going to take two hours and give you the chance to come up with some new ways.

If you are a young ham planning to attend Hamvention 2003 and would like 10 minutes to present your ideas, drop us an e-mail. We will go through what you send us and some of you might be invited to be a part of our all-star panel.

The best way to contact us is by e-mail. Mark your note Town Meeting and send it to newsline@arnewsline.org. (ARNewsline™)

**

ON THE WEB: REPEATER LINKING POWERPOINT PRESENTATION

If you are into repeater linking, this one is for you. Kevin Custer, W3KKC, reports over the VHF Reflector on a new Repeater Linking presentation using Microsoft's Power Point Presentation format. It was produced by Douglas Otoupal, N5HYD, is 131 kilobytes in and available at http://www.repeater-builder.com/rbtip/pdfindex.html. (VHF Reflector)

**

INTERNATIONAL - GREECE: NEW VHF/UHF ONLY LICENSE CLASS

The V-H-F Reflector says that Greece now has its own, entry level VHF only license. The new ticket use the prefix SW1 through SW9 with priveleges on 2 meters and above. SV1 through SV9 prefixes indicate Greek stations that have full High Frequency operating privileges. (VHF REflector)

**

INTERNATIONAL - GERMANY: DEUTSCHE WELLE DROPPING NORTH AMERICAN SERVICE

Germany's premiere shortwave station says that transmissions to North America will soon cease. This with confirmation by Margot Forbes of the broadcaster Deutsche Welle that it will be terminating the long running service at the end of March.

Up until now, there have been several claims made by various sources that Deutsche Welle would be shutting down its broadcasts to North America this spring. The station would not deny or confirm this directly until now.

According to Forbes, the stations budget has been slashed time and time again by the German Government. Forbes says that maintaining shortwave transmissions are particularly expensive and the decision has been made to cancel operation on some frequencies. This includes the very popular transmissions to North America

Forbes says that there are no plans yet for a replacement service. but says there is the possibility of somthing being worked out using satellite delivery or over the Internet. (shortwavedxing.com)

**

PROPAGATION: SA 100 MICROWATT 7 MHZ BEACON HERARD IN USA

And a possible record for a high frequency beacon transmitter. Over the last 4 months, an extremely low power beacon transmitter has been operating from the QTH of ZS1J at Plettenberg Bay, South Africa. The measured power output of the 7.029 MHz transmissions is 100 microwatts and reception reports from all over South Africa, up to 1100 kilometers, have been received. But the big surpriose came on Tuesday January 29th. Bill Diggens, WA8LXJ, in West Union Ohio made a positive identification of the beacon transmiutter.

Diggens gave it a Readability 2, Signal strength 1 and tone T 9. He also made a tape recording of the signal received and played it back to amazed South African amateurs on the daily, split frequency net. A newt that can be found 7.095 and 7.177 MHz in the 40 meter band. (ZS6AKV)

**

DX

In DX, PS7AB says that Mexiana Island will be on the air May 21st through the 25th. Five operators will activate Mexiana on 40 through 10 meters on SSB only. Mexiana is considered the most wanted Islands on the Air group in all of South America. More information is on the web at http://www.mexianaisland2003.hpg.com.br (Press release)

**

THAT FINAL ITEM: HAM RADIO AND THE SPACESHIP COLUMBIA

And finally this week, we like many other Amateur Radio operators around the world felt a special loss following the Columbia space shuttle disaster. As we already mentioned, three of the astronauts on board were licensed Amateur Radio operators. And Amateur Radio has had close ties to the space program, to the astronauts, and to the ill-fated Columbia since the very early days of shuttle flights.

It was on board the Columbia during the STS-9 mission in November of 1983 that Dr. Owen Garriott, W5LFL, became the first person ever to operate a ham radio station from space. In case you have forgotten, this is how that historic contact sounded:

--
Audio only. Hear it in the audio version at http://www.arnewsline.org

--

That QSO marked the first time that astronauts could communicate directly with people on Earth. And they did it without going through the normal NASA's communications channels.

In 1990, NASA, the ARRL and AMSAT formed SAREX -- The Shuttle Amateur Radio Experiment. This was a program to schedule regular contacts between school students and the astronauts on-orbit using Amateur Radio. Astronauts were encouraged to obtain Amateur Radio licenses. Many did and they used them to talk with kids in schools the world over. A lot of those contacts took place from the mid-deck of the spaceship

Columbia.

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

In addition to the SAREX contacts, astronauts were encouraged to spend some of their free time making random contacts with hams on Earth. Open contacts they were called and they became a new form of radiosport. A kind of contest with radio amateurs everywhere vying to be the first in the city or neighborhood to talk to a ham radio operator in space.

Then Russia entered the realm of ham radio on-orbit. Amateur Radio gear was installed on its MIR space station and talking with cosmonauts soon became almost commonplace. Who can forget British astronaut Helen Sharman when she visited the MIR and took to the airwaves using ham radio.

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

SAREX has now given weay to ARISS -- Amateur Radio on the International Space Station. But it all had to have a beginning and from its earliest days on-orbit until it disintegrated in the sky above Texas the space ship Columbia and ham radio have shared history together. Now the Columbia is now gone, but the world of Amateur Radio will never, ever forget it or the seven human beings who were on it when it met its firey demise. (From the combined thoughts of the worlds radio amateurs as posted to various Internet remailers, by e-mail and numerous other sources.)

***

NEWSCAST CLOSE

Source record: 69141

DX is possible via several Tropospheric VHF/UHF DX Modes
See URL:
http://www.iprimus.ca/%7Ehepburnw/dx/tr-modes.htm

Many of these are very rare -- In San Diego Hams here have worked Hawaii
when conditions are right, but doesn't happen often

Linking (Hopping) of repeaters is common as an example see the CalZona Link
System
http://www.ecra.org/CalZona%20Link%20System.html
Links from Southern California into Arizona.
Others link from San Diego to Nevada.

Via IRLP -- one can work the world (repeater via internet to repeater)
http://ac6v.com/repeaters.htm#IR
Hams here have worked Europe, Antarctica, Australia and many others via IRLP

Also see ILINK, ECHOLINK, WIRES II
http://ac6v.com/repeaters.htm#IR

Yes you can work DX via Satellite
One Ham here has worked several stations in the Pacific and Japan.
See URL:
http://ac6v.com/satellites.htm

And finally 6 Meters is considered VHF and F-Layer skip is possible when the
solar flux is high. Hams here have worked back to the east coast, Caribbean,
Japan, Australia, etc. The east coast routinely works Europe when conditions
are right. Sporadic E skip gets us West coast skip. From San Diego Hams here
have worked the North West, WA, OR, Wyoming, The Dakotas, Nevada, etc on
Sporadic E.

> years of this crap. Hopefully we'll survive it but I have my doubts.

It that type of attitude that has
caused so much problems. Yes, you
have rights. The problem is that
people like you abuse those rights.
Every right has assumed responsibilities.

In the old days we did not have to use
government, the police or the courts.
We took assholes and non conformists
out and lynched them.

Ashcroft is a member of the Assemblies
of God, as is Pat Robertson and Adm.
Vern Clark (Navy CNO). The AG church is
one of the first churches to stand for
freedom.

The reason that we are in this mess in
the first place is that people like you
elected Clinton and other liberals. It
is the democrats who are the root of all
evil in America. They have become the
party of the well educated and the powerful.
It is now the party of the yuppies, not the
working man.

Yeah, that's what I used to think. But do people get rich by doing what everybody else does? Sure, being a loon will most likely to put a person in poverty or the nuthouse, but it's also might be a shot at being the next Howard Hughes or Michael Jackson.

I heard that "Festering Zit" N4FZ on .313 this afternoon, then the qrm'ers started in with the music.....john da blabtist was complaining.....That sanctimonious piece of shit didn't mind it when those jamming tapes he made for the Stumpjumpers were being used in that manner. What a two faced piece of shit!

Ed Norton

That may be true of the church but is not true of either Ashcroft or Robertson. We should never ever under any circumstances have any individuals in this country -- citizen or not -- locked up without the ability to communicate with family or an attorney, or not be able to communicate with an attorney privately, or to be locked up without charges.

These are Constitutional rights: The right to legal Consul. The right to a speedy trial. Innocent until proven guilty. The right to know the charges against you.

We are a nation where the phrase "prove your innocence" was something only the grossly ignorant would say.

We were once a nation where one could speak to your attorney without being listened in on.

We were a nation where anyone on our soil -- citizen or not -- was given equal protection under the law.

All those things are relics because of your "religious man" Ashcroft.

No, I have no love for clinton, but evil is the root of all evil in america. Ideology -- left or right -- is a convenient place to hide your evil. Clinton was dangerously irresponsible. Ashcroft is

dangerous. Clinton's sexual exploits won't scar america 100 years
from now, but Ashcroft just might.

I wish I'd had the Frog-A-Hunnert fired up to hear him too, Bro. Norton.

I hope Bro. John preached a really long sermon to them heatherens on 313. They sure need it. One guy on there even claims to be an agnostic homosexual. Or is it homosexual agnostic?

You better believe we need some good preaching on 313.

And Bro. John is probably the best man for the job. We just need Sigster on board to give the benediction.

Right, Bro. Norton?

Dunno. If you believe the conspiracy theories about Hughes, he was pretty much controlled by his inner circle during the last years of his life. For all I know, Jackson is spending himself into near bankruptcy as Elvis did. Still, any of those whackos needed a normal mainstream doctor even more than a good accountant.

Oh, I understand. If I say only my callsign, the FCC monitors will not know
who I am.

But if I say my callsign plus "for ID," then they know who I am.

It's all clear now.

Oh, wait, one question -- I operate a lot of CW -- does this mean that when
I sign on cw I must send:

-- --
AR (HIS CALL) DE (MY CALL) BT (MY CALL) FOR ID K

Otherwise the FCC monitors won't know who I am?????

Source record: 69154

Police arrested Lloyd A. Davies, a 27 year old white male, resident of Athens, Alabama in the Anderson Pumpkin patch at 11:38pm Friday. Davies will be charged with lewd and lascivious behavior, public indecency, and public intoxication at the Athens Municipal Courthouse Monday. The suspect allegedly stated that as he was passing a pumpkin patch, he decided to stop. "You know, a pumpkin is soft and squishy inside, and there was no one around here for miles. At least I thought there wasn't." he stated in a phone interview from the Athens Municipal Courthouse Jail.
Davies went on to state that he pulled over to the side of the road, picked out a pumpkin that he felt was appropriate to his purposes, cut a hole in it, and proceeded to satisfy his alleged "need". "I guess I was just really into it, you know?" he commented with evident embarrassment. In the process, Torrance apparently failed to notice the Athens Municipal police car approaching and was unaware of his audience until officer Brenda Taylor approached him. "It was an unusual situation, sure." said officer Taylor. "I walked up to (Davies) and he's... just working away at this pumpkin."
Taylor went on to describe what happened when she approached Davies. "I just went up and said, 'Excuse me sir, but do you realize that you are screwing a pumpkin?' He got real surprised as you'd expect, and then looked me straight in the face and said,
'A pumpkin? Damn, I thought it was my neighbor's cow".

Mr. Davies will be arraigned in Superior Court Monday February 10, 2003. No bail has been posted as of this time, as Mr. Davies has said to the jailer, "me and Big Bubba is good friends".

And you've never mentioned another callsign in your conversations? If so, which is the ID and which is just the casually mentioned callsign of another?

In the end, to complain about this seems somewhat trivial.

All you have to say in "this is kxabc", no 'for id' is necessary.
When you give YOUR call, you have identified.

If you have trouble telling the difference between someone
mentioning another's call in the course of a conversation and
giving their own call for identification, you have a problem.

Sadly, smug people often discount the truths discussed on the Liberty net and elsewhere. Please don't make the fool's mistake of disregarding the message, simply because the messenger speaks imperfectly. The facts are frightening to anyone who knows anything of the U.S. constitution and how the current regime is destroying same. If I had sufficient time, I could present facts that would support much of what the "liberty nuts" are saying...but then again, you probably don't care to listen. Well friend, enjoy your under-$2.00/gallon gas, your SUV, your Big Macs, your Budweiser and your prono...it's all coming to an end. Welcome to the Post-Constitutional U.S.A.

I've been working on learning code for a several years on and off - life keeps getting in the way. I've tried pretty much all the different freeware available, Gordon West's tapes, ARRL tapes, and Ham University. Ham U. is my favorite. I think it's the most user friendly of all the software I've tried, and I liked the demo program so much I shelled out the $ for the full program despite being a freeware junkie. You can download a free demo here: http://hamuniversity.com/
The software allows you to adjust the speed of the charaters and the spacing, and the code sent in lessons is random so you don't end up just memorizing each lesson as can happen with tapes. It also includes a game and the written Ham tests. I highly recommend it.
If I wasn't using Ham U., my next choice would be to try Code Quick. I like their meathod from what I've read on their web site:
http://www.cq2k.com/
Good Luck!
Tiger

From: AC6V <none@nowhere.com>
Message-ID: <dOO1a.11739$q91.1427098@news2.west.cox.net>
Source record: 69167

Certainly one can find that one of the methods mentioned to be easier for them -- but perhaps not another will find the same one the "best". One is advised to try several until one clicks in. Beware of the Elmer that sez "this method is the best" Maybe the best for them but not for you.

IMHO the most important ingredient is to persevere. Those that study 20 to 30 minutes or so a day - every day and not give up will find that in a month or so it will snap in place. Many are sporadic in the lesson regimen and others expect miracles and give up too soon. Stay with it and like typing, riding a bike, swimming, etc -- it will come to you.

Methods are see -- http://ac6v.com/morseaids.htm#Learn

VISUAL -- some learn best by seeing it on the screen as they hear it.
AUDIBLE - For many, the instant recognition of a character or whole word is usually recommended. The less interpretation taken between the initial hearing and recognition, the better.

But some learn by a musically or language associated- some learn it as a song or word -- dah dah ditit -- The zebra did it. dah dah di dah -- here comes the bride - queen. Code Quick does this with mnemonics.

AUDIBLE - INVERSE - Some study the opposites A then N, K then R, etc.

AUDIBLE PHONETICS - Some learn by associating it with the NATO Alphabet i.e, dit-dah followed by A or ALPHA after a while you will hear dit dah and A or alpha pops into the brain.

PATTERNS -There are patterns in morse code letters. For example: the letter A is similar to the letter W except that the letter W has an additional dah to it. One might study A, W, J, 1 in order, then mixed. This is effective if one has difficulty in discerning J from 1 etc.

TYPING - some find that they have an automatic reflex to hearing a character and hitting the right key on a keyboard. Check with your VEC if they will allow you to take the test this way. One of our local examiners does allow this as well as a Braille keyboard for the blind.

SENDING - Some folks learn better by sending with a key. Others read signs while driving on the highway. This is usually in conjunction with a listening method.

CHARACTERS - at 5 WPM it is feasible to repeat (or count) the dits and dahs in your head and pass the test --- this is the hard way and Farnsworth makes this tough - not recommended but may be the only way for some.

PLAIN TEXT VS MIXED RANDOM CHARACTERS. Studying Morse in plain text gives the advantage of being able to anticipate what is coming next where mixed

random characters - ya gotta know them all. Maybe practice both if that works for you.

KOCH METHOD - Learn morse code using high speed random characters.

FARNSWORTH - All tests are soon to be given at 12 WPM character speed, 5 WPM overall speed - if you are tested in Farnsworth -- then study that way -- several who have studied straight 5 WPM - couldn't copy a darn thing in Farnsworth.

BRAIN SOAK - Some folks give up on methods and just plain listen to code practice until one day it just all comes together. The impediment to increasing speed and proficiency is called a barrier which you may feel you will never hurdle, but is amazing when one day after brain soaking - it magically all comes together. Your mileage may vary.

I have known students to learn by one of these methods where other methods fail -- try each of them for what works for you. I learned well by audible inverse -- but others did not. I could never understand how one learned by visual -- but one person I know found it the only way!

One long time code instructor advises; "Most people's problems with the code stem from trying to learn it too fast without sufficient drilling before they move on to each new letter. The average person needs about 30 hours of study and practice on the code to hit 5 wpm. Now this is an average. Some will take longer and some will take less." So a half hour in the morning, a half hour in the evening and in a month -- you should have it.

For many -- Lesson sessions greater than an hour can overload the brain. 20 to 30 minutes or so a day - EVERY day.

For more knowledge of the ages, methods etc -- gathered from many code teachers and students -- see URL:
http://ac6v.com/morseaids.htm#Learn

Your dits and dahs may vary.

Try sort for a web page, like www.kenwood.
You may get lucky? This is a guess at a web site.
You could try a guess like www.trio
These are only part web site addresses, and as I say
a guess at that.

Icom IC-746 in as new condition.It comes with the mic,power cord and original box.The following
filters are installed.
FL 222,1.9 KHz 455 KHz IF SSB.New cost $199.99
FL 223,1.9 KHz 9 MHz IF SSB.New cost $99.99
The radio was purchased in July 2001 and the S/N is 91**.The condition is a 9 + in both operation
and appearance.
Asking $875.00 + shipping. (lower 48 only)

Hello fellow newsgroupies!

I had a very relaxing time at Pigeon Forge. Had a lot of fun and met alot of good people. I will be forwarding some pictures of me to K1TP's webpage soon.

Let's get down to business. I went to K1TP's webpage sunday night. I am outraged that the jerks on 14.275 countinue to take Brother Glenn. My advice would be to pay Mr. Baxter the $500,000 in damages. In addition, I am debating weather to turn over the many hours of recordings on 20 meters, to Glenn Baxter to use in his case. We will see. I have been defamed and harmfully interfered with, as a avid listener to K1MAN. Maybe I will ask for a settlement as well.

Whatever method you use, try to *hear* the code directly as a letter.
IOW, don't try to translate the sound into dot-dash and translate that
into A, just hear the dot-dash and think A. Easier said than done, but
when you master it your receiving speed will increase dramatically.

Source record: 69174
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.misc,comp.dsp

Hello again. I am still looking for some more CHU and WWV recordings from various places in North America (or elsewhere if you can receive them).

So far I have recordings from Milwaukee, WI, from Memphis, TN and from Lakeland, FL. If anyone else out there has a shortwave radio that they can hook up to their PC to record a couple minutes of CHU and/or WWV/WWVH for our project, it will be quite appreciated.

Please make the recordings as 8-bit, 8000Hz sampling, mono WAV files (or .AU files if using a Sun workstation). Please no MP3 or OGG as these will throw away much of the noise, etc.

These samples will be used to test DSP algorithms to decode the time signals out of them for use in synchronizing NTP. We are building a small device that will incorporate the shortwave receiver, and connect to a computer for use in NTP synchronization.

My original posting is also included below for more detail.

Thanks in advance.
Gavin

DE means "from" (his call) from (my call). It should be obvious to the most casual of observers which is which, even to the FCC monitors.

I have been a ham for over 40 years and have never used the phrase "for id" after my call and no one has ever had any problems knowing when I was identifying or being able to tell my call from someone else's. The FCC has evidently never had a problem with it either. The rules state you must ID, do they say anywhere that the phrase "for id" must follow your call? If the FCC had a problem as you say above it would be in the rules.

Please.....please...nobody tell the balding pate
chipmunk-cheeked Lloyd-da-toid about this website:

http://www.angelfire.com/ne/AntariiRescue/rabbi_rocky_show.html

If Lloyd sees it, he's liable to go on an INSANE rant across every
kook and conspiracy newsgroup known to man and then check into
the 3.860 Eastern Regioinal Pay-triots Website and blow up his HF
from loading into his 5/8th wave 2 meter vertical mag-mount he's
got pasted atop the rusty 4-drawer filing cabinet outside of his shack's
window that he "rescued" from the local auto-body shop's trashcan....

(come to think of it...DO NOT let any Liberty Netters get ahold of
the website either.....if Vic sees it, he's liable to have "depends
under-garments"
moments right up to next Saturday night.....Oy!!

ATTENTION USENET VISITORS, THIS AREA HAS BEEN DECLARED A TROLL
WILDLIFE REFUGE. TO LEARN ABOUT THE TROLL, ITS HABITAT, AND
ITS WAY OF LIFE, PLEASE READ THE SIGN-POST BELOW. IF YOU WOULD
LIKE TO LEARN MORE ABOUT THE TROLL, YOU CAN PICK UP BOOKS AND
SOUVENIRS IN THE GIFT SHOP AT THE END OF THE TOUR. THANK YOU
IN ADVANCE FOR OBSERVING ALL TROLL WILDLIFE REFUGE RULES, HAVE
A NICE DAY.
****
****

| Common name: Woodland Troll |
| Scientific name: Trollus Useneticus |

###
# #
PHYSICAL CHARACTERISTICS:
# #
The common woodland troll (Trollus Useneticus) is an
approximately 1.7m long nocturnal furry creature that
has been found to exist in nearly every climate and
latitude. Predominant features include: a very pale
complexion, a large bony ridge above the eyes, a dense
cranium, dragging knuckles, and a pungent odor.
# #
###

###
# #
HABITAT:
# #

```
# Most trolls spend the daylight hours under a large rock #
# sleeping. Unfortunately, the natural habitat of the #
# troll has been encroached by development (as is all too #
# common these days). The modern troll has to make due #
# with a slimy, moss covered rock. Often, trolls are #
# forced to endure poor sanitation and filthy living #
# conditions. Combined with the general lack of hygiene #
# among trolls, this results in a very unpleasant odor. #
# #
###################################################################

###################################################################
# #
# ACTIVITIES AND DIET: #
# #
# During their active period at night, the common troll #
# engages in numerous activities, though the most #
# important of these is foraging for food. The one #
# characteristic that ties all different troll species #
# and sub-species together is their diet. Trolls #
# invariably survive off of a combination of cheetos, #
# arguments, and annoying others. A typical troll #
# requires approximately 10 arguments and flames per day #
# just to stay alive. With the increasing use of #
# killfiles and just regular ignoring of trolls, it has #
# become more and more difficult for trolls to eke out a #
# basic sustenance. #
# #
###################################################################

###################################################################
# #
# KNOWN PREDATORS: #
# #
# Unfortunately, trolls have many predators. Most common #
# among them are the helpful researcher, the informative #
# poster, the cool headed responder, and the kill-filer. #
# The cool header responder is technically not a troll #
# predator however. Trolls are typically unfazed by #
# logical counter arguments and cool headed reason. #
# However, even though their posts do not deliver the #
# same level of sustenance that a "flamer" or an "annoyed #
# poster" may provide, they still provide a valuable #
# source of dietary fiber for the troll. #
# #
# The most dangerous predators for the trolls are the #
# helpful researcher, the informative poster, and the #
# kill-filer. The common troll is highly allergic to #
# fact, real data, and research. Upon skin contact with #
# actual hard evidence and real data, the troll will #
# experience intense itching and burning at the site of #
```

```
# contact, followed by lesions and blisters. Eventually, #
# this results in loss of skin near the area of contact, #
# and usually to loss of a limb (in the example of #
# contact near the arm or leg). Contact with facts and #
# data near the facial area usually results in a slow #
# painful death. Contact with extremely high doses of #
# fact and hard data can cause temporary loss of #
# consciousness and even permanent brain damage for the #
# troll. #
# #
# The kill-filer poses a much more insidious threat to #
# the troll. Not posing a direct threat to the troll per #
# se, the kill-filer simply deprives the troll of yet #
# another source of nourishment. Some trolls have #
# developed counter measures to thwart the kill-filers, #
# usually this takes the form of a type of camoflage. #
# #
# The trolls' predators have reaped a terrible slaughter #
# over the years, resulting in the death of great hordes #
# of trolls. Trolls continue to breed rapidly though and #
# their population is stable. However, it is unknown how #
# long this situation can persist. Eventually, natural #
# predators and poachers may result in lower numbers of #
# trolls. Already we are seeing lower diversity among #
# the different troll species. That is why this troll #
# habitat refuge exists, to ensure the preservation of #
# the troll for not only our future, but the future of #
# our children. #
# #
#################################################################################

============================================================
/ This troll habitat refuge has been paid for in part by /
/ the anti Troll-Defamation League, the International /
/ Society for the Advancement of Trolls, and the Troll /
/ Habitat Preservation Alliance. /

Ok guys, let me spell it out reeeeeeallll slow and easy:

1. The question was asked why anyone would say "for ID".

2. I answered the question.

3. Some people thought the answer was horse puckey, but the answer I gave is the actual, real, true reason why people said "for ID", like it or not.

4. Of course it's not in the FCC rules. Neither are the prosigns "K" or "BK" or "KN". So what?

5. Never, at any time, did I RECOMMEND saying "for ID".

6. Pleez don't castigate me for RECOMMENDING it - I DIDN'T. I only explained the motivation some people had for using it.

Once again, the messenger dies a grisly death.

Face it. Bill simply cannot stand being told his way is not THE way. He'll keep whining and whining and pushing and pushing. Let him ID his way, and we will ID our way. If he prefers to be redundant, be redundant, then let him, then let him.

My remarks aren't geared to which "meathod" but most user friendly,
feature packed software at a reasonable price. Ham U. allows the user
to choose *either* Koch or Farnsworth. Having downloaded nearly all
the freeware programs and only found a couple even acceptable,
hopefully I can point someone to some decent software and maybe save
them some time and frustration. While some people have success with
tapes, a drawback I found was learning the sequences so repeated
listening is a problem. I think it's helpful to share this so one can
consider whether or not to invest in tapes. Hopefully armed with
differing opinions and experiences shared by others, one can make an
informed choiced and avoid some frustration. As I said, I'm a freeware
junkie, so if I can find free programs, I won't spend my money. In the
case of learning code, I thought Ham U. was software worth paying for
after trying the demo. Again, an *opinion* that might be helpful to
someone, esp. since they can try it out for free and see if it works
for them or if they should try something else.

Somehow you missed my post which explained it long and slow, long and slow.

When you find it, read it, read it, and send your apologies apologies along with a suitable cash donation to my CBA.

No, I have no idea what the cash is for, it just sounded like a good idea at the time at the time.

All,

Question on the US Vanity Callsign program.

The current Status of my application is 2 - meaning "Pending Level 2".
Anyone know what this means?

I submitted the application on Jan 29, and I see payment was confirmed on
Jan 30 (used CC online). The applications has spent most of its life in
"Pending Level 2" status. Just curious if anyone has insight as to what
Pending Level 2 is.

Thanks & 73,

Jim

Ok folks, time for a good topic!

I want to show differences between the two.

Has Glenn Baxter ever:

http://www.k1man.com

called anyone a "savage negro beast"
called for death of jews.
called for death of blacks
had the leader of posse comatatus on his program?
Has IARN ever passed out anti-semitic leaflets?

How about Hal?

Has Hal Turner ever:
http://www.halturnershow.com

Helped any earthquake victims with radios?

Think now......

Lloyd Davies, N0VFP
BARF/AARA/IARN

Glen Baxter is "ham radio's answer" to Michael Jackson.....

Hal Turner is "US based Shortwave" Radio's answer to 'Ask Dr Phil'.....

(is??) Lloyd Davies is really James lloyd of 9.335 Christianmedianetwork
fame...???

(finally, after seein that 'alleged' pic of Lloyd on the 14313 News Webpage
go here: http://members.aol.com/jcunham/ I am convinced that N0VFP
was either a bowling pin or a Port wine bottle in a previous/earlier
life.....)

Gavin,

I don't suppose you'd have use for recordings made directly from the timecode generators at these stations? It sounds like you're looking for recordings that specifically suffer from the effects of propagation, in which case these won't be of much help, but let me know.

Myke

Yes it is bad, but where is that "brotherly love"??? humm? Guess when I'm
on my own, I've got to fight fire with fire. You better be glad I'm not
sueing them like Glenn Baxter is.

1267. Doughtin or Dalton Hamfest?

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-11 06:00:26 UTC
From: Herb <Lloyd@HerbHereComesHerbie.net>
Message-ID: <b2a3gm$e6p$0@pita.alt.net>
Source record: 69212

Ah yes, it is Frebruary, and 75 meters in the Southeast
is alive with "Doughtin" talk. Yes, we hear Doughtin,
Doughtin, "are ya gone ta Doughtin"? Ya gonna buy
annetin et Doughtin"? Assorted white trash, no code
techs fresh off the CB, ex-cons, druggies, felons, alcoholics,
and all other assorted fruits and nuts. Yes, it is February in
the Southeast and time for the annual trek to "Doughtin."

Oh, in case you are wondering about what all the
"Doughtin" talk is all about? In standard English, it is the
Dalton Hamfest that they are getting all excited about
throughout the Southeast.

For the most part neither do I use those as listed in the first sentence. I am also in the public safety family and sometimes, especially if you are tired, accidentally mixing up the two. This just happened the other day while on the way back from a fire, and I cleared my rig and almost said my ham callsign, but bit my tongue before I got anything more than the K in my callsign out and quickly said instead "1130 clear."
Whhhhhooooopppssss!!! :)

That isn't the issue, JJ. Of course the words "for ID" are not necessary. Nobody has said they are. The issue raised is whether the use of those words are unacceptable - that to do so makes you a CB'er. Several have shown where the FCC requires the callsign, but none has shown anything in the rules that suggests adding those words are wrong. And certainly none have shown any link to CB with the use of those words. Absent that, the premise behind the original message is flat wrong.

I have given one example where those words might be helpful (not necessary, but helpful). Now, can you show anything that is wrong with that?

Dwight Stewart (W5NET)

Do they say that those words cannot be added? The premise of this discussion is that the use of the words "for ID" is UNACEPTABLE - to do so makes you a CB'er. Other than opinion, nobody has offered any evidence to support that premise.

The words "for ID" are common radio slang - no more or less acceptable than any other slang used on the radio. Perhaps you don't use that particular phrase, but that doesn't mean others are wrong because they do.

This sounds almost like the argument about the partial calls.

People who use only their suffix at times.

Yes, there's nothing that says you can or can't do something.

And yes, there are requirements for ID.

But once you meet the requirements for ID, then anything else really
doesn't matter, with one exception.

.
.
.

That exception? Anything that would tend to mislead as to your actual
call, such as someone else's call.

Once I ID legally with my call, there is nothing that says I can't use just
my suffix for 'who I am' in a roundtable. As long as remember to ID
properly once the situation requires it.

And once I ID properly, anything I add at the end, as long as I'm not
trying to disguise or mislead, has no consequence.

If 'for ID' would not be allowed, then what else wouldn't be allowed?

Mike

Will this jerk-off ever learn? He was talking on top of Glenn, just a
little bit ago! I thought ND8V said he was ok with Glenn moving to 14.272?
I guess Mike is such a jerk! Keep messing with K1-MAN! And you will get
your big butt stomped on!

HAHAHAHAHAHAHA!

Here is something else from Glenn:

Email from Glenn-K1MAN- MY ORIGINAL LETTER

Finally, ARRL, in accepting an order from me on line for the Cronkite
video, taking my VISA card information, charging my account ($5 for
the video and $4 for shipping - a total of $9.04 on 21 January 2003),
and then later announcing (ARRL letter 24 January 2003) that ARRL is
now only "taking a list" on line from those wanting the video which is
not yet available, would seem to constitute both criminal fraud as
well as a violation of various other credit card laws.
You should seriously consider getting the hell out of my face and out
of my way! The childish games and dirty tricks are getting very old.

7 February 2003

Christopher D. Imlay, Esq.
Booth, Freret, Imlay, & Tepper
14356 Cape May Road
Silver Spring, Md. 20904-6011

Ronald S. Konecky, Esq.
488 Madison Avenue
New York, New York 10022

Dear Messrs. Imlay and Konecky:

In response to Mr. Imlay's letter to me dated 31 January 2003, copy
attached, I request your offer of proof with regard to an alleged
copyright of the colorful Walter Cronkite Video which ARRL made
available in the public domain for downloading from the internet
(70-MB MPEG video format). Indeed, it would seem that ARRL and Mr.
Cronkite, if REALLY interested in promoting amateur radio to the
general public, as advertised, would WELCOME unlimited copying and
distribution of this general amateur radio promotional piece. If ARRL
and Walter instead intended instead to cause malicious defamation
against K1MAN, however, this would seem to be a logical explanation of
your currently stated and very curious legal positions.
I have made no alterations to this video, of course. I am in no

violation of any copyrights, of course. Period.
Secondly, Mr. Inlay's letter seems to suggest an illegal restraint of trade with regard to buying and then reselling or giving away these videos after purchase from ARRL. I done some checking and, yes, the United States is STILL a free country. Perhaps you gentlemen were sick on the day they taught law at law school? Are you actually being paid by ARRL and Mr. Cronkite? Take my sound Professional Engineering advice, and cheerfully send back their money or else tear up their invoices!
Finally, ARRL, in accepting an order from me on line for the Cronkite video, taking my VISA card information, charging my account ($5 for the video and $4 for shipping - a total of $9.04 on 21 January 2003), and then later announcing (ARRL letter 24 January 2003) that ARRL is now only "taking a list" on line from those wanting the video which is not yet available, would seem to constitute both criminal fraud as

1286. National Negro Tolerance Month

Newsgroup: rec.radio.amateur.misc
Date: 2003-02-11 22:51:47 UTC
From: r75man@aol.com
Message-ID: <20030211175147.18137.00000689@mb-mc.aol.com>
Source record: 69231

FEBRUARY IS NATIONAL NEGRO TOLERANCE MONTH: A PRESIDENTIAL PROCLAMATION ON THE CHANGEABILITY OF COLORED FOLKS
Proclamation by the President

THE PRESIDENT: Colored Americans have played suspiciously conspicuous roles in some of the most whiny and destabilizing moments in our Nation's history. The last time our nation had full employment for colored men was with slavery - and they still complain about it! During National Negro Tolerance Month, we Republicans nevertheless both suppress our contempt and feign respect for their many contributions to our professional sports, tap dancing and common street whore industries. As we celebrate this year's theme, "Standing for the Truth That Negroes Can Change," we remember the successes and challenges of the past year, and we resolve to make a fuss over niggling accomplishments following in the legacy of some our nation's proudest and most convincing negro tolerators, who were kind enough to give negroes a friendly pat on the head and a shiny dime long before folks careful about their personal safety made such dangerous overtures.
Now I realize that my remarks today come fully one third of way through Negro Tolerance Month. Of course that's unusual, because for most National Whatever Months, one of my speechwriters always puts out a little something something a day or two before the month kicks off. But in this case, well - it's just not a very important month to begin with, and to be honest with you, we've been so busy demonizing the stuffing out of foreign SAND negroes, we sort of forgot to pay lip service to the domestic variety of negroes that are underfoot on our very shores.

Download Printable PDF Version But today, as we look forward over the remaining weeks of February, let us not dwell on the past of racial prejudice, let us look forward, and embrace a future where negroes and people alike bask in the healing white glow of enlightenment - a future where the notion of "tolerance" and so-called Black Pride (and all those freaky hairstyles that go with it) will be an anachronism, inasmuch as negroes will have elected to change.
It is with this goal in mind that I am proud to announce that my Faith-Based & Community Initiatives budget for fiscal year 2004 includes no fewer than $350 million dollars to be allocated to the ex-Negro Ministry program established by our good friends at Baptists Invoking God's Old Testament Standards. Yes, the fine folks at B.I.G.O.T.S. have put together a very impressive pamphlet, which - Jesus Christ be willing - America's taxpayers will foot the bill to allow every last do-rag wearing Welfare Queen and Baby Daddy to follow in the glorious footsteps of Michael Jackson, Clarence Thomas, Condoleezza Rice and Colin Powell and renounce all that "but I like being black" nonsense and start acting like the ordinary high-yellow folks in Texas we don't put down like dogs with lethal injection. If enough of you people heed the call of Republican re-education, maybe in this whole "being a Negro" thing will have run its lurid

course in three years and we can free up February to remember something pleasant for a change.
NOW, THEREFORE, I, GEORGE W. BUSH, President of the United Confederate States of America, by virtue of the authority vested in me by the Supreme Court of the United States, do hereby proclaim the remainder of February 2003 as National Negro Tolerance Month.
IN WITNESS WHEREOF, I have hereunto set my hand this ninth day of February, in the year of our Lord Jesus Christ two thousand three, and of the Independence of our nation the two hundred and twentyseventh.

Thanks John,

I just wanted to make sure that "Pending Level 2" wasn't the FCC's name for
the bit-bucket dismissed applications go into before they are dismissed!
For some reason I think it's going to be dismissed anyway.

73,

Jim

John,

Just went to the VanityHQ site you referenced above. From there, I followed
a link to the FCC's website about valid calls, etc. Looks like my
application for KE2XCC probably will be dismissed because it runs afoul of:

"Any 2-by-3 format call sign having the letter X as the first letter of
the suffix"

Oops! Should have performed a bit more due diligence. Unless the FCC has a
heart and says, "Hey, this clown must be a fan of Major E H Armstrong...lets
cut him a break." I doubt it.

Thanks again for the append and the URL.

73,

Jim

Source record: 69089
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment

In your opinion, what's the best miniature QRP CW rig (or kit) sold today?

I'd like to build one for 40-meters. The Electrocraft K1 is a fine radio, but it's way too big. The size of an Altoid tin would be nice, but not necessary.

I could make a wish list with things like a superhet receiver. But I'm willing to sacrifice luxury so long as it's a rock solid performer. 3-watts output would nice too, but there I go wishing again.

I want it to be extremely reliable, well tested, and with good performance and characteristics.

Thanks for your help.

Message-id: <3e4963e7$1_2@corp-goliath.newsgroups.com>

Will this jerk-off ever learn? He was talking on top of Glenn, just a
little bit ago! I thought ND8V said he was ok with Glenn moving to 14.272?
I guess Mike is such a jerk! Keep messing with K1-MAN! And you will get
your big butt stomped on!

HAHAHAHAHAHAHA!

Here is something else from Glenn:

Email from Glenn-K1MAN- MY ORIGINAL LETTER

Finally, ARRL, in accepting an order from me on line for the Cronkite
video, taking my VISA card information, charging my account ($5 for
the video and $4 for shipping - a total of $9.04 on 21 January 2003),
and then later announcing (ARRL letter 24 January 2003) that ARRL is
now only "taking a list" on line from those wanting the video which is
not yet available, would seem to constitute both criminal fraud as
well as a violation of various other credit card laws.
You should seriously consider getting the hell out of my face and out
of my way! The childish games and dirty tricks are getting very old.

7 February 2003

Christopher D. Imlay, Esq.
Booth, Freret, Imlay, & Tepper
14356 Cape May Road
Silver Spring, Md. 20904-6011

Ronald S. Konecky, Esq.
488 Madison Avenue
New York, New York 10022

Dear Messrs. Imlay and Konecky:

In response to Mr. Imlay's letter to me dated 31 January 2003, copy
attached, I request your offer of proof with regard to an alleged
copyright of the colorful Walter Cronkite Video which ARRL made
available in the public domain for downloading from the internet
(70-MB MPEG video format). Indeed, it would seem that ARRL and Mr.
Cronkite, if REALLY interested in promoting amateur radio to the
general public, as advertised, would WELCOME unlimited copying and
distribution of this general amateur radio promotional piece. If ARRL

and Walter instead intended instead to cause malicious defamation against K1MAN, however, this would seem to be a logical explanation of your currently stated and very curious legal positions.
I have made no alterations to this video, of course. I am in no violation of any copyrights, of course. Period.
Secondly, Mr. Inlay's letter seems to suggest an illegal restraint of trade with regard to buying and then reselling or giving away these videos after purchase from ARRL. I done some checking and, yes, the United States is STILL a free country. Perhaps you gentlemen were sick on the day they taught law at law school? Are you actually being paid by ARRL and Mr. Cronkite? Take my sound Professional Engineering advice, and cheerfully send back their money or else tear up their invoices!
Finally, ARRL, in accepting an order from me on line for the Cronkite video, taking my VISA card information, charging my account ($5 for the video and $4 for shipping - a total of $9.04 on 21 January 2003), and then later announcing (ARRL letter 24 January 2003) that ARRL is now only "taking a list" on line from those wanting the video which is not yet available, would seem to constitute both criminal fraud as

I'd guess it's the opposite of a repsot?

I wonder if Mr. Davies has ever been tested for dyslexia(sp?). Lots of his spelling "errors" indicate that this might be the problem.

His local vocational rehabilitation office can test him for *free* and probably arrange some free or very low cost therapy.

Hint hint.

Vocational Rehabilitation Services
Huntsville, AL
Phone:(256)536-6621

All he's gotta do is call that number and ask for the Employee Assistance Program. They'll take it from there.

Hint hint.

1) Hal Turner hates jews and non-whites.
2) Glenn Baxter hates the ARRL.
3) Hal Turner pays for his radio time.
4) Glenn Baxter thinks it's his God-given right.

Any other similarities are purely coincidental.

Source record: 69101
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment

The Wilderness Radio SST -- a superhet single-band rig -- is popular for good reason -- it's a fine rig. I have the 40-meter version of it and am quite pleased with it.
http://www.fix.net/~jparker/wilderness/sst.htm

The S&S Engineering QRP CW rigs are superior pieces of equipment. I have their 40 and 80 meter rigs (separate, single-band rigs) These things are something to behold -- compact and small, but not tiny. MILSPEC board, case, and components. Sharp and sensitive receivers, clean keying. Fully synthesized and unquestionably stable.
http://www.sseng.com/

The RockMite is a 40-meter CW rig that fits in an Altoids box. Single-frequency with a switch that moves the offset so you can operate on two slightly different frequencies. Neat little rig but I would not want to rely on it as my only QRP rig. Its flea power and fixed freq make QSOs hard to come by.

ok,
I can already see where this is leading.

I have some things to say to the "liberty net".
1. they are a bunch of ignorant, wannabe lame-asses with delusions of self importance,
2. anything they may have said regarding the shuttle and the loss of all abord is in very poor taste,
3. One of the folks on board happened to be a neighbor of mine (his family lives less than 2 miles away),
4. anything else I might say would be clouded with grief and loss (and would probably be something I'd regret later).

in any case, I really wish the members of "the liberty net" would just shut up and disappear (this goes for anyone else who has chosen to open mouth before engaging brain!).

sorry I seem so intense. I've been helping out with some traffic passing via irlp and echolink to local reps of nasa, fbi, etc.

The feeding area at Doughtin, err Dalton, always provides
endless free viewing entertainment. Watch 325 lb human hulks,
wrapped in coiled microphone cords from three HTs, as they
quaff down tray after tray of cheese nachos and grease dripping
French fries. The sight of liquid nacho cheese dripping all over
a wrinkled filthy shirt on a smelly unshaven body is free
entertainment at its best. Check out the women they drag along
with them, ugly and fat enough to make one vomit! Later, take
in one of the great technical forums, as discussions of which
radio will "make the trip" better rival engineering discussions at
Georgia Tech. Demonstrations of the "clarifier" on the latest
HF ssb rig are sure to challenge your technical expertise.

Yes, don't miss Doughtin this year!

Did you ever stop to consider that the participants of the Liberty Net have an absolute right to discuss and consider issues, including the issue of the shuttle crash? If it's "in poor taste" for them to discuss the issue, then it's also "in poor taste" for Ted Koppel and Larry King to discuss it, since the media whores are not endowed with any superhuman qualities or rights. At any rate, matters of taste ought not to limit speech on public issues.

Lastly, you should not consider the account from Mr. Carey as an accurate report of what was said on the Net. He obviously has an animus against it.

With every good wish,

I like the statement, "Don't make fun of my webpage - If you can do better, then do so, goofball!"

Heh, I already have. I really don't know if my website sucks, is decent, or is great, but I know it's better than your page, Lloyd. I think if you just lay out the information better and have direct links to the other websites instead of using web archive.org, it would help quite a bit.

PA-SitRep (Pennsylvania Situation Report) is developing
a group of PA-SitRep Contacts, most of whom (44)
are Amateur Radio Operators. We are currently seeking
additional Amateur Radio volunteers.

PA-SitRep Contacts are asked to monitor emergency
situations from their local areas and post emergency
situation reports to the PA-SitRep Discussion e-mail
list which is used, in part, for monitoring developing
emergency situations. If warranted, PA-SitRep
Administrators move the emergency situation reports
to our main emergency alert PA-SitRep list where the
alert is distributed to over 550 subscribers throughout
the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant
enough network of Contacts throughout Pennsylvania in
order to provide timely and accurate emergency situation
reports, free of charge, to those subscribed to our
emergency alert e-mail distribution lists.

In addition to providing the situation reports for our
own emergency alert lists, the eventual long-term goal
of PA-SitRep is to provide rapid emergency situation
reporting service, free of charge, to any interested
served agencies, much in the same way that SKYWARN
provides weather situation reports for the National
Weather Service.

If you're interested in volunteering as a PA-SitRep
Contact, or have any questions regarding PA-SitRep,
please drop me a line at owner@pa-nospamsitrep.com
(remove "nospam" from the address).

Or visit the website to learn more:
http://www.pa-sitrep.com

-David Kleber, KB3FXI
PA-SitRep List Owner and PA-SitRep.com Founder
www.PA-SitRep.com

PA-SitRep website and mail lists are

Talk about "Customer NO SERVICE" !
Purchase two RascalV units based on the reviews here on eham.
Received items and one of the cables would not plug into my Kenwood
870 (13 Pin).
I verified my plug with the plug that shipped with my radio, and it
plugged in correctly.
This was a puzzling problem and I didn't want to damage my rig forcing
this plug into it.
I sent BuxCom and email, and they responded that all they have is a
fax.

I was very upset that they don't want to talk to you on the phone
about problems.
So I replied back to them to call me !

Bux called me back wanting to argue about my email I sent them.
All I wanted to do is talk to someone who could help me with a cable
problem.
How can someone run a business where they take your order via Fax or
Internet.

I apologized for my email even though I didn't feel I was out of line,
but just
to get this guy to calm down to focus on the problem I was ready to do
anything.
This problem could have been resolved by them sending me a replacement
cable.
He said he tested all of his cable, but not this one?

I told him that I was a member of a club that was getting ready to buy
a number of these units.
He replied he didn't care and didn't want to deal with people like me.
Just send it all back.

I posted my review on eHam and while looking through the reviews,
I found someone else that had a similar problem with this company.
All I can say is you get what you pay for.
If you have a problem, good luck with dealing with Bux.
Just fix it yourself.

I have bought three Rascals (one ready-made and two kits) from Buck
and all of them work OK.

The ready-made came with TXD hard keying CW instead of DTR. Buck
fixed it, no questions asked.

He answers all my questions, which I keep few and short. I believe he
gets very busy, so you need to be patient.

You can't expect a 3 credit college course with a $25 kit (or $20, if
you bought during the year-end clearance sale).

These kits cost less than the cables alone run at Radio Shack.

If you were expecting the level of support you get with a K2 or CMOS4
kit, you were a little unrealistic.

One advantage of the rough-hewn approach is you will wind up knowing a
lot more about the subject than when you started -- or if you bought a
$125 Rigblaster.

Lastly, he is fast, honest and his prices are very fair.

I'm trying to determine which is the better radio, the Small Wonders SW+
or Wilderness Radio SST? Does anyone here have an opinion?

They are very similar. Perhaps this is splitting hairs. If you have
built both then I'd like to hear your experience.

Thanks for your help.

Joe, thanks for your input.

I really want to keep it small. So the S&S Ark falls out of that
category. I've narrowed it down to the Small Wonders SW+ or Wilderness
Radio SST, and posted a new thread asking for a comparison.

Can't say anything about Buxcom positive or negative. But if you look
at eham, Buxcom does not have a perfect 5.0 and you should have read the
other complaints or the reasons people dinged him on the rating. Or,
maybe just went ahead and bought an interface from someone that has a
perfect 5.0 rating.

I have bought several (up to three now I believe) interfaces from Donner
Digital Interfaces. He has a perfect 5.0 rating and every interface
worked first time without a hitch.

They are both nice radios. The SST has more limited tuning range since it is VXO. I understand these rigs are used a lot in some of the QRP contests because they can be extremely lightweight and the tuning range limitation is not an issue.

I know at least on 20m, the SST is extremely sensitive. This is good in that it will pick up very tiny signals given good band conditions (such as other SSTs!), but would not be good handling large neighboring signals of a QRO cw contest.
